1805.101 Methods of disseminating information.

For NASA policy regarding paid advertisements, see FAR 5.502 and 1805.502.

Subpart 1805.2—Synopses of Proposed Contracts

1805.201 General.

1805.201–70 Headquarters notification.

A copy of each synopsis of a proposed contract, sent to the Department of Commerce, shall be furnished to the Director of Small and Disadvantaged Business Utilization, NASA Headquarters (Code K).

1805.205 Special situations.

Potential sources which respond to NASA Advance Notices shall be added to the appropriate solicitation mailing list for the subsequent solicitation. Those sources which do not appear on the solicitation mailing lists established in accordance with FAR 14.205–1 shall be requested to submit Standard Form 129, Solicitation Mailing List Application. In those situations where responding sources are on established lists they may be requested to submit amended applications in order to reflect their current capabilities.

1805.207 Preparation and transmittal of synopses.

Within NASA, each notice publicizing procurement of architect-engineer services shall be headed *"R. Architect-Engineer Services."* The project shall be listed with a brief statement concerning the location, scope of service required, the significant evaluation criteria and the relative order of importance the Government attaches thereto, the estimated construction cost range, the construction cost limitation, type of contract proposed, the estimated start and completion dates, and the date by which responses to the notice must be received, including submission of Standard Form 255, Architect-Engineer and Related Services Questionaire for Specific Project, if required. Appropriate statements shall be made concerning any specialized qualifications, security classifications, and limitations on eligibility for consideration. Qualifications or performance data required from architect-engineer firms shall be described. If the procurement is to be set aside for small business, the notice shall so state, indicating the specific size standard to be used and requiring that eligible responding firms

submit a small business certification statement.

"Provisions of Note 62 shall apply to this notice except that in the second paragraph of the note: (a) the 'National Aeronautics and Space Administration' is substituted for the 'Department of Defense' wherever the reference appears, and (b) the third additional consideration listed is changed to read: '(3) past experience, if any, of the firm with respect to performance on contracts with NASA, other Government agencies, and private industry.' "

Subpart 1805.3—Synopses of Contract Awards

1805.302 Preparation and transmittal of synopses of awards.

1805.302-70 Headquarters notification.

The contracting officer shall forward, by mail, one copy of the synopsis of contract award as prepared under FAR 5.302 to the Office of Small and Disadvantaged Business Utilization, NASA Headquarters (Code K) and a copy to the Public Affairs Office of the installation.

1805.303 Announcement of contract awards.

Congressional notification shall be in accordance with 1805.403–70.

1805.303-70 Furnishing additional procurement information to the public.

(a) *Policy.* (1) In addition to publicizing procurements and contract awards in the Commerce Business Daily, it is NASA policy to furnish the public, upon request, through the public affairs office of the NASA installation receiving the request, information on specific current NASA procurements, including—

(i) The names of firms invited to submit bids or proposals;

(ii) The names of firms which attended pre-proposal briefing conferences when held;

(iii) After the date established for receipt of bids or proposals, the names of firms which submitted bids or proposals (but see Subpart 1815.6 regarding requests for information involving offerors participating in negotiations); and

(iv) Contract award information as required to be publicized in the Commerce Business Daily under the provisions of FAR 5.303 and this 1805.303–70.

(2) Exceptions to this policy will be permitted only when the Assistant Administrator for Procurement or the Director of the field installation concerned determines that the disclosure of such information would be prejudicial to the interests of NASA.

(b) *Procedures.* Contracts requiring approval by the Assistant Administrator for Procurement, in accordance with Subpart 1804.72 will not be distributed, nor will any information be given to any source outside of NASA that the contract has been approved, until 24 hours after the Director of Public Affairs and the Assistant Administrator for Legislative Affairs, NASA Headquarters, have been advised that the contract has been consummated.

(c) *Unsuccessful offerors.* For releasing information to unsuccessful offerors, see FAR 14.408 and FAR Subpart 15.10.

1805.303-71 Notification of the Public Affairs Office.

(a) *Letter contracts.* (1) The procedures for issuing and approving letter contracts are contained in FAR 16.603 and 1816.603. Prior to transmittal of a letter contract to a contractor for signature, the Procurement Officer will furnish to the Installation Public Affairs Office the following information:

(i) Whether the letter contract initiates a new contract or additional work or services under an existing contract.

(ii) Dollar amount authorized for letter contract and estimated total cost of the contract or supplemental agreement.

(iii) Name and address of the contractor.

(iv) Location where the work is to be performed.

(v) Brief description of the work, including identification of the program and project.

(vi) For the purpose only of responding to queries, a list of the unsuccessful offerors and addresses.

(2) Upon receipt of the information described in paragraph (a)(1) above, the Installation Public Affairs Office will transmit the information immediately, in the form of a news release, by priority TWX or more expeditious means (if appropriate), to the Director, Public Affairs Division, and the Director of Legislative Affairs, NASA Headquarters. The information will not be otherwise released by the Installation Public Affairs Office, nor will the letter contract be released before 2:30 p.m. Washington, DC time of the next working day, unless clearance has been received earlier from the office of the Director, Public Affairs Division. If individual circumstances clearly indicate a need for earlier action, exception must be obtained from the Assistant Administrator for Procurement.

(b) *Definitive contracts and supplemental agreements.* (1) This subparagraph pertains to contracts and supplemental agreements which do not require the approval of the Assistant Administrator for Procurement pursuant to 1804.7205 and are in an amount of $5,000,000 or over, exclusive of supplemental agreements covering overruns or incremental funding actions. Such contracts and supplemental agreements will not be distributed, nor information be given to any source outside NASA that the contractural instrument has been signed by both parties, until the following procedures are carried out:

(i) The Procurement Officer will furnish to the Installation Public Affairs Office the following information:

(A) Whether the contract initiates a new contract or additional work or services under an existing contract;

(B) Type of contract;

(C) Dollar amount authorized for the instant action and estimated total cost of the contract if this is different;

(D) Name and address of the contractor;

(E) Location where the work is to be performed;

(F) Brief description of the work, including identification of the program and project; and

(G) For the purpose only of responding to queries, a list of the unsuccessful offerors and addresses.

(ii) Upon receipt of the above information, the Installation Public Affairs Office will immediately prepare a news release in the form of a priority TWX which will contain as a minimum the information in paragraph (b)(1)(i) above, and transmit it to the Director, Public Affairs Division, and the Director of Legislative Affairs, NASA Headquarters. The information will not be otherwise released by the Installation Public Affairs Office, nor will the contract instrument be released before 2:30 p.m. Washington, DC time of the next working day, unless clearance has been received earlier from the office of the Director, Public Affairs Division. If individual circumstances clearly indicate a need for earlier action, exception must be obtained from the Assistant Administrator for Procurement.

(2) Contracts and supplemental agreement which require the approval of the Assistant Administrator for Procurement pursuant to 1804.7205 will be accompanied, when forwarded for such approval, by a draft news release prepared by the Installation Public Affairs Office and furnished to the contracting office for inclusion in the submission file. The news release will contain as a minimum the information required by paragraph (b)(1)(i) above. At the time the contract or supplemental

agreement is approved by the Assistant Administrator for Procurement, the news release will be forwarded inmediately to the Director, Public Affairs Division and the Director of Legislative Affairs.

Subpart 1805.4—Release of Information

1805.401 General.

Release of information to the Small Business Administration shall be in accordance with FAR 19.402(b).

1805.402 General public.

Requests from the general public for specific information will be processed in accordance with 1805.303–70.

1805.403 Requests from Members of Congress.

1805.403–70 Headquarters approval and release.

The proposed reply, with full documentation, will be promptly prepared and forwarded by the most expeditious means to the Assistant Administrator for Legislative Affairs, NASA Headquarters, for approval and release. (See 1805.303–70.)

Subpart 1805.5—Paid Advertisements

1805.502 Authority.

Use of paid advertisements for procurement purposes is not authorized in NASA.

SUBCHAPTER B—ACQUISITION PLANNING

PART 1807—ACQUISITION PLANNING

Subpart 1807.1—Acquisition Plans

Sec.

1807.101 Definitions.
1807.102 Policy.
1807.103 Agency-head responsibilities.
1807.170 Contents of the procurement plan.
1807.170–1 Procurement plans requiring approval by NASA Headquarters.
1807.170–2 Procurement plans requiring approval by the Procurement Officer.
1807.170–3 Assistance in providing for reliability assurance in procurement plans.

Subpart 1807.3—Contractor Versus Government Performance

1807.303 Determining availability of private commercial sources.
1807.307 Appeals.

Subpart 1807.70—Reserved

Subpart 1807.71—Master Buy Plan Procedure

1807.7100 Scope of Subpart.
1807.7101 Policy.
1807.7102 Applicability.
1807.7103 Submission, selection, and notification preoedure.
1807.7103–1 Submission of Master Buy Plan.
1807.7103–2 Submission of amendment to the Master Buy Plan.
1807.7103–3 Selection and notification procedures.
1807.7104 Procedures for procurements selected for Headquarters review and approval.
1807.7105 Procedures for procurements not selected for Headquarters review and approval.
1807.7106 Format of Master Buy Plan.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1807.1—Acquisition Plans

1807.101 Definitions.

"Procurement plan" means a detailed outline of the method by which the contracting officer expects to accomplish the procurement task. The plan is an administrative tool designed to enable the contracting officer to plan effectively for the placement and accomplishment of assigned procurements by analyzing the requirement for, and determining the method to be used in, placing the procurement. It also furnishes justification for the contemplated method of procurement for use in connection with the review and approval of higher authority when applicable.

1807.102 Policy.

NASA uses several methods to document its acquisition planning. These include the Project Approval Document (PAD), Project Plan, Program Operation Plan (POP), normal budget submissions, and procurement plan. The procurement plan is the only one of these coordinated documents that is a direct procurement responsibility. Instructions and requirements for completing the other documents are in various NMI's. The thresholds and requirements for NASA procurement plans are at 1807.103 below. As authorized in FAR 7.102, NASA will continue to use its existing procurement planning system in lieu of the criteria in FAR Subpart 7.1.

1807.103 Agency-head responsibilities.

(a) *Requirement for preparation of procurement plans.* (1) Except as otherwise authorized by paragraph (a)(2) below, the contracting officer shall prepare a procurement plan, with the advice and assistance of the cognizant technical division, on each negotiated procurement estimated to exceed the dollar amount set forth below for the installation concerned. Such plans shall be prepared prior to solicitation of proposals. Field installations may require the preparation of a procurement plan for negotiated procurements that are not anticipated to exceed the dollar amount established for the particular installation:

(i) $250,000 for—

(A) Headquarters Contracts and Grants Division.

(B) NASA Resident Office—JPL.

(C) National Space Technology Laboratories.

(ii) $500,000 for—

(A) Ames Research Center.

(B) Goddard Space Flight Center.

(C) Johnson Space Center.

(D) Kennedy Space Center.

(E) Langley Research Center.

(F) Lewis Research Center.

(G) Marshall Space Flight Center.

(2) Procurement plans are not required to be prepared for procurements—

(i) Of architect-engineer services;

(ii) Based on unsolicited proposals;

(iii) Of basic research from nonprofit organizations;

(iv) Of utility services where the services are available from only one source:

(v) Made from or through other government agencies;

(vi) Of industrial facilities required in support of related procurement contracts; and

(vii) Of flight payloads and investigations where selection is made pursuant to NHB 8030.6, Guidelines for Acquisition of Investigations.

(b) *Approval of procurement plans.* (1) Whenever the estimated cost of the procurement (including the aggregate amount of follow-on contracts) meets the thresholds below, procurement plans, shall, as a minimum, be reviewed and approved as follows:

(i) For procurements in excess of the dollar amount in 1807.103(a)(1) above, but less than the dollar amount below for the installation concerned, the procurement plan shall be submitted for the approval of the Procurement Officer or designee after review and written concurrence by the head of the cognizant technical division or laboratory, as applicable. (For the purpose of this requirement, the term "or designee" shall mean the individual authorized by the Procurement Officer to sign the procurement plan. Such authorization shall be in writing and shall not be delegated to more than one individual.)

(A) $1,250,000 for —

(*1*) National Space Technology Laboratories.

(*2*) Headquarters Contracts and Grants Division.

(*3*) NASA Resident Office—JPL.

(*B*) $2,500,000 for—

(*1*) Ames Research Center.

(*2*) Goddard Space Flight Center.

(*3*) Johnson Space Center.

(4) Kennedy Space Center.
(5) Langley Research Center.
(6) Lewis Research Center.
(7) Marshall Space Flight Center.

(ii) For procurements within the range of the dollar amounts below for the installation concerned, the procurement plan shall be submitted for the approval of the Head of the Installation, Deputy Installation Head, or Associate Director (the title "Associate Director" means a full Associate Director and not an Associate Director for * * *) after review and written concurrences by the Director or Assistant Director of the cognizant technical directorate, cognizant Program Manager, or cognizant staff official, as applicable, who reports directly to the Head of the Installation, and by the Procurement Officer.

(A) $1,250,000 but less than $2,500,000 for—

(1) National Space Technology Laboratories.
(2) Headquarters Contracts and Grants Division.
(3) NASA Resident Office—JPL.

(B) $2,500,000 but less than $5,000,000 for—

(1) Ames Research Center.
(2) Goddard Space Flight Center.
(3) Johnson Space Center.
(4) Kennedy Space Center.
(5) Langley Research Center.
(6) Lewis Research Center.
(7) Marshall Space Flight Center.

(iii) For procurements that are selected for Headquarters review and approval in accordance with the Master Buy Plan Procedure, the procurement plan shall be submitted for the signature of the Head of the Installation after review and written concurrences by the Director or Assistant Director of the cognizant technical directorate, cognizant Program/Project Manager, or cognizant staff official, as applicable, who reports directly to the Head of the Installation, and by the Procurement Officer. The procurement plan shall contain additional signature blocks for approval by the Assistant Administrator for Procurement and for concurrences by cognizant Officials-in-Charge of Headquarters offices. The procurement plan shall be submitted to the Assistant Administrator for Procurement (Code H) for coordination of the Headquarters review and approval process. The original and ten copies shall be submitted. The position title will be shown for each individual signing the procurement plan as required by paragraph (b)(1) (i) through (iii) above.

(2) Examples of what is meant by the phrase "including the aggregate amount of follow-on contracts" appearing in paragraph (b)(1) above are—

(i) Options as defined in FAR Subpart 17.2;

(ii) Agreements-to-agree, wherein the parties agree to negotiate for the extension of the supplies or services being procured; and

(iii) Later phases of the same project.

(3) Approval of a procurement plan does not constitute approval of any deviation or special conditions or clauses which may be required. Any such deviations must be submitted for review and approval under FAR Subpart 1.4 and/or 1801.4.

1807.170 Contents of the procurement plan.

1807.170-1 Procurement plans requiring approval by NASA Headquarters.

(a) Each procurement plan prepared for approval by NASA Headquarters shall be prepared on NASA Forms 1451 and 1452 or on a Headquarters-approved Optional Free Form for those installations that use automated equipment to prepare their procurement plans. Use of either the NASA forms or the Optional Free Form is authorized for preparing procurement plans to be approved by the Head of the Installation. Form 1451, Request for Procurement Plan Approval (see 1853.207-1451), shall be completed as follows:

(1) *Item 1. A descriptive short title.* In this item, include only a descriptive short title of the procurement plan. A Detailed Description of the Proposed Procurement will be attached to the Plan as Tab A. The information to be provided will consist of—

(i) A clear and concise description, including intended use, of the item or service to be procured;

(ii) Number of units, delivery schedule, and/or period of performance (Note: In the event a schedule of major events will enhance the plan, it should also be included);

(iii) An identification of any option provision including the period(s) covered and estimated costs thereof;

(iv) A brief discussion of the relationship between the proposed procurement and NMI 7121.1, Planning and Approval of Major Research and Development Projects; and

(v) A statement as to whether the contractor will be required to comply with detailed specifications, meet performance requirements, perform a mission, or furnish a level of effort.

(2) *Item 2. Name of installation.* Indicate the name of the installation responsible for the procurement.

(3) *Item 3. Plan prepared by.* Indicate the name of the individual who prepared the plan.

(4) *Item 4. Date.* Date the plan is prepared.

(5) *Item 5. Responsible technical office.* Identify the office (by title) that will be responsible for technical monitoring of the contract.

(6) *Item 6. Project Approval Document (PAD) citation and date.* Enter PAD title, number and date of project approval, and name and title of approving authority. If the required PAD, or PAD Change Request, is in process but has not been approved, enter all information except the date.

(7) *Item 7. Total estimated cost of this procurement.* Provide one figure for the total estimated cost of the proposed procurement, including options, if any. When options are involved, show the cost for each option separately in the description (Tab A), as a breakout from total cost.

(8) *Item 8. Separate approvals required.* Indicate by checkmark in each box whether separate approvals will be required for items 8.a. through 8.i. in support of the proposed procurement. Any determinations and findings requiring the approval of the Administrator under 10 U.S.C. 2304 (a)(11) through (a)(16), Justification for Noncompetitive Procurement, and Source Evaluation Board Appointment Letter (NHB 5103.6, Chapter 3, Source Evaluation Board Manual) will be attached to the procurement plan forwarded for approval. All other documents checked under Item 8 should be processed separately for approval.

(9) *Item 9. Proposed funding by fiscal year and project.* Identify the funding amounts by appropriation, fiscal year, and project, for the procurement covered by the plan. Where funding is obtained from multiple projects, provide a complete identification of each fund source.

(10) *Item 10. Competitive or noncompetitive.* If competitive, check box. If noncompetitive, indicate the name of the source in the space provided under Item 10.c.

(11) *Item 11. Type of contract.* State the type of contract recommended for the procurement. Under Tab B, Remarks, discuss the type of contract and the rationale for its selection. Where an incentive-type contract is proposed, discuss the type of incentive provision considered most suitable for the accomplishment of the procurement objectives.

(12) *Item 12. Facilities and Government-furnished property.* Indicate, by checking the appropriate box, whether the procurement will require the providing of any existing, new, or modified Government property.

When other Government property is to be provided, identify the item(s) and dollar amount(s) involved. The dollar amount(s) provided in Item 12 will not be included in the dollar amounts specified under Items 7 and 9 of the form unless the property or facilities specified are part of the procurement. If dollar amounts under Item 12 are included under Items 7 and 9, the amounts should be so annotated under this item in Tab B, Remarks.

(13) *Item 13. Procurement action schedule.* Indicate the date the procurement plan was submitted to Headquarters for review and approval. For all other entries, provide only the number of calendar days required to complete the action (beginning at the time the previous action was completed) in order to meet the program schedule.

(b) *Tab B, Remarks.* (1) *General.* Include any comments required by the above instructions not covered elsewhere and any other information considered essential to amplify or clarify any item on the form. In addition—

(i) Identify specific deviation(s) to the Acquisition Regulation if a deviation was indicated in Item 8;

(ii) Identify any special conditions or clauses required;

(iii) Identify the type of D&F used if other than 10 U.S.C. 2304 (a)(11) through (a)(16);

(iv) Include a copy of any comments by Counsel for the contracting office (or a statement that Counsel has no objection to the plan) and describe the actions taken in response to any such comments; and

(v) Discuss considerations given as to small business, including minority business enterprises, participation.

(2) *Relationship to other procurements, relevant data, and studies.* Discuss the relationship of this procurement to any other active contracts, including the status of completion of each such contract. Identify the extent to which the product of related contracts will affect this procurement and indicate whether performance under related, active contracts should be permitted to continue during the competitive phase of this action, where appropriate. Discuss all relevant data and studies, whether obtained under contract or through in-house efforts, and state whether such data and studies will be made available to all offerors participating in the competition. If data or studies are available, but it is not planned to make them available to prospective offerors, discuss the reasons for not doing so.

1807.170–2 Procurement plans requiring approval by the Procurement Officer.

Procurement plans prepared for the approval of the Procurement Officer are not subject to the requirement set forth in 1807.170–1 above. Such plans may be prepared in accordance with the procedures prescribed by each installation, provided, that each plan shall contain, as a minimum, the following information:

(a) Purpose and description of the proposed procurement.

(b) Program and project titles.

(c) Responsible technical office.

(d) Delivery schedule or period of performance.

(e) Estimated dollar amount of the procurement and funding data.

(f) Sources to be solicited and reasons for omission of other known sources, if any.

(g) Synopsis or explanation of exception.

(h) Justification for noncompetitive procurement (may be referenced in and attached to the plan).

(i) Determination and findings authorizing negotiation (may be referenced in and attached to the plan).

(j) Type of contract contemplated and, if not firm fixed-price, rationale therefor.

(k) Determination and findings for method of contracting (may be referenced in and attached to the plan).

(l) Incentive consideration, unless firm fixed-price contract is contemplated.

(m) Considerations as to small business, including minority business enterprises, participation.

(n) Government property description, monetary evaluation, and basis for requirement.

(o) Precontract costs, if any.

(p) Management information systems, if appropriate.

(q) Reliability and quality assurance, if appropriate.

(r) Technical data for reprocurement.

(s) Procurement action schedule.

1807.170–3 Assistance in providing for reliability assurance in procurement plans.

When system hardware costing over $1,000,000 is involved, reliability personnel at the field installation involved shall assist in the preparation of the procurement plan with respect to arrangements to be made for reliability monitoring. In the absence of such reliability personnel, the field installation shall seek the advice and assistance of the Director, Safety Reliability and Quality Assurance, NASA Headquarters, Code DP, or designee, in the preparation of procurement plans.

Subpart 1807.3—Contractor Versus Government Performance

1807.303 Determining availability of private commercial sources.

NASA procedures for periodic inventories and reviews of commercial and industrial activities are contained in NMI 7410.3, Delegation of Authority for Acquisition of Commercial or Industrial Products or Services for NASA's Use.

1807.307 Appeals.

NASA appeals procedures are contained in NMI 7410.3.

Subpart 1807.71—Master Buy Plan Procedure

1807.7100 Scope of subpart.

This Subpart prescribes the Master Buy Plan Procedure, contains the requirements for furnishing advance information to NASA Headquarters on proposed procurements that meet the criteria in this Subpart, and prescribes the procedures for selecting those procurements that are to be subject to NASA Headquarters review and approval and those that are to be processed at the installation level. This Subpart also prescribes the approval requirements for those procurements that are to be processed at the installation level.

1807.7101 Policy.

The Master Buy Plan Procedure is designed to enable management to focus its attention on a representative selection of high dollar value and otherwise sensitive procurement actions without compromise of Headquarters visibility or control over essential management functions. This procedure is expected to—

(a) Reduce the number of procurement actions requiring Headquarters review and approval;

(b) Permit better visibility of those procurement actions to be submitted to Headquarters;

(c) Permit better planning of workload and better use of personnel resources at both Headquarters and installation levels;

(d) Shorten the procurement review and approval cycle at Headquarters; and

(e) Increase the delegation of procurement responsibility and authority to each installation.

1807.7102 Applicability.

(a) The Master Buy Plan Procedure is applicable to each negotiated procurement, when the expected dollar value of that procurement, or aggregate amount of follow-on procurements (see

1807.103(b)(2)), is expected to equal or exceed the dollar value in paragraph (c) below, for the installation making the award, except that this procedure is applicable to—

(1) Procurement of utility services when an area-wide contract is not used and either—

(i) The annual cost of the services to be procured is estimated by the using installation, at the time of the initiation of the service or annual renewal of the expenditure, to exceed $100,000; or

(ii) When, except for communication services, a proposed connection charge, termination liability, or any other facilities charge to be paid (whether or not refundable) is estimated to exceed $25,000;

(2) Procurement of architect-engineer services when—

(i) The total dollar value is $250,000 or more; or

(ii) The work to be performed under a cost-plus-fixed-fee or fixed-price contract, regardless of the dollar amount, which involves the production and delivery of designs, plans, drawings, and specifications, and the fee inclusive of the architect-engineer's cost, to be paid to the architect-engineer for the performance of such services exceeds 6% of the estimated cost of the related construction project, exclusive of the amount of such fee (see FAR 15.903(d));

(3) Procurements which provide facilities having a total acquisition value exceeding $500,000, or provide real property regardless of amount (see 1845.302–1); and

(4) Leases, and extensions thereto, for the rental of real property by the Government where the annual rental is more than $50,000 or where a Certificate of Necessity under 40 U.S.C. 278b is required.

(b) Information on the above listed procurements is required to be submitted to NASA Headquarters in accordance with 1807.7103 for determination as to which individual procurement actions are to be submitted to NASA Headquarters for review and approval and which ones are to be approved at the installation level. These individual procurement actions may include one or more of the following: procurement plans, requests for proposals, justifications for noncompetitive procurements, source evaluation board appointments and source selections, prenegotiation positions, contracts (including supplemental agreements) and leases (see 1807.7106).

(c) The following are monetary limitations on Master Buy Plan Procedure:

(1) *$12,500,000:*

(A) National Space Technology Laboratories

(B) Headquarters Contracts and Grants Division

(C) NASA Resident Office-JPL

(2) *$5,000,000:*

(A) Ames Research Center

(B) Goddard Space Flight Center

(C) Johnson Space Center

(D) Kennedy Space Center

(E) Langley Research Center

(F) Lewis Research Center

(G) Marshall Space Flight Center

(d) The foregoing monetary limitations also apply to the following types of contracts:

(1) A contract which contains an option provision (including those authorized by FAR Subpart 17.2), or an agreement-to-agree provision, when the total dollar value, including the option(s) or agreement(s)-to-agree, equals or exceeds the dollar value in paragraph (a) above, for the installation awarding the initial contract.

(2) A supplemental agreement (except one which provides only for the addition or deletion of funds for incremental funding purposes) which—

(i) Definitizes either one or more debit change orders or one or more credit change orders when the total dollar value of either the debit change order(s) or credit change order(s) equals or exceeds the dollar value in paragraph (a) above for the installation making the award;

(ii) Definitizes and consolidates one or more debit and one or more credit change orders when the total dollar value of either the debit change order(s) or credit change order(s) before consolidation equals or exceeds the dollar value in paragraph (a) above, for the installation making the award; or

(iii) Adds new work and definitizes and consolidates one or more debit and one or more credit change orders when the total dollar value of either (A) the new work and debit change order(s), or (B) the new work and the credit change order(s) equals or exceeds the dollar value in paragraph (a) above, for the installation making the award.

(e) The Master Buy Plan Procedure does not apply to supplemental agreements which extend contract performance pursuant to agreement(s)-to-agree provisions, where the initial contract was approved by the Assistant Administrator for Procurement. However, where the supplemental agreement provides for a substantive change in the contract, e.g., expanded statement of work, substantial increase in contract value, etc., the Master Buy Plan Procedure will apply. Approval of such supplemental agreements may be specifically required by the Assistant Administrator for Procurement.

(f) The Master Buy Plan Procedure is not applicable to termination settlement agreements (see FAR Part 49).

1807.7103 Submission, selection, and notification procedure.

1807.7103–1 Submission of Master Buy Plan.

Prior to July 15th of every year, each installation will submit to the Assistant Administrator for Procurement (Code HS–1) a Master Buy Plan (original and eight copies) for the next fiscal year, listing therein every known procurement that meets the criteria in 1807.7102, and that (a) is expected to be initiated in that fiscal year and (b) has not been included in a previous Master Buy Plan or amendment to a Master Buy Plan. If applicable, the plan will include procurements that are for later phases of the same project (see 1807.103(b)(2)). The plans will be prepared in accordance with the format shown in 1807.7106, and, for every procurement listed therein, an identification will be provided as to the individual procurement documents that are involved (1807.7104). Procurement documents that require Headquarters approval (see 1807.7104) will be held in abeyance until receipt of the notification required by 1807.7103 (a) or (b). This is not to preclude the planning for or initiation of such actions up to that point where Headquarters approval may be required. The fiscal year Master Buy Plan shall include a listing of those procurements that were selected for Headquarters review and approval from prior fiscal year(s) Master Buy Plans and amendments to Master Buy Plans that have not been completed. The procurements should be listed by the appropriate fiscal year Master Buy Plan and should show the current status of the individual procurement documents previously selected for Headquarters review and approval.

1807.7103–2 Submission of amendments to the Master Buy Plan.

Procurements identified by installations after submission of their Master Buy Plan for a fiscal year, which meet one of the criteria in 1807.7102, will be submitted to Headquarters in the same manner as the original Master Buy Plan. Such amendments will be submitted sufficiently in advance of contract award date to allow Headquarters to select those procurement documents which will be subject to Headquarters review and approval without creating an unacceptable delay in contract

placement. When timely submittal is not possible, the installation will provide with the amendment a narrative explaining the circumstances leading to the late submittal.

1807.7103–3 Selection and notification procedures.

(a) *Selection of procurements.* Selection of procurements from the Master Buy Plan and amendments of Master Buy Plans to receive Headquarters review and approval and designation of the Source Selection Officials and the officials to whom the justifications for noncompetitive procurements are to be submitted for approval shall be made by the Assistant Administrator for Procurement with the concurrence of the cognizant officials-in-charge of Headquarters offices.

(b) *Notification when procurement is cancelled, superseded, deferred, or no longer requires Headquarters approval.* In the event a selected procurement, subsequent to its selection, is cancelled, superseded, or deferred, or no longer requires Headquarters approval in accordance with the criteria in 1807.7102, the Assistant Administrator for Procurement will be so advised, together with the reasons therefor. The Assistant Adminstrator for Procurement, with the concurrence of the cognizant officials-in-charge of Headquarters offices, will notify the installation in writing of any further action which may be required.

1807.7104 Procedures for procurements selected for Headquarters review and approval.

For those procurements which have been selected for Headquarters review and approval under this procedure, the cognizant installation will ensure that all documents that require Headquarters review and approval are submitted in accordance with established procedures. Such documents may include one or more of the following: procurement plans (1807.103), request for proposals, justifications for noncompetitive procurements (1815.105–70), source evaluation board appointments, and source selections (see NHB 5103.6A, Source Evaluation Board Manual), prenegotiation positions, contracts (including supplemental agreements), and leases (1807.7106).

1807.7105 Procedures for procurements not selected for Headquarters review and approval.

(a) Procurements which are not selected for Headquarters review and approval shall be processed at the installation level. For such procurements, the following documents, to the extent applicable, shall be approved by the Head of the Installation: procurement plans, justifications for noncompetitive procurements, and prenegotiation positions. If the procurement is subject to the Source Evaluation Board Manual, the Head of the Installation shall sign the source evaluation board appointment letter and shall be the Source Selection Official. If the procurement is between $2,500,000 and $5,000,000 and the installation's Master Buy Plan limitation is $2,500,000, the Head of Installation shall be the Source Selection Official and may redelegate this authority to cognizant management officials. The Head of the Installation may redelegate the authority to approve procurement plans and justifications for noncompetitive procurements and to sign source evaluation board appointment letters to the Installation's Deputy or an Associate Director (the title "Associate Director" means a full Associate Director and not an Associate Director for * * *). The Head of the Installation may redelegate the authority to approve prenegotiation positions to the level of the Procurement Officer. If the procurement is subject to the Source Evaluation Board Manual, the request for proposals shall be reviewed and approved in accordance with paragraph 403 of that manual. In all other procurements, requests for proposals shall be approved as directed by the Procurement Officer, commensurate with the sensitivity or significance of the procurements. Contracts (including supplemental agreements) and leases that are not selected for Headquarters review and approval under the Master Buy Plan Procedure, shall be subject to approval by the Procurement Officer. The signing of those documents by the Procurement Officer, as the contracting officer, constitutes such approval. The approvals required above may not be redelegated.

(b) Procurements authorized to be processed at the installation level will be subject to after-the-fact reviews by Headquarters personnel during normal procurement surveys or as the situation may otherwise indicate, or through special reviews.

1807.7106 Format of Master Buy Plan.

In accordance with the requirements of 1807.7103–1 and 1807.7103–2, Master Buy Plans and amendments to Master Buy Plans will be prepared in the format below:

Installation:..... Date:.....

Cognizant HDQ Program Office (1)	Descriptive Title of Procurement (2)	Estimated Dollar Value	Proc Plan	RFP	JNCP (3)	SEB	Pre-Neg	Contract Award	Current Status (4)	Remarks (5)

FY19 Documents Selected for Headquarters Review and Approval Not Yet Completed (6)

(1) Include 3 digit Unique Project Number (UPN) as listed in FMM 9130.
(2) Include N or FO to indicate new or follow-on procurement.
(3) Include name of firm under Remarks.
(4) Indicate current status and scheduled date for next event.
(5) Include data considered pertinent by installation and indicate expected date for placement of contract.
(6) List procurements from prior fiscal year(s) Master Buy Plans and amendments to Master Buy Plans that have not been completed (20.5103.1).

(Form should be prepared on legal size paper. Use separate sheets as necessary.)

PART 1808—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Sec.

1808.002 Use of other Government supply sources.
1808.002–70 Procurement of materials from Surplus, Strategic, and Critical Materials Stockpile.
1808.002–71 Acquisition of helium.
1808.002–72 Acquisition of radioisotopes.
1808.002–73 Acquisition of liquid hydrogen.
1808.002–74 Acquisition of propellants.
1808.002–75 Acquisition of mercury.

Subpart 1808.1—Excess Personal Property

1808.103 Information on available excess personal property.

Subpart 1808.3—Acquisition of Utility Services

1808.301 Definitions.
1808.302 Applicability.
1808.303 General.
1808.304 Acquiring utility services.
1808.304–2 GSA areawide contracts.
1808.304–4 Consolidated purchase, joint use, or cross-service.
1808.304–5 Agency acquisition.
1808.304–570 Renewal of contracts.
1808.304–571 Headquarters requirements for copies of contracts.
1808.304–572 Contents of a negotiated utility service contract.
1808.305 Rate increases.
1808.307 Precontract acquisition reviews.
1808.307–70 Utility service narrative.
1808.307–71 Contracts requiring Headquarters' approval.
1808.309 Contract clauses.

Subpart 1808.4—Ordering From Federal Supply Schedules

1808.404 Using schedules.
1808.404–3 Requests for waivers.
1808.405 Ordering office responsibilities.
1808.405–1 Ordering from multiple-award schedules.
1808.405–2 Order placement.

Subpart 1808.6—Acquisition From Federal Prison Industries, Inc.

1808.605 Clearances.

Subpart 1808.7—Acquisition From the Blind and Other Severely Handicapped

1808.705 Procedures.
1808.705–1 General.
1808.705–4 Compliance with orders.
1808.711 Quality complaints.

Subpart 1808.8—Acquisition of Printing and Related Supplies

1808.802 Policy.

Subpart 1808.11—Leasing of Motor Vehicles

1808.1100 Scope of subpart.

Authority: 42 U.S.C. 2473(c)(1).

1808.002 Use of other Government supply sources.

1808.002–70 Procurement of materials from Surplus, Strategic, and Critical Materials Stockpile.

(a) The General Services Administration has responsibility for the disposition of strategic and critical materials which are in excess of national stockpile requirements. These materials are primarily metals, ores, chemicals, and similar raw material items and are listed and described in a GSA bulletin disseminated periodically to procurement officers.

(b) Prior to initiating procurements of materials which are listed as being available for transfer from the General Services Administration, the contracting office should screen the list to determine whether the requirement may be met through transfer of materials from the GSA. Due consideration should be given to the quantity, quality and location of the material and to the timeliness of its availability. Detailed information on these excess materials is available from the General Services Administration, Office of Stockpile Management, Room 5028, 18th & F Streets, NW., Washington, DC 20405.

1808.002–71 Acquisition of helium.

(a) NASA is required under the provisions of Pub. L. 86–777 (50 U.S.C. 167a et seq.) to obtain its major requirements for helium from the Department of the Interior.

(b) Each contracting office shall obtain its requirements for gaseous helium from the Department of the Interior (Bureau of Mines) or other Government support activity supplying Bureau of Mines helium.

(c) Requirements for (1) liquid helium or (2) gaseous helium of a quality not supplied by the Bureau of Mines may be procured from commercial sources, provided such sources are qualified by the Bureau of Mines and included in the Bureau of Mines publication, "List by Shipping Points of Private Distributors Eligible to Sell Helium to Federal Agencies." Copies of this publication may be obtained from Bureau of Mines, Helium Operation, P.O. Box H4372, Herring Plaza, Amarillo, Texas 79101.

(d) Procurement documents for the commercial procurement of helium shall be annotated:

> Pursuant to Parts 1 and 2, Subchapter A, Chapter 1, Title 30, Code of Federal Regulations, helium furnished under this contract (purchase order) shall be Bureau of Mines helium or shall be replaced by the supplier with an equivalent volume of helium purchased from the Bureau of Mines.

(e) A copy of each contract or purchase order for the supply of helium from commercial sources shall be forwarded to the Bureau of Mines, at the address in paragraph (c) above.

1808.002–72 Acquisition of radioisotopes.

(a) DOE Form EV 375, U.S. Department of Energy Isotope Order Blank, and NRC Form 313I, U.S. Nuclear Regulatory Commission Application for Byproduct Material License, shall be used for the acquisition of radioisotopes as stated on the back of DOE Form EV 375. No other type of order blank, purchase order, or contract shall be used in lieu of these forms.

(b) NRC Form 313I shall be filed with the Chief, Radioisotopes Licensing Branch, Division of Fuel Cycle and Material Safety, United States Nuclear Regulatory Commission, Washington, DC 20555. If the application meets all regulatory requirements and applicable standards, a license will be issued to the applicant by the Radioisotopes Licensing Branch, Nuclear Regulatory Commission. After receipt of the license, a complete DOE Form EV 375 (in duplicate, if the contracting office wants an accepted copy of the form back from the supplier), the license, and a Government bill of lading shall be sent to the appropriate DOE laboratory. If a bill of lading is not furnished, shipment shall be made collect on a commercial bill of lading, to be converted at destination.

(c) The "Terms and Conditions" on DOE Form EV 375 shall control all requisitions for radioisotopes purchased by NASA from Department of Energy Laboratories.

(d) NRC Form 313 and DOE Form EV 375 shall be requisitioned directly from: United States Nuclear Regulatory Commission, Attn: Radioisotopes Licensing Branch, Division of Fuel Cycle and Material Safety, Washington, DC 20555.

1808.002–73 Acquisition of liquid hydrogen.

(a) To ensure that adequate supplies of liquid hydrogen are readily available to meet current and future program requirements, NASA has established contractual arrangements with primary supply sources located in Louisiana and in California. These contracts will be used to the maximum extent practicable in supplying both in-house and contractor requirements for liquid hydrogen.

(b) Requests for liquid hydrogen shall be submitted to the Marshall Space Flight Center.

1808.002–74 Acquisition of propellants.

(a) *General.* The Department of the Air Force has assigned the operational authority and responsibility for the acquisition and distribution of missile propellants and related items to the San Antonio Air Logistics Center (SA–ALC), Kelly Air Force Base, Texas. Propellants (i.e., oxidizers and fuels), pressurants, and related materials are financed under a single Air Force appropriation designated the Missile Procurement Fund (MPF). Supplies are obtained by SA–ALC from Government-owned, contractor-operated plants and by consolidated acquisitions from industry. NASA and its contractors (where materials are Government-furnished) may acquire from SA–ALC the items listed in 1808.002–74(j) (except for liquid hydrogen, see 1808.002–73) on a reimbursable basis. The Air Force MPF shall be utilized as a supply source for propellants whenever there are economic or other advantages to the Government. Field installations and offices obtaining supplies from the MPF shall comply with the reporting requirements of 1808.002–74(f).

(b) *Requests for acquisition.* To obtain the materials listed in 1808.002–74(j) from the Air Force MPF, NASA contracting offices will execute a NASA-Defense Purchase Request (NASA Form 523) 1853.217–523 and forward it to Headquarters, SA–ALC, Kelly Air Force Base, Texas, Attention: SFS. The following additional information should also be provided on the form: (1) contract number (when material is required for use by a NASA contractor), (2) delivery address, and (3) mode of transportation, rail, trailer,

barge, etc. When the procurement request covers requirements for materials not previously forecast or covers significant changes to previously reported requirements, SA–ALC should be notified immediately of such requirements.

(c) *Delivery requests.* (1) A delivery request is a call on the Air Force, made against a purchase request (NASA Form 523), which specifies the time and place of delivery. On the basis of the estimated requirements, the Air Force will notify NASA field installations and contractors of the name and address of the Air Force office or producing contractor's plant to which requests for delivery of materials shall be made. Delivery requests may be placed by any means of communication that time justifies; however, all verbal requests for delivery must be confirmed by a written request within 24 hours. The delivery request, whether oral or written, must cite the NASA-Defense Purchase Request number under which the material is being ordered and contain the following information:

(i) Nomenclature and National Stock Number.

(ii) Quantity.

(iii) Program, project, and task.

(iv) Contract number (when material is required for use by a NASA contractor).

(v) Delivery address.

(vi) Dates of delivery.

(vii) Mode of transportation.

(viii) Location of weighing stations and scales (if weighing of the products prior to delivery is required).

(2) Each delivery request shall be numbered as follows to simplify identification and control. The number shall consist of the last two digits of the calendar year followed by a dash, and a numerical designator of the month submitted, a dash, and a consecutive number beginning with 1. Changes to a request would be identified by adding an alphabetical designator beginning with (A) to the number. This system is not intended to replace or to interfere with existing NASA purchase order numbering or internal budget or accounting numbering procedures.

(d) *Receiving procedures.* (1) *Receiving documents.* Receipt of materials will be evidenced by the signature of an individual authorized by NASA to receive materials from the Air Force on the receiving document received with the shipment. Every effort should be made to ensure that the NASA-Defense Purchase Request number is recorded on the receiving document prior to signing.

(2) *Weighing facilities.* Local weighing facilities (NASA-owned, contractor-owned, commercial, or State-operated) may be used to determine quantities of product received. If a discrepancy exists between the quantities shown on receiving documents and the quantities actually received—

(i) A certified weighing ticket evidencing actual weight at destination will be obtained; and

(ii) A copy of the receiving document (AF Form 857 or DD Form 250) and the original weighing ticket will be forwarded to Headquarters, SA–ALC, Kelly Air Force Base, Texas, Attention: ACFOM, identifying the discrepancy.

(3) *Distribution of receipts.* Copies of all receiving documents except the AF Form 857 shall be transmitted to the Headquarters, SA–ALC, Kelly Air Force Base, Texas, Attention: SACAOM. Receiving documents may be accumulated and submitted on the 10th, 20th, and last day of each month.

(e) *Billing.* The costs for materials obtained through the AMPF are reimbursable. After delivery, a Standard Form 1080 (Voucher for Transfers Between Appropriations and/or Funds (Disbursement)), supported by documentary evidence of delivery, will be submitted by Headquarters, SA–ALC to the NASA installation designated in the NASA Form 523.

(f) *Reporting requirements.* (1) Field installations shall submit periodic estimates of requirements for materials listed in 1808.002–74(j) for all programs under their cognizance, including in-house contractor requirements. Headquarters Program Offices shall submit periodic estimates of requirements for any existing or potential programs which may not be known to, or not under the cognizance of, a field installation. Reports shall be submitted in duplicate on NASA Form 558, Materials Requirement Report.

(2) The reports shall be forwarded so as to reach the Office of Space Flight (Code MOC–8) and HQ, SA–ALC, Kelly AFB, Texas, Attn: SFS, no later than June 1 and December 1. Supplemental reports which advise of additions to or significant changes in previous reports shall be submitted at any time. The reports, covering all materials listed in 1808.002–74(j) due in June and December shall begin with requirements as of the following July 1 and January 1, respectively, and shall cover a three-year period. Requirements shall be shown by month for the first six months, and by quarters for the remaining two and one-half year period.

(g) *Report content.* The reports shall be made using a separate report form for each material and shall provide the following information for each item of material:

(1) Contract number.

(2) Program and/or project.

(3) Specific task within project.

(4) End use when not associated with named program or project.

(5) Name of contractor.

(6) Specific location of use (shipping destination).

(7) Planned source of supply.

(h) *Basis for developing materials requirements.* In computing requirements, consideration shall be given to such elements as lead time, waste factors, transfer, and storage losses so that phased requirements reflect the total gross quantities required to be delivered to the use or storage site. Since the requirements estimates are being used by other Government agencies acting as supply sources to actually contract for materials, estimates must be as accurate as possible.

(i) *NASA headquarters review.* The NASA Office of Space Flight (Code MOC–8) shall be responsible for consolidating reports from installations and Headquarters Program Offices and for coordinating the review of all data with the Headquarters Program Offices. The data will then be used as the basis for NASA requirements reports to various Government agencies for planning and supply support.

(j) *Table of reportable materials.*

Ammonia, Technical (Anhydrous) (Low Oil Content) 99.97 percent purity, Spec 0–A–445

Argon Gas, 6000 PSI AFPID 6830–5

Propellant, Ammonia Liquid Anhydrous 99.5 percent purity, Spec MIL–P–27406

Propellant, Chlorine Tri-fluoride, Spec MIL–P–81399

Propellant, Deuterium, Gaseous, AFPID 9135–20

Propellant, Fluorine, gaseous, Spec MIL–P–27405

Propellant, Fluorine, Liquid, Spec MIL–P–27405

Helium, Technical Grade A, Spec BB–H–1168

Propellant, Isopropyl Alcohol, AFPID 9135–18

Propellant, Hydrazine, Standard Grade, Spec MIL–P–26536

Propellant, Hydrazine, Monopropellant Grade, Spec MIL–P–26536

Propellant, Hydrazine/Uns-Dimethylhydrazine, Spec MIL–P–27402

Propellant, Hydrogen Gaseous, Type I, Spec MIL–P–27201

Propellant, Hydrogen Liquid, Type II, Spec MIL–P–27201

Propellant, Hydrogen Peroxide, Spec MIL–P–16005

Propellant, Hydrogen Peroxide, Electrolytic process, Spec MIL–P–16005

Propellant, Jet Fuel, Grade RJ–1, Spec MIL–F–25558

Propellant, JPX, 50% UDMH–50% JP–4 Spec MIL–P–26694

Propellant, JPX, 17% UDMH–83% JP–4 Spec MIL–P–26604
Propellant, Kerosene Grade RP–1, Spec MIL–P–25576
Propellant, Monomethyl Hydrazine, Spec MIL–P–27404
Propellant, Neon, Liquid AFPID 9135–16
Propellant, Nitric Acid, Type IIIB, Spec MIL–P–7254
Propellant, Nitric Acid, Type III LS, Spec MIL–P–7254
Propellant, Nitric Acid, Type IV (High Density Acid), Spec MIL–P–7254
Propellant, Nitrogen Tetroxide (NTO)(MON–1)(MON–3) Spec MIL–P–26539
Propellant, Nitrogen Tetroxide (NTO) Spec MIL–P–26539
Propellant, Nitrogen Tetroxide (MON–1) Spec MIL–P–26539
Propellant, Nitrogen Tetroxide (MON–3) Spec MIL–P–26539
Propellant, Oxygen, Grade B, Spec MIL–P–25508
Propellant, Oxygen, Grade A, Spec MIL–P–25500
Propellant, Oxygen, Grade F, Spec MIL–P–25505
Propellant, Pressurizing Agent, Helium, Spec MIL–P–27407, 99.995 Pct Min Assay
Propellant, Pressurizing Agent, Nitrogen, Type II, liquid Grade C, Spec MIL–P–27401
Propellant, Pressurizing Agent, Nitrogen, Type I, gaseous Grade A, Spec MIL–P–27401
Propellant, Pressurizing Agent, Nitrogen, Type I, Grade B, Spec MIL–P–27401
Propellant, Pressurizing Agent, Nitrogen, Type II, Grade A, Spec MIL–P–27401
Propellant, Pressurizing Agent, Nitrogen, Type II, Grade B, Spec MIL–P–27401
Propellant, Uns-Dimethylhydrazine, Spec MIL–P–25604
Propellant, Nitrogen Trifluoride
Propellant, Pressurizing Agent Argon, Liquid, AFPID 9135–19

1808.002–75 Acquisiton of mercury

(a) NASA is prohibited from purchasing mercury in quantities of 76 pounds or more from commercial sources without prior clearance from the General Services Administration.

(b) Mercury, minimum 99.9 percent pure (not triple distilled), in 76-pound flasks, is available for transfer from General Services Administration stocks at fair market value.

(1) Requests from mercury by NASA installations for their use or for use by their cost-reimbursement type contractors shall be made to the Project Manager, Mineral and Ores, Property Management and Disposal Services, General Services Administration, Washington, DC 20405. The Project Manager will furnish the current fair market value to NASA. The unit of issue is a 76-pound flask.

(2) Requests for clearance to purchase quantities of 76 pounds or more from sources other than the General Services Administration shall be submitted to the office referred to in paragraph (b)(1) above and must be accompanied by a statement of reasons that makes the available excess mercury unsuitable for use by the requesting field installation.

Subpart 1808.1—Excess Personal Property

1808.103 Information on available excess personal property.

In addition to the sources identified in FAR 8.103, Installation personnel shall review the availability of NASA property on lists—

(a) Maintained by the NASA Property Disposal Office, and

(b) Maintained by the NASA Equipment Visibility System (EVS) coordinator.

Subpart 1808.3—Acquisition of Utility Services

1808.301 Definitions.

"Multiple service locations" as used in this Subpart means the various locations or delivery points in the contractor's service area to which services are provided under a single contract.

"Utility suppliers" as used in this Subpart means quasi-public service corporations, private concerns, municipalities, associations, or cooperatives. They generally operate in a franchised territory without competition, so they may frequently be in a "sole source" position. Under common law, however, public utilities must render service at reasonable rates and without unjust discrimination. Furthermore, their operations, management, rates and profits are usually regulated by Federal, State, or local regulatory bodies, but absence of a regulatory body does not necessarily mean a complete lack of control. Administrative remedies pursuant to enabling statutes may be pursued or complaints may be taken to a court of competent jurisdiction.

1808.302 Applicability.

For procurement of utility services without a written document see 1808.304–5.

1808.303 General.

Requirements for utility services shall be determined by technically qualified personnel who will assist the contracting officer as required. Prior to soliciting technical assistance outside the agency (see FAR 8.303(b)), technical personnel will contact the Facilities Division (Code NX–2), NASA Headquarters.

1808.304 Acquiring utility services.

1808.304–2 GSA areawide contracts.

(a) A list of the utility services obtainable under GSA area-wide public utility contracts, including the area served and the name of the contractor involved, is contained in GSA Circular No. 61, Revised. GSA also has available copies of the area-wide public utility contracts which include the required order form. Copies of GSA Circular No. 61 and GSA area-wide public utility contracts may be obtained, upon request, from General Services Administration, Transportation and Communication Service, Public Utilities Division, Washington, D.C. 20405.

(b) In determining whether a GSA area-wide public utility contract is adequate to meet the requirements of the using installation, consideration should be given to (1) the area-wide contract rates viewed in light of the magnitude of the service required, (2) any unusual characteristics of the service required, (3) any special equipment or facility requirements, (4) any special technical contract provisions required, and (5) any other special circumstances.

(c) Where an installation considers that a separately negotiated contract is more advantageous to the Government than the GSA area-wide public utility contract, for a utility service other than communications, a request will be submitted to the Assistant Administrator for Procurement, NASA Headquarters (Code HS–1), for a waiver of the requirement to use the GSA area-wide public utility contract. The request shall explain why the separately negotiated contract is considered to be more advantageous to the Government than the area-wide contract.

1808.304–4 Consolidated purchase, joint use, or cross-service.

(a) The Department of Defense enters into area-wide fuel oil and other energy service contracts. DoD area-wide contracts provide that the contractor will upon receipt of an order in the form prescribed by the contract, furnish, without further negotiations as to rates and charges, the service involved in accordance with such of his established and filed rate schedules as are applicable to the service.

(b) A memorandum of understanding, specifying the services to be provided and the conditions under which they will be supplied, shall be used when procuring utility services from another Government agency by cross-servicing. A Utility Service Narrative shall be

submitted in accordance with 1808.307–70.

1808.304–5 Agency acquisition.

Unless a written document is required by FAR 8.304–5(e), utilities services may be procured without a written document (see FAR 8.304–5(g)) when all the following conditions apply:

(a) The services are to be furnished at rates, terms, and conditions based on an established rate schedule approved by a Federal, State, or other public regulatory body.

(b) The estimated annual cost of the services to be procured is $10,000 or less.

(c) A connection, termination, installation, or similar charge, or a deposit other than a meter deposit required of all customers, if involved, has a total cost that does not exceed $5,000.

(d) The utility supplier does not require the execution of a contract or application form.

(e) It is not deemed advantageous to the Government to negotiate and execute a contract.

1808.304–570 Renewal of contracts.

(a) It is permissible to provide that a contract may be renewed annually for a number of years upon the execution by the Government of a renewal notice, provided that the number of successive years for which the contract is in effect does not exceed five.

(b) In selecting the expiration date to be stated in the contract, consideration should be given to the selection of a date sufficiently past the end of the fiscal year to ensure that appropriations will be available for the renewal period of the contract at the time the renewal notice is issued. The exercise of the option is a new procurement and the contract file shall be documented accordingly. (See FAR Subpart 17.2.)

1808.304–571 Headquarters requirement for copies of contracts.

The contracting officer shall forward, promptly after execution, one copy of each contract, service authorization form, memorandum of understanding, or any modification thereto, to the Assistant Administrator for Procurement, NASA Headquarters (Code HS–1) and to the Facilities Division, NASA Headquarters (Code NX–2).

1808.304–572 Contents of a negotiated utility service contract.

(a) Except under the conditions in 1808.304–5 any negotiated utility service contract which involves an estimated annual cost of more than $2,500 shall consist of—

(1) *Standard Form* 26 (see FAR 53.215–1(b));

(2) (i) *Appendix A.* The rate schedule applicable to the contract, which shall consist of—

(A) The printed or otherwise published rate schedule of the contractor which has been approved or established by a Federal, State, or other regulatory body; or

(B) The rate schedule negotiated between the contractor and the Government.

(ii) The rate schedule shall bear the legend "Appendix A, attached to and made a part of Contract No. * * *," and be entitled "Rate Schedule." Each page shall indicate its numerical order in the total number of pages comprising Appendix A, as, for example, "page 1 of 3." In addition to stating the rate applicable to the contract, Appendix A shall include, where applicable, any rules or regulations (whether established by the regulatory body, the contractor, or by negotiation between the contractor and the Government), which pertain to the Rate Schedule. Appendix A may provide for payment to the contractor of a nonrecurring, nonrefundable fee of not more than $1,000 to cover the costs of connecting the contractor's facilities to, and disconnecting them from, the Government's facilities, whenever the contract period is less than six months. In all instances where a connection charge, other than the fee described above, is involved, the "Connection Charge" clause (1852.208–7009) and Appendix C (see paragraph (a)(4) below) shall be included in the contract.

(3) *Appendix B.* The service specifications applicable to the contract which shall consist of a specially drafted attachment to the contract, bearing the legend "Appendix B, attached to and made a part of Contract No. * * *," and the title of the appropriate service specifications. Each page shall indicate its numerical order in the total number of pages comprising Appendix B, as, for example, "page 1 of 3." Such appendix shall contain as a minimum—

(i) The premises to be served;

(ii) An estimate of the service requirements;

(iii) The point of delivery to the Government;

(iv) A description of the service;

(v) A statement of how the service is to be measured for purposes of billing;

(vi) A statement of the capacity and flow of the service.

(4) *Appendix C.* The connection charge schedule which is required whenever the contract includes the connection charge clause prescribed by 1852.208–7009 or the termination charge clause prescribed by 1852.208–7010 and which shall bear the legend "Appendix C, attached to and made a part of Contract No. * * *," and be entitled "Connection Charge Schedule." Each page shall indicate its numerical order in the total number of pages comprising Appendix C, as, for example, "page 1 of 3." The appendix shall contain as a minimum—

(i) A detailed description of the new facilities to be furnished by the contractor; and

(ii) The agreed salvage value of such facilities.

(5) Any contract clauses required by FAR 8.309 or by 1808.309.

(b) Except under the conditions in 1808.304–5, any negotiated utility service contract which involves an estimated annual cost of $2,500 or less shall consist of—

(1) Standard Form 26 (53.215–1(b)).

(2) An Appendix A (see (a)(2) above).

(3) Any contract clauses required by FAR 8.309 or by 1808.309.

1808.305 Rate increases.

(a) When the contractor furnishes written notice to the contracting officer of a filing of an application for rate changes, as provided for in the clause entitled "Public Regulation and Change of Rates" at 1852.208–7003, or whenever the contractor requests that rate changes be negotiated, as provided for in the clause entitled "Change in Rates" at 1852.208–7008, the contracting officer will notify the Assistant Administrator for Procurement, NASA Headquarters (Code HS–1) and the Facilities Division NASA Headquarters (Code NX–2). The notification shall include sufficient information to permit a determination of the monetary effect of the proposed changes, a recommendation of action to be taken under paragraph (a) (1) or (2) of this section, and the basis therefor.

(1) When a notice is received of a filing of an application for rate changes before the local regulatory body, the contracting officer will make a recommendation as to whether or not the Government should intervene in the hearing on the application. If it is recommended that the Government intervene in the hearing, the recommendation shall be accompanied by a statement containing the basis for such intervention and the extent to which the installation can support intervention through the presentation of testimony, preparation of exhibits, and the furnishing of legal counsel.

(2) When a notice is received that the contractor requests that rate changes be negotiated, the contracting officer wi

make a recommendation as to the position to be taken by the Government regarding the rate changes and the extent to which installation personnel are available to support this position.

(b) The Assistant Administrator for Procurement, NASA Headquarters, with the technical assistance of the Facilities Division, NASA Headquarters, will furnish the contracting officer a recommendation concerning the proposed rate changes and the extent to which NASA Headquarters will participate in the intervention before the local regulatory body in negotiations with the contractor. Prior to recommending any action concerning the proposed rate changes, the Assistant Administrator for Procurement, NASA Headquarters will, as necessary, coordinate with other staff offices or divisions, or other Government agencies. The contracting officer shall await the recommendations of the Assistant Administrator for Procurement, NASA Headquarters for at least 30 calendar days prior to submitting the matter to GSA (see FAR 8.305(b)) or taking any other action concerning the proposed rate changes.

1808.307 Precontract acquisition reviews.

1808.307-70 Utility service narrative.

(a) When required by FAR 8.307-1(b) the contracting officer shall submit a Utility Service Narrative for proposed procurements for new utilities services, renegotiations or extensions of existing utility services, or existing contracts that require a negotiation for change of rate schedules, to the Assistant Administrator for Procurement (Code HS-1), NASA Headquarters, prior to initiating negotiation procedures. The Utility Service Narrative shall include—

(1) A brief technical description of the service required or being furnished;

(2) An analysis of the reasonableness of the proposed rate and/or the monetary extent of the rate change compared to the last typical year of service;

(3) A description outline of the field installation's proposed negotiation tactics, basis for position, and any alternate position;

(4) An estimate of the annual cost of service; and

(5) Other related items, as applicable, such as connection charges, termination liability, facilities charges, requirement for Government capital costs, or any other unusual factors affecting the procurement.

(b) The Assistant Administrator for Procurement (Code HS-1), with the coordination of the Facilities Division (Code NX-2), NASA Headquarters, will review the information submitted under paragraph (a) above. If NASA Headquarters participation in the negotiation proceedings, in an advisory capacity to the contracting officer, is considered desirable, the Assistant Administrator for Procurement (Code HS-1), NASA Headquarters, will inform the contracting officer not later than 30 calendar days from the receipt of the Utility Service Narrative.

1808.307-71 Contracts requiring Headquarters approval.

Contracts and supplemental agreements for utility services shall be submitted to the Assistant Administrator for Procurement, NASA Headquarters (Code HS-1) for approval as required by 1804.71.

1808.309 Contract clauses.

(a) The contracting officer shall, unless stated otherwise, insert the clauses prescribed below in negotiated utility service contracts which involve an estimated annual cost of more than $2,500 and, where specifically prescribed, in those with an estimated annual cost of $2,500 or less. Said clauses are in addition to those prescribed elsewhere in the FAR or this Regulation for inclusion in utility contracts.

(1) Insert the clause at 1852.208-7002, Rates (also include in contracts of $2,500 or less).

(2) Insert the clause at 1852.208-7003, Public Regulation and Change of Rates, in all contracts (regardless of estimated annual costs) except when the clause in paragraph (b)(2) below is applicable.

(3) Insert the clause at 1852.208-7004, Change in Class of Service.

(4) Insert the clause at 1852.208-7005, Contractor's Facilities (see paragraph (a)(6) below).

(5) Insert the clause at 1852.208-7006, Technical Provisions.

(6) Insert the clause at 1852.208-7012, Contractor's Facilities (Short Form), in lieu of the clause at 1852.208-7005 only when the estimated annual cost is $2,500 or less.

(b) When applicable in negotiated utility service contracts, the contracting officer shall also insert the clauses prescribed below:

(1) Insert the clause at 1852.208-7007, Renewal of Contract whenever it is desirable that the utility service be provided under the same terms and conditions for more than one year (see 1808.304-570).

(2) Insert the clause at 1852.208-7008, Change in Rates, in lieu of the clause in 1852.208-7003, when the rates applicable to the service furnished under the contract are negotiated between the contractor and the Government without recourse to the approval of any Federal, State, or local regulatory agency, or if the service to be furnished under the contract is otherwise not subject to regulation by any Federal, State, or local regulatory agency, or if the contractor also acts as the local public regulatory agency and its decisions are not subject to review by a higher regulatory agency.

(3) Insert the clause at 1852.208-7009, Connection Charge when (i) a connection charge is to be paid by the Government and (ii) the conditions permitting the incorporation of a nonrecurring, nonrefundable fee in Appendix A, the rate schedule applicable to the contract, do not exist. Also attach Appendix C (see 1808.304-572(a)(4)).

(4) Insert the clause at 1852.208-7010, Termination Charge, when payment is to be made to the contractor upon termination of service in lieu of a connection charge upon completion of the facilities. Use of this clause is subject to Master Buy Plan approval requirements (see Subpart 1804.71). Also attach Appendix C.

(5) Insert the clause at 1852.208-7011, Multiple Service Locations when it is desired to provide for possible alternative service location.

Subpart 1808.4—Ordering From Federal Supply Schedules

1808.404 Using schedules.

1808.404-3 Requests for waivers.

(a) The head of the NASA office initiating the purchase request or a designated representative shall furnish the NASA contracting office a signed statement identifying the supplies or services to be purchased. This statement shall state why similar items listed in the applicable schedule will not meet the specific requirement.

(b) If a waiver is not granted, the case will be referred to the Assistant Administrator for Procurement for a final decision as to whether the non-schedule item will be purchased. The Assistant Administrator for Procurement shall promptly notify the Commissioner, Federal Supply Service, GSA, and the contracting office of the decision reached.

1808.405 Ordering office responsibilities.

1808.405-1 Ordering from multiple-award schedules.

(a) If an opportunity arises for NASA to purchase an item from a schedule contractor at a price substantially more favorable to the Government than the price listed, *the procurement will be*

accomplished at the more favorable price. A copy of the order shall be forwarded to GSA in accordance with FAR 8.405–1(d).

(b) The following examples are additional factors to be considered when making a determination to purchase higher-priced items:

(1) Probable life of the item selected, as compared to that of a lower cost item, is sufficiently greater so that the additional purchase price is economically warranted.

(2) Warranty conditions of a higher-priced item are sufficiently advantageous to justify the added cost.

(3) Greater maintenance availability, lower overall maintenance costs, or the elimination of problems anticipated regarding machines or systems, especially at isolated use points, will produce long-run savings greater than the difference in purchase prices.

1808.405–2 Order placement.

Delivery orders may be placed on Optional Form 347 or an installation prescribed form as specified in FAR 8.405–2.

Subpart 1808.6—Acquisition From Federal Prison Industries, Inc.

1808.605 Clearances.

(a) NASA purchase orders or contracts written pursuant to a general or blanket clearance need not be supported by a copy of the clearance, but the clearance number must be cited on the purchase order or contract as well as on the initial voucher.

(b) Where a formal clearance has been requested, the contracting officer shall not consummate the purchase before the issuance of the formal clearance. A copy of the clearance certificate must be attached to the initial voucher.

(c) When disputes under FAR 8.605(c) occur, the contracting officer shall refer the matter to the Assistant Administrator for Procurement (Code HP–1), for review and any further action. Such referrals shall include a complete statement of the attempts made to resolve the matter.

Subpart 1808.8.7—Acquisition From the Blind and Other Severely Handicapped

1808.705 Procedures.

1808.705–1 General.

(a) When supplies (1) require overseas packaging or packing or (2) are required in carload lots, as described in the Consolidated Freight Classification for the commodity concerned, procurement shall follow the procedure in FAR 8.705–3(b)(1).

(b) The Federal Standard Requisitioning and Issue Procedure (Federal Property Management Regulation, Subpart 101–26.2) shall be used to obtain blind-made and severely handicapped made supplies from General Services Administration supply distribution facilities.

1808.705–4 Compliance with orders.

If a workshop fails to comply with the terms of an order and the problem cannot be resolved with the workshop, the matter shall be forwarded to the central nonprofit agency and/or the Committee, as necessary.

1808.711 Quality complaints.

If a problem related to the quality of an item or of performance of a service cannot be resolved with the workshop, the matter will be referred for resolution to the central nonprofit agency and the Committee.

Subpart 1808.8—Acquisition of Printing and Related Supplies

1808.802 Policy.

Approval of printing supplies or services in contracts shall be in accordance with NPD–1490.1, NASA Printing Management Program.

Subpart 1808.11—Leasing of Motor Vehicles

1808.1100 Scope of subpart.

NASA procedures for leasing motor vehicles from GSA or commercial sources are contained in NASA Management Instruction NMI 6720.1, NASA Motor Vehicle Management.

PART 1809—CONTRACTOR QUALIFICATIONS

Sec.

Subpart 1809.1—Responsible Prospective Contractors

1809.102 Applicability.
1809.102–70 Procurements from Canadian sources of supply.
1809.106 Preaward surveys.
1809.106–1 Conditions for preaward surveys.
1809.106–7000 Preaward survey procedures.
1809.106–7001 General.
1809.106–7002 Definitions.
1809.106–7101 Procedure for requesting preaward surveys.
1809.106–7102 Scope of survey.
1809.106–7103 Contracting office procedure.
1809.106–7201 Steps for survey performance.
1809.106–7202 Preliminary analysis.
1809.106–7203 Development of information.
1809.106–7204 On-site surveys.
1809.106–7205 Evaluating data and preparing the report.

Subpart 1809.2—Qualified Products

1809.200 Scope of subpart.
1809.203 Responsibilities of a specification preparing activity (SPA).
1809.203–70 General.
1809.203–71 Waiver of qualification requirements.
1809.206 Acquiring qualified products.
1809.206–70 Small businesses.
1809.206–71 Contract clause.

Subpart 1809.4—Debarment, Suspension, and Ineligibility

1809.402 Policy.
1809.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.
1809.405 Effect of listing.
1809.405–1 Continuation of current contracts.
1809.405–2 Restrictions on subcontracting.
1809.406 Debarment.
1809.406–3 Procedures.
1809.407 Suspension.
1809.407–3 Procedures.
1809.470 Reporting of suspected causes for debarment, suspension or evasive actions.
1809.470–1 Situations where reports are required.
1809.407–2 Contents of reports.
1809.470–3 Addresses and copies of reports.

Subpart 1809.5—Organizational Conflicts of Interest

1809.500 Scope of subpart.
1809.503 Waiver.
1809.507 Procedures.
1809.508 Solicitation provision and contract clause.
1809.508–2 Contract clause.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1809.1—Responsible Prospective Contractors

1809.102 Applicability.

1809.102–70 Procurements from Canadian sources of supply.

Awards to Canadian sources of supply are subject to FAR Subpart 9.1. A Canadian firm proposed by the Canadian Commercial Corporation (CCC) as its subcontractor generally shall be accepted by the contracting officer under the provisions of FAR 9.104–4 as the basis for his determination under FAR 9.103(b). In cases where the firm proposed by CCC is so accepted, preaward survey forms need not be completed. The contracting officer, when the CCC proposal is not consistent with other information which may be available shall request from CCC and any other sources additional information or plant surveys deemed necessary to make the determination of responsibility. Such additional data may be requested on the preaward survey forms or on any other forms. Upon request, CCC shall be furnished an explanation of the reasons for rejection of its proposed firm.

1809.106 Preaward surveys.

1809.106–1 Conditions for preaward surveys.

In addition to the circumstances enumerated in FAR 9.106–1(a) (1) and (2) preaward surveys normally are not required when—

(a) The contract is for study or research only.

(b) The data, necessary for a responsibility determination, is available from other sources.

(c) The pending contract will be a definitive contract superseding a letter contract.

(d) An order is placed under an existing contract.

(e) The source has been recommended by the NASA Source Evaluation Board.

1809.106–7000 Preaward survey procedures.

All preaward surveys shall be conducted in compliance with FAR Subpart 9.1 and Subparts 1809.7000.

1809.106–7001 General.

Subsections 1809.106–7001 through 1809.106–7205 establish procedures for conducting preaward surveys (except for construction contracts). They include preaward surveys conducted by NASA, those conducted by another agency for NASA, and those jointly conducted.

1809.106–7002 Definitions.

"Monitor" as used in this section, means the person designated to administer the preaward survey from the receipt of the request through the issuance of the final report.

"Pre-Award Survey Review Board" means a board established to review and approve or disapprove preaward survey reports.

"Team Coordinator" as used in this section means the person designated by the monitor to coordinate the on-site survey, make arrangements for plant visits, and conduct team conferences as necessary before, during, or after the plant visit.

1809.106–7101 Procedure for requesting preaward survey.

(a) A preaward survey shall be requested on Standard Form 1403, Pre-Award Survey of Prospective Contractor (General), indicating in Section III thereof, the scope of the survey desired. Factors requiring emphasis not enumerated in Section III should be listed under block "20.G." of that Section. The "Walsh-Healey Public Contracts Act" block of Section I is for information purposes only. If information is needed on the offeror's eligibility under the Walsh-Healey Act, it must be specifically requested in block "20.G." of Section III. A survey may be requested by telegraphic communication containing the data required by Sections I, II, and III of the Form. A survey may be requested by telephone but shall be immediately confirmed on SF 1403. Unless previously furnished, a copy of the solicitation and such drawings and specifications as deemed necessary by the contracting office, shall be supplied with the preaward survey request.

(b) Any information indicating previous unsatisfactory contract performance shall be furnished the survey activity with the preaward survey request, except where it is known that the survey activity already has this information.

(c) The request for preaward survey shall be forwarded in an original and three copies to the responsible survey activity. If the survey activity is a DoD agency, the request is to be sent to the appropriate office shown in the DoD Directory of Contract Administration Services Components, DoD 4105.59–H, Attn: Pre-Award Survey Monitor. The date on which the completed survey report is desired should be indicated; however, the DoD normally allows seven working days in which to conduct a full survey and submit the report to the requesting agency.

§ 1809.106–7102 Scope of survey.

(a) A complete survey encompasses investigation, to the extent applicable to the proposed contract, of the factors listed in Section III of SF 1403, together with other requirements of special inquiry as requested by the contracting officer, and submission of appropriate findings thereon.

(b) A partial survey encompasses investigation of those factors referenced in (a) above which are specifically requested by the contracting officer and any other factors considered advisable by the activity conducting the survey, and submission of appropriate findings thereon.

(c) The activity conducting the survey may execute and transmit to the contracting officer a short form preaward survey report in those cases where sufficient current favorable information is available to recommend award without a formal survey. The SF 1403 will be used as the survey report in accordance with procedures outlined in 1809.106–7103(a)(4). If the contracting officer has reason to need additional information on contractor capability, the activity conducting the survey may be so advised, and a detailed survey report will be provided.

1809.106–7103 Contracting office procedure.

(a) *General.* (1) Preaward surveys will be conducted within the normal time frame of seven working days after receipt of request and in the detail requested by the contracting officer. In unusual procurement situations, reports of such surveys may be requested in a shorter time if the situation so warrants. Qualified specialists responsible for the factors referenced in 1819.106–7102(a) shall participate as required.

(2) Representatives of the contracting office and other activities will participate in preaward surveys when requested by the contracting officer or as desired by the contracting office.

(3) If the preaward survey cannot be accomplished within the time allowed, the contracting officer shall be so notified. If the date is not extended the preaward survey monitor shall supply a definite recommendation by the date required, based on the material at hand or developed by that time. The basis for the recommendation and the factors for which no data or only partial data could be obtained, shall be indicated.

(4) When the activity conducting the survey possesses sufficient current favorable information about an offeror to recommend complete award without performing a formal survey, a short form preaward report may be executed and forwarded to the contracting officer unless the contracting officer has requested additional information as required by 1809.106–7102. The "short-form" preaward survey report will consist of only SF 1403. Sections III and IV of the SF 1403 will be completed and the following statement will be stamped in block 23, the "Remarks" portion of Section III:

Short Form Pre-Award Report Pursuant to 1809.106–7102(a), complete award is recommended.

(b) *Designation of preaward survey monitor.* An individual within each procurement office performing preaward surveys shall be designated as the preaward survey monitor. The monitor shall administer the preaward survey from the receipt of the request through the issuance of the final report to assure appropriate coverage and maximum efficiency. The monitor shall:

(1) Receive all incoming preaward survey requests;

(2) Ascertain whether the prospective contractor is included on the Consolidated List of Debarred, Ineligible, and Suspended Contractors for any reason, including those attributable to equal employment opportunity practices. (Where the prospective contractor is so listed, the

contracting officer shall be promptly advised and the preaward survey shall not be completed, unless specifically requested by the contracting officer);

(3) Compare the survey request with the requirements of the solicitation;

(4) Determine the need for an on-site survey after reviewing the type and quantity of items or services involved; previous experience with the firm; technical and schedule requirements; and the extent of other information currently available. (If an on-site survey has been requested and sufficient data is already available in the contracting or other offices (e.g., DoD Contract Administration Officer), the monitor shall ask the contracting officer whether an on-site survey must nevertheless be conducted, and for the specific elements to be covered);

(5) Determine and advise the organizational segments of the installation (e.g., Engineering, Production, Reliability and Quality Assurance, and Contract Administration), that will furnish team members;

(6) Provide team members the following information:

(i) The date on which the information is required from each organizational segment;

(ii) The portion of the survey for which each organizational segment is responsible;

(iii) Whether an on-site survey of the prospective contractor's facility is contemplated. (This is subject to later modification based on information supplied by team members.);

(iv) Any special terms and conditions noted in the solicitation; and

(v) Any other information or guidance the particular request may require;

(7) After discussion with appropriate organizational segments, designate the team coordinator;

(8) Arrange for required audit and other external assistance. (For example, in those cases where contract award is dependent upon the contractor having an adequate cost accounting system for proper post-award administration of the contract, the cognizant audit agency shall be responsible for the system review, evaluation, and conclusive recommendation (SF 1408 is provided for this purpose);

(9) Coordinate any participation where the preaward survey is being performed for another NASA installation;

(10) Receive and review reports of the individual team members for completeness and adequate substantiation;

(11) Resolve questions regarding technical details with responsible specialists;

(12) Report those applicable procedures of the prospective contractor which have been reviewed by Government personnel (e.g., procurement system, estimating system, accounting system, control of Government property, and quality program); and

(13) Assemble all necessary survey data into a report, including a recommendation as to award, and submit it to the Chairman of the Pre-Award Survey Review Board.

(c) *Designation and responsibilities of team coordinator and members.* (1) When an on-site survey by a team is necessary, members should include specialists qualified to evaluate all appropriate phases of the firm's capabilities. The team coordinator shall:

(i) Arrange for the team's visit to the site;

(ii) Conduct team conferences for the purpose of

(A) Arriving at uniform interpretations prior to holding discussions with the prospective contractor's management;

(B) Briefing team members on their interviews and discussions with officials of the firm prior to making an on-site survey. (Members shall not make reference or comment relative to the possibility that the award will or will not be made to the prospective contractor. This does not preclude discussion with a prospective contractor of questionable areas which in the opinion of the team member require clarification. Information obtained during the survey will be treated in strict confidence and divulged only to those Government representatives having a need to know); and

(C) Arranging for discussions among members during and after the on-site survey to assure that evaluations by individual specialists are integrated, coordinated, and complete; and

(iii) Otherwise direct the efforts of the team.

(2) When an on-site survey is required for only one aspect of the prospective contractor's capability, a qualified specialist will be designated to conduct the on-site portion of the survey. One specialist may be designated to investigate more than one aspect when it is within his capability.

(d) *Preaward survey review board.* (1) A Pre-Award Survey Review Board shall be formally established to review and approve survey reports prior to transmittal to the contracting officer.

(2) The Board shall be composed of senior specialists from each of the major functions normally concerned with preaward surveys, one of whom shall be designated Chairman. Flexibility of membership shall be provided by designating alternates for membership and by establishing the criteria or conditions governing the need for occasional special technical representation. Membership on the Board shall be in addition to the members' regular duties.

1809.106–7201 Steps for survey performance.

The three steps in performing a preaward survey are the:

(a) Preliminary analysis;

(b) Development and evaluation of information; and

(c) Preparation and review of the preaward survey report.

1809.106–7202 Preliminary analysis.

The request (SF 1403, Sections, I, II, and III) shall be reviewed to establish basic administrative information and the factors to be investigated. The solicitation shall then be reviewed to ascertain those general and special requirements which have a significant bearing on determining contractor responsibility. Examples are the nature of the product or services, applicable specifications, delivery schedule, documentation requirements, property control requirements and financing aspects.

1809.106–7203 Development of information.

(a) *Review of available data.* The information already available in the contracting office pertaining to the prospective contractor and his past performance shall be reviewed. Prior preaward survey reports and contractor performance records shall be examined and considered in support of preaward survey recommendations. If the prospective contractor has current or contemplated Government contracts, the files should be checked for information regarding similarity of product, current status of contracts, quality control experience, and financial status.

(b) *Development of additional data.* (1) When appropriate, the contracting office shall supplement the data on hand with any additional information required from other Government sources and from commercial sources, such as banks, business associates, and credit rating and reporting agencies.

(2) An on-site survey shall be performed when required by FAR 9.106–1(a), or when sufficient information is not developed as a result of (a) and (b)(1) above.

(3) A narrative discussion shall be referenced in Section III of SF 1403 and

appended to the form covering each factor investigated. This narrative shall include detailed discussion supporting both satisfactory and unsatisfactory conditions and shall include reasons for all stated conclusions. When review discloses previous unsatisfactory contractor performance in any regard, the preaward survey shall specifically cover the extent to which action has been taken or planned by the contractor to avoid repetition. Lack of evidence that the contractor was responsible for a failure to meet past contractual requirements does not necessarily indicate satisfactory performance. A persistent pattern of the contractor's need for costly and burdensome Governmental assistance (engineering, inspection, testing) that was provided in the Government's interest but not contractually required, shall be treated in the preaward survey as an element for separate narrative discussion to be appended to the Form.

(4) When a prospective contractor proposes to acquire additional resources essential to performance of the proposed contract, the activity conducting the survey shall as a minimum obtain and evaluate:

(i) An itemized list of the required resources;

(ii) A planned method of acquisition; and

(iii) A schedule for acquisition of resources.

Failure to meet commitments on previous contracts shall be documented in the current preaward survey report and considered in the final recommendation.

1809.106-7204 On-site surveys.

(a) *Interview, investigation and review.* (1) *General.* An on-site survey will consist of an interview with representatives of the prospective contractor and, normally, an investigation of his resources and procedures.

(2) *Interview with management.* Management officials of the appropriate level authorized to represent the prospective contractor should be interviewed. The prospective contractor's background shall be reviewed and as much history recorded as necessary to reflect the soundness and reputation of the firm's operation.

(i) The organizational structure of the facility is the basis for management's control and must be reviewed. Assignment of definite tasks and responsibilities should be checked.

(ii) Lack of understanding or misinterpretation of the solicitation often results in delinquent contracts and leads to default actions. Therefore, the solicitation shall be discussed with the prospective contractor to assure that he understands its requirements, including its technical aspects, such as drawings, specifications, prototype, technical data, testing, and packaging, and Government's right to use technical data in accordance with the terms of the solicitation (Ref. clauses in 1827.473). Any misinterpretations of the requirements of the solicitation which could adversely affect performance, or refusal by the prospective contractor to furnish required data, should be brought to the immediate attention of the monitor by the team coordinator. The monitor shall, in turn, promptly advise the team coordinator. The monitor shall, in turn, promptly advise the contracting officer.

(3) *Investigation of resources and review of procedures.* The resources which the prospective contractor intends to utilize shall be inspected, analyzed, and compared with his overall plans for performing. His procedures relating to performance of the proposed contract shall be reviewed for adequacy.

(4) *Specific factors to be considered.* In the course of developing information, those factors described in (b), (c), and (d) below and all others needed to provide the report and recommendations in detail and to the extent required by the contracting officer shall be considered.

(b) *Production.* (1) *General.* The production portion of the on-site survey consists of an evaluation of the prospective contractor's ability to manufacture the product(s) or accomplish the tasks in accordance with the specifications and delivery schedule of the proposed contract. To achieve the objectives of this portion of the on-site survey, the production plan shall be reviewed, production resources ascertained, and the plan related to such resources.

(2) *Obtaining the production plan.* The prospective contractor's production plan for meeting the delivery schedule specified in the proposed contract shall be ascertained. The principal milestones within the production plan shall be established, along with target dates for achievement. These target dates must support the delivery schedule of the proposed contract. The controls which will be utilized in order to gear and hold the manufacturing effort to the target dates for the principal milestones shall be analyzed for suitability.

(3) *Ascertaining production resources.* The information necessary to prepare SF 1404 and SF 1405 shall be obtained by discussion with appropriate management personnel of the prospective contractor. This information shall be verified, when necessary, by physical inspection of the manufacturing plant and evaluated in terms of suitability to manufacture the required item(s).

(4) *Relating production plans to production resources.* When necessary, representatives of the prospective contractor shall be requested to advise how the production resources described in Sections II, III, IV, and VI of SF 1405 will be allocated and utilized in order to achieve the target dates for the principal milestones. This shall include both in-house and subcontractor production resources. Pertinent to this is an analysis of projects and contracts which will compete for utilization of those resources within the same time frame as that specified by the prospective contractor's production plan. The information developed as a result of equating the production plan and production resources of the prospective contractor should enable the procurement office to:

(i) Conclude whether the resources which the prospective contractor is planning to use are suitable for the job;

(ii) Determine whether the prospective contractor will be capable of properly controlling, maintaining, protecting and using Government property;

(iii) Determine whether the planning and scheduling of effort will result in timely accomplishment of the principal milestones; and

(iv) Conclude whether achievement of the principal milestones will result in timely delivery.

(c) *Quality assurance.* (1) The standing of the quality assurance organization in the prospective contractor's overall organization must be evaluated. An inspection or quality control function which reports to some other organizational segment (such as production) instead of top management may be undesirable. The experience of the company inspection or quality control personnel with the same or similar items shall be evaluated.

(2) To evaluate the prospective contractor's ability to comply with quality control or inspection requirements, the following areas shall be reviewed:

(i) Methods currently utilized to control product quality as reflected by a documented or verifiable inspection system or quality program plan;

(ii) Personnel on hand and available (report both trained and untrained);

(iii) Inspection and test equipment on hand and available;

(iv) Quality, identification, and storage of materials;

(v) Physical arrangement of plant;

(vi) Tool and gauge control; and
(vii) Test and inspection records.

(d) *Financial.* (1) *General.* The normal procedure for determining a prospective contractor's financial capability shall be initial pre-survey planning, followed by verification of financial data as required. The extent of the review and analysis of financial matters shall be governed by the nature of the proposed contract. In certain instances, a sound decision may be possible after a relatively simple review of a company's financial position and production commitments. Under other circumstances, a more comprehensive review and analysis will be required.

(2) *Procedure.* Aspects to be considered in determining the prospective contractor's financial capability (SF 1407) include the following:

(i) The latest balance sheet and profit and loss statement shall be reviewed. The following are indicative of the soundness of the prospective contractor's financial structure:

(A) Rates and ratios;

(B) Working capital as represented by current assets over current liabilities; and

(C) Financial trends such as net worth, sales and profit.

(ii) The method of financing the contract shall be evaluated. Where sources of outside financing, other than the Government, are indicated, their availability should be verified.

(iii) When financial aid from the Government is to be obtained, the necessity should be verified. Review shall be made concerning the applicability of such financing as progress payments or guaranteed loans.

1809.106–7205 Evaluating data and preparing the report.

(a) *Findings of team members.* When the required information has been gathered, each individual participant shall analyze it and evaluate the prospective contractor's capability to perform with respect to the functions element(s) investigated. Each participant shall then provide his findings to the monitor on one or more of the appropriate forms (see FAR 9.106–4(a)) or an attachment or attachments thereto. Where a negative reply is recorded, or where doubt exists, an explanation must substantiate the entry. If a detailed analysis is needed or additional significant information is pertinent, the Form should be supplemented by a narrative report.

(b) *Monitor's evaluation and recommendation.* Based on all the information received from the team members, the monitor shall thoroughly review and evaluate the findings and recommendations, and forward the report to the Chairman of the Review Board with (1) a summary of his findings, and (2) his recommendation concerning award. A recommendation shall be supported by a statement of justification and shall, where the prospective contractor is a small business concern, be coordinated with the cognizant small business specialist.

(c) *Review board action.* Upon receipt of each preaward report, the Chairman of the Review Board shall determine the extent of Review Board action. The requirements of 1809.106–7103(d) above may be satisfied at the discretion of the Chairman by any of the following:

(1) Action by the Chairman alone;

(2) Informal contact by the Chairman with one or more of the Board members; or

(3) Formal action by the entire Board.

(d) *Final actions.* Following the action by the Review Board, the monitor shall forward the report direct to the contracting officer. When advance reports are made by telegraphic communication or telephone, they shall be confirmed by mail without delay. The monitor shall follow up on any requirements for the submission of supplemental reports.

Subpart 1809.2—Qualified Products

1809.200 Scope of subpart.

This subpart prescribes policies and procedures which, like those of FAR Subpart 9.2, are to be followed only in the use of Qualified Products Lists for procurement of microcircuits as authorized by NPD 5320.5, Basic Policy for Electronic Parts and, NMI 5320.6, Implementation of NASA Standard Parts Program.

1809.203 Responsibilities of a specification preparing activity (SPA).

1809.203–70 General.

(a) NASA Headquarters Office of Reliability and Quality Assurance is responsible for justifying, determining, and approving NASA's need for inclusion and continued usage of qualification requirements in specifications under the NASA Microelectronics Reliability Program.

(b) Prior to the procurement of Class "A" microcircuits, as defined in NHB 5300.4(3F), the determination required by paragraph 3F103–2 of that handbook shall be made in writing by an authorized NASA field installation official.

(c) Copies of NHB 5300.4(3F) may be purchased by the public from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

1809.203–71 Waiver of qualification requirements.

When procuring a product under a specification which includes qualification requirements either for the end item or for components of the end item, such qualification requirements can be waived by the NASA installation conducting the procurement. Directing a waiver of the end item qualification requirement, constitutes adequate authorization for waiver of product qualification requirements. Where waivers have been granted, solicitations shall specifically indicate that the qualification requirement is inapplicable. Such information shall also be included in any synopsis of the procurement (see FAR Subpart 5.2).

1809.206 Acquiring qualified products.

1809.206–70 Small businesses.

Where a small business, otherwise eligible for award, has been placed in a special status of a Qualified Products List (see NHB 5300.4(3F)) established as a part of the NASA Microelectronics Reliability Program and the contracting officer has determined that the small business does not appear to have the capacity to perform, the certificate of competency procedures in FAR Subpart 19.6 are applicable.

1809.206–71 Contract clause.

When qualified products are being procured, insert the clause at 1852.209–70 in both the solicitation and resulting contracts.

Subpart 1809.4—Debarment, Suspension, and Ineligibility

1809.402 Policy.

For purposes of FAR Subpart 9.4 and this Subpart, the Assistant Administrator for Procurement is the "debarring official," the "suspension official," and the agency head's "designee."

1809.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.

(a) The Office of Procurement (Code HP–1) is responsible for taking the actions enumerated under FAR 9.404(c).

(b) In compliance with FAR 9.404(c)(5), contracting officers shall consult the Consolidated List to ensure that they do not solicit offers from, award contracts to, or consent to subcontracts with listed contractors, except as otherwise provided in FAR 9.405.

1809.405 Effect of listing.

If it is believed that a new contract or subcontract with a debarred or suspended contractor must be awarded, the contracting officer shall prepare a determination as set out in 1809.405–1(b) below, and forward it to the Assistant Administrator for Procurement (Code HP–1).

1809.405–1 Continuation of current contracts.

(a) The contracting officer may terminate a contract under FAR 9.405–1(a) if it is in the best interest of the Government to do so, unless directed otherwise by the Assistant Administrator for Procurement.

(b) If it is believed that an existing contract or subcontract with a debarred or suspended contractor must be renewed or otherwise extended, the Procurement Officer shall prepare a determination with all necessary support documentation and forward it to the Assistant Administrator for Procurement (Code HP–1) for approval. If approved, the Assistant Administrator shall forward a notice describing the decision to the GSA Office of Acquisition Policy. Some examples of circumstances that may constitute a compelling reason under FAR 9.405–1(b) for award, renewal, or extension include—

(1) The property or services to be acquired are available only from the listed contractor;

(2) The urgency of the requirement dictates that NASA deal with the contractor;

(3) The contractor and NASA have entered into an agreement covering the same events which resulted in the listing, and the agreement includes a decision by NASA not to debar or suspend the contractor; and

(4) For such other reasons related to the national defense or program requirements which necessitate continued business dealings with the listed contractor.

1809.405–2 Restrictions on subcontracting.

When a subcontract must be awarded the procurement officer shall prepare a determination, with all support documentation, and forward it to the Assistant Administrator for Procurement (Code HP–1) for approval. Some examples of circumstances that may constitute compelling reasons are in 1809.405–1(b) above.

1809.406 Debarment.

1809.406–3 Procedures.

The report required by FAR 9.406–3 shall be forwarded by the Procurement Officer to the Assistant Administrator for Procurement (Code H) in accordance with 1809.470, below.

1809.407 Suspension.

1809.407–3 Procedures.

The report required by FAR 9.407–3 shall be forwarded by the Procurement Officer to the Assistant Administrator for Procurement (Code H) in accordance with 1809.470, below.

1809.470 Reporting of suspected causes for debarment, suspension, or evasive actions.

1809.470–1 Situations where reports are required.

A report incorporating the information required by 1809.470–2 below shall be forwarded by the Procurement Officer to the Assistant Administrator for Procurement (Code H) when—

(a) A contractor has committed, or is suspected of having committed, any of the acts described in FAR 9.406–2 and FAR 9.407–2; or

(b) A contractor is suspected of attempting to evade the prohibitions of debarments or suspensions imposed under this Regulation by changes of address, multiple addresses, formation of new companies, or by other devices.

1809.470–2 Contents of reports.

Each report prepared under 1809.470 shall be coordinated with local counsel and shall include substantially the following information, where available:

(a) Name and address of contractor.

(b) Names of the principal officers, partners, owners, or managers.

(c) All known affiliates, subsidiaries, or parent firms, and the nature of the affiliation.

(d) Description of the contract or contracts concerned, including the contract number, and office identifying numbers or symbols, the amount of each contract, the amount paid the contractor and the amount still due, and the percentage of work completed and to be completed.

(e) The status of vouchers.

(f) Whether the contract has been assigned pursuant to the Assignment of Claims Act, and, if so assigned, the name and address of the assignee and a copy of the assignment.

(g) Whether any other contracts are outstanding with the contractor or any affiliates, and, if so, the amount of such contracts, whether they are assigned pursuant to the Assignment of Claims Act, and the amounts paid or due on such contracts.

(h) A complete summary of all pertinent evidence.

(i) A recommendation as to the continuation of current contracts.

(j) An estimate of damages, if any, sustained by the Government as a result of the action of the contractor, including an explanation of the method used in making the estimate.

(k) The comments and recommendations of the contracting officer and local counsel as to (1) whether the contractor should be suspended or debarred, (2) whether any limitations should be applied to such action, and (3) the period of any debarment.

(l) As an enclosure, a copy of the contract(s) or pertinent excerpts therefrom, appropriate exhibits, testimony or statements of witnesses, copies of assignments, and other relevant documentation.

1809.470–3 Addressees and copies of reports.

Reports, including enclosures, shall be submitted in duplicate to the Assistant Administrator for Procurement (Code HP–1) with an additional copy to the Office of General Counsel, NASA Headquarters (Code G).

Subpart 1809.5—Organizational Conflicts of Interest

1809.500 Scope of subpart.

The Assistant Administrator for Procurement has authorized the Procurement Officer to take those actions reserved in FAR Subpart 9.5 for the Head of the Contracting Activity. However, see 1809.503 regarding waivers.

1809.503 Waiver.

The Administrator has designated the Assistant Administrator for Procurement as the approval authority for waivers under FAR 9.503. A request for waiver under FAR 9.503 will be forwarded from the Procurement Officer to the Assistant Administrator for Procurement (Code HS–1) for action.

1809.507 Procedures.

(a) The draft solicitation and contract provision required by FAR 9.507(a) (2) and (3) shall be approved by the Procurement Officer in those cases where the installation has final authority for contractor source selection and by the Assistant Administrator for Procurement (Code HS–1) for NASA Headquarters selection.

(b) The Assistant Administrator for Procurement (Code HS–1) will make the final decision required by FAR 9.507(c)(4).

1809.508 Solicitation provision and contract clause.

1809.508-2 Contract clause.

The contracting officer may insert a clause substantially the same as the clause at 1852.209-71, Limitation of Future Contracting, in solicitations and contracts in compliance with FAR 9.508.

PART 1810—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

Sec.
1810.001 Definitions.
1810.002-70 NASA policy.
1810.004 Selecting specifications or descriptions for use.
1810.004-70 Additional requirements.
1810.004-71 Brand name or equal purchase descriptions.
1810.007 Deviations.
1810.008 Identification and availability of specifications.
1810.008-70 Brand-name or equal awards.
1810.011 Solicitation provisions and contract clauses.

Authority: 42 U.S.C. 2473 (c)(1).

1810.001 Definitions.

"Brand name product" means a commercial product described by brand name and make or model number or other appropriate nomenclature by which such product is offered for sale to the public by the particular manufacturer, producer, or distributor.

1810.002-70 NASA policy.

(a) Each solicitation shall be accompanied by the applicable specifications, standards, plans, drawings, and other pertinent documents, or shall state where such documents may be obtained or examined.

(b) Whenever a specification is deemed inadequate, immediate action shall be taken to effect the issuance of an amendment or a revision in accordance with established procedures to obviate the necessity for repeated departures from the specification.

1810.004 Selecting specifications or descriptions for use.

(a) As required by FAR 10.004(e), appropriate preservation, packaging, packing, and marking requirements will be included in contracts as applicable. The services of packaging technicians shall be used to the maximum extent practicable, for example, for the following purposes:

(1) Development or establishment of preservation, packaging, packing, and marking requirements for individual procurements.

(2) Assistance in evaluating the reasonableness of contractors' packaging, packing, and marking cost estimates or charges.

(b) Unrealistic preservation, packaging, packing, and marking requirements should be reported and changes recommended to the activity originating the requirement and to the contracting officer.

1810.004-70 Additional requirements.

(a) Drawings and data furnished with solicitations shall be clear and legible (see also FAR 10.008).

(b) Many specifications cover several grades or types and provide for several options in methods of inspection. When such specifications are used, the solicitation shall state specifically the grade, type, or method of inspection, on which offers are to be based.

1810.004-71 Brand name or equal purchase description.

(a) Purchase descriptions which contain references to one or more brand name products followed by the words "or equal" may be used only when authorized by FAR 10.004(b)(3) and in accordance with this Subpart (see 1810.001 and 1852.210-70).

(b) The words "or equal" should not be added when it has been determined under paragraph (a) above that only a particular product meets the essential requirements of the Government, as, for example, (1) where the required supplies can be obtained only from one source (see FAR 15.210(b)(1) and 1815.105-70) or (2) procurements negotiated under FAR 15.207 for specified medicines or medical supplies where it has been determined that only a particular brand-name product will meet the essential requirements of the Government.

(c) Where feasible, all known acceptable brand-name products should be referenced. Where a "brand-name or equal" purchase description is used, prospective contractors must be given the opportunity to offer products other than those specifically referenced by brand name if such other products will meet the needs of the Government in essentially the same manner as those referenced.

(d) "Brand-name or equal" purchase descriptions should set forth those salient physical, functional, or other characteristics of the referenced products which are essential to the needs of the Government. For example, where interchangeability of parts is required, such requirement should be specified. Purchase descriptions should contain the following characteristics, in addition to those at FAR 10.004(b)(1), to the extent available, and include such other information as is necessary to describe the item required:

(1) Complete common generic identification of the item required;

(2) Applicable model, make, or catalog number for each brand-name product referenced, and identity of the commercial catalog in which it appears;

(3) Name of manufacturer, producer, or distributor of each brand-name product referenced (and address if company is not well known).

(e) When necessary to describe adequately the item required, an applicable commercial catalog description, or pertinent extracts therefrom, may be used if such description is identified in the solicitation as being that of the particular-named manufacturer, producer, or distributor. The contracting officer will insure that a copy of any catalogs referenced (except parts catalogs) is available on request for review by offerors at the contracting office.

(f) When a solicitation contains "brand-name or equal" purchase descriptions, bidders who offer brand-name products referenced in such descriptions shall not be required to furnish bid samples of the referenced brand-name products; however, solicitations may require the submission of bid samples in the case of offerors proposing "or equal" products.

(g) Proposals offering products which differ from brand name products referenced in a "brand-name or equal" purchase description shall be considered for award where the contracting officer determines in accordance with the terms of the clause in 1852.210-70 that the offered products meet fully the salient characteristics requirements referenced in the solicitation. Solicitations shall not be rejected because of minor differences in design, construction, or features which do not affect the suitability of the products for their intended use.

(h) Except as provided in paragraph (i)(1) below, when a "brand-name or equal" purchase description is included in a solicitation, the following shall be inserted after each item so described in the solicitation for completion by the bidder:

Bidding on:
Manufacturer's Name _____
Brand _____
No. _____

(i)(1) Where component parts of an end item are described in the solicitation by a "brand-name or equal" purchase description and the contracting officer determines that application of the clause in 1852.210-70 to such component parts would be impracticable, the requirements of paragraph (h) above

shall not apply with respect to such component parts. In such cases, if the clause is included in the solicitation for other reasons, a statement substantially as follows also shall be included:

The clause entitled Brand-Name or Equal does not apply to the following component parts: (List the component parts to which the clause does not apply.)

(2) In the alternative, if the contracting officer determines that the clause in 1852.210–70 should apply to only certain such component parts, the requirements of paragraph (h) above shall apply to such component parts and a statement substantially as follows also shall be included:

The clause entitled Brand-Name or Equal applies to the following component parts: (List the component parts to which the clause applies.)

(j) The policies and procedures prescribed in paragraphs (a) through (g) above for formally advertised procurements shall be generally applicable to negotiated procurements. If use of the clause is not practicable (as may be the case in exigency purchases), suppliers shall be suitably informed that proposals offering products different from the products referenced by brand name will be considered if the contracting officer determines that such offered products are equal in all significant and material respects to the products referenced.

1810.007 Deviations.

(a) If an exception or deviation from a Federal or military specification is required—

(1) The contracting officer shall, before issuance of the solicitation, submit a fully documented and justified request for the deviation to the Procurement Officer; and

(2) The Procurement Officer shall comply with FAR 10.007(a).

1810.008 Identification and availability of specifications.

1810.008–70 Brand-name or equal awards.

Award documents shall identify or incorporate by reference an identification of the specific products which the contractor is to furnish. Such identification shall include any brand name and make or model number, descriptive material, and any modifications of brand-name products specified in the solicitation. Included in this requirement are those instances where (a) the description of the end item contains "brand-name or equal" purchase descriptions of component parts or of accessories related to the end item and (b) the clause at 1852.210–70 was applicable to such component parts or accessories (see 1810.004–70(i)).

1810.011 Solicitation provisions and contract clauses.

The contracting officer shall, when a "brand-name or equal" purchase description is included in a solicitation, insert the provision at 1852.210–70, Brand-Name or Equal. The provisions may be modified for use in negotiated contracts.

PART 1812—CONTRACT DELIVERY OR PERFORMANCE

Subpart 1812.1—Delivery or Performance Schedules

Sec.
1812.102 Contract clauses.

Subpart 1812.2—Liquidated Damages

1812.202 Policy.

Subpart 1812.3—Priorities, Allocations, and Allotments

1812.302 General.
1812.302–70 NASA program.
1812.370 DO/DX priority rating system.
1812.370–1 Scope of section.
1812.370–2 General.
1812.370–3 Application of ratings.
1812.370–4 Non-rateable items.
1812.371 Reporting of controlled materials requirements.
1812.371–1 Scope of section.
1812.371–2 Reporting responsibility.
1812.371–3 Report content.
1812.371–4 Basis for developing controlled-material requirements.
1812.371–5 Requirements coordination with other Government agencies.
1812.371–6 Requirements review, assembly, and submission to DoD.
1812.371–7 List of controlled materials—Defense Materials System Regulation 1.
1812.372 Special priorities assistance.
1812.372–1 Scope of section.
1812.372–2 General.
1812.372–3 Criteria for special priorities assistance requests.
1812.372–4 Form, preparation, and routing of requests.
1812.372–5 Action by NASA Headquarters.
1812.373 Priority ratings for automatic data processing equipment.

Subpart 1812.5—Suspension of Work, Stop-Work Orders, and Government Delay of Work

1812.505 Contract clauses.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1812.1—Delivery or Performance Schedules

1812.102 Contract clauses.

(a) The contracting officer may use the clause at 1852.212–70, Notice of Delay, when it is desirable to provide for contractor notice of anticipated delays in performance.

(b) The contracting officer shall insert the clause at 1852.212–71, Reports of Works, in all fixed-price research and development contracts and may insert it in cost-reimbursement type contracts. Modifications to this clause may be made to meet the particular requirements of a procurement. Consideration should be given in each case to the desirability of providing for reports on the completion of significant units or phases of the work, in addition to periodic reports and reports on the completion of the entire contract.

Subpart 1812.2—Liquidated Damages

1812.202 Policy.

The contracting officer shall forward recommendations concerning remission of liquidated damages via the head of the contracting activity to the Assistant Administrator for Procurement for submission to the Administrator.

Subpart 1812.3—Priorities, Allocations, and Allotments

1812.302 General.

1812.302–70 NASA program.

(a) It is national policy to require contractors to use ratings and allotment authority to support NASA acquisition to the extent required by the Office of Industrial Resource Administration (OIRA). In addition to the procurement and construction of the Department of Defense (DOD), the Federal Emergency Management Agency (FEMA) has authorized OIRA to provide priorities authority for all procurement and construction programs of NASA. The DOD is the claimant agency to FEMA for NASA.

(b) DOD implementation of all rules and regulations published by OIRA for which the DOD is delegated administrative responsibility is contained in the DOD Priorities and Allocations Manual (PAM).

(c) NASA installations shall comply with the priorities and allocations program as set forth in—

(1) The DOD PAM;

(2) The rules and regulations published by OIRA; and

(3) Sections 1812.370 through 1812.372.

1812.370 DO/DX priority rating system.

1812.370–1 Scope of section.

This section prescribes procedures for the administration of the priority rating system regarding products and equipment, including automatic data processing equipment (see 1812.373), other than controlled materials, required for NASA programs.

1812.370–2 General.

With minor exceptions, the use of priority ratings on both NASA contracts

and purchase orders and on all contractor purchase orders is mandatory. Priority ratings are assigned on individual contracts and purchase orders by NASA personnel to whom authority has been delegated under NMI 5101.8, Delegation of Authority—To Take Actions in Procurement and Related Matters (Assistant Administrator for Procurement). Complete information regarding the use of ratings, method of assignment, items not otherwise eligible for ratings (see 1812.370–4), and additional instructions are set forth in section 2 of the DOD PAM.

1812.370–3 Application of ratings.

A NASA contract or purchase order is "rated" by writing on the contract or order or on a separate paper specifically identified with the contract or order, the following:

(a) DO or DX-(appropriate program code symbol).

(b) The certification prescribed in FAR 12.303(b)(3).

(c) The required delivery date(s).

(d) Signature and title of authorized official.

1812.370–4 Non-rateable items.

(a) Priority rating will not be issued for—

(1) Direct procurement of "controlled materials" (i.e., steel, copper, aluminum, and nickel alloys);

(2) Contracts for services, except those relating to deliveries of materials; or

(3) Items ordered or requisitioned from GSA Federal Supply Service.

(b) In addition to the above, a complete list of non-rateable items and classes of items is contained in Exhibit 1, section 2–1 of the PAM.

1812.371 Reporting of controlled materials requirements.

1812.371–1 Scope of section.

This section contains the procedures for the furnishing by installations of quarterly reports of estimates of requirements for Defense Materials System controlled materials. The installation quarterly reports described in this section are the basis of NASA's consolidated estimates to DOD and to FEMA.

1812.371–2 Reporting responsibility.

(a) *Scope of report.* Installations shall submit quarterly estimates of controlled materials requirements by the codes, forms, shapes, and subdivisions as listed in 1812.371–7 for the applicable claimant programs as described in PAM 2–2. Reports will be submitted on DD Form 614, Materials Requirements—Steel and Nickel Alloys, and DD Form 614–1, Materials Requirements—Copper and Aluminum.

(b) *Report due dates.* Reports for the first quarter of each calendar year shall be forwarded to reach the Office of Procurement, NASA Headquarters (Code HP–1) by the preceding September 1, for the second calendar quarter by the preceding December 1, for the third calendar quarter, by the preceding March 1, and for the fourth calendar quarter by the preceding June 1.

1812.371–3 Report content.

The report required by 1812.371–2 above shall include—

(a) For each separate claimant program, the controlled materials needed for all procurements to be made by the reporting installation showing (1) the materials to be purchased by contractors for producton of Class A products, including construction, and materials for research and development and (2) the materials to be purchased by installations for in-house operations. Materials required for production of Class B products are *not* to be reported; (section 1–4 of the PAM contains the definition of Class A and B products);

(b) A summary or total of the requirements reported in paragraph (a) above; and

(c) A breakout from the data called for in paragraph (a) above and the totals in (b) of estimates for the materials required for items and projects which are of highest national priority. Such programs as are authorized for the special DX priority rating may be found in the DOD Master Urgency List.

1812.371–4 Basis for developing controlled-materials requirements.

The reports submitted in accordance with this section shall be based on the research and development, end-item, and construction programs which take into consideration all funds available or anticipated to become available. Estimates shall reflect the best judgment of the installations, and should, if possible, be derived by multiplying unit weight per item by scheduled production, with due consideration of production and purchasing lead times. When this approach is not feasible, other methods, such as factoring a relationship of materials to dollar value, engineering estimates, contractor estimates, or actual past usage of materials, may be utilized in preparing the requirements. Installations shall maintain records of the methods and data used in preparing the reports for review upon request by the Office of Procurement, NASA Headquarters (Code HP–1).

1812.371–5 Requirements coordination with other Government agencies.

Installations shall *not* report materials requirements for those items purchased by other Government agencies for NASA use. However, end-item quantitative requirements for Class A products will, if requested, be furnished to the contracting office so that it can compute and include the required materials in its submission of reports to the DOD.

1812.371–6 Requirements review, assembly, and submission to DOD.

The Office of Procurement, NASA Headquarters (Code HP–1), will—

(a) Review field installation reports for accuracy of computations and reasonableness of computed quantities in relation to authorized program procurements;

(b) Summarize data received from field installations into an overall NASA report for submission to the DOD; and

(c) Justify and defend NASA estimates as may be necessary before DOD and FEMA.

1812.371–7 List of controlled materials—Defense Materials System Regulation 1.

DOD Code and Material	
1200	*Carbon Steel (including wrought iron) Total*
1212	Ingots, billets, etc. (excluding 1215)
1215	Billets, stock for shell bodies
1221	Bars, cold finished
1222	Bars, hot rolled (excluding 1223 and 1225)
1223	Bars, reinforcing
1225	Bars, stock for shell bodies
1231	Structural shapes
1232	Piling
1240	Pipe and tubing, including threaded couplings
1251	Plates
1252	Sheet and strip (excluding 1261)
1261	Sheet, galvanized
1262	Tin, terne, tin mill black plate
1270	Rails and track accessories
1280	Wheels, tires and axles
1290	Wire rods, wire and wire products
1300	*Alloy Steel (excluding 1000 and 1400) Total*
1312	Ingots, billets, etc.
1314	Castings, armor
1321	Bars, cold finished
1322	Bars, hot rolled
1331	Structural shapes
1340	Pipe and tubing, including threaded couplings
1351	Plates (excluding 1355)
1352	Sheet and strip
1355	Plates, rolled armor
1370	Track accessories
1380	Wheels, tires, and axles
1390	Wire rods, wire and wire products
1000	*Stainless Steel—Non-Nickel Bearing— Total*

1400 *Stainless Steel—Nickel Bearing—Total*
0600 *Nickel Alloys—Total*
0601 5% through 29.9% nickel content
0602 30% through 49.9% nickel content
0603 50% through 100% nickel content
1510 *Brass Mill Copper Base Alloy Products—Total*
1511 Plate, sheet and strip (except 1514)
1512 Rods, bars and wire
1513 Tube and pipe
1514 Ammo cups and discs
1520 *Brass Mill Unalloyed Copper Products—Total*
1521 Plate, sheet and strip
1522 Rods, bars and wire
1523 Tube and pipe
1510 and 1520 *Brass Mill Products—Total (sum lines 1510 and 1520)*
1530 *Wire Mill Products (copper content)*
1540 *Foundry Products*
1550 *Powder—Total*
1551 Powder, copper, unalloyed
1552 Powder, copper base alloys
1600 *Aluminum—Total*
1610 Rods and bars, porcelain coated
1611 Rods and bars, rolled (excluding 1610 and 1612 and excluding stock for 1620, 1630 and 1661)
1612 Rods and bars, rolled, forging and impact extrusion stock
1620 Wire and cable (excluding 1630)
1630 Rivets and rivet wire
1651 Sand castings
1652 Mold castings
1653 Die Castings
1654 Other castings
1661 Shapes, rolled structural
1662 Shapes, extruded (excluding 1663 and 1664)
1663 Shapes, extruded forging stock
1664 Shapes, extruded, porcelain
1670 Sheet, strip and plate (excluding 1671 and stock for 1693)
1671 Sheet, strip and plate, porcelain coated
1680 Tubing
1691 Powder
1692 Ingot
1693 Foil (.005" and thinner)

1812.372 Special priorities assistance.

1812.372-1 Scope of section.

This section contains procedures whereby field installations and contractors may obtain special assistance in expediting delivery of raw materials, supplies, and equipment from commercial sources on NASA programs.

1812.372-2 General.

In most instances, with the use of a priority rating and timely acquisition, it is possible to obtain satisfactory deliveries of materials and equipment to meet program schedules. However, conflicts occasionally occur among priority-rated programs competing for the same resources. A number of factors may cause such a conflict, such as a shortage of capacity to produce a material or product or placement by different sources of similar orders on a supplier which require delivery within the same time period. Resolution of problems of this type is accomplished by using the special priorities assistance procedure described herein if not resolved at the field level. Detailed explanation regarding the special priorities assistance procedure is contained in section 7 of the PAM and the Defense Priorities Regulation 1.

1812.372-3 Criteria for special priorities assistance requests.

(a) Requests for special priorities assistance may be submitted by field installations if there is, as a minimum, a clear demonstration—

(1) Of the relationship and importance of the applicant's requirements to NASA programs;

(2) Of the inability of the applicant to divert materials or equipment from other production to meet requirements;

(3) That failure to obtain the supplies will delay NASA program schedules; and

(4) That satisfactory arrangements cannot be accomplished by the field installation.

(b) Requests may be submitted for assistance in placement of orders as well as to improve deliveries of orders already placed.

1812.372-4 Form, preparation, and routing of requests.

(a) Form ITA–999 shall be used for all special priorities assistance requests. Copies of this form may be obtained from Department of Commerce field offices listed in section 9 of the PAM.

(b) The form shall be prepared in accordance with the instructions in section 7–2, Exhibit 2, of the PAM. Blocks 18 and 19 of the form should be left blank for use of NASA Headquarters and DOD officers. The form may be prepared by any authorized field installation representative or by the prime contractor or subcontractors. Prime contractors may prepare forms for their subcontractors, if expedient. However, all forms prepared by contractors must be endorsed by a NASA representative who preferably shall be the DMS/DPS Officer of the installation administering the contract. Technical offices of field installations having need for expediting assistance are urged to utilize the services of their local DMS/DPS Officer in preparing and processing special-priorities assistance requests.

(c) Special-priorities assistance requests on ITA–999 shall be transmitted in quintuplicate to the Office of Procurement, NASA Headquarters (Code HP–1). For emergency cases involving programs of highest national priority (DX) which warrant special handling to obtain immediate deliveries, requests will be accepted by telephone. Data transmitted by telephone shall be confirmed by submission of a Form ITA–999 through regular mail channels.

1812.372-5 Action by NASA Headquarters.

(a) After receipt of the Form ITA–999 a thorough exploration of the case will be unertaken with a view toward determining the specific deficiency (e.g., lack of capacity, prior higher priority orders, shortage of materials or parts). On the basis of the information developed, action will be taken through the DOD to resolve the case by informal arrangements with the supplier and applicant. If this action is unsuccessful, the case will be endorsed by DOD to OIRA. In either case, one of the following actions will result:

(1) Arrangement for improved delivery dates by informal agreement with the supplier.

(2) Issuance of a one-time only, bottle-neck breaking DX rating—not to be confused with those DX ratings assigned programs of highest national priority.

(3) Issuance of a directive requiring the supplier to produce or deliver the specified item by a specific date.

(b) The Office of Procurement, NASA Headquarters (Code HP–1) will maintain a follow-up of all cases received and notify field installations as to final disposition of individual cases.

1812.373 Priority ratings for automatic data processing equipment.

(a) Industrial priority ratings shall be used when the computer systems or peripheral equipment (1) will be used in direct or logistic support of military operations or (2) is necessary for R&D, production, testing or construction at Government-owned facilities.

(b) Industrial priority ratings shall not be used when the primary function of the equipment will be for administrative or business purposes such as financial management (payroll, budget), insurance programs, or personnel/education/training programs.

(c) Contractor requests to use industrial priority ratings for the acquisition of computers and peripheral equipment as privately-owned capital equipment shall be processed on DD Form 691 (reference DOD Priorities and Allocations Manual). Authorization shall not be granted until the request is thoroughly evaluated to assure that the equipment:

(1) Is to be used for NASA related R&D, production, or construction purposes (i.e., computer-aided design, testing, production process control, etc.);

(2) Is needed to insure timely deliveries on priority rated NASA contracts and purchase orders for approved programs; and

(3) Has the smallest capacity available which is sufficient to meet NASA related requirements.

Subpart 1812.5—Suspension of Work, Stop-Work Orders, and Government Delay of Work

1812.505 Contract clauses.

The Stop-Work Order clause at FAR 52.212–13 is not authorized for use in research contracts with educational or other nonprofit institutions.

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACTING TYPES

PART 1813—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 1813.1—General

Sec.
1813.104 Procedures.

Subpart 1813.2—Blanket Purchase Agreements

1813.203 Establishment of Blanket Purchase Agreements.
1813.203–1 General.

Subpart 1813.3—Fast Payment Procedure

1813.303 Preparation and execution of orders.

Subpart 1813.4—Imprest Fund

1813.403 Agency responsibilities.
1813.403–70 Establishment of imprest funds.
1813.404 Conditions for use.
1813.405 Procedures.

Subpart 1813.5—Purchase Orders

1813.502 Unpriced purchase orders.
1813.505 Purchase order and related forms.
1813.505–2 Agency order forms in lieu of Optional Forms 347 and 348.

Subpart 1813.70—Procurement Request Overlay Method

1813.7001 General.
1813.7002 Limitations on use.
1813.7003 Procedures.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1813.1—General

1813.104 Procedures.

(a) When bulk funding is deemed appropriate see Financial Management Manual 9030–5e and 9040–4b.

(b) See FAR 15.203 for appropriate negotiation authority.

Subpart 1813.2—Blanket Purchase Agreements

1813.203 Establishment of Blanket Purchase Agreements.

1813.203–1 General.

Blanket Purchase Agreements shall be prepared and issued on any Center-prescribed purchase order form.

Subpart 1813.3—Fast Payment Procedure

1813.303 Preparation and execution of orders.

Orders incorporating the fast payment procedure may be issued on Optional Form 347, Order for Supplies or Services, or on other Center-prescribed purchase order form.

Subpart 1813.4—Imprest Fund

1813.403 Agency responsibilities.

1813.403–70 Establishment of imprest funds.

(a) *Authority.* The Director of Financial Management, NASA Headquarters, may authorize, upon approval of the Chief, Disbursing Office of the Treasury Department, the establishment of imprest funds and any required subsequent increases thereto. The number of imprest funds at an installation is generally restricted to the minimum number necessary to assure efficiency in small purchase transactions. Financial Management Manual paragraphs 9650–2 through 9650–15 should be used in conjunction with this Subpart.

(b) *Amount of imprest funds.* The amount of each fund shall be established on the basis of the estimated monthly payments therefrom and the need for replenishment without undue administrative burden. A fund level review shall be made at least semi-annually (see FAR 13.403(a)).

(c) *Imprest fund cashiers.* (1) Imprest fund cashiers are appointed in accordance with Financial Management Manual paragraph 9650–5 and are authorized to make cash payments for materials and nonpersonal services, maintain custody of funds, and file periodic vouchers to account for and replenish the imprest fund. Financial management or fiscal officers and others having access to accounting records or responsibility for originating, approving, processing, or receiving requirements are not eligible for appointment as imprest fund cashiers. In no event shall an imprest fund cashier have access to or control of more than one imprest fund.

(2) An alternate imprest fund cashier may be appointed where (i) the volume of work requires an alternate to the principal cashier or (ii) to provide sevice during the absence of the principal cashier. Appointment requirements for principal cashiers shall apply to alternate cashiers. In planned short-term absences of the principal cashier, cash may be advanced by the principal to the alternate in an amount not to exceed the alternate's limit of the fund. Upon resumption of duties, the principal cashier shall return the cash receipt to the alternate after obtaining paid receipts, subvouchers, and residual cash. In the absence of the principal cashier for more than 15 working days or for a period of time which will require the submission of a reimbursable voucher before the return of the principal, the transfer of funds from the principal to the alternate cashier shall be accomplished as prescribed by Financing Management Manual paragraph 9650–10(c).

1813.404 Conditions for use.

(a) Imprest funds may be used for small purchases when the transaction does not exceed $300 ($500 under emergency conditions).

(b) Imprest funds may also be used for small purchases when—

(1) The supplies or services are available for delivery within 60 days, whether at the supplier's place of business or at destination;

(2) The purchase does not require detailed technical specifications or technical inspection;

(3) Charges for local delivery, parcel post (including c.o.d. postal charges) and line-haul or inter-city transportation charges of $75.00 or less for supplies ordered for payment from imprest funds when the vendor is requested to arrange for delivery; and

(4) C.O.D. charges for supplies ordered for payment from imprest funds.

(c) The conditions for use specified in paragraph (b) above do not preclude the use of imprest funds for other expenditures not related to small purchases (*e.g.*, travel advances, travel expenses, transportation charges, and purchases of postage stamps and transportation tokens or passes) when such expenditures are authorized by other regulations governing the use of imprest funds.

(d) Imprest funds shall not be used for—

(1) Payments of salaries and wages;

(2) Advances, other than those authorized in 1813.405(b); or

(3) Cashing of checks or other negotiable instruments.

1813.405 Procedures.

(a) *Receipt of material.* (1) All material purchased through the imprest fund shall be delivered to a designated receiving activity. The receiver shall examine the material to ascertain that the quantities and items described on the purchase request document and the supplier's sales document are present and in satisfactory condition. If the material is acceptable, the receiver shall stamp the supplier's sales documents "Received and Accepted," date and sign the document, and pass it to the imprest fund cashier for payment. In the absence of a supplier's sales document, a receipted Standard Form 1165, Receipt for Cash-Subvoucher, will be used to record the receipt of purchases made from the imprest fund and shall be processed in the same manner.

(2) When it is not practicable to obtain delivery of material at destination on a c.o.d. basis, advanced arrangement may be made for the material to be picked up. The imprest fund cashier may then advance cash to an authorized individual to pick up and pay for the material. Necessary certifications of receipt and acceptance of material shall be obtained on one of the documents as indicated in paragraph (a)(1) above. Receipt for cash payment (see paragraph (c) below) shall be made on the same document, which will serve as the imprest fund receipt.

(3) When prior arrangements for pick up of material are not practicable, the imprest fund cashier may advance cash to an authorized individual to make a proposed purchase.

(b) *Advance of funds.* Individuals receiving a cash advance from the imprest fund cashier shall be required to sign the "Interim Receipt for Cash" portion of Standard Form 1165. After purchase has been made, the individual will return any unused cash to the imprest fund cashier with the necessary certifications of receipt, acceptance, and cash payment, at which time the imprest fund cashier shall "void" the interim receipt for cash. Cash so advanced should generally be accounted for daily, but cash may be advanced for a period not to exceed five consecutive work days.

(c) *Certification of cash payment.* (1) The original receipt document (or a copy tendered as the original) presented to the imprest fund cashier for payment shall be stamped with a certification containing the following information:

(i) Statement that cash payment was received in full.

(ii) Amount paid.

(iii) Date of payment.

(iv) Signature and title of supplier or his agent receiving the cash payment.

(2) Alterations or corrections to documents tendered for payment shall be initialled by the person making the change. Changes in the amount paid shall be initialled by the individual receiving payment.

(d) *Responsibilities of imprest fund cashier.* Pending receipt of material, the imprest fund cashier shall keep a file of purchase request documents covering imprest fund purchases. Prior to payment or acceptance of the document tendered for settlement of an advance, the cashier shall verify the necessary certification of receipt and the supplier's billed price or the price paid. If the supplier's receipt for cash payment is not obtained for purchase of $15.00 or less, the person making the purchase shall complete and sign the cash receipt document indicating receipt of funds from the imprest fund.

(e) *Payments.* (1) *C.O.D.* Upon presentation of an authorized document with the necessary certification of receipt for supplies or services, the imprest fund cashier or other authorized individual shall pay the supplier or agent and obtain the certification of cash payment as required in 1813.405(c).

(2) *Receipt from common carrier or post office.* When c.o.d. shipments are received or picked up from a common carrier or post office, the certification of cash payment may be accomplished on a list of the packages provided by the post office or common carrier. Such receipt will be supported by copies of the applicable sales document if available.

(3) *Periodic payment.* When a blanket purchase agreement is not suitable and it is administratively convenient and agreeable to the supplier, periodic payments from the imprest fund may be made for supplies delivered on a repetitive basis, provided that the accumulated amount of the deliveries for the specified period does not exceed the doliar limitation imposed on the imprest fund method by 1813.404.

(4) *Failure to ship c.o.d.* When material is ordered c.o.d. but is shipped by the supplier subject to payment by check, Standard Form 1034, Public Voucher for Purchases and Services Other than Personal, may be used to make payment. Under these circumstances, the receiver shall prepare the necessary certification of receipt and forward the receipted document through the imprest fund cashier for attachment of the supporting documents which authorized the shipment and submission to the disbursing officer for payment.

(f) *Reimbursement of imprest funds.* (1) The imprest fund shall be reimbursed in accordance with Financial Management Manual paragraph 9650–9.

(2) When a supplier refunds cash prior to the submission of Standard Form 1129, Reimbursement Voucher, covering such payment, the imprest fund cashier shall accept the refund, return the money to the imprest fund, and enter the amount of the refund on the original of the supplier's receipt. When the refund is made subsequent to the submission of the applicable Standard Form 1129, the imprest fund cashier shall enter the amount of the refund on the retained copy of the reimbursement voucher, promptly submit the refund to the disbursing officer, or by otherwise depositing directly such funds on Standard Form 209, Certificate of Deposit.

(g) *Accounting.* Record keeping shall be based on simplified memorandum records to permit frequent reconciliation of funds and should show (1) the amount of cash received, (2) the amount paid out, and (3) the balance on hand at the close of each day. It is permissible to group numerous small payments by numbering payment documents and affixing to them an adding-machine tape showing the total applying to each grouping of payment documents.

(h) *Review.* The imprest fund cashier shall be required to account for the established fund at any time by cash on hand, paid supplier's receipts, unpaid reimbursement vouchers, and interim receipts for cash. Unannounced reviews, including cash counts, are required to be made of each imprest fund at least quarterly by qualified individuals who are under the jurisdiction of the financial management or fiscal officer of the installation maintaining the imprest fund.

Subpart 1813.5—Purchase Orders

1813.502 Unpriced purchase orders.

(a) NASA contracting officers shall assure that suppliers receiving unpriced purchase orders are carefully selected.

(b) Orders shall not contain an estimated target unit price.

(c) Suitable local records and controls of outstanding unpriced purchase orders shall be maintained to assure regular followup with suppliers until the order is priced. These records should include any information available to support the fairness and reasonableness of the proposed monetary limitation.

1813.505 Purchase order and related forms.

1813.505–2 Agency order forms in lieu of Optional Forms 347 and 348.

Optional Forms 347, 348, or Center-prescribed forms may be used.

Subpart 1813.70—Procurement Request Overlay Method

1813.7001 General.

This method is an acceptable adjunct to other simplified purchase methods and may be used in placing oral orders when BPA's do not exist or, if existing, their use is considered too cumbersome in the instant circumstance. Each transaction is recorded on a small form which attaches to, becomes a part of, and overlays a portion of the procurement request. Suppliers' delivery tickets are used as additional supporting documentation. This method eliminates the administrative requirements for preparing and mailing individual purchase orders. This method may be used where suppliers are willing to accept oral orders and can be reasonably relied upon to fill such orders in accordance with the terms of the oral transaction.

1813.7002 Limitations on use.

This method is *not* to be used where—

(a) The requirements of more than one procurement request are to be combined in a transaction;

(b) More than one delivery will be required (except that where the requirements of a single procurement request are to be equitably divided among several qualified suppliers, a single delivery per supplier shall be required);

(c) An installation prescribed form or Optional Form 347 has been utilized;

(d) It is necessary or desirable to incorporate specifications or other terms and conditions in a written purchase order;

(e) GSA Federal Supply Schedules are to be used; or

(f) Where purchases are to be made from or through other Government agencies.

1813.7003 Procedures.

(a) After competitive selection of the source (see FAR 13.106) the order may be placed by telephone. Particular care is to be taken to ensure that the supplier agrees to accept the order without written confirmation and that the order number, item descriptions, quantities, prices, and other terms and conditions are clearly understood. If the amount of the purchase does not exceed $300 (or $500 under emergency conditions) the supplier should be encouraged to deliver c.o.d. (see FAR 13.404).

(b) The supplier will be given all pertinent and specific instructions at the time of placing the order, including the installation's methods of handling charge purchases to be billed within a period of one month or less.

(c) Upon placing the order, the contracting officer will assure that a preprinted overlay form is affixed to the procurement request, and will, if necessary, after the overlay is filled in, adjust the estimated unit and total cost figures of the procurement request to reflect the actual purchase price. This will be done by lining through the original procurement request figures so that they remain legible. Any other changes in the original information of the procurement request to make it conform to the facts of the purchase will be made in like manner. The preprinted overlay form will contain at least the following information:

Order No _____
Supplier (Name) _____
(Address, City) _____
(State, Zip) _____
Discount Terms _____
Deliver Date _____
Buyer _____
FOB Destination _____
Procurement _____
Placement _____
Code _____
Action: purchase request line items ( ), ( ), (etc.) complete*
Total procurement request action: partial,* complete*
Payment: cash,* charge*

_____
(Contracting Officer Signature) _____
Date Signed _____

(*Circle as appropriate.)

(d) The contracting officer will sign and date the completed overlay form on the procurement request.

(e) The procurement request with overlay will be reproduced and distributed internally in accordance with the installation's local instructions to provide copies to the offices or activities which will be responsible for receiving and accepting the merchandise, making cash payment, or processing charge purchases.

(f) In accordance with local instructions, copies of the supplier's delivery ticket received with the merchandise will be distributed to establish receipt and acceptance of merchandise and serve as a basis for cash payment or obligation of funds and subsequent payment of charge purchases.

PART 1814—FORMAL ADVERTISING

Subpart 1814.2—Solicitation of Bids

Sec.
1814.201 Preparation of invitation for bids.
1814.201–2 Part I—The Schedule.
1814.201–5 Part IV—Representations and instructions.
1814.201–6 Solicitation provisions.

Subpart 1814—Opening of Bids and Award of Contract

1814.406 Mistakes in bids.
1814.406–3 Other mistakes disclosed before award.
1814.406–4 Mistakes after award.
1814.407 Award.
1814.407–8 Protests against award.

Subpart 1814.5—Two-Step Formal Advertising

1814.503 Procedures.
1814.503–1 Step one.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1814.2—Solicitation of Bids

1814.201 Preparation of invitations for bids.

1814.201–2 Part 1—The Schedule.

The contracting officer shall include in this section of the Schedule the data specified—

(a) In FAR 14.201–2;

(b) Elsewhere in the FAR; and

(c) Elsewhere in this Regulation.

1814.201–5 Part IV—Representations and instructions.

(a) *Section L.—Instructions, conditions, and notice to bidders.* In procurements involving mission-critical positions in connection with the Space Transportation System, include a statement that the selected contractor will comply with the provisions of NASA Management Instruction 8610.13, Space Transportation System Personnel Reliability Program. The statement will not be required in procurements for flight crew members or payload specialists when covered by other NMI's which have equivalent screening requirements to NMI 8610.13. See, for example, NMI 7100.16, Payload Specialists for NASA-Related Projects.

(b) *Section M.—Evaluation factors for award.*

(1) If no award will be made for less than the full quantities advertised, include a statement to that effect.

(2) If award is to be made by specified groups of items or in the aggregate, include a statement to that effect.

(3) In unusual cases, where bidders are required to have special technical qualifications due to the complexity of the equipment being purchased or for some other special reason, include a statement of such qualifications.

1814.201–6 Solicitation provisions.

The Assistant Administrator for Procurement, under the deviation authority in FAR 1.404(c) has authorized use of the NASA deviation (see 1852.214–23) to the provision at FAR 52.214–23, Late Submissions, Modifications, and Withdrawals of Technical Proposals under Two-Step Formal Advertising in step one of all two-step formally advertised procurements (see FAR 14.201–6(r)). This deviation allows the contracting officer to accept late technical proposals or proposal modifications if in the contracting officer's judgment, it is in the Govenment's best interest to do so.

Subpart 1814.4—Opening of Bids and Award of Contract

1814.406 Mistakes in bids.

1814.406–3 Other mistakes disclosed before award.

(a) Under the authority delegated by the Administrator in NMI 5101.8, Delegation of Authority—To Take Actions in Procurement and Related Matters (Assistant Administrator for Procurement), the Assistant Administrator for Procurement is authorized to permit the correction of bids under FAR 14.406–3 (a) and (b), and the award of a contract under FAR 14.406–3(d). The Assistant Administrator for Procurement has, in turn, authorized Procurement Officers to permit withdrawal of bids when the conditions in FAR 14.406–3(c) are met. When the Procurement Officer permits withdrawal of a bid, a copy of the determination shall be forwarded to the Office of Procurement, Code HP–1.

(b) When a contractor requests correction of a bid under FAR 14.406–3(a) and it is determined that a mistake has been made but correction is denied and, as an alternative, the contractor requests award under its bid as submitted, the contracting officer must refer the file to the Assistant Administrator for Procurement for determination.

(c) Any doubtful case under FAR 14.406–3 should be forwarded to the Assistant Administrator for Procurement.

1814.406–4 Mistakes after award.

(a) The determination required by FAR 14.406–4 (b) and (c) shall be made by the contracting officer after obtaining concurrence from the Center's Office of Chief Counsel in accordance with FAR 14.406–4(d).

(b) A copy of the determination made under FAR 14.406–4 (b) and (c) shall be forwarded to the Office of Procurement, Code HP–1.

1814.407 Award.

1814.407–8 Protests against award.

(a) For protests filed with NASA Headquarters, a member of Congress, or the General Accounting Office, contracting officers will forward the report required by FAR 14.407–8(a)(2) to the Office of Procurement, Code HP–1. The agency's decision or its Administrative Report to a member of Congress or the General Accounting Office will be signed by the Assistant Administrator for Procurement (Code H).

(b) The notice to other persons required by FAR 14.407–8(a)(3) and the notice to the General Accounting Office required by FAR 14.407–8(a)(5) are the responsibility of the Office of Procurement Code HP–1.

(c) The determination authorizing award of a contract prior to resolution of a protest (FAR 14.407–8(b) (3), (4) and (5)) is the responsibility of the Assistant Adminstrator for Procurement (Code H).

(d) Notice to the protester and others (FAR 14.407–8(b)(5)) is the responsibility of the Assistant Administrator for Procurement (Code H).

(e) Protests filed after award (FAR 14.407(c)) with the contracting officer will be decided by the contracting officer in the same manner as protests filed with the contracting officer before award. Protests filed after award with the General Accounting Office or a member of Congress will be decided by the Assistant Administrator for Procurement. A report from the Contracting Officer, as required by FAR 14.407–8(a)(2), will be forwarded to the Office of Procurement (Code HP–1).

Subpart 1814.5—Two-Step Formal Advertising

1814.503 Procedures.

1814.503–1 Step one.

In addition to FAR 14.503–1(h) and FAR 15.412, see also 1814.201–6 and 1852.214–23 regarding the handling of late technical proposals.

PART 1815—CONTRACTING BY NEGOTIATION

Subpart 1815.1—General Requirements for Negotiation

Sec.

1815.103 Use of negotiation.
1815.105 Competition.
1815.105–70 Noncompetitive procurement.
1815.106 Contract clauses.
1815.106–2 Audit—Negotiation clause.
1815.106–270 Partial small business set-asides.
1815.170 Factors in negotiation.

Subpart 1815.2—Negotiation Authorities

1815.204 Personal or professional services.
1815.213 Technical equipment requiring standardization and interchangeability of parts.
1815.217 Purchases in the interest of national defense or industrial mobilization.
1815.217–70 Records and reports.
1815.270 Construction work.

Subpart 1815.3—Determinations and Findings to Justify Negotiations

1815.302 General.
1815.304 Content.
1815.307 Signatory authority.
1815.307–70 Determinations and Findings by the Administrator.
1815.307–71 Determinations and Findings below the Administrator level.
1815.370 Retention of copies of Determinations and Findings.
1815.371 Formats for Determinations and Findings.
1815.371–1 General.
1815.371–2 Formats for Administrator or Deputy Administrator Determinations and Findings.
1815.371–3 Format for Class Determination and Findings for Exception (11).
1815.371–4 Formats for Determinations and Findings below the Administrator or Deputy Administrator level.
1815.372 Preparation of the Justification for Authority to Negotiate.

Subpart 1815.4—Solicitation and Receipt of Proposals and Quotations

1815.405 Solicitations for information or planning purposes.
1815.405–1 General.
1815.405–70 Application.
1815.405–71 Procedure.
1815.405–72 Special considerations
1815.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).
1815.406–2 Part I—The Schedule.
1815.406–3 Part II—Contract clauses.
1815.406–4 Part III—Documents, exhibits, and other attachments.
1815.406–5 Part IV—Representations and instructions.
1815.406–70 Instructions for technical proposal and business management proposal submission.
1815.407 Solicitatioins provisions.
1815.412 Late proposals and modifications.
1815.413 Disclosure and use of information before award.

Subpart 1815.5—Unsolicited Proposals

1815.502 Policy.
1815.503 General.
1815.505 Content of unsolicited proposals.
1815.506 Agency procedures.
1815.507 Contracting methods.
1815.570 Foreign proposals

Subpart 1815.6—Source Selection

1815.608 Proposal evaluation.
1815.608–70 Technical evaluation.
1815.608–71 Automatic data processing equipment.
1815.610 Written or oral discussion.

1815.613 Alternative source selection procedures.
1815.613–70 General.
1815.613–71 Evaluation and negotiation of procurements conducted in accordance with the Source Evaluation Board Manual (NHB 5103.6)
1815.613–72 NASA solicitation provision.

Subpart 1815.7—Make-or-Buy Programs

1815.704 Items and work included.
1815.706 Evaluation, negotiation, and agreement.

Subpart 1815.8—Price Negotiation

1815.804 Cost or pricing data.
1815.804–3 Exemptions from or waiver of submission of certified cost or pricing data.
1815.805–4 Technical analysis.
1815.805–470 Responsibilities of NASA requirements personnel.
1815.805–5 Field pricing support.
1815.806 Subcontract pricing considerations.
1815.807 Prenegotiation objectives.
1815.807–70 Content of the Prenegotiation Position Memorandum.
1815.807–71 Center reviews.
1815.807–72 Headquarters reviews.
1815.808 Price negotiation memorandum.
1815.870 Subcontract price redetermination.
1815.870–1 General.
1815.870–2 NASA contract clause.
1815.871 Procedures for identifying contractor's unallowable costs.

Subpart 1815.9—Profit

1815.902 Policy.
1815.970 NASA structures approach for profit or fee objective.
1815.970–1 Common factors..
1815.970–2 Additional factors—unusual pricing agreements.
1815.970–3 Facilities capital cost of money.
1815.971 Payment of profit or fee under letter contracts.

Subpart 1815.10—Preaward and Postaward Notifications, Protests, and Mistakes

1815.1002 Debriefing of unsuccessful offerors.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1815.1—General Requirements for Negotiation

1815.103 Use of negotiation.

Among the factors to be considered in determining whether formal advertising is feasible and practicable are—

(a) The number and location of potential suppliers;

(b) The adequacy of the specifications for advertising;

(c) The nature of the items being purchased;

(d) The time available; and

(e) The type of contract contemplated.

1815.105 Competition.

1815.105–70 Noncompetitive procurement.

(a) While competition must be obtained whenever possible, there are circumstances where one institution or company has exclusive or predominate capability by reason of experience, specialized facilities, or technical competence to perform the work within the time required and at reasonable prices. In such a circumstance, the initiating technical office may recommend, for approval by the appropriate authority listed in paragraph (d) below, that only one institution or company is qualified to perform the work or services and that a proposal be solicited only from this source. This recommendation shall be in writing in a separate document entitled Justification for Noncompetitive Procurement (JNCP) and shall contain full and complete justification for the selection in accordance with paragraph (c) below, except as otherwise authorized by paragraph (d)(1) below. In those cases where the initiating technical office does not make such a recommendation, the recommendation may be made by the contracting office, if deemed appropriate. In such a case, the recommendation will be prepared for the signature of an appropriate individual, consistent with the approval requirements of paragraph (d) below, and shall have the concurrence of the cognizant technical office before submission to the approving authority specified in paragraph (d) below, except that such concurrence may be waived in the case of small purchases.

(b) The provisions of this subsection 1815.105–70 do not apply to procurements—

(1) Of $500 or less;

(2) From or through other Government agencies;

(3) Of utility services where the services are available from only one source;

(4) Of industrial facilities required in support of related procurement contracts;

(5) Of flight payloads and/or programs of investigation where source selection is made pursuant to the procedures of NHB 8030.6, Guidelines for Acquisition of Investigation; or

(6) Based on unsolicited proposal where a Justification for Acceptance of Unsolicited Proposal is provided in accordance with Subpart 1815.5.

(c) *Justification for noncompetitive procurement.*

(1) The Justification for Noncompetitive Procurement (JNCP). The JNCP shall—

(i) Fully express the circumstances which make competitive negotiation impractical or not feasible;

(ii) Explain with particularity the exclusive or predominant capability the proposed contractor possesses which meets the requirements of the procurement; and

(iii) Contain in the first sentence an appropriate recommendation *(e.g.,* "I recommend that NASA negotiate only with the *(name of company)* * * * for the detailed documentation and fabrication of *(item being procured)* * * *").

(2) Each JNCP shall reflect the degree of consideration which has been given to other sources in the particular field and the reasons they lack the capability which the proposed contractor evidences. The following illustrations represent factors which should be considered, as appropriate, in preparing the JNCP:

(i) What capability, important to the specific effort, does the proposed contractor have which makes it clearly more desirable than another firm in the same general field?

(ii) What prior experience of a highly specialized nature does the contractor possess which is vital to the proposed effort?

(iii) What facilities and test equipment does the contractor have which are specialized and vital to the effort?

(iv) Does the contractor have a substantial investment of some kind which would have to be duplicated at Government expense by another source entering the field?

(v) If schedules are involved, why are they critical and why can the proposed contractor best meet them?

(vi) If lack of drawings or specifications is a guiding factor, why is the proposed contractor best able to perform under these conditions? Why are drawings and specifications lacking? What is the leadtime required to get drawings and specifications suitable for competition?

(vii) Are Government-owned facilities involved?

(viii) State whether the procurement is/is not a continuation of previous effort performed by the proposed contractor. If a continuation, include the following.

(A) The basis on which the initial selection was made (*i.e.,* competitive or noncompetitive and, if noncompetitive, the reasons therefor), contract period, dollar value, and a brief description of the scope of work.

(B) A résumé of all subsequent awards up to the current action containing detail as described in paragraph (c)(2)(viii)(A) above.

(ix) Does the proposed contractor have personnel considered predominant experts in the particular field?

(x) Is competition precluded because of the existence of patent rights, copyrights, or secret processes?

(xi) Are parts or components being procured as replacement parts in support of equipment specially designed by a manufacturer where data available are not adequate to assure that the parts or components will perform the same function in the equipment as those parts or components being replaced?

(xii) State if the potential for continuation of the procurement does/does not exist. If the potential exists, state whether it will be competitive or noncompetitive, and identify the contemplated performance period.

(d) *Review and approval.* The original and 10 copies shall be submitted, and the position title will be shown for each individual signing the JNCP. The JNCP shall, as a minimum, be reviewed and approved as follows:

(1) For purchases of $1,000 or less but not in excess of the ——— small purchase limitation, the JNCP may be in the form of a statement and shall be submitted for the approval of the contracting officer, except as provided in paragraph (d)(6) below.

(2) For procurements in excess of the small purchase limitation, but not in excess of $100,000, the JNCP shall be submitted for the approval of the Procurement Officer, except as provided in paragraph (d)(6) below, or designees after prior review and written concurrence by the initiating technical individual's immediate superior. Such authorization shall be in writing and shall not be delegated beyond the first level of supervision below the Procurement Officer.

(3) For procurements in excess of $100,000, but less than the dollar amount set forth below for the installation concerned, the JNCP shall be submitted for the approval of the Procurement Officer, except as provided in paragraph (d)(6) below, or a designee after prior review and written concurrence by the head of the cognizant technical division or laboratory, as applicable:

(i) $1,250,000 for—

(A) National Space Technology Laboratories

(B) Headquarters Contracts and Grants Division

(C) NASA Resident Office—JPL

(ii) $2,500,000 for—

(A) Ames Research Center

(B) Goddard Space Flight Center

(C) Johnson Space Center

(D) Kennedy Space Center

(E) Langley Research Center

(F) Lewis Research Center

(G) Marshall Space Flight Center

(4) For procurements within the range of the dollar amounts set forth below for the installation concerned, the JNCP shall be submitted for the approval of the Head of the Installation, Deputy or Associate Director (the title "Associate Director" means a full Associate Director and not an Associate Director for * * *) after prior review and written concurrences by the Director or Assistant Director of the cognizant technical directorate, cognizant Program Manager, or cognizant staff official, as applicable, who reports directly to the Head of the Installation, and by the Procurement Officer:

(i) $1,250,000 but less than $2,500,000 for—

(A) National Space Technology Laboratories

(B) Headquarters Contracts and Grants Division

(C) NASA Resident Office—JPL

(ii) $2,500,000 but less than $5,000,000 for—

(A) Ames Research Center

(B) Goddard Space Flight Center

(C) Johnson Space Center

(D) Kennedy Space Center

(E) Langley Research Center

(F) Lewis Research Center

(G) Marshall Space Flight Center

(5) For procurements that are selected for Headquarters review and approval in accordance with the Master Buy Plan Procedure (see Subpart 1807.71), the JNCP shall be submitted for the signature of the Head of the Installation after prior review and written concurrences by the Director or Assistant Director of the cognizant technical directorate, cognizant Program/Project Manager, or cognizant staff official, as applicable, who reports directly to the Head of the Installation and by the Procurement Officer. The JNCP shall contain additional signature blocks, on a separate page for approval by the official designated in the selection of the procurement for Headquarters review and approval under the Master Buy Plan Procedure and for concurrence by cognizant Officials-in-Charge of Headquarters offices and the Deputy Administrator if the Administrator is the approving official.

(6) For procurements involving an individual who was formerly employed by NASA during the past two years or a firm in which such a former employee is a partner, principal officer, majority shareholder, or which is otherwise controlled or predominantly staffed by such former employees (see Subpart 1803.70), the approval of the JNCP shall be one level above that specified in paragraphs (d) (1), (2), and (3) above.

(e) The JNCP shall be attached to the Procurement Plan (see Subpart 1817.1) and made a part of the contract file.

1815.106 Contract clauses.

1815.106–2 Audit—Negotiation clause.

1815.106–270 Partial small business set-asides.

When the conditions in 1819.502–3(a)(2) exist, the clause at FAR 52.215–2, Audit—Negotiation, shall be included in the supplemental agreement and made applicable to the set-aside portion only.

1815.170 Factors in negotiation.

During the course of negotiations, contracting officers and their negotiators shall give due attention to the following and any other appropriate factors:

(a) Comparison of—

(1) The business reputations, capabilities, and responsibilities of the respective persons or firms that submit proposals;

(2) Prices quoted and consideration of other prices for the same or similar supplies or services, with due regard to production costs, including extra-pay shift, multi-shift, and overtime costs, and any other factor relating to price, such as profits, costs of transportation, and cash discounts.

(b) Consideration of—

(1) The quality of the supplies or services offered or the quantity of the same or similar supplies or services previously furnished, with particular regard to the satisfaction of technical requirements;

(2) Delivery requirements;

(3) Cost sharing, if required (see 1816.303);

(4) The size of the business concern;

(5) Whether the prospective supplier requires expansion or conversion of plant facilities;

(6) Whether the prospective supplier is located in a labor surplus area;

(7) Whether the prospective supplier will have an adequate supply of qualified labor;

(8) The extent of subcontracting;

(9) The existing and potential workload of the prospective supplier;

(10) Broadening the industrial base by the development of additional suppliers;

(11) Whether the contractor requires Government-furnished property, machine tools, or facilities, or Government-operated test facilities;

(12) The rules for the avoidance of organizational conflicts of interest (see FAR Subpart 9.5).

(c) Discriminating use of price and cost analyses.

(d) Investigation of price aspects of any important subcontract.

(e) Individual bargaining, by mail or by conference.

(f) Effective utilization in general of the most desirable type of contract.

(g) Advantages or disadvantages to the Government that might result from making multiple awards.

(h) Royalties the Government will be required to pay under patent license agreements.

Subpart 1815.2—Negotiation Authorities

1815.204 Personal or professional services.

(a) Under section 203(c)(9) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2473(c)(9)), NASA is authorized "to obtain services as authorized by section 3109 of Title 5, United States Code, but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS–18." 5 U.S.C. 3109, in turn, provides authority to procure by contract "the temporary (not in excess of one year) or intermittent services of experts or consultants or organizations thereof, including stenographic reporting services."

(b) It is NASA policy to obtain the personal services of experts and consultants by appointment rather than by contract. The policies, responsibilities, and procedures pertaining to the appointment of experts and consultants are in the NASA Federal Personal Manual Supp. 118.

1815.213 Technical equipment requiring standardization and interchangeability of parts.

(a) Actions taken under this authority shall be reviewed at least once every two years to determine whether the standardization should be continued, revised, or canceled.

(b) This authority may be used in situations where only one or a limited quantity of a particular item is to be purchased and where compatibility with existing equipment and interchangeability of parts is essential. The fact that this authority is used in such a case does not mean that a subsequent purchase of similar equipment will necessarily require the use of negotiation for purposes of standardization. The facts involved in each case must be examined to determine whether compatibility with other equipment and interchangeability of parts are essential objectives.

1815.217 Purchases in the interest of national defense or industrial mobilization.

1815.217–70 Records and reports.

Each contracting office shall maintain a record of the name of each contractor with a contract awarded under FAR 15.217, together with the amount of the contract and (with due consideration given to the National security) a description of the work required to be performed thereunder. These records, and reports based thereon, are maintained through the NASA procurement reporting system described in Subpart 1804.6.

1815.270 Construction work.

(a) *Application.* Contracts to construct or repair any building, road, sidewalk, sewer, main, or similar item are subject to 10 U.S.C. 2304(c).

(b) *Limitation.* (1) *Work in the United States.* Contracts for construction work to be performed within the United States shall be formally advertised and may not be negotiated unless authorized pursuant to 10 U.S.C. 2304(a)(1), (2), (3), (10), (11), (12), or (15).

(2) *Work outside of the United States.* Contracts for construction work to be performed outside of the United States shall be formally advertised and may not be negotiated unless authorized under 10 U.S.C. 2304(a) (1) through (17), as appropriate.

(c) *Citation of authority to negotiate.* Negotiated contracts for construction work shall cite as authority for their negotiation the applicable subsection of 10 U.S.C. 2304(a).

Subpart 1815.3—Determinations and Findings To Justify Negotiations

1815.302 General.

While the contracting officer is responsible for preparing the determination and findings (D&F's), requirements and technical personnel are responsible for the accuracy and adequacy of the factual information supporting the findings. Supporting information within the functional areas of requirements and technical personnel shall be furnished the contracting officer in writing.

1815.304 Content.

Date. D&F's shall be dated at the time of signature.

(a) *D&F's signed by the Administrator or Deputy Administrator.*

(1) When approval of the procurement plan by NASA Headquarters is required (see 1807.103–2), the submission of the D&F shall be made concurrently with the submission of the procurement plan and forwarded to the Assistant Administrator for Procurement (Code HS–1) for simultaneous processing for required approvals in NASA Headquarters.

(2) Each request for Administrator or Deputy Administrator determination under 10 U.S.C. 2304(a) (11) through (16) shall consist of—

(i) A memorandum from the Procurement Officer to the Assistant Administrator for Procurement (Code HS–1) recommending approval of the D&F;

(ii) An original and one copy of NASA Form 543, Justification for Authority to Negotiate (JAN);

(iii) An original and three copies of the D&F in the appropriate format required by 1815.371 below; and

(iv) When only one source is to be solicited, a copy of the approved Justification for Noncompetitive Procurement, as required by 1815.105–70 or a copy of the approved "Justification for Acceptance of Unsolicited Proposal," as required by 1815.507.

(3) The signed D&F and the original NASA Form 543 shall be returned to the contracting office. The copies of these documents shall be retained in Headquarters files.

1815.307 Signatory authority.

1815.307–70 Determinations and Findings by the Administrator.

(a) The following D&F's may be made only by the Administrator or Deputy Administrator (but see 1815.307–71):

(1) The determination required by FAR 15.211 regarding any negotiated contract for experimental, developmental, or research work, or for the making or furnishing of supplies for experimentation, development, research, or test (but see 1815.307–71(a)(4) when the amount does not exceed $5,000,000).

(2) The determination required by FAR 15.212 regarding any negotiated contract that should not be publicly disclosed.

(3) The determination required by FAR 15.213 regarding any negotiated contract for technical equipment requiring standardization and interchangeability of parts.

(4) The determination required by FAR 15.216 regarding any negotiated contract for technical or specialized supplies requiring a substantial initial investment or an extended period of preparation for manufacture.

(5) The determination required by FAR 15.214 regarding any negotiated contract entered into after advertising has proved unsatisfactory.

(6) The determination required by FAR 15.217 regarding any negotiated contract entered into in the interest of National defense or industrial mobilization.

(b) In addition to the foregoing determinations, the Administrator or Deputy Administrator may also make any of the D&F's in support thereof, that may be made by the Assistant

Administrator for Procurement or by a contracting officer.

1815.307–71 Determinations and Findings below the Administrator level.

(a) The following levels of approval are established for executing D&F's under the authority of 10 U.S.C. 2304(a)(11) below the Administrator level:

(1) $5,000,000 or less—Assistant Administrator for Procurement.

(2) $500,000 or less—Procurement Officer.

(3) $100,000 or less—Contracting Officer.

(b) When it is estimated that a class D&F will consist of two or more contracts, each of which is estimated to exceed $5,000,000, the class D&F shall be submitted to the Assistant Administrator for Procurement (Code HS–1) for the signature of the Administrator or Deputy Administrator and may only be executed by one of those two officials. When it is estimated that a class D&F will consist of two or more contracts, each of which is estimated to exceed $500,000 but not exceeding $5,000,000, the class D&F shall be submitted to the Assistant Administrator for Procurement (Code HS–1) for execution. When it is estimated that a class D&F will consist of two or more contracts, each of which is estimated to be $500,000 or less, the class D&F will be signed by the Procurement Officer.

1815.370 Retention of copies of Determinations and Findings.

Executed originals of all D&F's and copies of supporting documents shall be preserved in the NASA installation for six years following the date of the respective determination.

1815.371 Formats for Determinations and Findings.

1815.371–1 General.

Modifications as appropriate shall be made in the formats for D&F's when they are used for a class of contracts. Other modifications of a minor nature may be made in individual cases as necessary. The statutory negotiation authority is hereafter referred to as "Exception (11)," "Exception (12)," and so forth.

1815.371–2 Formats for Administrator or Deputy Administrator Determinations and Findings.

(a) *Format for Individual D&F for Exception (11).* See 1815.371–3 for class D&F for Exception (11).

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(11)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property or services described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination, the proposed procurement described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(11). (See Note 1.)

Findings

1. The * * * (2) * * * proposes to procure by negotiation an Infrared Acquisition Aid for AN/FPS–16 Radar located at * * * (2) * * * consisting of (a) a control unit, (b) an infrared tracking head, (c) an electronic signal processing unit, (d) boresighting gear and (e) test equipment. This acquisition aid will permit * * * (2) * * * to track a vehicle from ignition until burnout and maintain the vehicle within the beamwidth of the AN/FPS–16 Antenna so that searching will not be required and thereby enable * * * (2) * * * to acquire an appreciable amount of data which is unobtainable at present.

2. The effort necessary to satisfy the requirement of the comtemplated Infrared Acquisition Aid will require research and development work to accomplish all of the requirements for acquisition assistance, as well as to optimize the field of view required in this instrument to accommodate the high acceleration vehicles launched from * * * (2) * * * Since no acquisition aid capable of meeting all of our performance specifications has ever been built, research will be required to analyze the tracking rates required to allow the Infrared Servo system to acquire and track the specified vehicles. When these rates have been determined for the Infrared Locator with respect to the various launch locations, the contractor must determine the velocity constant and the acceleration constant for the proper servo bandwidth and then design and develop a Servo and Optics system with adequate loop response to accommodate the stringent angular tracking rate requirement.

3. Formal advertising is not feasible or practicable for this procurement because it involves things which have not been done before, such as the aforementioned optimizing of the field of view to accommodate the high acceleration vehicles launched from * * * (2) * * * It is essential that the specifications and evaluation procedures provide a reasonable latitude for the prospective contractors to propose alternate methods for achieving the performance required, and for the Government to evaluate, and explore with the prospective contractors, which of these methods offer the optimum performance in view of the cost and technical advantages.

Determination

The proposed procurement is for developmental and research work, and for the making of property for research. (3)

Date _____

Notes.—

(1) Assistant Administrator for Procurement, Procurement Officer, and Contracting Officer D&F's under 10 U.S.C. 2304(a)(11) (see 1815.307–71) shall be in the same format and contain justification similar to that in the above example except that the preamble. "This D&F is not an approval of a program * * * made available for the purpose," shall be omitted.

(2) Installation.

(3) When appropriate in individual cases, this determination should be limited to the particular kinds of work under the proposed procurement, as such work is described in FAR 15.211.

(b) *Format for D&F for Exception (12).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(12)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property or services described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(12).

Findings

1. The * * * (1) * * * proposes to procure by negotiation * * * (2) * * *, maintenance handbooks for the maintenance and repair of the propulsion system of a YFB–C Research Aircraft being tested jointly by NASA and the United States Air Force.

2. Procurement by negotiation of the above described requirement is necessary because the data to be included in the maintenance handbook is compiled from highly classified tests results and performance data that for reasons of security have been classified as secret. The data in the maintenance handbook describes the stress tolerances for the engine components as well as other classified information that relate to engine thrust levels, speed, and ranges under varying conditions and fuel consumption. Also, included in the document to be prepared and reproduced will be engineering drawings showing various designs of critical parts and components of the propulsion system.

3. Procurement by formal advertising of the above described requirements is impracticable because formal advertising would result in unauthorized public disclosure of information that is classified because of the sensitive character of the data

involved. The information to be made available for this requirement has been classified secret and therefore must be controlled through classified procedures and protected from undue disclosure to avoid jeopardizing the security classification.

Determination

The proposed contract is for property whose procurement should not be publicly disclosed because of their character, ingredients and components. (3)

Date ———————

Notes.—
(1) Installation.
(2) Quantity and description of equipment.
(3) When appropriate in individual cases, this determination should be limited to supplies or to services, as the case may be; and, preferably, refer only to those words in the phrase "character, ingredients, or components" that are germane.

(c) *Format for D&F for Exception (13).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(13)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.
Upon the basis of the following findings and determination the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(13).

Findings

1. The * * * (1) * * * proposes to procure by negotiation * * * (2) * * * The * * * (3) * * * is deemed to be technical equipment within the meaning of section 15.213 of the Federal Acquisition Regulation.

2. Procurement by negotiation of the above described equipment is necessary because standardization of this equipment and interchangeability of its parts are necessary in the public interest. This equipment forms an integral part of the launch system. Its failure due to damage or other causes will render the launch system inoperable. Because of the highly technical nature of this equipment, complexity of the processes involved in its manufacture, and differences in manufacturing equipment and techniques, other suppliers would produce equipment having such variation in the physical characteristics of their parts and in their performance (notwithstanding detailed specifications and rigid inspection) that standardization and interchangeability of parts would be precluded. Accordingly when replacement or repair of equipment manufactured by other suppliers becomes necessary, use of other apparently similar equipment or parts is generally impossible. Standardization of this equipment and interchangeability of its parts are necessary to (i) assure the readiness, maintainability and reliability of the equipment; (ii) materially reduce the quantity of spares and repair parts required to be carried which reduction will result in savings in time, manpower, storage space and costs; and (iii) make possible the interchange of parts among pieces of malfunctioning equipment during launch or any other emergency.

3. Use of formal advertising for procurement of the above described equipment is impracticable because such method may result in procurement from another supplier and thereby prevent standardization of the equipment and interchangeability of its parts.

Determination

The proposed contract is for technical equipment for which standardization and interchangeability of its parts is necessary in the public interest, and procurement thereof by negotiation is necessary to assure such standardization and interchangeability.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(14)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(14).

Findings

1. The * * * (1) * * * proposes to procure by negotiation approximately * * * (2) * * * together with spares, special support equipment, engineering drawings and related data, publications and repair parts under provisioning procedures. The * * * (3) * * * is deemed to be of a technical or special nature within the meaning of section 15.216 of the Federal Acquisition Regulation.

2. Procurement by negotiation of the above described equipment is necessary because the equipment is so intricate and complicated that its manufacture requires a substantial initial investment and if manufactured by any supplier other than * * * (4) * * * would duplicate high starting costs already borne by the Government. Starting costs such as preliminary engineering and development work and other manufacturing preparations by * * * (4) * * *, the developer and only producer of this equipment, have been recovered by the contractor under other contracts with the Government. Generally, such work would not be useful to or usable by any other supplier. Therefore, manufacture of this equipment by any other supplier will result in a duplication of these costs and would likely result in additional costs to the Government by reason of such duplication.

[Alt: * * * because manufacture of this equipment by any supplier other than * * * (4) * * * would result in duplication of necessary preparation which would unduly delay the procurement of the equipment. The manufacture of this equipment requires detailed familiarity with the design and related specifications as well as extensive production engineering and time consuming physical preparation. Deliveries of the equipment are required to commence * * * (5) * * * and be completed in * * * (5) * * * or * * * (6) * * * The * * * (4) * * * has acquired the special skills, manufacturing techniques and experience necessary to manufacture this equipment and can meet the required delivery schedule. No other supplier possessing the special skills and experience necessary to manufacture acceptable equipment in time to meet the delivery schedule is known. Accordingly, manufacture by any supplier other than * * * (4) * * * would require an extended period of preparation for manufacture which would delay delivery of the equipment.]

3. Use of formal advertising for procurement of the above described equipment is impracticable because such method may result in procurement from another source which would require duplication of necessary initial investment to produce this equipment and would likely result in additional cost to the Government by reason of such duplication.

[Alt: * * * because such method may result in procurement from another source which would require duplication of necessary preparation and thereby delay the procurement of this equipment.]

Determination

The proposed contract is for equipment of a technical or specialized nature which requires a substantial initial investment to manufacture, and procurement thereof by formal advertising would likely result in additional cost to the Government by reason of duplication of investment.

[Alt: * * * equipment of a technical or specialized nature which requires an extended period of preparation for manufacture, and procurement thereof by formal advertising would result in duplication of necessary preparation which would unduly delay the procurement of the equipment.]

[Alt: * * * equipment of a technical or specialized nature which requires a substantial initial investment and an extended period of preparation for

manufacture, and procurement thereof by formal advertising would (A) likely result in additional cost to the Government by reason of duplication of investment, and (B) result in duplication of necessary preparation which would unduly delay the procurement of the equipment. (7)]

Date ———————

Notes.—

(1) Installation.

(2) Quantity and description of equipment and estimated cost.

(3) Description of equipment.

(4) Name of supplier.

(e) *Formats for D&F for Exception (14).* (1) *Format (A).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(15)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property or services described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination (1), the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(15).

Findings

1. The * * * (2) * * * proposed to procure by negotiation 12,080 pounds of Hydrazine, Free Base.

2. Procurement by negotiation of the above described supplies is necessary because the bid prices received after formal advertising are unreasonable. In response to Invitation for Bid, * * * (3) * * *, for the above material prepared and mailed, or delivered, to 17 prospective bidders by the * * * (2) * * * in accordance with the requirements of Subpart 14.2 of the Federal Acquistion Regulation, the following responsive bids were received:

Bidder A $6.96 per pound
Bidder B 9.25 per pound
Bidder C 9.30 per pound
Bidder D 9.55 per pound
Bidder E 9.94 per pound

One bid, which failed to conform to the delivery schedule in the Invitation for Bids, was rejected as nonresponsive. The remaining bids comply in all essential respects with the Invitation for Bids. Quantities of individual purchases of this material have been approximately 4,000 pounds. The most recent purchase, approximately one year ago, was for 3,700 pounds. Based on the unit price paid for the above quantity of 3,700 pounds, a unit price of $6.30 per pound was estimated for the proposed procurement of 12,080 pounds. All other terms and conditions were substantially identical to previous purchases. However, comparison of the lowest bid price with prices previously paid for this material, indicates that the bid prices received are unreasonable. * * * (4) * * * (Note: Include such other requirements as may be appropriate.)

3. Use of formal advertising for procurement of the above described supplies is impracticable because bid prices received after formal advertising are unreasonable.

Determination

The proposed contract is for supplies for which bid prices received after formal advertising are unreasonable.

Date: ———————

Notes.—

(1) Where use of the authority of 10 U.S.C. 2304(a)(15) to negotiate after formal advertising is contemplated, two separate D&F's shall be used. See FAR 15.214. This D&F is an example of the first. An example of the second D&F follows (see format (B)).

(2) Installation.

(3) Number or other identification of Invitation for Bids.

(4) In any case where a partial award has been made at bid prices considered reasonable, such fact should be included.

(2) *Format (B).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(15)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of property or services described, only if, in accordance with established agency regulation and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination * * * (1) * * * the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(15).

Findings

1. The * * * (2) * * * proposes to procure by negotiation 12,080 pounds of Hydrazine, Free Base.

2. Procurement by negotiation of the above described supplies is necessary because the bid prices received after formal advertising were unreasonable. Authority to negotiate this procurement under 10 U.S.C. 2304(a)(15) was obtained from the * * * (3) * * * Pursuant to such authority, the Contracting Officer notified each responsive bidder of intention to negotiate and gave each a reasonable opportunity to negotiate. The following proposals were received:

Offeror A $7.95 per pound
Offeror B 8.35 per pound
Offeror C 8.90 per pound
Offeror D 9.10 per pound
Offeror E 9.50 per pound
Offeror F 10.10 per pound

The negotiated price of $7.95 per pound is lower than the lowest rejected bid price of any responsible bidder and is the lowest negotiated price offered by any responsible supplier.

3. Use of formal advertising for procurement of the above described supplies is impracticable because bid prices received after formal advertising were unreasonable.

Determination

The proposed contract is for supplies for which the negotiated price (A) is lower then the lowest rejected bid price of any responsible bidder and (B) is the lowest negotiated price offered by any responsible supplier.

Date: ———————

Notes.—

(1) This is an example of the second D&F which shall be used when the authority of 10 U.S.C. 2304(a)(15) is used to negotiate after formal advertising (see FAR 15.214). An example of the first D&F precedes this example (see Format (A)).

(2) Installation.

(3) Identify the title of the individual signing the first D&F (Format A) and the number and date there.

(f) *Format for D&F for Exception (17).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, D.C. 20546

Determination and Findings

Authority To Negotiate an Individual Contract Under 10 U.S.C. 2304(a)(16)

This determination and findings is not an approval of a program or of specific procurement. It authorizes procurement by negotiation, in lieu of formal advertising, of the property or services described, only if, in accordance with established agency regulations and procedures, the procurement has been made available for the purpose.

Upon the basis of the following findings and determination the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(16).

Findings

1. The * * * (1) * * * proposed to procure by negotiation * * * (2) * * * including repair parts and maintenance manuals.

2. Procurement by negotiation of the above described equipment is necessary because its operational and reliability requirements are so critical that no known supplier other than the * * * (3) * * * has the unique skills, sophisticated production techniques, specialized plant facilities and strict quality control disciplines required for its manufacture. This equipment is a vital component of the * * * (4) * * * and its reliable operation is essential to the proper functioning of the * * * (4) * * * It is in the

interest of national defense to keep * * * (3) * * * available for furnishing this equipment in case of a national emergency.

[Alt. (for a class determination and findings): "* * * because the complexity of this equipment limits the sources of supply and it is in the interest of national defense that * * * (3) * * * and * * * (3) * * * be kept available for furnishing such supplies in case of a national emergency. In such event, the planned mobilization requirements for this equipment will substantially exceed the production capacity of both companies. Therefore in addition to maintaining the manufacturing facilities of both companies for emergency requirements, it is essential that their engineering and production skills be maintained in order to be available for training other companies in the manufacture of this equipment."]

3. Use of formal advertising for procurement of the above described supplies is impracticable because such method may result in procurement from another source (notwithstanding rigid evaluation of bidders qualifications, strict manufacturing disciplines and test requirements) of equipment not meeting qualitative requirements.

[Alt. (for a class determination and findings): "* * * because such method may result in procurement from another source and thus prevent the keeping of vital sources available for mass production in the event of a national emergency."]

Determination

It is in the interest of national defense that the * * * (3) * * * be kept available for furnishing such supplies in the event of a national emergency, and procurement by negotiation is necessary to that end.

[Alt. (for a class determination and findings): "It is in the interest of industrial mobilization that the * * * (3) * * * and * * * (3) * * * be kept available for furnishing such supplies in the event of a national emergency, and procurements by negotiation is necessary to that end."]

Notes.—
(1) Installation.
(2) Quantity and description of equipment and estimated cost.
(3) Name of supplier.
(4) Identify system or other end item (e.g., Space Shuttle).

1815.371-3 Format for Class Determination and Findings for Exception (11).

(a) *Findings.* (1) In the first paragraph, identify the program, the project, and the project number (using the NASA Financial Management Manual, Agency-Wide Coding Structure) to which the contemplated procurements are oriented. The following statements will also be included in the first paragraph:

(i) That the D&F covers only procurement requirements that are provided for and further defined under the program project cited; and

(ii) Identification of the NASA installation initiating the request for authority to negotiate.

(2) In the second paragraph, briefly describe the purpose and objectives of the program or project. Also state that the facts and circumstances which demonstrate that the procurements contemplated are for experimental, developmental, and research work, or for making or furnishing property for experiment, test, development and research are set forth in Appendix A. Clearly and convincingly establish that formal advertising would not be feasible and practicable.

(b) *Determination.* Following the format set forth in the sample below, use the appropriate terms to state precisely whether the proposed class of contracts is for experimental, developmental, or research work, or for making or furnishing property for experiment, test, development, or research; or for a combination of these. Include a statement of the period (see paragraph (c) below) for which the D&F will be effective.

(c) *Appendix A.* A description of the types of procurements to be negotiated under this authority will, to the extent identifiable at the time of preparation of the D&F, be set forth in Appendix A, broken down into generic and functional groupings of like type procurements. To the extent that it can be done, specific procurements will be identified, but the class scope is not limited if the generic scope is clear. The critical element is the need for an adequate generic description in order to satisfy the statutory requirements. Accordingly, each category shall set forth those facts and circumstances that are clearly illustrative of the conditions set forth in 10 U.S.C. 2304(a)(11) for use of this authority. These categories should adequately describe in narrative form the particular types of research and development, hardware and configuration, study effort, advance development, novel interfacing problems, and so forth. The purpose here is to demonstrate that even though precise procurements are not identified, the work categories clearly qualify as R&D, e.g., not within the state-of-the-art and not reasonably procurable by formal advertising. Wherever feasible, procurements involving discrete disciplines or work to be done in particular laboratories should be grouped together to better identify the intended subject matter. The appendix should contain sufficient detail to establish that the proposed procurements logically qualify for negotiation under the criteria in paragraph (a) above.

(d) *Format for Class D&F for Exception (11).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Negotiate a Class of Contracts Under 10 U.S.C. 2304(a)(11)

This determination and findings is not an approval of a program or of specific procurements. It authorizes procurement by negotiation, in lieu of formal advertising, of the property or services described, only if, in accordance with established agency regulations and procedures, the procurement has been authorized and funds have been made available for the purpose.

Upon the basis of the following findings and determination the proposed class of contracts described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(11).

Findings

1. The procurements contemplated by this document will consist of a class of contracts to be accomplished by the * * * (2) * * *, each of which is estimated to cost in excess of $5,000,000, for the accomplishment of research and development requirements in support of Space and Nuclear Research and Technology except that no procurement of property or supplies for which formal advertising is feasible and practicable will be accomplished hereunder. This document will cover procurement requirements that are defined in Appendix A and are under the following program/project citation: Space and Nuclear Research and Technology Program, Research and Technology Base Project, Project No. 506.

2. The proposed class of contracts is in support of the Space Tug Program. In the performance of these contracts, the contractor will be required to perform work which is of a developmental, experimental or research nature which is described in more detail in Appendix A. In summary, the contractor will be required to: (a) investigate design concepts for the hot side of regenerative thrust chambers that will significantly extend low cycle fatigue life by reduction of wall temperatures or heat flux, and (b) design, fabricate, and test a high chamber pressure, regeneratively-cooled, 20K thrust, 400/1 expansion area ratio, rocket thrust chamber.

3. Formal advertising is not feasible and practicable for these procurements because it is impossible to describe in precise detail or by any definite drawings or specifications, the nature of the work to be performed under the proposed contracts; only the ultimate objectives and the general scope of the work can be outlined. In such programs, technical knowledge, experience, and skills are highly necessary in achieving successful results. Under formal advertising such technical experience and skills cannot be evaluated.

Determination

The proposed class of contracts is for experimental, developmental, and research

work, and for making and furnishing property for experiment, test, development, and research. (3)

This class determination and findings shall remain in effect for one year after the date of execution indicated below.

Date ——————

Notes.—

(1) D&F's for procurements of not more than $5,000,000 under 10 U.S.C. 2304(a)(11) shall be in the same format and contain justification similar to that in the above example except that the preamble "This D&F is not an approval of a program * * * made available for the purpose." shall be omitted.

(2) Installation.

(3) When appropriate in individual cases, this determination should be limited to the particular kinds of work under the proposed procurement, as such work is described in 1815.211(a).

SPACE AND NUCLEAR RESEARCH AND TECHNOLOGY, RESEARCH AND TECHNOLOGY BASE, CHEMICAL PROPULSION, PROJECT NO. 506

Appendix A

Advanced Chemical Rocket Component Technology (506)

The Contractor will be required to investigate design concepts for the hot side of regenerative thrust chambers that will significantly extend low cycle fatigue life by reduction of wall temperatures or heat flux for the space tug engine.

The use of film cooling to reduce wall temperature or heat flux has been recently modeled and correlated under contract using heated gas in typical thrust chamber configurations. To fully evaluate film cooling as a tool for extending low cycle fatigue life, additional follow-on contractual effort is required. Such effort shall include interaction with coolant side, film cooling effect on performance, location of film injection, and hot combustion effects. Ultimately, the modeling capability will be made available to LeRC in the form of computer program or design charts.

Advanced Thrust Chamber Technology (506)

The Contractor will be required to design and fabricate a high chamber pressure (2000 psia), 20K thrust, 400/1 expansion area ratio rocket thrust chamber which must have a life expectancy of 300 major thermal cycles with a safety factor of 4. This thrust chamber is to be regeneratively cooled to an area ratio of 100/1. The delivered altitude specific impulse and heat transfer characteristics are to be determined experimentally by the contractor using a LeRC furnished injector. At the completion of these tests, the thrust chamber is to be delivered to LeRC for evaluation of the life expectancy at the S–40 facility.

Additional Sample Categories

The following sample categories or generic descriptions covering various projects are listed for additional guidance in preparation of the appendix of a class D&F. Each category, when considered together with the description of the associated project set forth in paragraph 2 of the D&F, should identify the experimental, developmental, or research nature of the work.

Example No. 1

The procurements under this category are directed toward improving performance of static inverters and converters through improvements to magnetic materials, and the use of modular components and circuits. High frequency operation of magnetic components in static inverters and converters is desirable, to reduce size and weight. However, high frequency operation is limited by the efficiency reduction resulting from high eddy current losses. The magnetic materials program will provide solid magnetic core materials for high frequency operation through the development of multi-layer thin magnetic films, interspersed with bonded thin-film insulation. Since many of the individual stages such as logic, control, regulation, and filter circuits of existing inverters are quite similar, the modularization program will be a study to determine the types and extent of modularization applicable to existing inverters and converters. The objective is to construct building-block types of circuits modules such that inverters and converters for given power requirements can be fabricated from combinations of the various modules. The feasibility of employing existing inverters and converters paralleling techniques to permit parallel operation of power stage modules to increase inverter and converter power output will be verified by breadboard testing.

Example No. 2

The R&D procurements of fuel cells under this category involve work on basic research on electrode structures, high performance lightweight electrodes, improved catalysts, and investigations of methods for using storable reactants in fuel cells. Also involved are procurements for development of an electrically rechargeable fuel cell for orbital energy storage use, and for improved hydrogen-oxygen fuel cells and systems hardware. Fundamental research on the physical properties of electrolyte solutions shall be undertaken. Improved electrolyte matrices will be studied.

Example No. 3

This category involves the design and development of primary and secondary batteries, reserve batteries, and high temperature batteries. Fundamental research on the mechanism and kinetics of reaction of high energy compounds and cathode reactants in nonaqueous electrolytes will be investigated. Experimental work will be required on the compatibility of electrodes, electrolytes, separators, seals, etc. The most promising combinations will be tested in laboratory cells after proper cell design parameters have been determined. Complete performance evaluations will be made on prototype cells and demonstration batteries will be built. Improvements in the design of conventional batteries will be studied. These tasks will include work on improved electrodes and cell designs to produce increased energy output and reliability.

Example No. 4

The procurements in this category are connected with an evaluation of the capabilities of the regenerative Brayton Cycle for achieving high conversion efficiency in the kilowatt electrical power output range. Work that will be performed is divided into three functional areas. In the area of power subsystems, preliminary designs of a radioisotope heat source will be made for the Brayton Cycle Power Conversion System. In addition, subsystem such as the gas management, and the control system will be examined and developed.

In regard to high efficiency, components work will continue to be done to improve the performance of the aerodynamic components as well as the electrical alternator and recouperator components. Axial and radial flow compressors and turbines will be examined for application to the Brayton Cycle System. In the area of bearings and seals for the Brayton application, designs and materials for self-acting gas bearing will be investigated for the high speed, high temperature machines that are being developed. Exploratory work will also be conducted on sophisticated oil bearings, seals, and gas-scrubber system that may be applicable for the Brayton Cycle Space Power System.

Example No. 5

This cateogry of R&D will require the contractor to conduct research for the definition of design parameters for a Simultaneous Stack Gas Emission Control and Wastewater Purification System requiring the contractor to apply various parametric data (for example, scrubber geometry, gas-liquid contact times, liquid and gas flow rates, SO_2 gas concentrations, inhibitors, catalytic oxidation, and recycle rate) to specified design requirements for fuel, scrubbing efficiency, size of plant, waste water flow, SO_2 in exhaust stream, fly ash, ash, flue gas flow, gas temperature, minimum reheat temperature, and exhaust gas moisture in order to define specific simultaneous purification systems. As part of this program, the contractor will be required to develop detailed parametric curves and/or tables reflecting the magnitude of the effects of dependent and independent variables to the scrubbing process; to design a series of detailed process sequences in order to scrub stack gases, including a definition of the complexity of the processes, their utilization under various conditions, and their costs; to establish a technology evaluation of the state-of-the-art in water scrubbing of sulfur dioxide and oxides of nitrogen; to develop bench model units of a simultaneous purification system of stack gases and waste water; and to define a test plan for the bench equipment.

Example No. 6

This category of R&D will require the contract(s) to conduct research for the definition of design parameters which will result in an engine capable of propelling a space shuttle vehicle under the following nominal conditions, none of which can be achieved with existing flight hardware that can be built from existing designs.

(1) Up to 50,000 pounds of discretionary cargo to be placed into earth orbit and returned.

(2) Crew of 2 plus 10 passengers.

(3) Up to 10,000 cubic feet of internal payload volume. The main engine is to be LO2/LH2 high performance, reusable rocket engine, which is to be throttleable down to a 10:1 ratio with up to 800,000 pound sea-level thrust. Previous LO2/LH2 engines have been designed, including the 1,500,000 pound vacuum thrust M–1 Engine, but none of these engines have embodied the high pressure design required to provide the specific impulse and reusable characteristic required of the propulsion system to be incorporated into the proposed space shuttle vehicle. New concepts in the field of liquid propulsion must be incorporated into design criteria for later hardware development.

These contracts will also provide for testing of components (e.g., turbomachinery, and valves), since they will be of configurations and designs not heretofore used in main engines for space vehicles. These contracts will further provide for a study and design of the facilities required for existing facilities (such as the National Space Technology Laboratories) and prevent duplication: and these contracts will provide for the study, definition, and design of modifications to existing test facilities in order that they may meet the engine requirements.

1815.371–4 Formats for Determinations and Findings below the Administrator or Deputy Administrator level.

(a) *Format for D&F for Exception (2).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Determination and Findings

Authority To Negotiate an Individual Contract

Upon the basis of the following findings and determination, the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(2), as implemented by paragraph 15.202(b) of the Federal Acquisition Regulation.

Findings

1. The * * * (1) * * * proposes to procure by negotiation the installation of a composition roof to be installed on Building 631 at * * * (1) * * *. The roof on Building 631 was completely destroyed during a hurricane which caused considerable damage in this area on October 10, 1983. As a result of this emergency condition, the electrical equipment housed in this building is exposed to the inclement weather we are now experiencing and is expected to continue for the next week. Building 631 houses electronic test equipment that is used extensively by NASA to check out aircraft components, avionic systems and guidance and navigation equipment for research test aircraft and the Space Shuttle system. The test equipment housed in Building 631 is very unique to its intended purpose and would require considerable cost for replacement if the equipment is destroyed beyond its usefulness through its exposure to the elements. Also, if this equipment is destroyed or incapacitated beyond its operational capability, it would cause a serious interruption to aircraft safety programs conducted by NASA and FAA which could result in a delay of approximately * * * (2) * * * before a replacement facility can be obtained, tested and established. With present program commitments to ongoing research projects for NASA and other Government agencies, the operational capability of this test facility cannot be interrupted for a * * * (2) * * * period without causing serious problems to programs that are critical to the national interest.

2. Formal advertising for this procurement would not be feasible or practicable because of time constraints. Obtaining a contractor that can immediately undertake and complete this effort is only possible through the process of negotiations. Formal advertising procedures would delay this procurement for approximately * * * (2) * * * and could not provide the flexibility that would accelerate contractor selection and contract award in time for this emergency condition. Therefore, it is essential that this work commence and be completed immediately. The negotiated method of procurement will permit NASA to initiate a compressed and accelerated time frame to competitively select a contractor and make an award within a * * * (2) * * *, time period. Also, with this compressed time frame, it would be possible for the contractor to commence work immediately and complete the job within * * * (2) * * * from date of award.

Determination

The proposed contract is for property * * * (3) * * * for which the public exigency will not permit the delay incident for formal advertisting.

Date _____

Notes.—
(1) Installation.
(2) Time, in days or months as appropriate.
(3) Each determination shall specify whether it is for property or services as applicable.

Determination and Findings

Authority To Negotiate an Individual Contract

Upon the basis of the following findings and determination, the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(10), as implemented by

paragraph 15.210(b)(7) of the Federal Acquisition Regulation.

Findings

1. The * * * (1) * * * proposes to procure by negotiation technical non-personal services in connection with the assembly, installation, or servicing of the * * * (2) * * *. The * * * (2) * * * is deemed to be equipment of a highly technical or specialized nature within the meaning of paragraph 15.210(b)(7) of the Federal Acquisition Regulation.

2. Procurement by negotiation of the above described services is necessary because * * * (3) * * * is the only manufacturer of this equipment and is therefore the only contractor qualified to furnish the required services.

3. Use of formal advertising for procurement of the above described services is impracticable because no other supplier is qualified to furnish the services required.

Determination

The proposed contract is for property or services for which it is impracticable to obtain competition by formal advertising.

Date ————————

Notes.—
(1) Installation.
(2) Description of equipment and estimated cost.
(3) Name of supplier.

(3) *Format (C).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Determination and Findings

Authority To Negotiate an Individual Contract

Upon the basis of the following findings and determination, the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(10), as implemented by paragraph 15.210(b)(13) of the Federal Acquisition Regulation.

Findings

1. The * * * (1) * * * proposes to procure by negotiation * * * (2) * * *.

2. Procurement by negotiation of the above described equipment is necessary because only a developmental model not wholly representative of the equipment to be procured and a performance specification are available. Some additional design and engineering effort by the contractor, including the preparation of design data and quality assurance procedures, will be necessary. The performance specification is not sufficiently detailed to permit advertised bidding. The developmental model was constructed by * * * (3) * * * primarily on the basis of technical contributions from several sources. Government and industry. The design data available are incomplete, not sufficiently detailed and are largely uncoordinated.

3. Use of formal advertising for procurement of the above described equipment is impracticable because it is impossible to draft, for a solicitation of bids, adequate specifications or any other adequately detailed description of the equipment.

Determination

The proposed contact is for property or services for which it is impracticable to obtain competition by formal advertising.

Date ————————

Notes.—
(1) Installation.
(2) Quantity and description of equipment and estimated cost.
(3) Name of activity, Government or industry.

(4) *Format (D).*

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Determination and Findings

Authority To Negotiate an Individual Contract

Upon the basis of the following findings and determination, the proposed contract described below may be negotiated without formal advertising pursuant to the authority of 10 U.S.C. 2304(a)(10), as implemented by paragraph 15.210(b)(15) of the Federal Acquisition Regulation.

Findings

1. The * * * (1) * * * proposes to procure by negotiation certain parts or components as replacement parts in support of the * * * (2) * * *. The latter equipment was specially designed and manufactured by * * * (3) * * *. The estimated cost of the proposed procurement is $————.

2. Procurement by negotiation of the parts or components required as replacement parts in support of the equipment described above is necessary because fully adequate data and quality assurance procedures are not available and cannot reasonably be made available. Only the above named designer and manufacturer of the equipment is capable of furnishing parts or components which assure the requisite safe, dependable and effective operation of the equipment.

3. Use of formal advertising is impracticable because the data available are not adequate to assure that the part or component will perform the same function in the equipment as the part or component it is to replace.

Determination

The proposed contract is for property or services for which it is impracticable to obtain competition by formal advertising.

Date ————————

Notes.—
(1) Installation.
(2) Description of the basic equipment for which the replacement parts or components are to be procured.
(3) Name of designer and manufacturer.

§ 1815.372 Preparation of the Justification for Authority to Negotiate.

(a) The determination to formally advertise or to negotiate is governed by the specific facts in a procurement. When the decision is to negotiate and Administrator or Deputy Administrator authority is required, the proposed D&F must be supported by a procurement plan, as required by 1807.103. In such cases, a NASA Form 543, Justification for Authority to Negotiate (JAN) (see 53.215–543), will be attached to the memorandum requesting approval of the D&F (see 1815.304(b)).

(b) The contracting officer shall be generally responsible for the preparation and justification of the proposed D&F and for all contracting aspects discussed in the supporting justification. Where the information furnished in a justification relates to a proposed class D&F, it shall fully support the proposed negotiation authority as to the class of items as a whole or to each item, whichever is applicable, in order to provide the same information that would have been furnished if the item were covered by an individual D&F.

(c) Information to be included in the JAN is self explanatory, except as follows:

(1) In block 5, include a non-technical description of the features of the property or services to be procured which, in the case of Exception (11), demonstrate that the procurement is for experimental, developmental, or research work, or for the making or furnishing of property for experiment, test, development, or research, or a combination of two or more of the foregoing.

(2) In addition to completing block 12, attach a copy of the Justification for Noncompetitive Procurement or Justification for Acceptance of Unsolicited Proposals, as appropriate.

(3)(i) The following information is to be included in block 13 of the JAN or in an attachment:

(A) If a class D&F is proposed, state that a procurement plan and justification for noncompetitive procurement will be prepared prior to the issuance of the requests for proposals, as required.

(B) If a class D&F is proposed, include a statement with regard to the potential for a small business set-aside on a section 8(a) contract on each procurement. If individual procurements are not susceptible to such preferential procedures, the reasons therefor should be stated.

(C) If an individual D&F is proposed, state why a small business set-aside or Section 8(a) contract is inappropriate. Also, state how many of the firms being solicited are small or disadvantaged business firms.

(ii) The requirements of paragraphs (c)(3)(i) (B) and (C) above are not applicable to a noncompetitive

procurement. However, if the firm is a small or disadvantaged business, so state.

(d) The following additional information is required in support of a D&F authorizing negotiation under 10 U.S.C. 2304(a) (11) through (17). When approval of the procurement plan at NASA Headquarters is required, the information will be included in the procurement plan. When approval of the procurement plan is at the Installation level, the information must be included in the JAN or attached to it.

(1) *Exception (12).* The JAN shall contain sufficient information about the item being procured to identify the characteristics warranting a security classification. The simple statement that an item is classified is not sufficient. The nature of the security requirement shall be identified in unclassified language to amplify what will be revealed by data included in the solicitation. A statement shall be included that no other negotiating authority in FAR 15.201 through 15.217 is available for the proposed procurement.

(2) *Exception (13).* Include the following:

(i) A description of previous procurements of the item;

(ii) A statement that the additional units and replacement items of the specific makes and models of technical equipment and parts to be procured have been adopted as standard items of supply in accordance with agency procedures and are—

(A) For use in special situations;

(B) An integral part of or used in direct support of a launch or space vehicle system; or

(C) For use in a particular locality;

(iii) The reasons for standardizing the equipment and why such standardization and interchangeability of parts is necessary in the public interest.

(iv) The results of consideration given each of the factors enumerated in FAR 15.213 and a statement that in arriving at the determination to standardize, other user installations, as applicable, have been consulted in order to insure the full benefit of the action.

(v) A statement that the standardization of the equipment will be reviewed at least once each two years to determine whether the standardization should be continued, revised, or canceled (in cases where standardization of the equipment has previously received Administrator or Deputy Administrator approval, the date the approval was received and the basis for continuing such standardization).

(vi) A statement as to whether or not the initial solicitation of bids or proposals contained the *Notice of Possible Standardization* clause.

(3) *Exception (16).*

(i) If the basis for negotiation is that manufacture of the equipment requires an extended period of preparation for manufacture and its procurement by formal advertising would result in duplication of such preparation which would unduly delay the procurement, the JAN should contain statements of the technical and specialized nature of the item and substantiating data and information clearly demonstrating such duplication of preparation for manufacture and the resulting delay of the procurement, such as the following:

(A) A description of the relationship of the proposed procurement to prior work performed by the proposed contractor, emphasizing the element of delay if the award is made to another contractor.

(B) The associated cost information on the magnitude of the proposed contractor's previous efforts.

(C) The contractor's previous research and development and production contracts, including their respective total time periods and the aggregate dollar values of each kind.

(D) The stage reached in the development or production and any other circumstances which will demonstrate the advantageous lead time of the proposed contractor.

(E) A description of such elements as preliminary engineering and development work already performed by the contractor, including the time required to perform such work, which would not be useful to or usable by any other supplier.

(F) The contractor's ability to make important design changes without repetition of previous engineering effort and the delay that would arise from a new supplier having to acquire the necessary special test equipment and special tooling and to develop essential employee skills.

(G) The minimum lead time for the proposed contractor, establishing that the lead time for any firm other than the proposed contractor would unduly delay the procurement.

(H) The lead time, in terms of months, for other firms as to—

(*1*) Design and engineering;

(*2*) Manufacture of preproduction unit;

(*3*) Test and evaluation; and

(*4*) Acquisition of materials, including special test equipment and special tooling, and manufacture of first production equipment.

(I) The date the requirement originated or was received by the requiring activity.

(J) The date the purchase request was received in the contracting office.

(ii) If the basis for negotiation is that manufacture of the equipment requires a substantial initial investment and its procurement by formal advertising would likely result in additional cost to the Government by reason of duplication of investment, the justification should contain substantiating data and information clearly demonstrating the duplication of investment and additional cost to the Government by reason of such duplication, such as the following:

(A) A description of the type and value of the substantial investment by the proposed contractor or by the Government.

(B) The contracts involved and the identity of any Government-furnished property.

(C) Delineation of costs of the nature described in FAR 15.216(b)(1), (i), (ii), and (iii) (if estimates are used, so state).

(D) The estimated costs which would be duplicated if the procurement were formally advertised; and

(E) The estimated additional costs which the Government would likely incur by reason of such duplication.

(4) *Exception (14).*

(i) Include the following:

(A) Invitation for bid number and date;

(B) The number of firms furnished invitations for bids, number responding, number (if any) rejected as nonresponsive or determined not responsible, a list of the responsible bidders submitting responsive bids, and respective prices submitted.

(C) The installation's original estimate of costs and the basis for the estimate.

(D) A conclusive showing that the responsive bids received are unreasonable as to all or part of the requirements.

(E) If a partial award was made, an explanation thereof.

(F) A list of the firms to be solicited (each responsible bidder that submitted a responsive bid must be included).

(G) A statement that if negotiation is authorized, no contract will be awarded under this authority unless the conditions in FAR 15.214(b) are met and a second D&F is obtained in accordance with 1815.371–2(e)(2).

(ii) See FAR 15.214(b) for procedures where there is evidence that the bid prices were not independently reached in open competition.

(5) *Exception (17).* Emphasis must be placed on the need to negotiate with a particular contractor or contractors, and it must be shown clearly that such necessity arises from genuine

considerations of National defense, or industrial mobilization in the event of a National emergency. The supporting data, as well as the determination and findings, must name the contractors to be kept available and clearly demonstrate that the above considerations form the basis for procurement from such contractors. Additionally, the JAN shall include the following information as applicable and such other information as may be pertinent:

(i) The specific purpose to be served (*i.e.*, for furnishing property or services in case of a National emergency, the interest of industrial mobilization in case of such emergency or the interest of National defense in maintaining active engineering, and research and development would otherwise be subserved) in having a particular contractor, or particular contractors, available in the event of a National emergency.

(ii) The circumstances which make it necessary to keep the proposed contractors available for this particular purpose.

(iii) If for maintaining active engineering, research and development, the circumstances which require negotiation under this authority.

(iv) The technical complexity and criticality of the item.

(v) The procurement history of the item and the firms which have produced it.

(vi) The reasons for lack of sources.

(vii) The current annual requirement and prospective needs for the item.

(viii) If, for maintenance of an existing mobilization base, the contractor's loss of capability to produce the item in the quantities and within the time required by the mobilization planning if the contract is awarded to other suppliers, the specialized capabilities that will be lost, and the time that would be necessary to reacquire such capabilities in the event of a National emergency.

(ix) When the establishment of additional source(s) is necessary to provide production capability to meet current and emergency requirements, the following:

(A) The current annual and the mobilization requirements for the item, citing the source of or the basis for such planning data.

(B) The comparison of current production capacity necessary to meet mobilization requirements.

(C) The hazards of relying on present sources and the time required for a new source to acquire the necessary facilities and skills and achieve the production capacity of both old and new source(s) to that necessary to meet mobilization requirements.

Subpart 1815.4—Solicitation and Receipt of Proposals and Quotations

1815.405 Solicitations for information or planning purposes.

1815.405-1 General.

Solicitations for informational or planning purposes are particularly useful when a procurement can be properly negotiated only after potential offerors have had an opportunity to become familiar with a large quantity of relevant data, or where it would be desirable to have industry participation in the formulation or review of complex specifications or requirements. Solicitations for informational or planning purposes can result in some desirable benefits. Aside from the basic objectives of promoting competition in the private sector and insuring the reasonableness and feasibility of the requirement, potential sources are apprised of NASA requirements in a particular field and invited to submit data for consideration early in the acquisition process without undue expenditure of time, effort, and money. However, such solicitations shall not be used as a means for the prequalification of offerors. It is recognized that the use of solicitations for informational or planning purposes may serve to lengthen the acquisition cycle under some circumstances. Conversely, it may shorten the time required for submitting proposals in situations where a large quantity of data must be analyzed by industry prior to the actual submission of proposals.

1815.405-70 Application.

Solicitations for informational or planning purposes should be utilized when appropriate. Instances where such solicitations would have application include major systems acquisitions or other complex projects where feasibility or technology studies are being conducted (either in-house or by contract) that may have relevance to later competitions. The results of such studies may be made available to industry as soon as they are known or at periodic intervals. Requirements for automatic data processing equipment or support services to perform specified operations or achieve certain results may also be suitable for advance review and comment by the private sector where diverse approaches to the accomplishment of mission objectives may be possible. The material made available in advance may vary from a comprehensive draft of a proposed requirement to a partial draft, e.g., statement of work and/or specifications or reports.

1815.405-71 Procedure.

(a) In making advance information available to industry, sufficient time should be allowed in the acquisition process to permit potential sources an opportunity, commensurate with the task, to prepare and submit a response to the solicitations for informational or planning purposes. Invitations for bids and requests for proposals will not be used for this purpose. Solicitations for informational or planning purposes shall be issued only with prior approval of the Procurement Officer.

(b) The provision at FAR 52.215-3 does not prohibit the allowance, under FAR 31.205-18, of the cost of preparing a response to the solicitation. Solicitations for informational or planning purposes will at least request an expression of interest in the contemplated requirement and will designate a time and place for submission of responses. Each solicitation will define, as explicitly as possible, the information the Government desires and will indicate whether it is contemplated that the solicitation will be followed by a conference. After approval by the Procurement Officer, the solicitation will be forwarded to potential sources and synopsized as required by FAR Subpart 5.2.

(c) Each source responding to the solicitation will be advised of the details of any pending conference. The conference, when provided for, will be conducted by procurement personnel, and should be attended by technical, legal, and other personnel as appropriate. Care must be taken not to prejudice any future competition. Each source shall be furnished identical information in connection with the proposed requirement. Also, care shall be taken to safeguard any information received in confidence.

1815.405-72 Special considerations.

It should be understood that the foregoing procedure does not consitute procurement in the usual sense, where the Government is fully aware of its requirements and has incorporated them in a formal solicitation or where firms are invited to make known their interest in a procurement by responding to a presolicitation notice. Under the solicitations for informational or planning purposes procedure, interested firms may suggest changes in a proposed specification or statement of work, propose alternatives in concept, method, design, system integration, and the like that might result in lower costs

without sacrificing performance, or propose changes in other requirements regarding the product or service involved. Care should be exercised in this connection to avoid potential conflict of interest situations. (See FAR Subpart 9.5.)

1815.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).

(a) Requests for proposals (RFP's), including amendments thereto, shall be prepared by the contracting office with assistance from technical or other offices as required and be issued by the contracting officer or authorized representative. The RFP has a twofold purpose: (1) To convey to prospective contractors the information they need to prepare a proposal properly, and (2) to solicit the information that procurement and technical personnel need to appraise the proposals of prospective contractors.

(b) RFP's shall specify a date for their submission. Any extension of time granted to one prospective contractor shall be granted uniformly to all. Each request for proposals shall be issued to prospective contractors at the same time, and no contractor shall be given an advantage. When advisable, particularly in the case of research and development, proposals shall be requested in two parts: (1) An unpriced technical proposal, and (2) a cost proposal cross-referenced to the technical proposal (see 1815.406–70).

1815.406–2 Part I—The Schedule.

The contracting officer shall include, in addition to requirements specified elsewhere in the FAR and this Regulation, the following in the section indicated of the Schedule:

Section A—Solicitation/contract form.

(a) A statement on the first sheet or on a cover sheet of the request for proposals that: "PROPOSALS MUST SET FORTH FULL, ACCURATE, AND COMPLETE INFORMATION AS REQUIRED BY THE REQUEST FOR PROPOSAL (INCLUDING ATTACHMENTS). THE PENALTY FOR MAKING FALSE STATEMENTS IN PROPOSALS IS PRESCRIBED IN 18 U.S.C. 1001." This statement shall be suitably modified when quotations are requested.

(b) Instructions that offeror promptly acknowledge receipt of the request for proposal or request for quotation and advise whether it intends to submit a proposal or offer.

1815.406–3 Part II—Contract clauses.

Section I, Contract clauses. In addition to the requirements of FAR 15.406–3, the contracting officer shall include in this section the clauses required by this regulation, if these clauses are not required in any other section of the Uniform Contract Format.

1815.406–4 Part III—Documents, exhibits, and other attachments.

Section J, List of Attachments. List here all of the documents, exhibits, and other attachments which make up the solicitation package; give form number, name, date, and number of pages for each document; give type and identifier (for example, "Exhibit A"), name, and number of pages for each exhibit, appendix, or other attachment (for example: work frequency schedules, work breakdown structures, work statements, specifications, special requirements, or other documents too lengthy to be conveniently written into the solicitation proper).

1815.406–5 Part IV—Representations and instructions.

(a) *Section L, Instructions, conditions, and notices to offerors or quoters.* (1) Includes statement that prospective offerors may submit inquiries by writing or calling (collect calls not accepted) (insert name and address, telephone area code, number, and extension).

(2) Include directions for obtaining copies of any documents, such as plans, drawings, and specifications, which have been incorporated by reference.

(3) Indicate the type of contract contemplated, together with type of repricing, and economic price adjustment, if any.

(4) Include a statement that the selected contractor will or will not require access to classified information (see NASA Management Instruction 1650.1, Industrial Security Policies and Procedures).

(5) Indicate the method and format of price quotation desired (fixed-price or cost type, if known at the time), including a reference to the necessity for cost or price breakdown.

(6) Include a description of the information required to support proposed prices; e.g., subcontract structure, purchasing system, royalty, and cost price information (see FAR Subparts 15.7 and 15.8, and FAR Part 44).

(7) Include information regarding the requirements for "Certificate of Current Cost or Pricing Data."

(8) Include instructions for disposition of drawings and specifications supplied with the solicitation.

(9) Include a statement of information required to facilitate evaluation of technical and financial capabilities and a statement covering special technical capabilities which offerors must possess.

(10) Include an instruction reflecting desirability of a separation between the contractor's "Business Management Proposal" and "Technical Proposal." For evaluation purposes separate proposals, where time permits, should be received; therefore, the format should be flexible enough to permit separate requirements (see 1815.406–70).

(11) Include a statement that this solicitation does not commit the Government to award a contract, since the Government reserves the right to reject any or all proposals, or to negotiate separately with any source considered qualified; and that the contracting officer is the only individual who can legally commit the Government to the expenditure of public funds in connection with the proposed procurement.

(12) Include a statement that the solicitation does not commit the Government to pay any cost incurred in the submission of the offer/quotation or in making necessary studies or designs for the preparation thereof, nor to contract for services or supplies. Further, no costs may be incurred in anticipation of a contract with the exception that any such costs incurred at the offeror's risk may later be charged to any resulting contract to the extent that they would have been allowable if incurred after the date of the contract and to the extent authorized by the contracting officer.

(13) In procurements involving mission-critical positions in connection with the Space Transportation System, include a statement that the selected contractor will comply with the provisions of NASA Management Instruction 8610.13, Space Transportation System Personnel Reliability Program. The statement will not be required in procurements for flight crew members or payload specialists when covered by other NASA Management Instructions which have equivalent screening requirements to NMI 8610.13. (See NMI 7100.16, Payload Specialists for NASA-Related Payload.)

(b) *Section M, Evaluation factors for award.* See 1815.406–70 for instructions for Technical Proposals and Business Management Proposal submissions to be included in this section as applicable.

1815.406–70 Instructions for technical proposal and business management proposal submission.

When it is contemplated that the contract will exceed $1,000,000 (or if appropriate lesser amounts), the solicitation should contain requirements for the following information to be

furnished by the offeror in the offer, if applicable, in addition to the information specified in 1815.406 above.

(a) *Technical proposal.* Proposals should include the following:

(1) Method by which the offeror proposes to solve the technical problems of the project, other than information to be furnished elsewhere as a part of program or project support plan summaries (see (a)(7) below).

(2) A specific exception to proposed technical requirements.

(3) Statement of background experience in fields relating to the procurement.

(4) Names and resumes of experience of key technical personnel who will be employed on the project and extent to which each will participate in the performance of the project. Include an organization chart of the segment of offeror's organization which will be directly assigned to the project, listing names and job categories.

(5) Description and location of the company-owned research test and production equipment and facilities which will be available for use on the project. Include a separate list of any additional facilities or equipment required in the performance of the work, and a separate list of existing Government facilities available to the contractor and required for use on the project.

(6) Hourly time estimates (without pricing information) by labor class for each phase or segment of the project, extent to which these estimates are based on the use of employees presently on the offeror's payrolls who will be available for the work as required, and an indication of number and types of personnel necessary to be hired and arrangements made to obtain them.

(7) For negotiated procurements conducted under Source Evaluation Board procedures where detailed program or project support plans will be required as part of the offeror's proposal, and when such plans are not considered to be important discriminators in the evaluation process but only provide technical or management support to the primary product or service being offered, the requirements for these plans shall be described in separate Appendices to the Statement of Work. As part of their original proposal, offerors will be required to submit an estimate of the cost and work force to perform major tasks under each requirement separately identified and a summary of the major task elements to perform each requirement. Offerors will also be required to indicate that they understand that a detailed program or project support plan will be ultimately required if they are selected for negotiations and that such plans will be negotiated into the proposed contract prior to award.

(b) *Business management proposal.* Proposals should include the following:

(1) Organization proposed for carrying out the project, including organization charts showing interrelationship of business management, technical management, and subcontract management, and an indication of all levels of operation and management, from lower levels through intermediate management to top-level management.

(2) Resume of experience of all key personnel who will conduct the managerial affairs of the project.

(3) Contractural procedures proposed for the project to effect administrative and engineering changes, describing differences from existing procedures.

(4) Extent to which offeror has invested corporate funds in research and development work in the project area or directly related areas and plans for future expenditures for such work; and the extent, if any, to which offeror is willing to participate in the cost of the project.

(5) Statement as to capacity at which company-owned research test and production equipment and facilities required in the performance of the work are currently working; and the extent to which such facilities and equipment could handle the additional workload imposed by this project. The cost of any additional facilities or equipment required in the performance of the work with information as to whether such additional facilities or equipment will be contractor-furnished or Government-furnished and a statement of value of exisitng Government facilities available to offeror and required for use on the project, showing the Government agencies and facilities contracts involved.

(6) Statement of past performance and experience including—

(i) List of Government contracts in excess of $1,000,000 received in past three years or currently in negotiation involving mainly research and development work, showing each contract number, Government agency placing the contract, type of contract, and brief description of the work;

(ii) For each cost-type contract, a list of amounts of cost overruns or underruns, reasons therefor, and percentage of fixed fee;

(iii) For each contract, a record of contract completion as against completion date anticipated at time of entering into contract, giving explanations for completion delays; and

(iv) An identification and explanation of any terminations for default or convenience.

(7) Balance sheet for offeror's last fiscal year, accompanied by profit and loss statement.

(8) Detailed cost or price proposal, furnished as a separate, detachable element of the business management proposal.

(9) In soliciting proposals for support services requiring price quotations for a cost reimbursement type contract, the solicitation should contain available data regarding the quantity and quality of supplies and services required. This data should be set forth in terms of work hours of identifiable categories of labor, including experience and related qualifications, and in terms of quantities of supplies, all exclusive of costs. To be responsive, an offeror must submit a detailed cost or price proposal based on the effort described or estimated in the solicitation. If the offeror feels that the work can be accomplished more efficiently with organizational plans, staffing, management, or equipment other than that indicated in the solicitation, it may also submit an alternate proposal supported by a detailed cost or price proposal.

1815.407 Solicitation provisions.

As authorized at FAR 15.412(c) and 1815.412(c), use the NASA Alternate I to FAR 52.215–10 (see 1852.215–10), Late Submissions, Modifications, and Withdrawals of Proposals, in NASA solicitations. Alternate I allows the contracting officer to accept late proposals or proposal modifications if, in the contracting officer's judgment, it is in the Government's best interest.

1815.412 Late proposals and modifications.

(a) Proposals, or modifications thereof, received from qualified firms after the latest date specified for receipt may be considered if there is a probability of a significant reduction in cost to the Government or if there are significant technical improvements, as compared with proposals previously received. In such case, the negotiator shall investigate the circumstances surrounding the submission of the late proposal or modification and evaluate its content and submit written recommendations and findings to the contracting officer as to whether—

(1) The company submitting the proposal has an excusable reason for late submission;

(2) There is an advantage to the Government to consider the proposal:

(3) All companies submitting proposals should be resolicited; and

(4) Time of performance permits such resolicitation.

(b) The contracting officer shall determine whether the proposal should be considered or rejected or whether proposals should be resolicited.

(c) When the failure of a proposal to arrive on time is due solely to delay in the mails for which the offeror was not responsible or when only one proposal is received, the contracting officer may consider the proposal.

(d) Offerors may withdraw their proposals any time prior to award, provided that the conditions in paragraph (g) of the provision at FAR 52.215–10, Late Submissions, Modifications, and Withdrawals of Proposals are satisfied.

1815.413 Disclosure and use of information before award.

The alternate procedures at FAR 15.413–2 shall be used for NASA procurements in lieu of those prescribed at FAR 15.413–1. The Notice at FAR 15.413–2(e) shall be placed on the cover sheet of all proposals whether solicited or unsolicited.

Subpart 1815.5—Unsolicited Proposals

1815.502 Policy.

NASA will foster and encourage the submission of unsolicited proposals relevent to agency mission requirements by—

(a) Informing organizations and individuals of the scientific and technological areas encompassed by NASA's mission;

(b) Issuing notices to the scientific and technological communities which are informative of ongoing programs and areas of activity;

(c) Making no other use of proposals than for evaluation or review purposes unless otherwise specified by law;

(d) Developing appropriate policies and procedures that are consistent with this subpart and that only encourage unsolicited proposal submission and avoid to the extent possible factors that tend to discourage the generation and acceptance of innovative ideas by the unsolicited proposal mechanism;

(e) Ensuring the availability of information for the preparation and submission of unsolicited proposals to NASA;

(f) Maintaining throughout NASA uniform proposal submission requirements that place the least possible burden on the offeror; and

(g) Acknowledging proposals, making suitable evaluations, and notifying the offeror of NASA's decisions in a timely fashion.

1815.503 General.

When it is determined that a meritorious unsolicited proposal is not related to the mission of NASA or may be of interest to agencies in additon to NASA, NASA may identify for the offeror other agencies whose missions bear a relationship to the subject matter of the unsolicited proposal; however, NASA should not transfer responsibility for evaluation to another agency without the express consent of the offeror.

(a) NASA will not accept for formal evaluation unsolicited proposals initially submitted to another agency or to JPL without the express consent of the offeror.

(b) Proposals submitted to NASA may not be transferred to JPL for procurement without the offeror's permission.

1815.505 Content of unsolicited proposals.

In addition to the requirements listed a FAR 15.505, unsolicited proposals submitted to NASA should contain—

(a) *Additional supporting information.* (1) Brief descriptions of the organization, previous work or experience in the field of the proposal, and facilities to be utilized for the work, where appropriate for understanding the proposal.

(2) The identifying number of the basic contract or other agreement, if applicable.

(b) *Renewal information.* Proposals for renewal of ongoing projects are generally simpler to prepare. However, they should cover the items listed at FAR 15.505 (a) through (c) and at (a) above, particularly as dictated by changes since the original award was made. Prior contact with the NASA technical officer is advisable to determine the optimum amount of technical information to include.

1815.506 Agency procedures.

(a) *NASA points of contact—*

(1) *Coordinating offices.* Each NASA field installation will designate an organizational entity as its unsolicited proposal control unit for coordinating the handling of unsolicited proposals in accordance with policies and procedures herein and in FAR Subpart 15.5. Headquarters program offices are designated as coordinating offices for proposals sent directly to them in relation to disseminated information on continuing activities described in paragraph (a)(2) below.

(2) *Proposal submission.* (i) Headquarters offices broadly disseminating information within the scientific and technological communities regarding continuing responsibilities and areas of activity should indicate in the communications that unsolicited proposals relating to such continuing responsibilities and areas of activities should be submitted directly to the originating office, unless submission to a specific field installation is indicated. Responses to any field installation announcements shall be addressed to the unsolicited proposal control unit at that installation.

(ii) Except as provided in paragraph (a)(2)(i) above, unsolicited proposals believed to be of interest to only one NASA field installation should be submitted to that installation, marked for the attention of the unsolicited proposal control unit.

(iii) Except as provided in paragraph (a)(2)(i) above, unsolicited proposals believed to be of interest to NASA Headquarters are to be submitted to NASA Headquarters, Office of Space Science and Applications, Management Operations, Code EPM–2, Washington, DC 20546.

(iv) Except as provided in paragraph (a)(2)(i), proposals from colleges and universities that are of interest to more than one installation should be submitted to NASA Headquarters, Office of Space Science and Applications, Management Operations, Code EPM–2, Washington, DC 20546, whereas such proposals from noneducational and other nonprofit organizations should be submitted to each installation believed to have an interest, marked for the attention of the unsolicited proposal control unit.

(3) *Proposal preparation information.* Information on the preparation of unsolicited proposals may be obtained from field installation contracting offices or NASA Headquarters. Only inquiries from academic researchers should be sent to Code EPM–2. All other inquiries to NASA Headquarters should be addressed to Headquarters Contracts and Grants Division, Code HW–2, Washington, DC 20546.

(4) *Other inquiries.* (i) Advertising material and commercial product offerings may be forwarded to any NASA office or individual.

(ii) Contributions should be sent to the Director of the Staff, Inventions and Contributions Board, NASA, Washington, DC 20546.

(iii) NASA does not have an "informal" or "preliminary" proposal category. Hence, any inquiries or exploratory discussions prior to submission of a complete unsolicited proposal are left as a matter strictly between the interested individuals or

organization and the appropriate NASA office or employee. General guidance on whom to contact is available from the contracting office at each field installation and NASA Headquarters.

(b) *Time of submission.* Unsolicited proposals should be submitted well in advance of the offeror's desired beginning of the proposed effort or activity in order to allow the agency sufficient time to evaluate the proposal and negotiate any resultant contract or other agreement and in ample copies to allow simultaneous study by all reviewers. A minimum of five copies and four months advance submission is suggested.

(c) *Receipt, review, and evaluation.* (1) Each NASA field installation shall adopt procedures that provide for the coordination, control, receipt, and evaluation of proposals in accordance with agency-wide policies and procedures. Because of the sensitivity of the evaluation process, evaluations should be conducted in a manner that will ensure thorough and equitable reviews that are in the best interests of NASA and the offeror.

(2) Unsolicited proposals shall be acknowledged as soon as possible by the office which has been assigned the coordination responsibility and processed in an expeditious manner.

(d) *Reconsideration.* NASA shall not deny reconsideration of a timely and appropriately revised submission which is responsive to an initial determination of inadequacy under FAR 15.506–1.

(e) *Information requirements.* Designated installation coordinating units shall keep records of received proposals and shall provide prompt status information to requestors. At a minimum, the information will include: The number under current active evaluation and the number received, funded, and rejected during the fiscal year. These numbers shall be broken out by source (large business, small business, university, or nonprofit).

1815.507 Contracting methods.

(a) Under FAR 15.507(b)(3), the technical office sponsoring the procurement shall support its recommendation for award of a negotiated, noncompetitive contract with a Justification for Acceptance of Unsolicited Proposal (JAUP). The JAUP shall be based on a comprehensive evaluation of the proposal; it shall include the facts and circumstances that operate to preclude competition and that support the recommended noncompetitive action. Consideration shall include the evaluation factors listed in FAR 15.508–2(a).

(b) For purchases in excess of $1,000, the JAUP shall be in writing and shall be submitted for the approval of the Procurement Officer or a designee after prior review and written concurrence by the head of the cognizant technical division or laboratory, as applicable.

1815.570 Foreign proposals.

Proposals from foreign sources are additionally subject to the provisions of NPD 1362.1, Initiation and Development of International Participation and Cooperation in Aeronautical and Space Programs. Installations shall forward procurement requests for foreign proposals to the Headquarters Contracts and Grants Division, Code HW–2, through the International Programs Division, Code LI–15, for procurement action.

Subpart 1815.6—Source Selection

1815.606 Proposal evaluation.

1815.606–70 Technical evaluation.

(a) Technical evaluation should include—

(1) The contractor's understanding of the scope of the work as shown by the scientific and technical approach proposed;

(2) Availability and competence of experienced engineering, scientific, or other technical personnel;

(3) Availability of necessary research, test, and production facilities;

(4) Experience or pertinent novel ideas in the specific branch of science or technology involved;

(5) The contractor's willingness to devote its resources to the proposed work with appropriate diligence; and

(6) The contractor's proposed method of achieving the reliability required.

(b) In making this evaluation, technical personnel may be given access to portions of the business proposals upon request. After evaluation and preparation of written findings as to selection of source by the technical personnel, proposals shall be returned to the negotiator. The contracting officer is responsible for reviewing the justification in support of the written findings of technical personnel to determine that the justification is adequate and that the documentation is complete.

1815.606–71 Automatic data processing equipment.

In evaluating proposals containing a significant amount of cost for Automatic Data Processing Equipment (ADPE), the contracting officer should obtain from the prospective contractor a feasibility study and a lease-versus-purchase study covering the acquisition of such equipment or service. The contracting officer will obtain the recommendations of the price analyst and appropriate ADPE technical personnel as to the adequacy of the studies and the prospective contractor's determinations resulting from the studies. Particular attention should be given to those proposals containing a high dollar amount for rental of ADPE or complete systems to be used solely for performance of the contract. Current Office of Management and Budget criteria (NHB 2410.1, Computer Resources Management) should be used, where applicable, as a guide in evaluating the contractor's studies. Prospective contractors should be encouraged to—

(a) Use ADPE machine time available within a reasonable geographic distance;

(b) Use telecommunications links to remote Government-owned or -leased ADPE systems; and

(c) Purchase ADPE in preference to leasing the equipment where the financial advantage is the sole or overriding factor.

1815.610 Written or oral discussion.

Procurement personnel, as well as other personnel concerned with the procurement, shall ensure that contract negotiations are completed expeditiously. However, all details of the negotiation must be completed before the contract is actually placed. This includes, to the extent applicable—

(a) Arrangements regarding Government-furnished property, including the contractor's responsibility for controlling, maintaining, and accounting for such property;

(b) Determination that the prospective contractor is responsible, including completion of preaward surveys where required;

(c) Arrangements with other Government agencies for the use of facilities under their control;

(d) Where the contract will be administered by another Government agency, any necessary arrangements with the responsible activity of that agency;

(e) Where the contract will involve access to classified information, verification that required security clearance has been obtained;

(f) The requirement for the furnishing of data by the contractor in the performance of the contract, both for technical evaluation and for competitive reprocurement where follow-on procurement is probable, in those situations where the appropriate

technical office has requested that the contracting officer obtain such data; and

(g) Assuring that the proposal has been included in the contract as an item of deliverable data (where it is considered necessary for NASA to have access during contract performance to proposal technical data which has been qualified by the offeror as protectible data).

1815.613 Alternative source selection procedures.

1815.613–70 General.

The evaluation of proposals received may be accomplished in a number of different ways. Evaluation of proposals received in response to an Announcement of Opportunity will be accomplished in accordance with NHB 8030.6, Guidelines for Acquisition of Investigations. The applicability of and rules for the conduct of source selection in accordance with formal source evaluation board procedures are covered at 1815.613–71 below.

1815.613–71 Evaluation and negotiation of procurements conducted in accordance with the Source Evaluation Board Manual (NHB 5103.6).

(a) *Applicability.* (1) These procedures shall be used for all competitively negotiated procurements conducted in accordance with NHB 5103.6 (excluding procurements for architect-engineer services and procurements for which the procedures have been specifically waived) when—

(i) The estimated cost of the contract exceeds $5,000,000;

(ii) The estimated cost of the contract does not exceed $5,000,000, but it is likely that the source selected will receive other contracts for later phases of the same project which, cumulatively, would total more than $5,000,000 (Examples of this category: (A) Options as defined in FAR Subpart 17.2; (B) agreements-to-agree, wherein the parties agree to negotiate for the extension of the supplies or services being procured; and (C) later phases of the same project subject to the Guidelines for Phase Project Planning concept prescribed by NHB 7121.1, Planning and Approval of Major Research and Development Projects, and/or the Major Systems Acquisition concept prescribed by NMI 7100.14, Major System Acquisitions.); or

(iii) A Source Selection Official determines that the use of the SEB procedures is desirable. Except where the relevance of this paragraph is peculiar to the SEB procedure, the principles expressed herein also apply to other negotiated procurements conducted in accordance with this Regulation.

(2) The detailed procedures regarding the designation and operation of SEB's are in NHB 5103.6.

(3) Evaluation of system design concepts resulting from requests for alternative system design concept proposals in support of a major system acquisition subject to NMI 7100.14 policies and procedures should include, in addition to proposed system function and performance capabilities to meet mission needs and program objectives, and analysis of resources required and benefits to be derived by trade-offs, where feasible, among technical performance, acquisition costs, ownership costs, time to develop and procure, and the relevant accomplishment record of competitors.

(b) *Evaluation and selection procedures. (1) Responsibility of source selection official.* In the final analysis, NASA judgment on the totality of the evaluation will be that of the Source Selection Official. This includes assessment of the procedures followed by the Board, the validity of its substantive evaluations, the relative significant of the several areas of evaluation, and the weightings previously assigned by the SEB, in the light of all the information produced by the source evaluation and selection process.

(2) *Evaluation criteria and weights.* The establishment of evaluation criteria and their weights requires the exercise of judgment on a case-by-case basis. Evaluation criteria and their weighting factors should be tailored to the requirements of each particular procurement. An SEB should not give scores for cost as such. Technical excellence, price or estimated cost, and contractor management capability are important factors in selection. Their relative importance depends on the nature of the products or services procured, with technical considerations having paramount importance in research and development. Any factor may tip the balance when competition is very close as to other factors. Evaluation criteria shall be described in each Request for Proposals (RFP's) fully enough to inform evaluators and prospective offerors of the significant matters to be addressed in the proposals. A general description of the relative weights of categories of evaluation criteria shall be furnished prospective offerors.

(3) *Initial identification of proposals not considered acceptable.* (i) Subsequent to the review of committee ratings and other information known to the committees or the Board and prior to ranking of proposals by the Board, the Board may discontinue the evaluation of any proposal which is unacceptable because—

(A) It does not represent a reasonable initial effort to address itself to the essential requirements of the RFP or clearly demonstrates that the offeror does not understand the requirements of the RFP;

(B) In research or development procurement, a substantial design drawback inheres in the proposal, and sufficient correction or improvement to consider the proposal acceptable would require virtually an entirely new technical proposal; or

(C) It contains major technical or business deficiences or omissions or out-of-line costs which discussions with the offeror could not reasonably be expected to cure.

(ii) Sample technical nonresponsiveness in the sense in which the term is used in formal advertising is not alone sufficient to constitute unacceptability if the proposal is otherwise competitive and negotiations after selection reasonably offer the likelihood of resolution. When there is doubt as to whether a proposal should be rejected initially as unacceptable, that doubt shall be resolved by including it for further consideration.

(iii) Documentation must be prepared by the Board as to why the deficiencies of any proposal are believed to be of sufficient significance to warrant discontinuing the evaluation of a proposal at this point in the evaluation process.

(4) *Board determinations of competitive range.* After initial identification of proposals not considered acceptable, the Board will tentatively rank the remaining proposals in accordance with the established scoring system. After this ranking is completed, the proposals will be reviewed to determine the proposals within the competitive range; namely, those which have a reasonable chance of being selected for final award. In making this determination, the Board will evaluate the potential for improving the competitive position of the proposals by written or oral discussions conducted in accordance with paragraph (b)(5) below. The competitive range will consist of the best proposals, considering mission suitability, cost or price, experience and past performance, and other factors. When there is doubt as to whether a proposal is within the competitive range, that doubt shall be resolved by including it. The initial number of offerors considered as being within the competitive range may be narrowed as a result of the written or oral discussions. However, a proposal

initially included in the competitive range should not be rejected withou giving the offeror an opportunity to submit a revised proposal to serve as the basis for establishing the new competitive range unless the discussions relating to an ambiguity or omission make it clear that the proposal should not have been in the competitive range initially.

(5) *Conduct of written or oral discussions.* (i) *General.* Careful judgment will be exercised in determining the extent of discussions. In some cases, good business practice may warrant having more than one round of discussions with all or some of those firms considered in the competitive range. The time available, the expense and administrative limitations, and the size and significance of the procurement should all be considered in deciding on the type, duration, and depth of the discussions.

(ii) *Cost-reimbursement type contracts and all contracts for research and development.* (A) The contracting officer, in concert with or on behalf of the SEB, will conduct writter or oral discussions of the work to be done and the cost of the work with those concerns whose proposals are within the competitive range. The discussions are intended to assist the SEB or other evaluators *(1)* in understanding fully the proposals and their strengths and weaknesses based upon the individual efforts of each offeror, *(2)* in assuring that the meanings and the points of emphasis of RFP provisions have been adequately conveyed to the offerors so that all are competing equally on the basis intended by the Government, *(3)* in evaluating the personnel proposed by each firm, and *(4)* in presenting a report to the Source Selection Official that makes the discriminations among proposals clear and visible. In this process, prior to contractor selection, the Government's interests are not served by its assuming the role of an information exchange or clearing-house.

(B) In cost-reimbursement type contracts and all research and development contracts, the contracting officer shall point out instances in which the meaning of some aspect of a proposal is not clear and instances in which some aspects of the proposal failed to include substantiation for a proposed approach, solution, or cost estimate.

(C) However, where the meaning of a proposal is clear and the Board has sufficient information to assess its validity and the proposal contains a weakness which is inherent in an offeror's management, engineering, or scientific judgment or which is the result of its own lack of competence or inventiveness in preparing its proposal, the contracting officer shall not point out the weaknesses. Discussions are useful in ascertaining the presence or absence of strengths and weaknesses. The possibility that such discussions may lead an offeror to discover that it has a weakness is not a reason for failing to inquire into a matter where the meaning is not clear or where insufficient information is available, since understanding of the meaning and validity of the proposed approaches, solutions, and cost estimates is essential to a sound selection. Offerors should not be informed of the relative strengths or weaknesses of their proposals in relation to those of other offerors. To do so would be contrary to other regulations which prohibit the use of auction techniques (see FAR 15.610(d)(3)). In the course of discussions, Government participants should be careful not to transmit information which could give leads to one offeror as to how its proposal may be improved or which could reveal a competitor's ideas.

(D) The foregoing guidelines are not all-inclusive. Careful judgment must be exercised in the light of all the circumstances of each procurement to promote the most advantageous selection from the standpoint of the Government while, at the same time, maintaining the fairness of the competitive process.

(E) At the conclusion of discussions, the contracting officer shall give each offeror a reasonable opportunity (with a common cut-off date for all) to support and clarify its proposal. An offeror may, on its own initiative, revise its proposal and make corrections or improvements until the established cut-off date.

(iii) *Fixed-price contracts other than for research and development.* (A) In fixed-price type contracts other than for research and development, the specifications ordinarily described the Government's requirements with more particularity than is possible in cost reimbursement or research and development contracting so that less emphasis is placed on an offeror's introduction of scientific, engineering, and management innovations. The contracting officer will conduct discussions in accordance with the provisions of paragraph (b)(5)(ii) above, except for the difference in paragraph (b)(5)(iii)(B) below.

(B) The contracting officer, in written or oral discussions, shall point out instances in which some aspect of a proposal contains a weakness in relation to the Government's requirements. But, as provided in paragraph (b)(5)(ii) above, the contracting officer shall neither point out the relative strengths or weaknesses of a proposal in relation to those of other offerors nor transmit information which could give leads to one offeror as to how its proposal may be improved or which could reveal a competitor's ideas. The contracting officer shall point out price elements that do not appear to be justified and shall encourage offerors to put forward their most favorable price proposals, but shall not discuss, disclose, or compare price elements of any other offeror.

(6) *Conduct of negotiations prior to selection.* If, after conclusion of written or oral discussions, the SEB considers that the evaluation findings thus far completed are not sufficiently comprehensive for the Source Selection Official to make a decision, it may be prudent and necessary to conduct further discussions or final negotiations with those offerors remaining in the competitive range prior to presentation of the findings to the Source Selection Official. This course of action must be considered as an exception to the SEB process and therefore may be accomplished only with the approval of the Assistant Administrator for Procurement.

(7) *Notice and debriefing.* When a proposal is no longer to be considered for contract award, the offeror will be promptly notified, in writing, together with a general, reasonably brief explanation of the reasons. If an offeror requests, in writing, a debriefing as a result of such notice, it will be accorded a formal debriefing in accordance with NMI 5103.1, Debriefing of Unsuccessful Companies in Competitive Negotiated Procurements. Such a debriefing will be provided at the earliest feasible time, which normally shall be after announcement of the selection decision and prior to award of the contract. However, where the exigency of the situation will not permit delaying the award in order to debrief unsuccessful offerors, such debriefing may be conducted after award.

(8) *Report to source Selection Official.* The SEB report shall contain a summary of the primary points of discussion and will show the effect of the discussions on the evaluation of proposals. The report shall set forth the strengths and weaknesses of each proposal with an estimate of the potential for correction of the principal weaknesses identified. The report also should state the board's estimate of the approximate impact on cost or price that will result from the elimination of correctible weaknesses during negotiations after selection.

1815.613–72 NASA solicitation provision.

The provision at 1852.215–70, Increases in Estimated Costs, shall be included in all requests for proposals to be evaluated pursuant to NASA Source Evaluation Board procedures, when award of a cost-reimbursement type contract (with or without incentive arrangement) is contemplated. The purpose of this provision is to advise the offeror(s) selected for final negotiation that they may not unilaterally increase their estimated costs for the reasons cited therein. Government negotiators are cautioned that in those cases where the second exception applies, there may be instances where such costs do not warrant additional fee.

Subpart 1815.7—Make-or-Buy Programs

1815.704 Items and work included.

As a rule, make or buy programs should not include items or work efforts estimated to cost less than (a) one percent of the total estimated contract price or (b) $5,000,000, whichever is greater.

1815.706 Evaluation, negotiation, and agreement.

The make or buy program review by the activities' small and disadvantaged business utilization specialist and the SBA representative (see FAR 15.706(b)) should be, concurrent with the contracting officers' review. When urgent circumstances preclude this, or where the small and disadvantaged business specialist or SBA representative fails to respond on a timely basis, the contracting officer shall include an explanatory statement in the contract file and transmit a copy to each of them.

Subpart 1815.8—Price Negotiation

1815.804 Cost or pricing data.

1815.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

(a) When granting an exemption under FAR 15.804–3(e)(2) for repetitive submissions of catalog items, Government approval or the exemption claim shall state the effective period, usually not more than one year, and require the contractor to furnish any later information that might raise a question as to the continuation of the exemption. This approval may be extended to other Government contracting offices with their concurrence.

(b) When exempting submission before solicitation under FAR 15.804–3(e)(3), the contracting officer may, by a solicitation provision or otherwise, either dispense with the requirement for a SF 1412 or limit the data required to be submitted on the form. For example, if the item being procured is similar to a commercial item, only an explanation of a price differential may be needed. If the fact of substantial sales to the general public is well known, the actual sales prices, but not the quantity of sales may, be required.

(c) The authority in FAR 15.804–3(i) to waive the requirement for submission of cost or pricing data is delegated to the Assistant Administrator for Procurement without power of redelegation. Set forth below is a format for the Determination and Findings to be made by the Assistant Administrator for Procurement to waive the requirement for submission of cost or pricing data and certification thereof as required by 10 U.S.C. 2306(f). Requests for waivers shall be addressed to NASA Headquarters, Contract Pricing and Finance Office, Code HC–1.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, WASHINGTON, DC 20546

Determination and Findings

Authority To Waive Submission of Cost or Pricing Data and Certificate

Upon the basis of the following findings and determination, the requirement for submission of cost and pricing data and certificate described below may be waived pursuant to the authority of 10 U.S.C. 2306(f), as implemented by NASA FAR Supplement 1815.804–3(c).

Findings

1. The * * * (1) * * * proposes to enter into a contract with * * * (2) * * * for the procurement of * * * (3) * * *.

2. Pursuant to FAR 15.804–2, the proposed contractor is required to submit cost or pricing data as defined in FAR 15.801, together with the certificate in FAR 15.804–4. However, waiver of submission of the cost or pricing data described below is justified for the reasons indicated:

Determination

The requirement for submission of cost or pricing data for the proposed procurement is waived.

Date _____

Notes.—

(1) Installation.

(2) Name of proposed contractor.

(3) Brief description of supplies or services.

(4) Describe the cost or pricing data requirements to be waived. The waiver may be partial *i.e.*, limited to particular cost or pricing data. Describe the circumstances and conditions which make the proposed procurement an exceptional case and state the reasons justifying the proposed waiver.

1815.805–4 Technical analysis.

1815.805–470 Responsibilities of NASA requirements personnel.

NASA requirements personnel are responsible for conducting a technical evaluation of proposals to determine whether the supplies or services offered will meet specifications. In addition, when a cognizant contract administration office is not requested to perform a technical analysis of proposals in accordance with FAR 15.805–5, the analysis will be the responsibility of NASA requirements personnel.

1815.805–5 Field pricing support.

(a) When the price is based on cost or pricing data submitted by the contractor, the contracting officer or authorized representative shall request a field pricing report unless information available to the contracting officer is considered adequate to determine the reasonableness of the proposed cost or price, prior to negotiation of a contract or modification resulting from a proposal in excess of: (1) $100,000, see FAR 15.805–5(a)(1), for firm fixed-price and fixed-price with provision for economic price adjustment, fixed-price redeterminable (prospective), time-and-materials, or labor-hour type of contract, interim and final price redetermination and settlement of incentive types; (2) $250,000 for fixed-price incentive, cost plus incentive fee or fixed-price redeterminable (retroactive) type of contract; or (3) $1,000,000 for cost reimbursement, cost sharing, cost-plus-award-fee, or cost-plus-a-fixed-fee type of contract.

(b) Whenever available data is considered adequate for a reasonableness determination, the contracting officer shall document the contract file to reflect the basis of the determination. Information of the type described in paragraphs (b) (1) through (6) below, which is often available to the contracting officer from the cognizant contract administration office, should be useful in determining the extent of any field pricing support that is needed. No single category of information is necessarily sufficient by itself; for example, information as to rates for labor and overhead would normally require data concerning the base elements-labor hours, material costs, and so forth, to which the rates apply.

(1) In-house engineering determination of level of effort required in connection with research and development or study contracts.

(2) Audited cost information from contract awards in process or recently negotiated contracts.

(3) Adequately reviewed data on proposed subcontract items which constitute the major portion of the prime contract price proposal.

(4) Prices of standard commercial items which constitute the major portion of the prime contract price proposal.

(5) Special forward pricing formulas or rates such as for support items or forecast overhead rates prescribed in an existing advance agreement.

(6) Current labor rates, overhead rates, loading factors, per diem rates, and lot data based upon actual costs and labor hours.

(c) The Defense Contract Audit Agency provides procurement liaison auditors at most NASA installations to facilitate the receipt and use of audit service and to provide accounting and audit advice as to whether or not audit review of a price proposal should be waived.

1815.806 Subcontract pricing considerations.

The appropriate contract administration activities will be notified by the contracting officer when review and evaluation of subcontractor's proposals (a) will require extensive field pricing assistance in connection with a major acquisition or (b) require special or expedited action by field pricing personnel and such action is being or has been delayed.

1815.807 Prenegotiation objectives.

Prior to conducting negotiations that require Center or Headquarters review, contracting officers or their representatives shall prepare a Prenegotiation Position Memorandum setting forth the technical, business, contractual, pricing, and other aspects to be negotiated. Matters for negotiation may result from proposal evaluations, contractor requests, unique Center requirements, and other Government agencies' requirements, among others.

1815.807-70 Content of the Prenegotiation Position Memorandum.

The Prenegotiation Position Memorandum (PPM) should fully explain the contactor and Government positions on any open issues as well as identify and justify the elements that are acceptable as proposed. Since the PPM will ultimately become the basis for negotiation, it should be structured to provide an audit trail to the Contract Negotiation Memorandum (see FAR 15.808 and 1815.808). Generally, the PPM should address the following subjects in the order presented:

(a) *Introduction.* Include a brief description of the procurement and a brief history indicating the extent of competition and results thereof. The identification of the contractor and the place of performance (if not evident from the description of the procurement) shall be included. In addition, the negotiation schedule should be addressed and the Government negotiating team members identified by name and position.

(b) *Special features and requirements.* In this area, discuss any special features (and related cost impact) of the procurement including such items as—

(1) Letter contract or precontract cost requirements;

(2) Government property to be furnished;

(3) Contract option requirements;

(4) Contractor/Government investment in facilities and equipment (and any modernization thereof to be provided by the contractor/Government);

(5) Any deviations, special clauses or conditions anticipated.

(c) *Cost and profit/fee analysis.* Include a parallel tabulation by element of cost and profit/fee of the contractor's proposal, the Government's negotiation objective, and the Government's maximum position. For each element of cost, compare the contractor and Government estimate and explain how each was developed, including the estimating assumptions and projection techniques employed. Further, explain how historical costs, including costs incurred under a letter contract (if applicable), were used in developing the negotiation objective. Significant differences between the field pricing report (including any audit reports) and the negotiation objectives and/or contractor's proposal should be highlighted and explained. Also, technical evaluation results which caused the Government's cost negotiation objectives to significantly differ from the contractor's proposed cost, such as differences in staffing, should be highlighted and explained. Further, there should be an identification and a brief discussion of each major subcontract involved, citing the type of subcontract and stating the degree of analysis performed on the subcontract cost estimate. In addition the rationale for the Government's profit/fee objectives, and a completed copy of the NASA Form 634, Structured Approach-Profit/Fee Objective, where appropriate, should be included.

(d) *Type of contract contemplated.* Explain the type of contract contemplated and the reasons for its suitability. For an incentive contract, including award fee contracts, describe the planned structuring arrangement in terms of profit/fee patterns, share lines, ceilings, and so forth.

(e) *Negotiation approval sought.* Indicate the specific approvals sought, *e.g.*, dollar parameters, special clauses/conditions not constituting deviations, type of contract, fee objectives, and so forth.

1815.807-71 Center reviews.

Each contracting activity shall establish a formal system for the prenegotiation review of any proposal over $250,000 ($100,000 at National Space Technology Laboratories, Jet Propulsion Laboratory, and Headquarters Contracts and Grants Division). The scope of coverage, exact procedures to be followed, levels of management review, and contract file documentation requirements should be directly related to the dollar value and complexity of the procurement and will be determined by each Center. The primary purpose of these reviews is to ensure that the negotiator, or negotiating team, is thoroughly prepared to enter into negotiations with a well-conceived, realistic, and fair plan.

1815.807-72 Headquarters reviews.

Approval of the prenegotiation position by the Assistant Administrator for Procurement is required prior to entering into negotiations on all procurement actions selected for Headquarters review. Generally, at the time a procurement is processed as a Master Buy Plan (MBP) action, under Subpart 187.71, a decision will be made as to whether the prenegotiation position will be subject to Headquarters review and approval. However, prenegotiation positions on MBP procurement actions where the prenegotiation position was not initially selected for Headquarters review and approval and other non-MBP procurement action prenegotiation positions may be selected for Headquarters review and approval at any point in the acquisition cycle prior to actual negotiations.

(a) *Scheduling of presentation.* When a prenegotiation presentation is required by Headquarters or requested by the Center, scheduling of the presentation will be arranged by the Office of Procurement, Program Operations Division (Code HS–1), in consultation with appropriate Headquarters program officials. It is the responsibility of the Center to notify Code HS–1 sufficiently in advance of the desired presentation date in order to permit scheduling and preparation by Headquarters staff.

(b) *Advance information.* Not less than ten working days in advance of the scheduled prenegotiation presentation, the Center shall provide Code HS–1 with the following:

(1) Five copies of the Center's PPM.

(2) Five copies of any briefing charts and/or vu-graphs to be used in the presentation. Briefing charts and/or vu-graphs shall summarize key points/factors identified in the PPM and should be grouped in the same manner as presented in the PPM. Only key words or expressions should be used on the charts or vu-graphs—complete sentences are not necessary.

(3) One copy each of the contractor's proposal, the Government technical evaluation, and all pricing reports (including any audit reports).

(c) *Waiver.* The Assistant Administrator for Procurement may waive the presentation requirement where, based on Headquarters review of the advance information provided under paragraph (b)(2) above, it is clear that Center personnel are thoroughly prepared to enter into negotiations.

(d) *Safeguarding prenegotiation material.* Prenegotiation data is very sensitive in nature and should be handled accordingly. Close coordination with Program Operations Division (HS–1) personnel should be maintained to ensure that prenegotiation material is not compromised during transit. Distribution of prenegotiation data shall be made on a need-to-know basis.

1815.808 Price negotiation memorandum.

(a) The NASA Contract Negotiation Memorandum serves as a detailed summary of (1) the technical, business, contractual, pricing and other aspects of the contract negotiated, and (2) the methodology and rationale used in arriving at the final negotiated agreement.

(b) Normally, the Contract Negotiation Memorandum is a "stand alone" document. However, when a PPM has been prepared under 1815.807 the subsequent Contract Negotiation Memorandum need explain (1) only the differences between the prenegotiation position and the final negotiated settlement, and (2) the areas identified in FAR 15.808(a).

1815.870 Subcontract price redetermination.

1815.870–1 General.

When subcontracts have been placed on a price redetermination or fixed-price incentive basis and the prime contract is to be repriced, it may be appropriate to negotiate a firm prime contract price, even though the contractor has not yet established final subcontract prices. The contracting officer may do this when convinced the amount included for subcontracting is reasonable, *e.g.*, where realistic cost or pricing data on subcontract efforts is available. However, even though the available cost data is highly indefinite and there is a distinct chance that one or more of the subcontracts eventually may be redetermined at prices that are lower than those predicted in redetermining the prime contract price, other circumstances may require the prompt negotiation of the final contract price. In such a case, the contract modification which evidences the revised contract prices should provide for adjustment of the total amount paid or to be paid under the contract on account of subsequent redetermination of the specified subcontracts. This may be done by including in the contract modification the clause prescribed at 1815.870–2.

1815.870–2 NASA contract clause.

Insert the clause at 1852.215–71, Adjustment for Subcontract Price Redetermination in contract modifications.

1815.871 Procedures for identifying contractor's unallowable costs.

(a) The establishment, maintenance, and consistent use of procedures for identifying and segregating unallowable costs, which will assure compliance with CAS 405 and FAR 31.201–6 will benefit both the Government and contractors. Such procedures may vary between plants or divisions of a contractor due to size, mix of business and complexity of organization. Some of the advantages of sound procedures are that—

(1) A greater degree of confidence can be placed on the accuracy and reliability of contractors' proposals, billings, and claims;

(2) They expedite the negotiation process; and

(3) They may reduce the scope of reviews performed by audit and other technical and procurement personnel.

(b) The responsible Federal Contract Audit organization shall review the contractor's procedures and practices in conjunction with other contract audit activities. Deficiencies shall be reported to the cognizant Administrative Contracting Officer and, as appropriate, contracting officers having substantial business with the contractor. Among the matters to be considered in determining the adequacy of a contractor's procedures are its policy, practices, and techniques for—

(1) Assignment of responsibilities within the organization for reviewing and approving claims against the government;

(2) Identification of unallowable costs (expressly unallowable, mutually agreed to be unallowable, or specifically designated as unallowable by written decision of the contracting officer) together with the individual employees incurring such costs;

(3) Identification and computation of directly-associated costs;

(4) Assurance that unallowable and directly-associated costs are not included in estimated costs proposed or in incurred amounts claimed by the contractor;

(5) Coordination and communication between the elements of the contractor's organization that prepare proposals and claims and those responsible for identifying unallowable and directly associated costs; and

(6) Assuring the adequacy of the documentation maintained by the contractor identifying the unallowable costs together with directly associated costs.

(c) Documentation in support of the contractor's procedures shall be made available to authorized Government personnel.

Subpart 1815.9—Profit

1815.902 Policy.

As authorized by FAR 15.902, NASA has established a structured approach for determining profit or fee objectives. This approach, described at 1815.970, is based on the profit-analysis factors appearing at FAR 15.905 and shall be used to determine a profit or fee objective for the conduct of negotiations in those acquisitions that require cost analysis except the following:

(a) Architect-engineer contracts.

(b) Management contracts for operation and/or maintenance of Government facilities.

(c) Construction contracts.

(d) Contracts primarily requiring delivery of material supplied by subcontractors.

(e) Termination settlements.

(f) Cost-plus-award-fee contracts (however, contracting officers may find it advantageous to perform a structured profit analysis as an aid in arriving at an appropriate fee arrangement).

(g) Contracts having unusual pricing situations where the structured approach is determined to be unsuitable and the exemption is justified in writing and authorized by the Procurement Officer.

1815.970 NASA structured approach for profit or fee objective.

(a) The following factors shall be considered in all cases in which profit is to be specifically negotiated. The weight ranges listed after each factor on NASA Form 634, Structure Approach Profit/Fee Objective, shall be used in all instances where the structured approach is used.

(b) The contracting officer shall first measure the "Contractor Effort" by the assignment of a profit percentage within the designated weight ranges to each element of contract cost recognized by the contracting officer. The amount calculated for the cost of money for facilities capital is not to be included for the computation of profit as part of the cost base.

(c) The suggested categories under the Contractor Effort are for reference purposes only. Often individual proposals will be in a different format; but since these categories are broad and basic, they provide sufficient guidance to evaluate all other items of cost.

(d) After computing a total dollar profit for the Contractor Effort, the contracting officer shall calculate the specific profit dollars assigned for cost risk, investment, performance, socio-economic programs, inventive developmental contributions, and additional factors. This is accomplished by multiplying the total Government Cost Objective, exclusive of any cost of money for facilities capital, by the specific weight assigned to the elements within the Other Factors category. NASA Form 634 should be used, as appropriate to facilitate the calculation of this profit objective (calculating Inventive and Developmental Contributions and Unusual Pricing Agreements and combining them under Special Situations).

(e) In making a judgment of the value of each factor, the contracting officer should be governed by the definition, description, and purpose of the factors together with considerations for evaluating them as set forth in 1815.970–1, 1815.970–2, and 1815.970–3.

(f) The structured approach was designed for arriving at profit or fee objectives for other than nonprofit organizations. However, if appropriate adjustments are made to reflect differences between profit and nonprofit organizations, the structured approach can be used as a basis for arriving at fee objectives for nonprofit organizations. Therefore, the structured approach, as modified in paragraph (f)(2) below, shall be used to establish fee objectives for nonprofit organizations. The modifications should not be applied as deductions against historical fee levels, but rather, to the fee objective for profit organizations as calculated under the structured approach.

(1) For purposes of this subparagraph, nonprofit organizations are defined as those business entities organized and operated exclusively for charitable, scientific, or educational purposes, no part of the net earnings of which inure to the benefit of any private shareholder or individual, and which are exempt from Federal income taxation under Section 501 of the Internal Revenue Code.

(2) For contracts with nonprofit organizations where fees are involved, an adjustment of up to 3 percent will be subtracted from the total profit/fee objective. In developing this adjustment, it will be necessary to consider the following factors:

(i) Tax position benefits,

(ii) Granting of financing through letters of credit,

(iii) Facility requirements of the nonprofit organization, and

(iv) Other pertinent factors which may work to either the advantage or disadvantage of the contractor in its position as a nonprofit organization.

1815.970–1 Common factors.

(a) *Contractor effort.* This factor is a measure of how much the contractor is expected to contribute to the overall effort necessary to meet the contract performance requirements in an efficient manner. This factor, which is apart from the contractor's responsibility for contract performance, takes into account what resources are necessary and what the contractor must do to accomplish a conversion of ideas and materials into the final product called for in the contract. This is a recognition that within a given performance output, or within a given sales dollar figure, necessary efforts on the part of individual contractors can vary widely in both value and quantity, and that the profit objective should reflect the extent and nature of the contractor's contribution to total performance. A major consideration, particularly in connection with experimental, developmental, or research work, is the difficulty or complexity of the work to be performed, and the unusual demands of the contract, such as whether the project involves a new approach unrelated to existing equipment or only refinements on existing equipment. The evaluation of this factor requires an analysis of the cost content of the proposed contract as follows:

(1) *Material acquisition (subcontracted items, purchased parts, and other material).* Analysis of these cost items shall include an evaluation of the managerial and technical effort necessary to obtain the required purchased parts, subcontracted items, and other materials, including special tooling. This evaluation shall include consideration of the number of orders and suppliers, and whether established sources are available or new sources must be developed. The contracting officer shall also determine whether the contractor will, for example, obtain the material and tooling by routine orders from readily available supplies (particularly those of substantial value in relation to the total contract cost), or by detailed subcontracts for which the prime contractor will be required to develop complex specifications involving creative design or close tolerance manufacturing requirements. Consideration should be given to the managerial and technical efforts necessary for the prime contractor to administer subcontracts, and select subcontractors, including efforts to break out subcontracts from sole sources, through the introduction of competition. These determinations should be made for purchases of raw materials or basic commodities, purchases of processed material including all types of components of standard or near-standard characteristics, and purchases of pieces, assemblies, subassemblies, special tooling, and other products special to the end-item. In the application of the criterion, it should be recognized that the contractor's purchasing program might make a substantial contribution to the performance of the contract. This might be applicable in the management of subcontracting programs involving many sources, involving new complex components and instrumentation, incomplete specifications, and close surveillance by the prime contractor's representative. Recognized costs proposed as direct material costs such as scrap charges shall be treated as material for profit evaluation. If intracompany transfers are accepted at price in accordance with FAR 31.205–26(e), they shall be evaluated as material. Other intracompany transfers shall be evaluated by individual components of cost, *i.e.*, material, labor, and overhead.

(2) *Direct labor (engineering, service, manufacturing, and other labor).* Analysis of the various items of the cost content of the contract should include evaluation of the comparative quality and level of the engineering talents, service contract labor, manufacturing, skills, and experience to be employed. In evaluating engineering labor for the purpose of assigning profit dollars, consideration should be given to the amount of notable scientific talent or

unusual or scarce engineering talent needed in contrast to journeyman engineering effort or supporting personnel. The diversity, or lack thereof, of scientific and engineering specialties required for contract performance and the corresponding need for engineering supervision and coordination should be evaluated. Such circumstances as whether the calibre or class of engineer involved is that of an "idea-man," or whether the contractor is required by the contract to assign to the work, because of its nature, unusually skilled talent should be considered as part of the evaluation. Service contract labor should be evaluated in a like manner by assigning higher weights to engineering or professional type skills and lower weights to semi-professional or other type skills required for contract performance. Similarly, the variety of manufacturing and other categories of labor skills required and the contractor's manpower resources for meeting these requirements should be considered. For purposes of evaluation, categories of labor (*i.e.*, quality control, receiving and inspecting, etc.) which do not fall within the definition for engineering, service, or manufacturing labor may be categorized as appropriate. However, the same evaluation considerations as outlined above will be applied.

(3) *Overhead and general management (G&A).*

(i) Analysis of these overhead items of cost includes the evaluation of the make-up of these expenses and how much they contribute to contract performance. To the extent practicable, analysis should include a determination of the amount of labor within these overhead pools and how this labor would be treated if it were considered as direct labor under the contract. The allocable labor elements should be given the same profit consideration that they would receive if they were treated as direct labor. The other elements of these overhead pools should be evaluated to determine whether they are routine expenses such as utilities and maintenance, and hence given lesser profit consideration, or whether they are significant contributing elements. The composite of the individual determinations in relation to the elements of the overhead pools will be the profit consideration given the pools as a whole.

(ii) It is not necessary that the contractor's accounting system break down overhead expenses within the classification of engineering overhead, manufacturing overhead, other overhead pools, and general and administrative expenses (G&A), unless dictated otherwise by Cost Accounting Standards (CAS). The contractor whose accounting system only reflects one overhead rate on all direct labor need not change its system (if CAS exempt) to correspond with the above classifications. The contracting officer, in an evaluation of such a contractor's overhead rate, could break out the applicable sections of the composite rate which could be classified as engineering overhead, manufacturing overhead, other overhead pools, and G&A expenses, and follow the appropriate evaluation technique.

(iii) Management problems surface in various degrees and the management expertise exercised to solve them should be considered as an element of profit. For example, a new program for an item which is on the cutting edge of the state of the art will cause more problems, require more managerial time, and abilities of a higher order than one which is a follow-on contract. If new contracts create more problems and require a higher profit weight, follow-ons should be adjusted downward since many of the problems should have been solved. In any event, an evaluation should be made of the underlying managerial effort involved on a case-by-case basis.

(iv) It may not be necessary for the contracting officer to make a separate profit evaluation of overhead expenses in connection with each procurement action for substantially the same product with the same contractor. Where an analysis of the profit weight to be assigned to the overhead pool has been made, that weight assigned may be used for future procurements with the same contractor until there is a change in the cost composition of the overhead pool or the contract circumstances, or the factors discussed in paragraph (a)(3)(iii) above are involved.

(4) *Other costs.* Include all other direct costs associated with contractor performance under this item (e.g., travel and relocation, direct support, and consultants). Analysis of these items of cost should include (i) the significance of the cost to contract performance, (ii) nature of the cost, and (iii) how much they contribute to contract performance.

(b) *Contract cost risk.* The degree of risk assumed by the contractor should influence the amount of profit or fee a contractor is entitled to anticipate. For example, where a portion of the risk has been shifted to the Government through cost-reimbursement or price redetermination provisions, unusual contingency provisions, or other risk-reducing measures, the amount of profit or fee should be less than where the contractor assumes all the risk. In developing the pre-negotiation profit objective, the contracting officer will need to consider the type of contract anticipated to be negotiated and the contractor risk associated therewith when selecting the position in the weight range for profit that is appropriate for the risk to be borne by the contractor. This factor should be one of the most important in arriving at pre-negotiation profit objectives.

(1) Evaluation of this risk requires a determination of (i) the degree of cost responsibility the contractor assumes, (ii) the reliability of the cost estimates in relation to the task assumed, and (iii) the complexity of the task assumed by the contractor. This factor is specifically limited to the risk of contract costs. Thus, such risks on the part of the contractor as reputation, losing a commercial market, risk of losing potential profits in other fields, or any risk on the part of the contracting office such as the risk of not acquiring an effective space vehicle, are not within the scope of this factor.

(2) The first and basic determination of the degree of cost responsibility assumed by the contractor is related to the sharing of total risk of contract cost by the Government and the contractor through the selection of contract type. The extremes are cost-plus-fixed-fee contract requiring the contractor to use its best efforts to perform a task and a firm fixed-price contract for a complex item. A cost-plus-fixed-fee contract would reflect a minimum assumption of cost responsibility. Whereas a firm fixed-price contract would reflect a complete assumption of cost responsibility, where proper contract type selection has been made, the regard for risk by contract type would usually fall into the following ranges:

Cost Type Contracts: 0–3 percent
Fixed-Price Type Contracts: 3–7 percent

(3) The second determination is that of reliability of the cost estimates. Sound price negotiation requires well-defined contract objectives and reliable cost estimates. Prior experience assists the contractor in preparing reliable cost estimates on new procurements for similar equipment. An excessive cost estimate reduces the possibility that the cost of performance will exceed the contract price, thereby reducing the contractor's assumption of contract cost risk.

(4) The third determination is that of the difficulty of the contractor's task. The contractor's task can be difficult or easy, regardless of the type of contract.

(i) Within the above ranges, a cost-plus-fixed-fee contract normally would not justify a reward for risk in excess of 0 percent, unless the contract contains cost risk features such as ceilings on overheads, etc. In such cases, up to ½ percent may be justified. Cost-plus-incentive-fee contracts fill the remaining portion of the above cost range with weightings directly related to such factors as confidence in target cost, share ratio of fee(s), etc. The range for fixed-price contracts is wide enough to accommodate the many types of fixed-price arrangements. These include fixed-price-incentive, firm-fixed-price with economic price adjustment, fixed-price with prospective or retroactive price redetermination, and firm-fixed-price contracts. Weighting should be indicative of the price risk assumed and the end item required, with only firm-fixed-price contracts with reqtirements for prototypes or hardware reaching the top end of the range.

(ii) The contractor's subcontracting program may have a significant impact on the contractor's acceptance of risk under a contract form. It could cause risk to increase or decrease in terms of both cost and performance. This consideration should be a part of the contracting officer's overall evaluation in selecting a factor to apply for cost risk. It may be determined, for instance, that the prime contractor has effectively transferred real cost risk to a subcontractor and the contract cost risk evaluation may, as a result, be below the range which would otherwise apply for the contract type being proposed. The contract cost risk evaluation should not be lowered, however, merely on the basis that a substantial portion of the contract costs represents subcontracts without any substantial transfer of the contractor's risk.

(iii) In making a contract cost risk evaluation in a procurement action that involves definitization of a letter contract, unpriced change orders, and unpriced orders under BOA's, consideration should be given to the effect on total contract cost risk as a result of having partial performance before definitization. Under some circumstances it may be reasoned that the total amount of cost risk has been effectively reduced. Under other circumstances it may be apparent that the contractor's cost risk remained substantially unchanged. To be equitable the determination of a profit weight for application to the total of all recognized costs, both those incurred and those yet to be expended, must be made with consideration to all attendant circumstances; not just by the portion of costs incurred, or percentage of work completed, prior to definitization.

(iv) Time-and-material and labor-hour contracts will be considered to be cost-plus-fixed-fee contracts for the purpose of establishing profit weights, unless otherwise exempt under 1815.902 in the evaluation of the contractor's assumption of contract cost risk.

(c) *Investment.* NASA encourages its contractors to perform their contracts with a minimum of financial, facilities, or other assistance from the Government. As such, it is the purpose of this factor to encourage the contractor to acquire and use its own resources to the maximum extent possible. The evaluation of this factor should include an analysis of the following:

(1) *Facilities.* To evaluate how this factor contributes to the profit objective requires knowledge of the level of facilities utilization needed for contract performance, the source and financing of the required facilities, and the overall cost effectiveness of the facilities offered. Contractors who furnish their own facilities which significantly contribute to lower total contract costs should be provided with additional profit. On the other hand, contractors who rely on the Government to provide or finance needed facilities should receive a corresponding reduction in profit. Cases between the above examples should be evaluated on their merits with either a positive or negative adjustment, as appropriate, in profit being made. However, where a highly facilitized contractor is to perform a contract which does not benefit from this facilitization or where a contractor's use of its facilities has a minimum cost impact on the contract, profit need not be adjusted.

(2) *Payments.* In analyzing this factor, consideration should be given to the frequency of payments by the Government to the contractor. The key to this weighting is to give proper consideration to the impact the contract will have on the contractor's cash flow. Generally, negative consideration should be given for payments more frequent than monthly with maximum reduction being given as the contractor's working capital approaches zero. Positive consideration should be given for payments less frequent than monthly with additional consideration given for a capital turn-over-rate on the contract which is less than the contractor's or the industry's normal capital turn-over-rate.

(d) *Contractor's performance.* The contractor's past and present performance should be evaluated in such areas as quality of product, meeting performance schedules, efficiency in cost control (including need for and reasonableness of cost incurred), accuracy and reliability of previous cost estimates, degree of cooperation by the contractor (both business and technical), timely processing of changes and compliance with other contractual provisions, and management of subcontract programs. Where a contractor has consistently achieved excellent results in the foregoing areas in comparison with other contractors in similar circumstances, such performance merits a proportionately greater opportunity for profit or fee. Conversely, a poor record in this regard should be reflected in determining what constitutes a fair and reasonable profit or fee.

(e) *Federal socio-economic programs.* This factor, which may apply to special circumstances or particular acquisitions, relates to the extent of contractor's successful participation in the Government sponsored programs such as small business, small disadvantaged business, labor surplus programs, and energy conservation efforts. The contractor's policies and procedures which energetically support Government socio-economic programs and achieve successful results should be given positive consideration. Conversely, failure or unwillingness on the part of the contractor to support Government socio-economic programs should be viewed as evidence of poor performance for the purpose of establishing a profit objective.

(f) *Inventive and development contributions.* (1) The extent and nature of contractor-initiated and financed independent development should be considered in developing the profit objective. The importance of the development in furthering space and aeronautical purposes, the demonstrable initiative in determining the need and application of the development, the extent of the contractor's cost risk, and whether the development cost was recovered directly or indirectly from Government sources should be weighed.

(2) This factor need not be limited to situations which only increase profit/fee levels. A negative consideration may be appropriate when the contractor is expected to obtain spin-off benefits as a direct result of the contract (e.g., products with commercial application).

1815.970-2 Additional factors—unusual pricing agreements.

Occasionally, unusual contract pricing arrangements are made with the contractor wherein it agrees to participate in the sharing of contract cost or agrees to accept a lower profit or

fee for changes or modifications within a prescribed dollar value. In such circumstances, the contractor should receive favorable consideration in developing the profit objective.

1815.970–3 Facilities capital cost of money.

When facilities capital cost of money (cost of capital committed to facilities) is included as an item of cost in the contractor's proposal, a reduction in the profit objective shall be made in an amount equal to the amount of facilities capital cost of money allowed in accordance with FAR 31.205–10(a) (see FAR 15.904 and 52.215–30 for related contract clause).

1815.971 Payment of profit or fee under letter contracts.

It is NASA policy to pay profit or fee on definitized contracts only. Therefore, contractors shall not be paid any profit or fee under letter contracts except as provided in the appropriate Termination clause for letter contracts (see 1852.249–7001 and 1852.249–7002). (See 1816.603–70(g).)

Subpart 1815.10—Preaward and Postaward Notifications, Protests, and Mistakes

1815.1002 Debriefing of unsuccessful offerors.

The policies and procedures governing debriefing are in NMI 5103.1, debriefing of Unsuccessful Companies in Competitive Negotiated Procurements and, as applicable, paragraph 504 of NHB 8030.6, Guidelines for Acquisition of Investigations.

PART 1816—TYPES OF CONTRACTS

Subpart 1816.2—Fixed-Price Contracts

Sec.
1816.203 Fixed-price contracts with economic price adjustment.
1816.203–4 Contract clauses.

Subpart 1816.3—Cost-Reimbursement Contracts

1816.301 General.
1816.301–3 Limitations.
1816.303 Cost-sharing contracts.
1816.370 Forms.

Subpart 1816.4—Incentive Contracts

1816.405 Contract clauses.

Subpart 1816.5—Indefinite-Delivery Contracts

1816.506 Ordering.

Subpart 1816.6—Time-and-Materials, Labor-Hour, and Letter Contracts

1816.603 Letter contracts.
1816.603–70 Information to include in a letter contract.
1816.603–71 Information to be furnished when requesting authority to issue a letter contract.

Subpart 1816.7—Agreements

1816.702 Basic agreements.
1816.702–70 Content and form.
1816.702–71 Responsibilities and procedures.
1816.703 Basic ordering agreements.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1816.2—Fixed-Price Contracts

1816.203 Fixed-price contracts with economic price adjustment.

1816.203–4 Contract clauses.

(a) When neither of the clauses prescribed in FAR 16.203–4(a) or (b) is appropriate, the contracting officer may use a clause prescribed in paragraph (b)(1) or (2) below or an alternate clause approved by the Assistant Administrator for Procurement.

(b) When applicable, the contracting officer will insert one of the clauses at 1852.216–7001 or 1852.216–7002 in accordance with following instructions:

(1) *Economic Price Adjustment for Basic Steel, Aluminum, Brass, Bronze or Copper Mill Products.* The price adjustment clause at 1852.216–7001 is authorized for use in fixed-price supply contracts for basic steel, aluminum, brass, bronze or copper mill products, such as sheets, plates and bars, when an established catalog or market price exists for the particular product being procured and has been verified in accordance with criteria in FAR 15.804–3(c). The ten percent figure in paragraph (c)(1) of the clause shall not be exceeded unless approved by the Procurement Officer. No adjustment under this clause shall be made in the contract price until the requested adjustment has been verified by the contracting officer, in accordance with the criteria in FAR 15.804–3(c) and as required by paragraph (c)(4) of the clause.

(2) *Economic Price Adjustment for Nonstandard Steel Items.* The price adjustment clause at 1852.216–7002 is authorized for use in fixed-price supply contracts when (i) the contractor is a steel producer and actually manufactures the standard steel mill item referred to in paragraph (d) of the clause and (ii) the items being procured are nonstandard steel items made wholly or in part of standard steel mill items. The 110 percent figure in paragraph (e) of the clause shall not be exceeded unless approved by the Procurement Officer after coordination with the installation Financial Management Officer.

(c) The contracting officer shall also coordinate with the installation Financial Management Officer before exceeding the ten percent limit in paragraph (c)(1) of the clause at FAR 52.216–2, 52.216–3, and 52.216–4.

(d) The contracting officer may modify the clause at FAR 52.216–4 for use in formally advertised procurements (see 1816.203–4(b)).

(e) *Adjustments based on labor or material costs (cost index method).* (1) As an alternative to the clauses at FAR 52.216–2, 52.216–3, or 52.216–4, consideration should be given to inclusion of a special economic price adjustment clause designed to minimize contingency pricing and prepared under the guidelines listed in (c) below, when (i) there will be an extended period of performance with significant costs to be incurred beyond one year after commencement of contract performance, (ii) the contract amount subject to adjustment is substantial and (iii) the economic variables for labor and material are determined to be too unstable to reflect a reasonable division of risk between the parties absent economic price adjustment provisions.

(2) All economic price adjustment clauses utilizing indices require advance approval by the Assistant Administrator for Procurement. Requests for such approval shall be submitted to the Office of Procurement, NASA Headquarters, Code HS–1.

(3) The following factors may be considered in preparing a price adjustment clause meeting the criteria of paragraph (e)(1) above including construction of appropriate indices:

(i) The clause should not be overly complex;

(ii) Normally, the clause should not provide either a ceiling or a floor for adjustment unless adjustment is based on indices below the four digit level of the Bureau of Labor Statistics Producer Price Index or the Wage and Income Series by Standard Industrial Classification (Labor).

(iii) Normally, the clause should cover all potential economic fluctuations within the original contract period of performance.

(iv) The clause must have a positive and accurate identification of the applicable index(es) upon which adjustments will be based and provide appropriate economic fluctuation in the event of the discontinuance of the publication of the movement of the designated index. This might include the substitution of another index if the time remaining would so justify and an appropriate index is reasonably available, or some other method for repricing of the remaining portion of the work to be performed. There should not normally be any need to make an

adjustment in the event computation of the indentified index is altered; however, provision may be made to adjust the economic fluctuation computations in the event there is such a substantial alteration to the method of computing the index as to negate the original intent of the parties. When an index to be used is subject to revision (*e.g.*, the Bureau of Labor Statistics Producer Price Indexes), The economic price adjustment clause shall further specify that any economic price adjustment shall be based upon the applicable revised index.

(v) An index should be structured to encompass a large sample of relevant items yet bear a logical relationship to the type of contract costs being measured. The basis of the index should not be so large and diverse that it is significantly affected by fluctuations not relevant to the contract performance, yet must be significantly broad so as to assure the minimal effect of any single company, including the anticipated contractors.

(vi) Construction of an index is largely dependent upon two general series published by the U.S. Department of Labor, Bureau of Labor Statistics (BLS). These are the Industrial Commodities portion of the Producer Price Index and the Wage and Income Series by Standard Industrial Classification for labor. Since there are no BLS published series currently available that relate directly to total prices of delivered items of aeronautical electronics, space property, etc., such composite indices from major portions of the two series described above should be made.

(vii) Normally not more than two indices should be used, i.e., one for labor (direct and indirect) and one for material (direct and indirect).

(viii) The clause must establish and properly identify a base period comparable to the contract periods for which adjustments are to be made as a reference point for application of an index.

(ix) The clause should provide for adjustment from the beginning of the contract or from such period of time that the rate of expenditure is commensurate with the administrative cost and effort to adjust, but it should not provide for adjustment beyond the original contract performance period.

(x) The expenditure profile for both labor and material should be based on a predetermined rate of expenditure (expressed as the percentage of material or labor usage as it relates to total contract price) in lieu of actual cost incurred. In the event the clause is to be used in a competitive procurement, the labor and material allocations, with regard to both mix of labor and material and rate of expenditure by percentage, shall be determined by the contracting officer in a manner which will, as nearly as possible, approximate the average expenditure profile of all companies to be solicited in order that all companies may compete on an equal basis. If the clause is to be used in a non-competitive procurement, the labor and material allocations as determined by the contracting officer may be subject to negotiation and agreement.

(xi) The clause should state that percentage of the contract price subject to price adjustment. Normally, adjustments would not be applied to the profit portion of the contract. Additionally, the labor and material portions of the contract must be examined to exclude any areas that do not require adjustment. It may not be necessary, for example, to include all subcontracting as being subject to escalation because some of the subcontracting could be for shorter periods of time during the early life of the contract and, would be covered therefor, by firm priced subcontracting. It may be possible to exclude certain areas of overhead from escalation protection; for example, depreciation charges, prepaid insurance costs, rental costs, leases, certain taxes, and utility charges are illustrated as some of the areas that should be examined in detail. In the same manner, consideration should be given to the necessity to include economic fluctuation protection covering that portion of labor for the period of time for which a definitive union agreement exists without additional factoring for such things as cost of living increases. Care should be taken to allocate to labor and material only those costs likely to be affected by fluctuation in the economy. That portion of the contract which is determined to be proper for economic fluctuation protection shall then be allocated to specific periods of time (*e.g.*—quarterly, semiannually, etc.) based on the most probable expenditure or commitment basis (expenditure profile).

(xii) The clause should provide for definite times or events positive for price adjustments. Adjustments should be of such a frequency so as to afford the contractor appropriate economic relief without at the same time creating a burdensome administrative effort. The adjustment period should normally range from a minimum of quarterly to a maximum of annually.

(xiii) When the contract contains cost incentives, any sums paid to the contractor on account of economic price adjustment provision shall be subtracted from the total of the contractor's allowable cost for the purpose of establishing the total costs to which the cost incentive provisions apply. If the incentive arrangement is cited in percentage ranges rather than dollar ranges, above and below target costs, the economic price adjustment clause should be structured to maintain the original contract incentive range in dollars.

(xiv) The economic price adjustment clause should provide that once the labor and material allocations have been established, they remain fixed through the life of the contract and are not modified except in the event of partial termination of the contract. The clause should state that pricing actions pursuant to the Changes clause or other provisions of the contract will be priced as though there were no provision for economic price adjustment.

(f) Consistent with the factors set forth in (e)(3) above, the contracting officer may also determine it appropriate to provide for certain economic price adjustment arrangements between the prime contractor and subcontractors to properly allocate risks. In such circumstances, provision for incorporation of price adjustment clauses in specified subcontracts should be included in the price adjustment provision of the prime contract.

(g) When economic price adjustment provisions are included in contracts that do not require submission of cost or pricing data as provided for in FAR 15.804–2 it will be the responsibility of the contracting officer to obtain adequate information to establish the base line from which adjustments will be made. In addition, the contracting officer may require verification of the data submitted to the extent considered necessary to permit reliance upon it as a reasonable base line.

(h) The contracting officer shall insert the provision at 1852.216–7003, Evaluation of Bids Subject to Economic Price Adjustment, in all solicitations and contracts that contain an economic price adjustment clause.

Subpart 1816.3—Cost-Reimbursement Contracts

1816.301 General.

1816.301–3 Limitations.

The determination and findings required by FAR 16.301–3(c) may be signed by the contracting officer for individual purchases and contracts.

1816.303 Cost sharing contracts.

NASA's Appropriation Acts for several years have included provisions

requiring cost sharing by the contractor under research contracts resulting from unsolicited proposals. In accordance with the foregoing, the following basic guidelines will be implemented in the negotiation of all research contracts and in supplements to such contracts which required additional funding.

(a) *When cost sharing is applicable.* (1) Except as provided in paragraphs (b)(1) and (2) below, cost sharing by non-Federal organizations is mandatory in any contract for basic or applied research which results from an unsolicited proposal.

(2) Cost sharing by non-Federal organizations which is not mandatory under paragraph (a)(1) above may nevertheless be accepted when voluntarily offered by a performing organization.

(b) *When cost sharing is not applicable.* (1) Cost sharing is not applicable to contracts for basic or applied research resulting from an unsolicited proposal when the offeror certifies in writing to the contracting officer that it has no commercial, production, educational, or service activities on which to use the results of the research and that it has no means of recovering any cost sharing on such projects. In these situations, where there is no measurable gain to the performing organization, there is, therefore, no mutuality of interest and it would not be equitable for the Government to require cost sharing.

(2)(i) The activities of educational institutions under NASA research grants, cooperative agreements, and contracts are of benefit only to NASA and thus would not normally justify cost sharing, *i.e.*, NASA's policy of normally reimbursing universities fully for research performed on its behalf would apply. However, in order to establish on a case-by-case basis that there is no clear indication of significant future benefit or measurable gain and that cost sharing does not apply, the contracting officer shall document the file with a determination that is substantively the same as required in paragraph (b)(1) above. The determination shall identify the information on which it is based. If the determination cannot reasonably be made from the available material, the contracting officer will request the offeror to certify as in paragraph (b)(1), above. Blanket procedures for obtaining certifications from offerors for all cases on a routine basis shall not be established.

(ii) Cost sharing by educational institutions may nevertheless be accepted when voluntarily offered provided the institution is aware of NASA's policy that amount of cost sharing is not a factor in the determination to support a given proposal.

(c) *Amount of cost sharing*—(1) *Educational institutions and affiliated not for profit institutions.*

(i) Cost sharing for such institutions normally may vary from one percent to as much as five percent of the costs of the project. Normally, it should be presumed that the cost sharing is appropriate if it falls within the one to five percent range.

(ii) NASA does not request inclusion of cost sharing information in proposals from educational institutions. If it is determined that cost sharing is applicable, a cost sharing offer will be requested during negotiations.

(2) *Other performing organizations.* (i) Cost sharing for other organizations may vary from less than one percent to fifty percent or more of the costs of the research. Mutuality of interest in the results of the work being performed should be of primary significance in assessing the appropriateness of any particular level of cost sharing within the foregoing ranges.

(ii) Factors which may be considered in determining mutuality of interest include:

(A) The potential of the contractor to recover its contribution from non-Federal sources;

(B) The extent to which a particular area of research requires special stimulus in the national interest; and

(C) The extent to which the research effort or result is likely to enhance the contractor's capability, expertise or competitive position.

(d) *Implementation.* The following policies and procedures implement the basic guidelines above.

(1) *Payment of fee or profit.* Normally, no fee or profit will be paid to a contractor, and only an agreed portion of allowable costs will be reimbursed. However, when required to reach agreement, fee- or profit-bearing contracts may be awarded, provided that the total contract value, *i.e.*, the amount of allowable costs plus the fee required, must not exceed the total amount that would have been recognized as the contractor's share under a straight cost-sharing arrangement.

(2) *Method of cost sharing.* Cost sharing shall be accomplished by a contribution of part or all of one or more elements of allowable cost of the work being performed and normally shall be expressed as a stated minimum percentage of the total allowable costs of the project. Costs so contributed may not be charged to the Government under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program).

(3) *Documentation.* Grant, cooperative agreement, and contract files shall contain appropriate documentation setting forth the reasons for cost sharing and supporting the amount of cost sharing agreed upon. For educational institutions, the reasons for cost sharing which exceeds five percent or the amount originally offered will be documented.

(4) *Contract clause.* The clause at 1852.216–7004 shall be inserted in each contract in which costs are shared by the contractor pursuant to 1816.303.

1816.370 Forms.

Contractors shall use the NASA Form 779, Assignee's Release, at 1853.216–70(d) and NASA Form 781, Assignee's Assignment of Refunds, Rebates, Credits, and Other Amounts, at 1853.216–70(d) to fulfill the assignment and release requirements of the clauses prescribed at FAR 16.307 (a) and (g).

Subpart 1816.4—Incentive Contracts

1816.405 Contract clauses.

As authorized at FAR 16.405(e) the contracting officer shall insert the clause at 1852.216–7004, Award Fee, in solicitations and contracts when a cost-plus-award-fee contract is contemplated.

Subpart 1816.5—Indefinite-Delivery Contracts

1816.506 Ordering.

Orders may be placed by written telecommunication if the contracting office retains all contract administration functions.

Subpart 1816.6—Time-and-Materials, Labor-Hour, and Letter Contracts

1816.603 Letter contracts.

1816.603–70 Information to include in a letter contract.

Although there is no set format for a letter contract, certain items must be addressed either in the letter portion of the letter contract or in an attachment to it. The following listing of items, not intended to be all-inclusive, applies to letter contracts:

(a) Signature of the contracting officer.

(b) Provision for written acceptance by the contractor.

(c) Statement of work.

(d) Provision for delivery or performance schedule and place of inspection and acceptance.

(e) Maximum dollar amount of Government liability and a statement

that expenditure or obligation in excess of that amount shall be at the contractor's own risk.

(f) Target date for negotiation and execution of a definitive contract and a statement of the type of contract contemplated.

(g) Statement that no profit or fee shall be paid under the letter contract except as provided in the Termination clause (see 1815.971).

1816.603–71 Information to be furnished when requesting authority to issue a letter contract.

(a) Requests for authority to issue letter contracts shall be signed by the Procurement Officer and submitted to the Assistant Administrator for Procurement (Code HS–1), and shall include the following:

(1) Name and address of proposed contractor.

(2) Location where contract is to be performed.

(3) Contract number, including modification number if applicable.

(4) Brief description of the work or services to be performed.

(5) Peformance period, or delivery schedule.

(6) Amount of letter contract.

(7) Performance period of letter contract.

(8) Estimated total amount of definitive contract.

(9) Type of definitive contract to be executed (fixed-price, cost-plus-award-fee, etc.).

(10) Statement that the definitive contract will contain all required clauses or that deviations therefrom have been approved.

(11) Statement as to the necessity and advantage to the Government of the use of the proposed letter contract.

(12) If a modification, date of letter contract approval and of execution.

(b) Promptly upon receipt of a request to issue a letter contract, the Assistant Administrator for Procurement will obtain the concurrence or comments of cognizant Officials-in-Charge of Headquarters Offices. Upon their receipt the Assistant Administrator for Procurement will advise the Procurement Officer of the disposition of the request.

Subpart 1816.7—Agreements

1816.702 Basic agreements.

1816.702–70 Content and form.

Basic agreements shall contain a set of "General Provisions." These general provisions shall include three groups of clauses. The first group, identified as "Section A," shall include all of the clauses made mandatory by Statute, Executive Order, the FAR and NASA FAR Supplement for use in negotiated research and development contracts. The second group, identified as "Section B", shall add clauses and/or modifications to the "Section A" clauses made mandatory by Statute, Executive Order, the FAR and NASA FAR Supplement for use in negotiated supply contracts. The third group, identified as "Section C", shall consist of clauses which may be made a part of each formal contractual document, depending upon their applicability to the particular procurement. The format set forth below may be adapted to fit specific circumstances:

Basic Agreement Between the United States of America and * * *

1. This Agreement is entered into as of the * * * day of * * * 19 * * * between the United States of America, hereinafter called the "Government", represented by the Contracting Officer and * * *, a corporation organized and existing under the laws of the State of * * *, hereinafter called "Contractor."

2. The clauses and provisions of Sections A, B, and C hereinafter set forth have been agreed upon by; the parties hereto for use in negotiated * * * type contracts between the parties, entered into on or after the date of this Agreement, and prior to its termination.

3. The clauses set forth in Section A shall apply to cost-reimbursement research and development contracts whereas cost-reimbursement supply contracts shall include the clauses in Section A modified by the clauses in Section B. These clauses are mandatory and shall, by reference or attachment, be incorporated in every such contract which makes reference to this Agreement. The clauses set forth in Section C are to be incorporated in individual contracts only when applicable and agreed to by the parties.

4. This Agreement, including Sections A, B, and C hereof, may be amended only by mutual agreement of the parties, and the Agreement may be terminated in its entirety by either party upon thirty (30) days written notice to the other party, except that this Agreement may be terminated by the Government at any time if the parties fail to agree upon any deletion, amendment, or addition to this Agreement which is required by statute, Executive Order, the FAR, or NASA FAR Supplement. No deletion, modification, addition to, or termination of this Agreement shall affect any contracts theretofore entered into between the parties in which this Agreement or a portion thereof has been incorporated except that letter contracts citing this Agreement shall, when formalized, contain the latest modification hereto and any required NASA implementations of Executive Orders, Federal Statutes, the FAR or NASA FAR Supplement.

5. This agreement shall continue in effect until terminated in accordance with paragraph four (4) above or until superseded by another Agreement. This Agreement should shall be reviewed, as a minimum, annually before the anniversary of its effective date, and revised to conform with all requirements of Federal Statutes, Executive Orders, the FAR, and NASA FAR Supplement. Such revision shall be evidenced by an Agreement modifying this Agreement or by the issuance of a superseding Basic Agreement.

6. This Agreement shall not be referred to by the Contractor in bids submitted in response to invitations for bids nor become a part of any contract placed through the process of formal advertising.

In Witness Whereof, the parties hereto have executed this Agreement as of the day and year first above written:

(Name of Company) _____

By _____

(Signature of Authorized Individual)

Typed or Printed Name _____

Title _____

United States of America

By _____

(Signature of Contracting Officer)

Typed or Printed Name _____

1816.702–71 Responsibilities and procedures.

(a) The Assistant Administrator for Procurement, NASA Headquarters, is responsible for negotiation of all basic agreements and amendments thereto. Contracting offices may not enter into basic agreements nor alter existing basic agreements without the prior written authorization of the Assistant Administrator for Procurement.

(b) Where a contracting office is authorized to enter into a basic agreement with a particular contractor, an introductory paragraph to the basic agreement shall include the clause at FAR 52.204–1, Approval of the Contract, with the word "contract" deleted from the title and text of the clause and the words "basic agreement" inserted in lieu thereof.

(c) Prior to the negotiation for renewal of a Basic Agreement or of a special clause requested by a contractor, each field installation, contracting office, and concerned Headquarters offices will be informed and will be asked to comment on any special items to be discussed.

(d) Basic agreements submitted to the Assistant Administrator for Procurement for approval, shall include the following information:

(1) A memorandum of negotiation describing each deviation from the FAR and NASA FAR Supplement as it appears in the basic agreement together with supporting data required;

(2) A listing of all non-standard clauses used, the genesis of such clauses, and the reasons for use in the basic agreement;

(3) A résumé of all salient features of the agreement which will facilitate the review and approval consideration; and

(4) Documentation of the coordination effected between the negotiator and the procurement offices of other NASA field installations.

1816.703 Basic ordering agreements.

(a) Orders under a basic ordering agreement may be issued on Optional Forms 347, 348, or an Installation prescribed form.

PART 1817—SPECIAL CONTRACTING METHODS

Subpart 1817.1—Multiyear Contracting

Sec.
1817.102 Policy.

Subpart 1817.2—Options

1817.207 Exercise of options.

Subpart 1817.4—Leader Company Contracting

1817.401 General.

Subpart 1817.5—Interagency Acquisitions Under the Economy Act

1817.504 Ordering procedures.

Subpart 1817.70—Procurement with Military Departments

1817.7000 Scope of subpart.
1817.7001 Authorization and policy.
1817.7002 NASA-Defense Purchase Request and acceptance.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1817.1—Multiyear Contracting

1817.102 Policy.

(a) *General.* Due to the nature of NASA's appropriations and agency mission, multiyear contracting is a technique that is generally not appropriate for use by this agency. Therefore, contracting officers shall not issue a multiyear solicitation without first obtaining written approval from the Assistant Administrator for Procurement, NASA Headquarters, Code HS–1.

(b) *Limitation.* Under 10 U.S.C. 2306(g), multiyear contracting is permitted for periods of not more than five years for certain types of services to be performed outside the 48 contiguous States and the District of Columbia. In such cases, a written determination and findings is required by 10 U.S.C. 2306(g) and 2311 at the approval levels listed below (this is in addition to the approval required under 1817.102(a) above):

(1) Contracts in excess of three years—Administrator or Deputy Administrator.

(2) Individual contracts that do not exceed three years—contracting officer.

Subpart 1817.2—Options

1817.207 Exercise of options.

Reporting of options exercised under FAR Subpart 17.2 shall be in accordance with the instructions for NASA Form 507, Individual Procurement Action Report (see 1853.204–70).

Subpart 1817.4—Leader Company Contracting

1817.401 General.

It is NASA policy not to use the leader company contracting technique.

Subpart 1817.5—Interagency Acquisitions Under the Economy Act

1817.504 Ordering procedures.

(a) It is the policy of NASA not to place Government agencies in direct competition with commercial sources. Prior to soliciting bids or proposals from commercial sources, it shall be determined by the Field Installation Director or designee (see NMI 5101.24, Delegation of Authority to Take Actions in Procurement, Grants, Cooperative Agreements, and Related Matters) whether to obtain supplies or services from other Government agencies. Solicitations shall not be sent to Government agencies. Current market prices, recent procurement prices, or prices obtained by informational bids as provided in FAR 15.405 may be used to ascertain whether procurement can be effected more economically from commercial sources.

(b) An order for services shall not be placed with an agency when such services can be performed as conveniently or more economically by private contractors.

(c) Delivery orders shall be placed on Optional Form 347, 348, or an Installation prescribed form. However, when the decision is made to procure energy services under DoD area-wide utility contracts, the method of ordering prescribed in the appropriate DoD area-wide contract will be used. The form may be modified to satisfy fiscal and administrative requirements of NASA, and to contain such additional contract provisions as may be contemplated or permitted by the DoD area-wide contract, except that it shall not be modified for use as a public voucher in lieu of Standard Form 1034.

Subpart 1817.70—Procurement With Military Departments

1817.7000 Scope of subpart.

This subpart contains policies and procedures, developed jointly by NASA and DOD, with reference to procurement of supplies or services by NASA from or through the Military Departments.

1817.7001 Authorization and policy.

(a) NASA is authorized by the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.) to use the procurement services, personnel, equipment, and facilities of the Military Departments with their consent, with or without reimbursement, and on a similar basis to cooperate with the Military Departments in the use of procurement services, equipment, and facilities.

(b) The Military Departments have agreed to cooperate fully with NASA in making their procurement services, equipment, personnel, and facilities available on the basis of mutual agreement.

(c) The Military Departments have agreed not to claim reimbursement for administrative costs incident to procurements for NASA, except as may be otherwise agreed prior to the time the services are performed.

(d) When procuring supplies or services for NASA or performing field service functions in support of NASA contracts, the Military Departments concerned have agreed to use its own methods, except when otherwise required by the terms of the agreement involved.

(e) The Military Departments normally will use their own funds when procuring supplies or services for NASA, or performing services, and will not cite NASA funds on any Defense obligation or payment document.

1817.7002 NASA-Defense Purchase Request and acceptance.

(a) The NASA-Defense Purchase Request (NASA Form 523) shall be used by NASA contracting offices for requesting procurement of supplies or services from all activities of the Military Departments. Individual NASA-Defense Purchase Requests shall be prepared in accordance with the instructions on the reverse of NASA Form 523 and shall be numbered in accordance with Subpart 1804.71. The form shall not be used for requesting:

(1) Block transfers of excess property between NASA and the Military Departments;

(2) Performance by the Military Departments of field service functions related to NASA contracts; or

(3) Items which the Military Departments normally purchase and stock for military use or in-house services, except when a DOD activity is willing to accept the form for these purposes. Supplies and services of this nature may be requisitioned using

appropriate DOD forms when they are provided by and are acceptable to or preferred by the Military Department supplying activity or as otherwise mutually agreed upon by the parties.

(b) To obtain materials from the Air Force Missile Procurement Fund, the procedures of 1808.072 will be followed.

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

Part 1819—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 1819.1—Terms and Size Standards

Sec.
1819.101 Explanation of terms.

Subpart 1819.2—Policies

1819.201 General policy.
1819.202 Specific policy.
1819.202–5 Data collection and reporting requirements.

Subpart 1819.3—Determination of Status as a Small Business Concern

1819.302 Protesting a small business representation.

Subpart 1819.4—Cooperation with the Small Business Administration

1819.401 General.
1819.402 Small Business Administration procurement center representatives.
1819.470 Access to procurement information.

Subpart 1819.5—Set-Asides for Small Business

1819.501 General.
1819.502 Setting aside acquisition.
1819.502–3 Partial set-asides.
1819.503 Setting aside a class of acquisitions.
1819.505 Rejecting set-aside recommendations.

Subpart 1819.6—Certificates of Competency and Determinations of Eligibility

1819.601 General.
1819.602 Procedures.
1819.602–1 Referral.
1819.602–3 Resolving differences between the agency and the Small Business Administration.
1819.602–70 Reports on certificates on competency.

Subpart 1819.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

1819.705 Responsibilities of the contracting officer under the subcontracting assistance program.
1819.705–1 General support of the program.
1819.707 The Small Business Administration's role in carrying out the program.

Subpart 1819.8—Contracting With the Small Business Administration (the 8(a) Program)

1819.801 General.
1819.803 Selecting acquisitions for the 8(a) program.
1819.804 Agency evaluation of the Small Business Administration's request for a commitment.
1819.808 Preaward considerations.
1819.809 Preparing the contracts.
1819.809–1 General.
1819.810 Contract administration.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1819.1—Terms and Size Standards

1819.101 Explanation of terms.

"Director of Small and Disadvantaged Business Utilization" means that NASA officer who—

(a) Is appointed by the NASA Administrator;

(b) Is responsible only to and reports directly to the NASA Administrator or deputy;

(c) Is responsible for the implementation and execution of the functions and duties under sections 8 and 15 of the Small Business Act which relate to NASA;

(d) Has supervisory authority over NASA personnel to the extent that the functions and duties of such personnel relate to functions and duties under sections 8 and 15 of the Small Business Act;

(e) Assigns a small business technical adviser to each office to which the SBA has assigned a procurement center representative; and

(f) Cooperates, and consults on a regular basis with the Administration regarding performance of the functions and duties described in paragraph (c) above.

"Small business specialist" is that person who (a) is appointed by the Head of each NASA installation having procurement responsibilities and (b) is the central point of contact for all small business and labor surplus area matters. See 1819.201 (b) and (c) for a detailed description of this position. This person is synonymous with the Small and Disadvantaged Business Utilization Specialist (see FAR 19.201(d)).

"Small business technical adviser" means that NASA officer at each NASA center to which SBA has assigned a procurement center representative—

(a) Who is a full-time employee of the contracting activity and is well qualified, technically trained, and familiar with the supplies or services acquired by the activity, and

(b) Whose principal duty is to assist the SBA procurement center representative in performing those duties and functions relating to sections 8 and 15 of the Small Business Act.

Subpart 1819.2—Policies

1819.201 General policy.

(a) *NASA headquarters.* The Assistant Administrator for Procurement is responsible for the general supervision and coordination of the NASA Small Business Program. The Director of the Office of Small and Disadvantaged Business Utilization is responsible for developing the NASA Small Business Program, advising the Assistant Administrator for Procurement and other NASA officials on small business matters, and representing NASA before other Government agencies and industry on matters related to the small business program.

(b) *Installations.* The Head of each installation having procurement responsibilities shall designate a qualified individual in the contracting office as a "small business specialist" to provide a central point of contact to which small business concerns may direct inquiries concerning participation in the NASA procurement program and small business matters. The small business specialist shall also perform such other functions as specifically directed to perform by this subpart for which the Procurement Officer may prescribe for the purpose of implementing the small business program, including the assignment of responsibility for the Labor Surplus Area Program described in FAR Part 20. When the Head of an installation considers that the volume of procurement or the functions relating to procurement at the installation does not warrant a full-time small business specialist, these duties may be assigned to procurement personnel on a part-time basis.

(c) *Small Business Specialists.* The small business specialist appointed under paragraph (b) above shall perform the following duties, as determined appropriate to the installation by the Procurement Officer:

(1) Maintain a program designed to locate capable small business sources for current and future procurements, through SBA or other methods.

(2) Coordinate inquiries and requests for advice from small business concerns on procurement matters.

(3) Prior to issuance of solicitations or contract modifications for additional supplies or services, determine that small business concerns will receive adequate consideration including initiation of set-asides (see FAR Subpart 19.5). This determination may be made jointly with the contracting officer or may be in the form of a recommendation to the contracting officer. Disagreements

between the small business specialist and the contracting officer on proposed set-aside actions shall be resolved by the Procurement Officer whose decision shall be final except in those cases where an SBA representative intervenes as an interested party. (See FAR 19.505 as to resolution of disagreements with SBA recommendations on set-asides.)

(4) If small business concerns cannot be given an opportunity to compete because adequate specifications or drawings are not available, unless there are sufficient and valid reasons to the contrary, initiate action, in writing, with appropriate technical and contracting personnel to ensure that necessary specifications or drawings for the current or future procurements, as appropriate, are available.

(5) Review procurement programs for possible breakout of items suitable for procurement from small business concerns.

(6) Advise small business concerns regarding the financial assistance available under existing laws and regulations, assist such concerns in applying for financial assistance, and also assure that requests by small business concerns for financial assistance are not treated as a handicap in securing the award of contracts.

(7) Participate in determinations concerning responsibility of a prospective contractor (see FAR 9.103), whenever small business concerns are involved.

(8) Participate in the evaluation of a prime contractor's small business subcontracting program (see FAR 19.705–4).

(9) Review and make appropriate recommendations to the contracting officer on any proposal to furnish Government-owned facilities to a contractor if such action may hurt the small business program.

(10) Assure that participation of small business concerns is accurately reported.

(11) Notify the Procurement Officer of possible contracting opportunities in or near sections of concentrated unemployment or underemployment and of areas of persistent or substantial labor surplus.

(12) Make available to SBA copies of solicitations when so requested.

(13) Act as liaison between the contracting officer and SBA field offices and representatives in connection with set-asides, certificates of competency and any other matters in which the small business program may be involved. Procurements in which certificates of competency are requested shall be reported to the Assistant Administrator for Procurement, NASA Headquarters. The report should contain a description of the requirement, a list of the offerors, and the contract prices specified in the offers as submitted and the reason for the proposed rejection of an otherwise acceptable small business offer. Pertinent dates such as the required date for the completion of the procurement, the date of the request for the certificate of competency, etc., should also be furnished.

(14) In cooperation with the contracting officer and technical personnel, seek and develop information on the technical competence of small business concerns for research and development contracts. Regularly bring to the attention of the contracting officers and technical personnel descriptive data, brochures, and other information as to small business concerns that are apparently competent to perform research and development work in fields in which NASA is interested.

(15) When a small business firm's offer has been rejected for nonresponsiveness or nonresponsibility, upon request, aid, counsel, and assist that small business firm in understanding requirements for responsiveness and responsibility so that the firm may be able to qualify for future awards.

1819.202 Specific policies.

1819.202–5 Data collection and reporting requirements.

Records of the total value of contracts and subcontracts placed with small business concerns during each fiscal year shall be maintained and reported through the NASA procurement reporting system prescribed in Subpart 1804.6.

Subpart 1819.3—Determination of Status as a Small Business Concern

1819.302 Protesting a small business representation.

When the contracting officer determines in writing that award must be made without delay to protect the public interest, award will not be made prior to (a) 5 working days after the bid opening date for procurements placed through small business restricted advertising or (b) the deadline date for submitting a protest set forth in the notification to the apparently unsuccessful offeror(s) for small business set-aside procurements placed through conventional negotiation. (See FAR 19.302(h)(1).)

Subpart 1819.4—Cooperation with the Small Business Administration

1819.401 General.

All NASA contracting offices are responsible for consulting and cooperating with the SBA in carrying out the purposes of the Small Business Act.

1819.402 Small Business Administration procurement center representatives.

(a) The contracting office shall include in the appropriate solicitation list or in any group of firms to be solicited in specific procurements, the names of firms submitted by SBA, unless there is a valid reason for not so doing.

(b) If the contracting officer determines not to solicit a firm recommended by SBA in a particular procurement, and as a result no small business firm will be solicited, SBA may appeal such determination to the Procurement Officer.

1819.470 Access to procurement information.

Upon request, and subject to applicable security regulations, the small business specialist shall provide SBA representatives access to available or reasonably obtainable information, including technical data (including drawings and specifications), procurement history, and solicitation lists, and to procurement planning information. The SBA representative will be furnished such other available or reasonably obtainable information as may be required for the SBA referral program.

Subpart 1819.5—Set-Asides for Small Business

1819.501 General.

(a) The contracting officer is responsible for either setting aside a requirement or documenting why a set-aside is inappropriate. The small business specialist is responsible for reviewing those procurements not set aside and for taking action in accordance with 1819.506.

1819.502 Setting aside acquisition.

1819.502–3 Partial set-asides.

(a)(1) Offers obtained under the clause at FAR 52.219–7 Notice of Partial Small Business Set-Aside from firms eligible for the set-aside portion of the requirement shall be in writing and shall include (i) agreement as to the established set-aside price for the available set-aside quantity, (ii) agreement as to the required delivery, (iii) agreement that all other terms and conditions of the solicitation will apply

to the set-aside award, and (iv) agreement to inclusion of the clause at FAR 52.215–1, "Examination of Records by the Comptroller General" in 7.104–5 and the clause at FAR 52.215–2, "Audit Negotiation."

(2) When the award of the no-set-aside portion has been made to a small business concern and the same concern is entitled to receive the set-aside portion of the solicitation, the set-aside portion may be added to the basic contract by supplemental agreement utilizing Standard Form 30. The supplemental agreement shall (i) include a reference to the contractor's letter offering on the set-aside quantity, (ii) state the price and delivery schedule applicable to the set-aside quantity, and (iii) include the clauses prescribed at FAR 15.106–1 and 15.106–2. Copies of all pertinent documents, including the signed offer, shall be attached. The supplemental agreement shall be signed by the contracting officer but need not be signed by the contractor since his signature on the attached offer will be deemed sufficient.

(3) When the award for the non-set-aside portion has been made to a firm other than the concern entitled to receive the set-aside portion of the solicitation, award of the set-aside portion will be made utilizing Standard Form 26. The offers obtained and the award utilized shall reference and include the same data indicated in paragraphs (a)(1) and (2) above. Also, the award shall reference in Block 26 of Standard Form 26, the applicable solicitation and the contractor's written offer, and copies of the solicitation and offer shall be attached. The Standard Form 26 shall be signed by the contracting officer but need not be signed by the contractor. The contractor's signature on the attached offer will be deemed sufficient.

(b) For purposes of Subpart 1804.6 the non-set-aside portions shall be reported separately.

1819.503 Setting aside a class of acquisitions.

(a) The contracting officer shall retain copies of each class set-aside determination.

1819.505 Rejecting set-aside recommendations.

(a) NASA small business specialist may make a set-aside recommendation with respect to any individual or class set-aside except those on which an SBA representative has made a recommendation.

(b) If an SBA representative makes a recommendation, see FAR 19.505 for the procedure to be followed.

(c) If the small business specialist recommends that an individual procurement or class of procurements, or portion thereof, be set-aside the contracting officer shall promptly either:

(1) Concur in the recommendation, or

(2) Disapprove, stating in writing his reasons for disapproval.

(d) If the contracting officer disapproves the recommendation of the small business specialist, the case shall be promptly referred to the SBA representative (if one is assigned and available) for review. No further appeal action will be taken by the small business specialist. If an SBA representative is not assigned or available, resolution of disagreements on set-asides between the small business specialist and the contracting officer shall be accomplished under (f) below.

(e) All cases involving the noninitiation of a set-aside, whether resulting from a joint decision of the small business specialist and the contracting officer or a determination by the contracting officer alone, require referral to the SBA representative (if one is assigned and available) for his review. The SBA representative will either concur with the decision of the contracting officer or appeal the case under FAR 19.505.

(f) In those cases where an SBA representative is not assigned or available, and the contracting officer disagrees with the recommendation of the small business specialist regarding a small business set-aside for an individual procurement or class of procurements or a portion thereof and so notifies the small business specialist in writing, or if the small business specialist disagrees with the contracting officer regarding a withdrawal or modification of a set-aside determination, the small business specialist may appeal in writing to the Procurement Officer (see 1819.201(b)) for decision. A memorandum of the decision by the Procurement Officer shall be placed in the contract file. After receipt of a decision from the Procurement Officer, which shall be final, and if the decision approves the action of the contracting officer, the small business specialist shall forward for information and management purposes complete documentation of the case to the Director of Small and Disadvantaged Business Utilization, NASA Headquarters, Code K.

(g) A signed memorandum of nonconcurrence in a recommended set-aside action or of any withdrawal or modification shall be made and retained in the contract file.

Subpart 1819.6—Certificates of Competency and Determinations of Eligibility

1819.601 General.

(a) In any procurement where the highest competence obtainable or the best scientific approach is needed, as in certain negotiated procurements of research and development, highly complex equipment, or professional services, the certificate of competency procedure is not applicable to the selection of the source offering the highest competence obtainable or best scientific approach. However, if a small business concern has been selected on the basis of the highest competence obtainable or best scientific approach and, prior to award, the contracting officer determines that the concern is not responsible, the certificate of competency procedure is applicable.

(b) A pre-award survey (see FAR 9.106) shall be made prior to a determination by a contracting officer that a small business concern is not responsible on a proposed award exceeding the small purchase limitation.

1819.602 Procedures.

1819.602–1 Referral.

A copy of the communication referring the matter to SBA shall be forwarded to the Assistant Administrator for Procurement, NASA Headquarters.

1819.602–3 Resolving differences between the Agency and the Small Business Administration.

(a) When there is a disagreement between the contracting officer and the SBA as in FAR 19.602–3(a), the contracting officer shall also forward through channels on an expedited basis a complete case file to the Assistant Administrator for Procurement with a request that the case be considered for appeal to SBA Headquarters. This file will include the data already furnished to SBA, SBA's rationale for proposing affirmative certificate of competency action, and the contracting officer's comments thereon. Procurement action shall be suspended until the contracting officer is informed by the Assistant Administrator for Procurement of the final decision in the case.

(b) If the Assistant Administrator for Procurement concludes that the request for certificate of competency action should be withdrawn and a contract awarded without benefit of a certificate of competency, the contracting officer will be so informed and provided written instructions on how to proceed with the procurement.

(c) If the Assistant Administrator for Procurement agrees with the recommended appeal action of the contracting officer, SBA Central Office will be requested to review the proposed affirmative certificate of competency action of the SBA Regional office.

1819.602-70 Reports on certificates of competency.

The NASA Director of Small and Disadvantaged Business Utilization shall be informed by the contracting activity small business specialist, in writing, on a quarterly basis, of all certificate of competency cases initiated during a particular quarter and of the final disposition made on cases during the quarter, including the number and dollar value of certificates of competency issued during the period. The information shall include company name, item being procured, solicitation number, dollar value of the procurement, and the date the case was submitted to SBA. In addition, advice and data will be furnished for all cases where (a) the small business concern elects not to file an application for a certificate of competency, (b) SBA declines to issue a certificate of competency, or (c) the contracting activity reverses the pre-award survey activity's negative finding concerning responsibility, withdraws the request for the certificate of competency, and makes the award. This reporting requirement shall be included in the Summary of Significant Matters related to the Small Business Program Reports Control No. 10000000029.

Subpart 1819.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

1819.705 Responsibilities of the contracting officer under the subcontracting assistance program.

1819.705-1 General support of the program.

The FAR permits the contracting officer to use an incentive clause with monetary rewards for increasing subcontract opportunities for small and small disadvantaged business concerns. It is a NASA policy that no clause of this nature be used in connection with the subcontracting program set forth in FAR Subpart 19.7.

1819.707 The Small Business Administration's role in carrying out the program.

Under the provisions of FAR 19.707(a)(2) and (3), 5 days are allotted for SBA review of solicitations and contracts subject to the subcontracting program. In the absence of an SBA request for the documents, the contracting officer may elect not to seek review.

Subpart 1819.8—Contracting With the Small Business Administration (the 8(a) Program)

1819.801 General.

In contracts for supplies, services, and research and development, it is the stated policy of the SBA to contract with only those small firms which have submitted a written business plan specifically outlining a reasonable approach to the attainment of the policy objectives of this program. This business plan, if approved by the SBA, will be the basis for NASA's consideration of participation in a section 8(a) program for the firm. In the execution of this policy, the SBA will furnish to the Assistant Administrator for Procurement, NASA Headquarters or to the Procurement Officer of a particular NASA installation, when the requested procurement is of a local nature, its request for a commitment to support the approved plan. SBA requests addressed to NASA Headquarters will be coordinated with appropriate installations.

1819.803 Selecting acquisitions for the 8(a) program.

(a) The SBA, under FAR 19.803, makes two separate requests to NASA regarding an 8(a) firm's participation (see FAR 19.803 (b) and (c)). The first request is based on the firm's 8(a) business plan (see 1819.801) and seeks NASA's general commitment to support the firm's plan, that is, to contract with that firm. If NASA commits itself to support the plan, the SBA then makes specific requests to NASA to make 8(a) awards for individual contracts.

(b) The SBA request for a commitment will show the extent to which procurement assistance is needed and an identification of the requirements sought from NASA (the identification of the supplies or services which the SBA may require in connection with a small firm's business plan will be developed by the SBA representatives. This may be accomplished through liaison with appropriate contracting offices either before or after the SBA's approval of a small firm's business plan as the SBA may elect. Small business specialists at NASA installations shall cooperate and assist the SBA representatives in developing identifying information for the requirements being sought from the contracting office. To the extent possible, identifying information furnished by the SBA will be definitive and include purchase descriptions and national stock numbers. The small business specialist shall, when practicable and feasible, arrange for such additional assistance as may be required from procurement, technical, and supply management officials so that the development of the identifying information may be meaningful. Current and future requirements of a small firm's business plan, if identified in meaningful terms, will enable NASA to relate the items to present and future procurement requirements).

(c) It will be the responsibility of the SBA to provide the NASA contracting officer written certification, as to SBA's competency to perform the contract. Such certification may be in the form of a statement in the SBA contract with the NASA contracting office, substantially as follows:

> SBA certifies that it is competent to perform the requirement as stated in this contract.

1819.804 Agency evaluation of the Small Business Administration's request for a commitment.

(a) In addition to considering specific requests for commitments to support the business plans submitted by the SBA under FAR 19.803(b), the NASA small business specialist or other responsible individuals shall review and evaluate, on a continuing basis, all procurement requirements to determine their suitability for referral to the SBA for 8(a) consideration. Upon completion of such evaluation, a recommendation concerning award to the SBA will be made to the contracting officer. In the event the contracting officer disagrees with the recommendation, the procedure in FAR 19.505 shall apply.

(b) After the SBA requested commitments have been evaluated or a specific procurement has been designated as suitable for 8(a) contracting, the cognizant contracting officer shall notify the SBA and the Director of Small and Disadvantaged Business Utilization. The notification will include the extent to which a section 8(a) contract may be placed with the SBA and the time frame within which the prime and subcontract actions must be completed to satisfy NASA's requirements. This notification represents a firm commitment by NASA to negotiate with the SBA, provided that there is no material change in requirements, availability of funds, or other pertinent factors. Within ten working days after notification, the SBA will establish contract with the installation and initiate negotiations of the section 8(a) contract. If negotiations with the installation contracting office have not been initiated by the SBA

within the time indicated, the Procurement Officer will notify the Director of Small and Disadvantaged Business Utilization of the intent to proceed with the procurement without further regard to the section 8(a) procedures, unless additional time is requested by the SBA and such additional time can be granted considering the urgency of the requirement.

1819.806 Preaward considerations.

(a) A preaward survey of the SBA's contractor, as required by FAR 9.106, will not generally be requested by the NASA contracting officer. The SBA or the NASA contracting officer may request a cognizant contract administration office to assist in a review of a specific element pertaining to the SBA contractor's responsibility.

(b) Certified cost or pricing data, when required by FAR 15.804–2, or needed to determine an estimated current fair market price, shall be obtained by the contracting officer. The request shall provide for the submission in writing by the SBA's contractor of cost or pricing data with a supporting certificate.

(c) Subsequent to agreement with SBA on satisfactory terms and conditions, including an estimated current fair market price and receipt of the SBA's reimbursable order for any business development expense (if appropriate), the contracting officer shall proceed with the award of a contract to the SBA.

(d) For follow-on year procurements in support of the SBA requested commitment, the SBA will initiate individual requests to NASA for each ensuing proposed section 8(a) contract. This process will permit NASA, prior to actual negotiations of follow-on section 8(a) awards, to verify the availability of requirements, funding, and other pertinent factors. It will be the responsibility of the SBA to provide certification to the cognizant NASA contracting officer for each section 8(a) contract under FAR 19.803(c).

1819.809 Preparing the contracts.

1819.809–1 General.

(a) *Supplies and services (including research and development).* (1) As required by FAR 19.809–1(a), the contracting officer shall prepare a Standard Form 26 for execution with the SBA without incorporating any required clauses (see FAR 52.101(e)) since they are not applicable to the SBA. "10 U.S.C. 2304(a)(17)" shall be cited as the authority for negotiation of this contract. This contract shall include a statement as follows:

It is agreed that the provisions of the Termination for Convenience of the Government, Changes, Disputes, and Default clauses which are included in the contract between the SBA and its Contractor shall be invoked in appropriate cases when requested by the NASA contracting officer. If the SBA does not agree with the NASA contracting officer's request, the case shall be referred to the Assistant Administrator for Procurement, NASA Headquarters, for decision.

Note.—Where a cost-reimbursement type contract is utilized, the following words shall be substituted in the above statement:

Termination (Cost-Reimbursement) in lieu of Termination for Convenience of the Government.

Excusable Delays in lieu of Default.

(2) The execution and distribution of contractual documents by the cognizant NASA contracting office shall comply with FAR Subparts 4.1 and 4.2. The contracting office shall accomplish internal NASA distribution of both the prime contract and the subcontract, and provide the SBA with a duplicate original copy of the executed prime contract and such additional authenticated, conformed or reproduced copies as requested by the SBA. The SBA shall provide the NASA contracting office with two duplicate original copies of the executed subcontract and such additional authenticated, conformed or reproduced copies as requested by the contracting office for internal NASA distribution. For purposes of fund obligation and payment, the NASA contracting office shall ensure that the NASA paying office identified in the contract is provided a signed copy of each contract.

(b) *Construction.* (1) In contracts for construction, it is the stated policy of the SBA to contract with only those small firms which have been approved by the SBA as supporting the policy objectives of FAR 19.801(a). In the execution of this policy, the SBA will furnish to the Assistant Administrator for Procurement or to the Procurement Officer of a particular NASA installation when the requested procurement is of a local nature, its request for a commitment(s) showing at least the following information:

(i) The identification of the SBA's contractor(s) and the capabilities and qualifications of the contractor(s) to accomplish various categories of maintenance, repair, alteration and construction work in such specific work project categories as mechanical, electrical, heat and air conditioning, demolition, building, painting, paving, earth work, water front work or general construction work;

(ii) The total extent to which procurement assistance is needed and an individual identification of the estimated dollar value in each category in which the SBA's contractor(s) have capabilities; for example, electrical up to $100,000, mechanical up to $100,000;

(iii) Any other information concerning the capabilities of the proposed contractor(s) which would be pertinent to the evaluation of the requested commitments.

(2) The Director of Small and Disadvantage Business Utilization will coordinate the evaluation of the SBA's request for a commitment(s) with installation contracting offices, to determine whether or to what extent NASA has proposed work projects for which funding is available, in those categories for which the SBA has indicated its contractors have capabilities to perform. In addition, the NASA small business specialist, or other responsible individual, shall review on a continuing basis, all construction procurement requirements to evaluate their suitability for referral to the SBA for 8(a) consideration. Upon completion of such evaluation, recommendation concerning award to the SBA will be made to the contracting officer. In the event the contracting officer disagrees with the recommendation, the procedure in FAR 19.503 shall apply. In these evaluations consideration shall be given to—

(i) The extent to which work project(s) of the type requested by the SBA are planned for procurement in the current fiscal year and, to the extent known, future fiscal years;

(ii) Required performance schedule;

(iii) Work project(s) of similar complexity and nature if there are no known work project(s) of the specific type requested;

(iv) Problems encountered in prior work project(s) of the type requested;

(v) Impact if slippage occurs in the performance schedule;

(vi) Impact if the work project(s) was procured historically by small business set-asides; and

(vii) Any other information concerning the work project(s) or the contractor which is pertinent to the evaluation of the requested commitment(s).

(3)(i) After the SBA requested commitments have been evaluated or a specific NASA construction requirement has been designated as suitable for 8(a) contracting, the cognizant contracting officer shall notify the SBA and the Assistant Administrator for Procurement. The notification shall contain information regarding the work project(s) as follows:

(A) A summary of the scope of the proposed work.

(B) Detailed Government cost estimates.

(C) Plans and specifications.

(D) Required performance schedules.

(E) Any other pertinent and reasonably available data.

(ii) This notification represents a firm commitment by NASA to negotiate with the SBA, provided there is no material change in requirements, availability of funds, or other pertinent factors. Within ten working days after notification, the SBA will establish contact with the installation and initiate negotiations of the section 8(a) contract. If negotiations with the installation contracting office have not been initiated by the SBA within the time indicated, the contracting office will notify the Assistant Administrator for Procurement of the intent to proceed with the procurement without further regard to the section 8(a) procedures, unless additional time is requested by the SBA and such additional time can be granted considering the urgency of the work project.

(4) Provisions of the Miller Act regarding performance and payment bonds do not apply to the prime contract between NASA and the SBA, but do apply to the contract between the SBA and its contractor.

(5) Certified cost or pricing data, when required by FAR 15.804–2 or needed to determine an estimated current fair market price, shall be obtained by the contracting officer. The request shall provide for the submission in writing by the SBA's contractor of appropriate cost or pricing data with a supporting certificate.

(6) It will be the responsibility of the SBA to provide written certification, as to its competency to perform the contract, to the contracting officer. Such certification may be made under FAR 19.803(c).

(7) Subsequent to agreement with SBA on satisfactory terms and conditions, including an estimated current fair market price, and receipt of the SBA's reimbursable order for any business development expense (if appropriate), the contracting officer shall proceed with the award of a contract to the SBA.

(8) To assist the SBA, NASA contracting offices shall prepare two contract sets as follows:

(i) Prepare appropriate contractual documents for use by the SBA with the SBA's contractor. These documents shall be completed, except for signatures and award information (see 1819.809–1), based on information requested or furnished by the SBA. This contract shall incorporate the required clauses and standard forms as required.

(ii) Prepare Standard Form 1442 or other appropriate forms for execution with the SBA without incorporating any required clauses. The required clauses are not applicable to the SBA. "10 U.S.C. 2304(a)(17)" shall be cited as the authority for negotiations of this contract. This contract shall include a statement as follows:

It is agreed that the provisions of the Termination for Convenience, Changes, Differing Site Conditions, Default-Damages for Delay-Time Extension, Suspension of Work, Disputes, Price Reduction, and Payments to Contractor clauses which are included in the contract between the SBA and its Contractor shall be invoked in appropriate cases when requested by the NASA Contracting Officer. If the SBA does not agree with the NASA Contracting Officer's request, the case shall be referred to the Assistant Administrator for Procurement, NASA Headquarters, for decision.

(9) The execution and distribution of procurement documents shall be in accordance with Part 1804 and as set forth herein.

1819.810 Contract administration.

To the extent consistent with NASA capability and resources, SBA contractors furnishing NASA requirements shall be afforded production assistance, including, where appropriate, identification of causes of deficiencies in their products and suggested corrective action to make such products acceptable.

PART 1822—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 1822.1—Basic Labor Policies

Sec.
1822.101 Labor relations.
1822.101–1 General.
1822.101–3 Reporting labor disputes.
1822.101–4 Removal of items from contractors' facilities affected by work stoppages.
1822.101–70 Inspection of material during labor disputes.
1822.101–71 Admission of labor representatives to contract sites.
1822.102 Federal and State labor requirements.
1822.102–70 Suspension or relaxation of State labor standards.
1822.103 Overtime.
1822.103–4 Approvals.

Subpart 1822.6—Walsh-Healey Public Contracts Act

1822.604 Exemptions.
1822.604–2 Regulatory exemptions.

Subpart 1822.8—Equal Employment Opportunity

1822.804 Affirmative action programs.
1822.804–2 Construction.
1822.805 Procedures.
1822.805–70 Preaward clearances for contracts between the small purchase limitation and $1,000,000.
1822.807 Exemptions.
1822.870 Reports and other required information.

Subpart 1822.10—Service Contract Act of 1965

1822.1001 Definitions.
1822.1003 Applicability.
1822.1007 Notice of Intention to Make a Service Contract.

Subpart 1822.11—Professional Employee Compensation

1822.1103 Policy, procedures, and solicitation provisions.

Subpart 1822.13—Special Disabled and Vietnam Era Veterans

1822.1306 Complaint procedures.

Subpart 1822.70—Non Discrimination—Government Lease

1822.7001 Policy.
1822.7002 Contract clause.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1822.1—Basic Labor Policies

1822.101 Labor relations.

1822.101–1 General.

(a) NASA contracting officers, in taking any of the actions prescribed or authorized in FAR Part 22 or Part 1822, will consult with and get advice from the labor relations advisor or other NASA official assigned that function at the installation concerned.

(b) NASA officials will not take any action regarding labor matters involving major policy determinations having a substantial impact on the activities of NASA or other Government agencies without the prior approval of the Director, Office of Industrial Relations (Code NR–31). A full report concerning any labor relations problem, particularly where a labor dispute significantly threatens to affect important NASA procurement, should be furnished to Code NR–31 in accordance with 1822.101–3.

(c) When a strike which may have an adverse effect on NASA programs is imminent or in progress at a prime's or subcontractor's plant, contracting officers shall—

(1) Advise both the prime contractor and the head of the union local in writing of the expected impact of the strike on NASA programs and, where appropriate, of the actions NASA is considering to protect the Government's interest and prevent delay in the accomplishment of NASA's mission. If the strike is in a subcontractor's plant, the subcontractor will only be approached through the prime contractor;

(2) Explore the possibility of locating other sources for the supplies or services to have been provided by the strike-threatened plant;

(3) Consider taking the actions at FAR 22.101–4.

1822.101–3 Reporting labor disputes.

Reports of actual or incipient labor-management disputes affecting NASA procurement, operations, or services shall be submitted as specified by the Director, Office of Industrial Relations. Reports shall be made as early as possible and shall include immediately available information. Supplemental reports shall be made, as appropriate, to provide full information and cover new developments. Reports shall be sent by the most expeditious means required in view of the seriousness of the situation. When an immediate critical effect on NASA procurement is probable, the initial report shall be made by telephone and followed by an electronically transmitted message or a confirming letter. These reports shall describe, but need not be limited to—

(a) The nature of the actual or incipient dispute, including whether a strike, lockout, slow-down, shut-down, or picketing is involved and the degree of emergency presented;

(b) The character, quantity, and importance of the supplies, operations, or services involved, including scheduled performance and delivery dates and the relation of the production involved to the total procurement program;

(c) The identity and location of the parties to the dispute and their representatives, including the approximate number of employees involved;

(d) The need for and availability of alternative facilities to furnish the items involved within the time required;

(e) The critical items, if any, which should be removed from the plant or work site or should be continued to be processed there with the consent of the parties to the dispute; and

(f) Recommended action to be taken by NASA.

1822.101–4 Removal of items from contractors' facilities affected by work stoppages.

When the contracting officer determines that it would be in the best interest of the Government to remove items or to arrange for shipment of urgently required items as provided in FAR 22.101–4(a)(2), the contracting officer shall first request approval from Code NR–31 and then take such action as shall be approved.

1822.101–70 Inspection of material during labor disputes.

Despite the existence of a labor dispute, inspection functions at contract plants or sites shall be performed as normally required during contract performance except where the safety of the inspector may be endangered.

1822.101–71 Admission of labor representatives to contract sites.

NASA activities shall not prevent the access of labor union representatives to contract sites for the conduct of union business if their activities are compatible with performance of the contract work involved and applicable safety and security regulations.

1822.102 Federal and State labor requirements.

1822.102–70 Suspension or relaxation of State labor standards.

(a) NASA shall not initiate applications to State agencies or officials for the suspension or relaxation of State labor standards.

(b) Contracting officers may support applications of contractors or subcontractors when relaxation of State labor standards does not conflict with applicable Federal labor laws and when all of the following circumstances are present:

(1) The required products or services are in short supply and failure to meet production schedules for critically needed end items will result unless the suspension or relaxation of State labor standards is approved.

(2) There are no alternative sources of supply for such products or services available within the required delivery schedule.

(3) Remedial action (such as recruitment, training, and more effective utilization of manpower) is not practicable.

(4) The granting of the application will not result in impairment of working conditions to the extent that productivity at the facility will be adversely affected.

(c) NASA letters of support will be addressed to the appropriate State agency and will indicate—

(1) The facilities and services affected; and

(2) The extent of relaxation of the particular State labor standard required to complete the specific work in conformity with the delivery schedule.

1822.103 Overtime.

1822.103–4 Approvals.

(a) The Procurement Officer or designees are authorized to approve overtime premiums at Government expense. Where two or more contracting officers have current contracts at a single facility, and the approval of overtime by one contracting office will affect the performance or cost of contracts of another, the approving official will obtain the concurrence of other appropriate approving officials and seek agreements as to the contracts under which overtime premiums will be approved. If the approving officials do not agree within a reasonable time as to the action to be taken, a decision shall be obtained through normal channels. Ordinarily, in the absence of evidence to the contrary, a contracting office may rely on the contractor's statement that such approval will not affect the performance, or payments in connection with any contract of another contracting office. Designations to approve overtime shall be in writing and shall not be delegated beyond the first level of supervision below the Procurement Officer.

Subpart 1822.6—Walsh-Healey Public Contracts Act

1822.604 Exemptions.

1822.604–2 Regulatory exemptions.

Applications for exceptions from one or more of the Act's stipulations under FAR 22.604–2(c)(1) shall be submitted in writing through the contracting officer with pertinent data and recommendations to the Director, Office of Industrial Relations (Code NR–31).

Subpart 1822.8—Equal Employment Opportunity

1822.804 Affirmative action programs.

1822.804–2 Construction.

In compliance with FAR 2.804–2(b), listing of covered geographical areas in NASA FAR Supplement Directives.

1822.805 Procedures.

1822.805–70 Preaward clearances for contracts between the small purchase limitation and $1,000,000.

In determining the contractor's responsibility for award of a contract in an estimated or actual amount between the small purchase limitation and $1,000,000, if the contracting officer learns or has reason to believe because of information from Government sources or from the offeror (see FA 52.222–21) that the prospective contractor is currently in violation of the Equal Opportunity clause, or has not developed an acceptable affirmative action program at each of his establishments, award shall be made only after ascertaining that the company

is no longer in noncompliance and is, therefore, eligible for award. The contracting officer will request any clearance from OFCCP at least 30 calendar days prior to the proposed contract award date. Award may also be made, notwithstanding the company's failure to have developed an acceptable affirmative action program, if the contracting officer determines that the proposed contract is for less than $50,000 or that the company has fewer than 50 employees and, in either case, has not previously been required to develop an affirmative action program.

1822.807 Exemptions.

To request an exemption under FAR 22.807(a)(1), the contracting officer shall prepare a detailed justification for such determination which shall be submitted to the Administrator.

1822.870 Reports and other required information.

(a) Title 41, Section 60–1.2 of the CFR prescribes the annual filing of required forms by prime contractors and subcontractors.

(b) If the bidder or prospective prime contractor fails to complete the representation at FAR 52.222–22, he/she should state, prior to award of the contract, whether he/she has participated in any previous contract or subcontract subject to the Equal Opportunity clause; and, if so, whether he/she has filed with the Joint Reporting Committee, the Director, OFCCP, or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements.

(c) In any case in which the bidder, prospective prime contractor or proposed subcontractor who participated in a previous contract or subcontract subject to Executive Order 10925, 11114, or 11246 has not filed a report due under the applicable filing requirements, the contract or subcontract shall not be awarded unless such contractor or subcontractor submits a report covering the delinquent period or such other period specified by the Director, OFCCP, and notifies the contracting officer of such submission.

(d) A bidder or prospective prime contractor or proposed subcontractor shall be required to submit such information, including copies of affirmative action programs, the Director, OFCCP, requests prior to the award of the contract or subcontract. When a determination has been made to award the contract or subcontract to a specific contractor, such contractor shall be required, prior to or after the award, or both, to furnish such information, including copies of affirmative action programs, as Director, OFCCP, requests.

(e) Failure to file timely, complete, and accurate reports as required constitutes noncompliance with the prime contractor's or subcontractor's obligations under the Equal Opportunity clause and is the basis for the imposition by Director, OFCCP, of any sanctions authorized by these regulations or for cancellation or termination of the subcontract by prime contractor or subcontractor. Any such failure shall be reported in writing to the Director, OFCCP, by the contracting officer as soon as practicable after it occurs.

(f) Reports filed and information furnished pursuant to FAR Subpart 22.8 shall be used only in connection with the administration of EO 11246, the Civil Rights Act of 1964, or in furtherance of the purpose of the Executive Order and Act and, to the extent consistent with this purpose, shall be held in confidence as privileged information in accordance with 32 CFR 286.6(b)(4) when requested by the offeror, contractor, or subcontractor.

Subpart 1822.10—Service Contract Act of 1965

1822.1001 Definitions.

"Agency labor advisor," means the Director, Office of Industrial Relations, NASA Headquarters (Code NR–31).

1822.1003 Applicability.

All requests for determinations and exemptions (see FAR 22.1003(e)) shall be submitted in writing through contracting channels to Code NR–31.

1822.1007 Notice of intention to Make a Service Contract.

(a) Contracting officers shall ensure that completed Standard Form 98/98a, Notification of Intent to Make a Service Contract and Response to Notice (original and 4 copies), reach Code NR–31 at least 40 days before issuing any solicitation, or opening negotiations for the contract extension, or exercising the option.

(b) Requests to expedite wage determinations shall be sent to Code NR–31.

(c) The information requested, below, by item number, shall be furnished, in addition to that required by the SF 98/98a:

(1) *Item 6.* Insert on the far left side of the block the applicable code identifying the type of proposed action:

Code and Proposed Action

I New Contract.
II Recompetition of services.
III Contract modifications affecting the scope of the work (see FAR 22.1007(f)).
IV Extension of contract performance through exercise of an option or otherwise (see FAR 22.107(h)).
V Other (e.g., when a multiyear contract (funding is not subject to annual appropriation) is to be entered into, NASA Headquarters (Code NR–31) shall be notified at the time of submission of the required SF 98/98a (see 1817.1)).

(2) *Item 8.* (i) If the proposed contract will be awarded under Section 8(a) of the Small Business Act, insert both the Small Business Administration and the name of the subcontractor.

(ii) If there is an incumbent contractor, the contractor's wage rate ranges and current actual wage rates being paid to the various classes of non-exempt, unrepresented employees will be included as part of the wage data submitted.

(iii) If there is no incumbent contractor, furnish whatever information that is available on wages and fringe benefits currently being paid in the locality.

(iv) If no wage determination is currently available for the particular contract, insert "None" in Item 8.b.

(3) *Item 10.* In addition to information requested, add the solicitation number, if known.

(4) *Item 12.* (i) When entering into a new service contract, all classes of work expected to be performed under the contract will be listed under this item, regardless of whether the class of employees is considered professional, executive, administrative, or hourly. However, if submission of the SF's 98/98a is in connection with any actions other than Code I in paragraph (c)(1) above, list only the classes of work that the incumbent contractor indicates are "nonexempt."

(ii) When classifications include both those categories of employees covered by a collective bargaining agreement and those not represented by a union, distinguish the difference by marking the classifications that are unionized with an asterisk(s).

(iii) If the classification of work is not known, use the most descriptive job title available for the work to be performed under the contract.

(5) *Item 13.* If the number of employees is not known, the estimated manhours required to perform the tasks should be designated so that manning estimates can be determined and listed.

(6) *Item 14.* This item shall also include the wage rates that would be paid if the employees were subject to 5 U.S.C. 5332 (GS grades).

Subpart 1822.11—Professional Employee Compensation

1822.1103 Policy, procedures, and solicitation provisions.

(a) The instructions in paragraph (a) of the clause at FAR 52.222–46, Evaluation of Compensation for Professional Employees, shall be augmented in Section M of the solicitation with an explanation of how the Government will evaluate the offeror's plan. The Government's assessment of the plan shall be a weighted and scored evaluation criterion under the Mission Suitability Factor—Understanding the Requirement. This criterion shall be accorded sufficient weight and relative order of importance to be effective under the particular circumstances involved. When there is a significant number of professional employees involved, the period of performance is lengthy, and the cost relatively large, or there is continuity of the same or similar services at the same location, the weight and relative importance of the criterion should be in the "most important" category.

(b) The cost realism of professional compensation proposed (see paragraph (c) of the clause at FAR 52.222–46) shall be identified as an evaluation factor in Section M of the solicitation.

Subpart 1822.13—Special Disabled and Vietnam Era Veterans

1822.1306 Complaint procedures.

The Assistant Administrator for Equal Opportunity Programs (Code U) is the NASA official designated to act on complaints received about administration of the Act.

Subpart 1822.70—Nondiscrimination—Government Lease

1822.7001 Policy.

It is NASA policy to include a Facilities Nondiscrimination clause in leases when NASA is the lessee. The policy has been adopted because Federal employees belonging to minority groups and other members of minority groups doing business with the Government in some parts of the country have been denied the use of public facilities located in buildings where the Government leases office space.

1822.7002 Contract clause.

(a) The contracting officer shall include the clause at 1852.222–70, Facilities Nondiscrimination Notice, in all solicitations involving leases and resulting leases.

(b) The contracting officer shall include the clause at 1852.222–71, Facilities Nondiscrimination, in all leases where (1) the total annual rental exceeds $10,000 or (2) the total annual rental under a new lease, combined with the total annual rental under all other NASA leases of space in the same building, exceeds $10,000.

PART 1823—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

Subpart 1823.1—Pollution Control and Clean Air and Water

Sec.
1823.106 Delaying award.
1823.107 Compliance responsibilities.

Subpart 1823.3—Hazardous Material Indentification and Material Safety Data

1823.302 General.
1823.370 Acquisition of potentially hazardous items from or through another Government agency.

Subpart 1823.70—Safety and Health

1823.7000 Scope of subpart.
1823.7001–2 Policy.
1823.7002 Responsibility.
1823.7003 Hazardous operations.
1822.7004 Contracts clauses.

Subpart 1823.71—Frequency Authorization

1823.7101 NASA contract clauses.
1823.7102 Forms.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1823.1—Pollution Control and Clean Air and Water

1823.106 Delaying award.

All notifications initiated by the contracting officer under FAR 23.106 shall be submitted to the EPA through the Procurement Officer and Assistant Administrator for Procurement. NASA Headquarters (Code HS–1).

1823.107 Compliance responsibilities.

Notifications under FAR 23.107 shall be submitted through the same channels as under 1823.106.

Subpart 1823.3—Hazardous Material Identification and Material Safety Data

1823.302 General.

As authorized under FAR 23.302(c)(3), NASA has designated the following as a "potentially hazardous" item.

Electro-sensitive initiating devices (squibs).

1823.370 Acquisition of potentially hazardous items from or through another Government agency.

When acquiring supplies or services from or through another Government agency (e.g., see FAR Part 8 and FAR Subpart 17.5) NASA shall request the acquiring agency to furnish NASA with the data required by FAR Subpart 23.3 and the clause at FAR 52.223–3.

Subpart 1823.70—Safety and Health

1823.7000 Scope of subpart.

This subpart contains NASA's safety and health policy responsibility, and requirements relating to its contractors.

1823.7001 Policy.

It is NASA policy that contractors and subcontractors shall perform in a safety and health conscious environment which, within the limits of controllable hazards, will—

(a) Protect the life, health, and physical well-being of NASA and contractor employees during their work on NASA programs;

(b) Assure proper protection of the public from hazards incident to operations of NASA contractors and subcontractors;

(c) Avoid accidental work interruptions which could delay NASA programs;

(d) Prevent contamination and damage to or loss of property, supplies and equipment;

(e) Provide data whereby risks and loss factors in space technology related to NASA programs can be accumulated and evaluated; and

(f) Comply with applicable regulations, standards, and guides.

1823.7002 Responsibility.

(a) *Originators of procurement requests.* Originators of procurement requests will ensure, in accordance with installation safety and health screening criteria, that procurement requests affected by considerations of safety or health are processed through the appropriate installation safety officials and installation health officers or other designated responsible officials for (1) determining if hazards are involved in the procurement, (2) formulating or selecting specific safety and health provisions applicable to the procurement in accordance with FAR Subpart 23.3 or applicable NASA instructions, and (3) determining to what extent a contractor safety and health plan will be required.

(b) *Installation safety officials, occupational health officials, or other designated responsible officials.* The appropriate installation safety and health officials, with their respective areas of responsibility, will advise and assist the contracting officer in—

(1) Evaluating prospective contractors' safety and health programs;

(2) Determining to what extent safety and health provisions, if any, should be included in a proposed procurement;

(3) Assigning the specific safety and environmental health provisions to be included in a contract Schedule;

(4) Determining, in coordination with the cognizant program or project manager, the need for and the adequacy of contractors' safety and health plans;

(5) Assigning the specific occupational medicine provisions to be included in a contract Schedule;

(6) Determining the extent and form of accident or incident reports, required of contractors in compliance with the Federal Reports Act of 1942, and NASA reporting requirements;

(7) Requesting inspections of NASA contractors by representatives of the Occupational Safety and Health Administration (OSHA) when appropriate; and

(8) Reviewing contractor hazardous operations procedures and certification requirements.

(c) *Headquarters occupational health official.* At installations where medical and environmental health officers or other designated responsible officials are not available to assist with the formulation of occupational medicine and environmental health provisions of a contract, the Director, NASA Occupational Health Office, NASA Headquarters (Code NPG–34), will assume this responsibility.

(d) *Contracting officer.* (1) The contracting officer will obtain advice, assistance, recommendations, and applicable requirements from the appropriate safety and health officials prior to the issuance of a solicitation in the following procurements:

(i) Construction, modification, and demolition of facilities on Government installations.

(ii) Manufacture of aerospace systems, including such items as power units, energy systems, boosters, engines, liquid and solid fuels, oxidizers, and/or propellants.

(iii) Transportation of fuels, oxidizers, hazardous chemicals, and other hazardous or regulated materials.

(iv) Research, development, or test of engines, related components and propellants which involve hazardous operations or the use of hazardous or regulated materials.

(v) Services on Government installations which involve hazardous operations or the use of hazardous or regulated materials.

(vi) Operations which involve the use of or exposure to potential health hazards (asbestos, polychlorinated biphenyls (PCB's), etc.) confined space entries, use of hazardous materials, or potential contamination of property, and pollution of air, water, vegetation, and soil.

(vii) Activities which may (by either direct or secondary effect) adversely effect the work environment due to the use of ionizing radiation, microwaves, noise, lasers, ultraviolet, and infrared sources.

(viii) Operations which necessitate exposures in neutral buoyancy or hyperbaric chambers and operations related thereto.

(2) Before issuing a stop-work order under paragraph (d)(2) of the "Safety and Health" clause at 1852.223–70, prior coordination will be effected with the safety and health officials and with the cognizant program or project manager.

1823.7003 Hazardous operations.

Hazardous operations are those that involve the use of, or handling of, hazardous materials or other materials, phenomena or elements at abnormal environmental or physical parameters that could result in personnel injury, illness or property damage if special precautions are not followed (e.g., high pressure gas operations in excess of 150 pounds per square inch gauge (psig), low pressure high volume gas operations, voltages above 550 volts, storage or handling of propellants or explosives, use of "heavy lift" material handling equipment, high or low temperature environments, environments with less that 19.5 percent or more than 25 percent oxygen by volume at normal atmospheric pressure, reduced gravity, radiation, or excessive noise).

1823.7004 Contract clauses.

(a) Specific system safety requirements which are to be included in the contract for the purpose of procuring system safety engineering services shall be defined in the contract Schedule in accordance with applicable NASA instructions.

(b) Any unique facility safety or health requirements, which are in addition to the general requirements of the clause at 1852.223–70, Safety and Health, shall be prescribed as required by 1823.7002(b)(3).

(c) Except as provided in paragraph (d) below, the clause at 1852.223–70 shall be included in—

(1) All negotiated contracts of $1,000,000 or more, unless the contracting officer makes a written determination in accordance with 1823.7002(b)(2) that, under the circumstances of the procurement, the clause is not necessary;

(2) All construction, repair, or alteration contracts in excess of $25,000;

(3) All contracts having, within their total requirement, construction, repair, or alteration tasks in excess of $25,000; and

(4) Any procurement regardless of dollar amount when (i) the deliverable contract end items are of a hazardous nature or (ii) during the life of the contract it can reasonably be expected that hazards will be generated within the operational environment, and the contracting officer determines that the hazards warrant the inclusion of the clause.

(d) The clause prescribed in paragraph (c) above may be excluded from any contract which is subject to either the Walsh-Healy Public Contracts Act (see FAR Subpart 22.6) or the Service Contract Act of 1965 (see FAR Subpart 22.10) and in which the application of either Act and any regulations thereunder constitute adequate safety and health protection. However, the clause should not be excluded without approval of the local safety and health officials.

Subpart 1823.71—Frequency Authorization

1823.7101 NASA contract clauses.

The contracting officer shall insert the clause at 1852.223–71, Frequency Authorization, in any contract which calls for developing, producing, constructing, testing, or operating a device for which a radio frequency authorization is required.

1823.7102 Forms.

NASA Form 566, Application for Radio Frequency Assignment (see 1853.223–566), shall be used to request radio frequency assignments under the clause at 1852.223–71.

Part 1824—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 1824.1—Protection of Individual Privacy

Sec

1824.000 Scope of part.
1824.103 Procedures.
1824.103–70 Applicability.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1824.1—Protection of Individual Privacy

1824.000 Scope of part.

NASA rules and regulations implementing the Privacy Act are located at 14 CFR 1212.100 et seq.

1824.103 Procedures.

1824.103–70 Applicability.

(a) The Privacy Act is not applicable to a system used by a contractor as a result of management discretion. For example it is not applicable to systems

of personnel records maintained by contractors on their own behalf.

(b) Illustrations of systems of records to which the Act applies include the following:

(1) Records which are maintained for administrative functions of a Federal agency, such as personnel and payroll records.

(2) Health records which are maintained by a contractor engaged to provide health services to agency personnel.

(c) Illustrations of systems of records to which the Act does not apply include the following:

(1) Records which are maintained by a contractor on individuals whom the contractor employs in the process of providing goods and services to the Federal Government.

(2) Under contracts with a State or private educational organization to provide training, the records generated on contract students pursuant to their attendance (admission forms, grade reports), are similar to those maintained on other students, and are commingled with their records on other students.

PART 1825—FOREIGN ACQUISITION

Subpart 1825.1—Buy American Act—Supplies

Sec.

1825.101 Definitions.
1825.102 Policy.
1825.103 Agreements with foreign governments.
1825.105 Evaluating offers.
1825.109 Solicitation provisions and contract clause.
1825.109–70 NASA solicitation provision.

Subpart 1825.2—Buy American Act—Construction Materials

1825.202 Policy.
1825.205 Solicitation provision and contract clause.
1825.205–70 NASA contract clause.

Subpart 1825.3—Balance of Payments Program

1825.304 Excess and near-excess foreign currencies.

Subpart 1825.4—Purchases Under the Trade Agreements Act of 1979

1825.401 Definitions.
1825.402 Policy.
1825.402–70 Centralization of foreign acquisition.
1825.403 Exceptions.
1825.403–70 Coordination of arms purchases.
1825.405 Procedures.

Subpart 1825.6—Customs and Duties

1825.604 Exempted supplies.
1825.670 Legal representation.

Subpart 1825.7—Restrictions on Certain Foreign Purchases

1825.703 Exceptions.

Subpart 1825.9—Omission of the Examination of Records Clause

1825.903 Conditions for omission.
1825.903–70 Request for determination and findings.

Subpart 1825.70—Foreign Contracts

1825.7000 Scope of subpart.
1825.7001 Definition.
1825.7002 Policy.
1825.7003 Assignment of responsibility for contract negotiation.
1825.7004 Procedure.
1825.7005 Assignment of contract administration.
1825.7006 Contracts with foreign nationals.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1825.1—Buy American Act—Supplies

1825.101 Definitions.

"Canadian end product" means an unmanufactured end product, mined or produced in Canada, or an end product manufactured in Canada if the cost of its components which are mined, produced, or manufactured in Canada or the United States exceeds 50 percent of the cost of all its components. The cost of components shall include transportation costs to the place of incorporation into the end product.

1825.102 Policy.

(a) Subject to the approval requirements in paragraph (c) below, contracting officers are authorized to make determinations under FAR 25.102(a)(4) and to make additional determinations of nonavailability both prior to entering into contracts and in the course of contract administration; *provided,* however, that in the latter case the Government receives adequate consideration. A copy of each determination of nonavailability will be included in the contract file.

(b) The following is the format for nonavailability determinations made by contracting officers:

Determination of Nonavailability

Pursuant to the authority contained in the Buy American Act (41 U.S.C. 10) and authority delegated to me by 48 CFR 1825.102(a), I hereby find—

a. (Insert a description of the item or items to be procured, including unit, quantity, and estimated cost inclusive of duty and transportation costs to destination.);

b. (Enter the name and address of proposed contractor or supplier and country of origin of the items.);

c. (Include a brief statement of the necessity for the procurement.);

d. (Include a statement of facts establishing the nonavailability of similar items of domestic origin. If there are no known domestic items which can be used as a reasonable substitute, make a statement to this effect.) Based upon these findings, I determine that the above-described item(s) is not mined, produced, or manufactured, or the articles, materials, or supplies from which it is manufactured, are not mined, produced, or manufactured, as the case may be, in the United States in sufficient and reasonably available quantities and of a satisfactory quality.

Accordingly, the requirement of the Buy American Act that procurement be made from domestic sources and that the item(s) be of domestic origin is not applicable to this procurement, since said procurement is within the nonavailability exception stated in the Buy American Act. Authority is granted to procure the above-described item(s) of foreign origin (country of origin) at an estimated total cost of $——, including duty and transportation costs to destination.

(Date)——————————

Contracting Officer——————————

(c) Determinations made under 1825.102(a) shall be approved by the Head of the Installation.

1825.103 Agreements with certain foreign governments.

(a) The Administrator has determined that it would be inconsistent with the public interest to apply the restrictions of the Buy American Act to the acquisition of certain supplies mined, produced, or manufactured in Canada (see NMI 5106.2, "Determination Under the Buy American Act—Canadian Supplies"). Accordingly, contracting officers shall—

(1) Evaluate all bids and proposals offering Canadian end products on a parity with bids and proposals offering domestic-source end products, except that applicable duty (whether or not a duty-free entry certificate may be issued) shall be included in evaluating such bids and proposals offering Canadian end products; and

(2) Treat all components mined, produced, or manufactured in Canada as though they were mined, produced, or manufactured in the United States, except that, in evaluating bids and proposals containing such components, applicable duty (whether or not a duty-free entry certificate may be issued) shall be included.

(b) The procedures in paragraph (a) above do not apply to or affect items—

(1) Listed in FAR 25.108; or

(2) Determined to be nonavailable under 1825.102.

1825.105 Evaluating offers.

The following are examples of evaluation of bids and proposals using the provisions of FAR 25.105.

(a) *Example 1:* Price differential of 6 percent or less between low foreign (non-Canadian) and low domestic bid or proposal:

	Low domestic bid	Low foreign bid
Cost to destination	$20,000	$19,000
Import duty		500
Total	20,000	19,500
6 percent differential		1,176
Total	20,000	20,776

The low domestic bid is not unreasonable; award would be made to the low domestic offeror.

(b) *Example 2:* Price differential in excess of 6 percent between low foreign (non-Canadian) and low domestic bid or proposal, and small business and/or labor surplus area concerns are not involved.

	Low domestic bid	Low foreign bid
Cost to destination	$20,000	$17,000
Import duty		500
Total	20,000	17,500
6 percent differential		1,050
Total	20,000	18,550

The low domestic bid is unreasonable; award would be made to the low foreign offeror.

(c) *Example 3:* Low domestic offeror is a small business and/or labor surplus area concern; the low domestic bid or proposal exceeds the low foreign (non-Canadian) bid or proposal by more than 6 percent, and small purchase procedures are not involved.

Item	Low foreign bids (include transportation to destination and duty)		Low domestic bids (include transportation to destination)			
	A Company	B Company	C Company	D Company	E Company	Difference (percent)
1	$20,000		$24,000			20
2	40,000		46,000			15
3		$20,000		$23,000		11
4	20,000				$22,606	13
5		30,000		32,700		9
6	20,000		22,000			10
7	10,000		10,700			7
8	5,000				6,500	30
Total			102,700			

(1) For Items 1, 2, 6, and 7, proposed awards would be submitted to the Assistant Administrator for Procurement for decision by the Administrator since (i) the low acceptable domestic offer exceeds the low acceptable foreign offer plus 6 percent on an item-by-item basis, (ii) the low acceptable domestic offeror is a small business or labor surplus area concern, and (iii) the low acceptable domestic offer exceeds $100,000.

(2) For Items 3 and 5, award would be made to the low acceptable domestic offeror, since (i) the differential is less than 12 percent on an item-by-item basis, (ii) the low acceptable domestic offeror is a small business and/or labor surplus area concern, and (iii) the low acceptable domestic offer is less than $100,000.

(3) For Items 4 and 8, award would be made to the low foreign offeror, since (i) the differential exceeds 12 percent on an item-by-item basis, (ii) the low acceptable domestic offeror is a small business and/or labor surplus area concern, and (iii) the low acceptable domestic offer is less than $100,000.

1825.109 Solicitation provisions and contract clause.

1825.109–70 NASA solicitation provision.

The contracting officer shall insert the clause at 1852.225–70, Percent Foreign Content, in all solicitations (including construction) except those made outside the United States.

Subpart 1825.2—Buy American Act—Construction Materials

1825.202 Policy.

(a) Subject to the approval requirements in paragraph (b) below, contracting officers are authorized to make determinations under FAR 25.202(a)(3) and to make additional determinations of nonavailability both before and after contract award; *provided,* however, that in the latter case the Government receives adequate consideration. The format for nonavailability determinations is at 1825.102(b).

(b) Determinations made under paragraph (a) above shall be approved by the Head of the Installation.

1825.205 Solicitation provision and contract clause.

1825.205–70 NASA contract clause.

The clause at 1852.225–71, Nondomestic Construction Materials, shall be included in all contracts for construction, and any article of materials and supplies which have been the subject of additional determinations under 1825.202(a) shall be listed thereunder.

Subpart 1825.3—Balance of Payments Program

1825.304 Excess and near-excess foreign currencies.

The determination of the feasibility of using excess or near-excess currency, required by FAR 25.304, shall be made by the NASA Comptroller. The Director of Financial Management (Code BF–6) maintains a current list of excess and near-excess currency-countries and arranges for its publication in the NASA Travel Regulations.

Subpart 1825.4—Purchases Under the Trade Agreements Act of 1979

1825.401 Definitions.

"Designated country" effective June 29, 1983, Israel is added to the list of countries designated under the Trade Agreement Act of 1979 (see FAR 25.401).

1825.402 Policy.

1825.402–70 Centralization of foreign acquisition.

The requirement of Subpart 1825.70 that the responsibility for foreign contract acquisition be centralized at NASA Headquarters does not apply to acquisitions that are subject to this Subpart. However, each contracting office (including JPL) shall coordinate with Headquarters, Division of International Affairs (Code LI–15), before awarding a contract for a designated-country end product.

1825.403 Exceptions.

1825.403–70 Coordination of arms purchases.

With respect to the exception in FAR 25.403(d), if a contracting office considers an individual acquisition to be a purchase "indispensable for National security or National defense purposes" and appropriate for exclusion from the provisions of this Subpart, a request with supporting rationale shall be submitted to Headquarters, Office of External Relations (Code L) for coordination with the Office of the U.S. Trade Representative.

1825.405 Procedures.

(a) The term "promptly," as used in FAR 14.408–1 and 15.1001(b), shall, for purposes of this Subpart, mean "within seven days."

(b) Solicitations will require that applicable duty charges be included in the offered price, whether or not duty free certificates are obtained. Duty charges will be included in the price evaluation.

Subpart 1825.6—Customs and Duties

1825.604 Exempted supplies.

The following items listed in Schedule 8 of the Tariff Schedules of the United States will be of particular interest when making NASA purchases:

(a) Item 832 of Schedule 8 provides that "emergency war materials purchased abroad" may be imported duty-free upon certification by the Military Departments to the Commissioner of Customs. Accordingly, when a Military Department makes a purchase on behalf of NASA, or when NASA is making a purchase for a Military Department, the above duty-free exemption authority shall be used to the maximum extent practicable.

(b) Item 864.30 of Schedule 8 provides for the duty-free exemption of "articles intended solely for testing, experimental or review purposes including plans, specifications, drawings, photographs, and similar articles for use in connection with experimental study" subject to the limitations in Headnote 1 under Item 862.20 of Schedule 8.

(c) Certain supplies (not including equipment) for vessels or aircraft operated by the United States are exempt from duty under 19 U.S.C. 1309.

(d) Under the Educational, Scientific, and Cultural Materials Importation Act of 1966, NASA has been determined to be an eligible institution to request duty-free entry for instruments or apparatus under Items 851.60 and 851.65 of Schedule 8. Pursuant to this authority, NASA may apply for duty-free entry of instruments or apparatus or related repair components if no instrument or apparatus of equivalent scientific value for the purpose for which the instrument or apparatus is intended to be used is being manufactured in the United States.

1825.670 Legal representation.

The Office of the General Counsel (Code G), NASA Headquarters, shall represent NASA before the Court of Appeals for the Federal Circuit.

Subpart 1825.7—Restrictions on Certain Foreign Purchases

1825.703 Exceptions.

(a) If the proposed procurement is from sources restricted by FAR 25.702 and—

(1) Is a small purchase, the contracting officer shall make a determination of nonavailability as authorized in 1825.102(a)(4) and 1825.202(a)(3). This determination shall also include a finding that there is no known item(s) from sources other than the Communist sources which can be used as a resonable substitute. This determination shall be made a part of the contract file.

(2) Exceeds the small purchase limitation, the contracting officer shall prepare a determination of nonavailability for signature by the Administrator. The format at 1825.102(b) shall be used, and the determination shall include a finding that there is no known item(s) from sources other than the Communist sources which can be used as a reasonable substitute. The determination shall be forwarded in triplicate to the Assistant Administrator for Procurement (Code HS–1).

(b) When it is proposed to procure supplies originating from the Communist areas of North Korea, Vietnam, or Cuba for public use outside the United States or when a construction contractor proposes to use such supplies in the performance of a contract for construction outside the United States, the contracting officer shall make a written finding setting forth the unusual situation, such as an emergency or the nonavailability of acceptable substitute supplies of domestic origin or from sources other than the Communist sources, which justifies the procurement. The finding shall be made a part of the contract file. If the proposed procurement exceeds the small purchase limitation, the finding shall be forwarded in triplicate to the Assistant Administrator for Procurement (Code HS–1), for approval by the Administrator of the exception authorizing the proposed procurement.

Subpart 1825.9—Omission of the Examination of Records Clause

1825.903 Conditions for omission.

A determination by the Administrator under FAR 25.903(a)(2) does not require the concurrence of the Comptroller General or designee. However, where such a determination is the basis for exclusion of the clause at FAR 52.215–1, Examination of Records, the statute requires that a written report be furnished to the Congress. This report, explaining the reasons for the determination, shall be prepared in triplicate, signed by the Head of the Installation concerned, and forwarded to the Assistant Administrator for Procurement (Code HC–1) for processing to the Administrator.

1825.903–70 Request for determination and findings.

Request for determination and findings for exclusion ordinarily will be initiated by the contracting officer. It shall consist of a letter submitted through normal procurement channels, addressed to the Administrator containing the facts necessary to arrive at an appropriate determination and findings.

Subpart 1825.70—Foreign Contracts

1825.7000 Scope of subpart.

This subpart prescribes policy and procedures for the negotiation of foreign contracts.

1825.7001 Definition.

"Foreign contract acquisition," as used in this subpart, means the acquisition by negotiation of supplies or services, including construction work and contracts for research and development, where the work is to be performed outside the United States, its possessions, and Puerto Rico, by a foreign government or instrumentality thereof or a foreign private contractor. The term does not include the following:

(a) Negotiation of government-to-government agreements.

(b) Negotiation of contracts with domestic concerns involving work to be performed outside the United States, its possessions, and Puerto Rico.

(c) Contracts with the Canadian Commercial Corporation.

(d) Acquisition of books and periodicals from foreign sources of supply.

1825.7002 Policy.

Foreign contracts are a specialized area that often requires involved negotiation with instrumentalities of foreign governments. Some of the requirements for contract clauses imposed by United States laws conflict with statutory prohibitions imposed by foreign countries. The resolution of these issues generally involves close coordination between the Office of International Affairs and the Office of General Counsel, NASA Headquarters, and the Department of State. Accordingly, the responsibility for placing foreign contracts has been centralized at NASA Headquarters.

1825.7003 Assignment of responsibility for contract negotiation.

The Headquarters Contracts and Grants Division (Code HW–2), in conjunction with the Offices of International Affairs and General Counsel, is responsible for negotiating and executing contracts with foreign governments and private foreign organizations. This assignment of responsibility is specifically limited to foreign contracts and acquisition, as defined at 1825.7001.

1825.7004 Procedure.

A Headquarters or field installation technical office requiring a foreign contract to be made will submit a properly approved Purchase Request (NASA Form 404, or similar form), through channels to the Headquarters Contracts and Grants Division (Code HW–2) for action. Contract forms and clauses for foreign contracts will be as prescribed on a case-by-case basis by the Assistant Administrator for Procurement.

1825.7005 Assignment of contract administration.

(a) *General.* Assignment of contract administration responsibility will be made by agreement between the initiating office and the Headquarters Contracts and Grants Division. Since principal responsibility for monitoring contract progress and performance generally rests with a field installation, the Headquarters Contracts and Grants Division normally will designate the cognizant Procurement Officer as its authorized representative for contract administration.

(b) *Contracts performed in Canada.* (1) When, in accordance with FAR Part 42 contract administration and related support service functions of the Defense Contract Administration Services are desired on a contract to be performed in Canada (whether placed with Canadian Commercial Corporation or directly with a Canadian firm), a letter or delegation shall be issued to—

Defense Supply Agency, DCASMA, Ottawa 6th Floor, Canadian Building 219 Laurier Avenue, West Ottawa, Ontario, Canada (K1A035)

(2) So that DCASMA, Ottawa, may utilize the capabilities of Canadian Government agencies in the performance of contract administration services functions, each letter of delegation shall provide that DCASMA, Ottawa, is delegated authority to act as the contracting officer's representative with power of further delegation for the performance of the requested services.

1825.7006 Contracts with foreign nationals.

(a) Proposals by NASA staff members which involve program or contract possibilities with foreign nationals shall be coordinated with the Office of International Affairs, NASA Headquarters, before any contracts are made with foreign nationals.

(b) Informal discussions between NASA staff members and foreign nationals could give rise to expectations concerning program or contract possibilities which are not supported by program requirements. Such situations must be avoided to preclude possible embarrassment to the United States as well as to NASA.

(c) Requests or offers by foreign nationals to NASA staff members on program or contract matters shall be reported promptly to the Office of International Affairs.

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 1828—BONDS AND INSURANCE

Subpart 1828.1—Bonds

Sec.

1828.102 Performance and payment bonds for construction contracts.
1828.102–2 General.
1828.106 Administration.
1828.106–1 Bonds and bond related forms.

Subpart 1828.3—Insurance

1828.305 Overseas workers' compensation and war-hazard insurance.
1828.307 Insurance under cost-reimbursement contracts.
1828.307–2 Liability.
1828.307–70 Insurance of industrial facilities.
1828.309 Contract clauses for workers' compensation insurance.
1828.311 Solicitation provision and contract clause on liability insurance under cost-reimbursement contracts.
1828.311–70 NASA Contract clause.
1828.370 Fixed-price contract clauses.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1828.1—Bonds

1828.102 Performance and payment bonds for construction contracts.

1828.102–1 General.

NASA prime contractors who, in the course of their contract performance, will acquire by subcontract construction work determined by NASA to be public work subject to the Miller Act, but who are not required under FAR 28.102 to furnish Miller Act bonds, shall be required to obtain such performance and payment bonds from their subcontractors (see 1828.106–1 below). The contracting officer shall establish the penal amount in accordance with FAR 28.102–2.

1828.106 Administration.

1828.106–1 Bonds and bond related forms.

When performance or payment bonds are required from subcontractors under NASA prime construction contracts (see 1828.102–1 above), the bonds shall be provided on SF 25, Performance Bond, and SF 25A, Payment Bond. These forms shall be modified to name the NASA prime contractor as well as the United States of America as obligees.

Subpart 1828.3—Insurance

1828.305 Overseas workers' compensation and war-hazard insurance.

(a) *Waiver of Defense Base Act.* Applications for waivers under FAR 28.305(d) shall be submitted to the Administrator, through the Assistant Administrator for Procurement. The request for waiver shall include the following:

(1) Name of contractor.

(2) Business mailing address of contractor.

(3) Contract number.

(4) Date of award.

(5) Geographic location where contract will be performed.

(6) Name of insurance company providing the Defense Base Act coverage.

(7) Nationality of employees to whom waiver is to apply.

(8) Reason for waiver.

(b) When the Defense Base Act is waived:

(1) The contractor shall assume liability to such waived employees and their beneficiaries for war-hazard injury, death, capture, or detention. At the option of the Assistant Administrator for Procurement or a designee, either the costs of this liability or the reasonable cost of insurance against this liability shall be allowed as a cost under the contract.

(2) The Schedule of each contract containing the clause at 1852.228–470, Reimbursement for War-Hazard Insurance, shall contain the following:

(i) *The estimated cost for war hazard losses.* The estimated cost will be based on estimates arrived at in the light of experience, taking into account the number of the contractor's employees subject to protection for war-hazard risks, the level of benefits applicable to such employees, location, and nature of the risks to which the contractor's employees are exposed. The amount allotted to the contract will initially be kept as small as reasonably feasible. As

reports are received indicating the need to increase the allotment to a particular contract, these will be evaluated and the allotment increased as necessary. When negotiating for the inclusion in a contract of provisons applicable to war-hazard risks, the contracting officer may include provisions concerning the types of foreign nationals employed by the contractor, the level of benefits applicable to them, and other pertinent provisions relating to the manner in which the program will function to the benefit of all concerned. Advance Agreements under FAR 31.109 may also be advantageous with respect to the levels of proof considered acceptable to justify the contractor commencing payments and being reimbursed therefor prior to the time the contractor is able to work out, in a proper case lump sum settlement of its obligation.

(ii) *An entry similar to the following:*

"The portion of this contract providing for the contractor to afford protection to its employees and subcontractors to their employees against war-hazard risks (see the clauses at FAR 52.228–4 and 1852.228–470) is on a cost reimbursement, no fee basis, notwithstanding the basis of the remainder of the contract."

1828.307 Insurance under cost-reimbursement contracts.

1828.307–2 Liability.

(a)(1) In accordance with FAR 28.307–2(b)(2) examples of special circumstances requiring property damage liability insurance are:

(i) Where a commingling of operations permits property damage coverage at a nominal cost to NASA under insurance carried by a contractor in the course of his commercial operations; and

(ii) Where the contractors are engaged in the handling of high explosives or in extrahazardous research and development activities undertaken in populated areas. Otherwise, prior approval for purchase of property damage liability insurance must be obtained from the Assistant Administrator for Procurement.

(b) The Government normally will assume the risk of a contractor's uninsured third-party liability to the extent provided for by the clause at FAR 52.228–7, Insurance—Liability to Third Persons.

1828.307–70 Insurance of industrial facilities.

When industrial facilities are provided by the Government under a facilities contract or a lease, the contract or lease shall require that during the period of construction, installation, alteration, repair, or use, and at any other time as directed by the installation concerned, the contractor or lessee shall insure or otherwise provide approved security for liabilities to third persons (including employees of the contractor or lessee) in the manner and to the same extent as required in FAR 28.307–2.

1828.309 Contract clauses for workers' compensation insurance.

(a) Insert the clause at 1852.228–470, Reimbursement for War Hazard Losses, in all public-work contracts performed outside the United States where the Defense Base Act is waived (see FAR 28.305) and the Assistant Administrator for Procurement determines that the contractor shall not purchase insurance against the assumed liability to such waived employees and their beneficiaries (see 1828.305(b)(2)).

1828.311 Solicitation provision and contract clause on liability insurance under cost-reimbursement contracts.

1828.311–70 NASA contract clause.

The contracting officer shall insert the clause at 1852.228–71, Aircraft Flight Risks, in all cost-reimbursement type contracts for the development, production, modification, maintenance, or overhaul of aircraft, or otherwise involving the furnishing of aircraft to the contractor except where such aircraft are covered by a separate bailment agreement.

1828.370 Fixed-price contract clauses.

(a) The contracting officer shall insert the clause at 1852.228–70, Aircraft Ground and Flight Risks, in all negotiated fixed price contracts for the production, modification, maintenance, or overhaul of aircraft except as provided in paragraph (b) below.

(b) The Government need not assume the risk of damage to, or loss or destruction of, aircraft, as provided by the clause at 1852.228–70 if the best estimate of premium costs which would be included in the contract price for insurance coverage for such damage, loss, or destruction at any plant or facility is less than $500. If it is determined not to assume such risk, the clause at 1852.228–70 shall not be made a part of the contract, and the cost of necessary insurance to be obtained by the contractor to cover such risk shall be considered in establishing the contract price. In such cases, however, if performance of the contract is expected to involve the flight of Government-furnished aircraft, the substance of the clause at 1852.228–71, Aircraft Flight Risks, suitably adapted for use in a fixed-price type contract, shall be used.

PART 1829—TAXES

Sec.

1829.101 Resolving tax problems.

1829.170 Exemptions from other Federal taxes.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1829.1—General

1829.101 Resolving tax problems.

(a) The Office of General Counsel, Code G, will represent NASA in all negotiations under FAR Part 29 and shall keep the Assistant Administrator for Procurement fully informed on the status of any such negotiations.

(b) Communications with the Department of Justice for representation or intervention in proceedings concerning taxes shall be made only by the General Counsel.

(c) Matters involving foreign taxes requiring the assistance of other executive departments shall be forwarded to the General Counsel for appropriate action.

(d) Tax problems which cannot be solved readily by reference to FAR Part 29 shall be forwarded to the General Counsel through the field installation Office of Chief Counsel. The forwarding of tax problems to the General Counsel is particularly important where—

(1) The amount of tax actually or potentially involved is substantial;

(2) The legal incidence of a tax appears to be upon the United States or its property, a specific exemption pertinent to the transaction appears to exist, or a State or local tax appears to have a direct effect upon a transaction in interstate commerce;

(3) Judicial or administrative action against a contractor is threatened;

(4) The imposition or potential imposition of a tax is the result of an amendment of a tax law or a change of position by the tax authorities; or

(5) The possibility exists of obtaining refunds of taxes previously paid.

(e) Tax problems forwarded to the General Counsel shall be accompanied by the following material, which shall be furnished by the initiating office or by intervening offices:

(1) A comprehensive statement of pertinent facts, including documents and correspondence.

(2) A copy of the contract.

(3) A thorough review of the legal issues involved and recommended action to be taken.

(4) If appropriate, a statement of the problem's effect(s) on procurement policies and procedures with recommendations.

(f) Information copies of tax-related correspondence shall be sent to the

Assistant Administrator for Procurement.

1829.170 Exemptions from other Federal taxes.

Distilled spirits, and specially denatured spirits of 190 degrees proof or more, may be purchased tax-free by any United States Government agency or its contractors. To obtain alcohol tax free, the Administrator or Assistant Administrator for Procurement is responsible for filing and updating Form ATF 1444/1486, Tax-Free Spirits or Specially Denatured Spirits for Use of United States, with the Treasury Department, Bureau of Alcohol, Tobacco and Firearms, Special Operations Branch. One application shall be submitted for all of NASA's requirements. Copies of the Treasury Department certificates issued shall be furnished to all installation Procurement Officers.

(a) When purchasing spirits for use by Center personnel, the contracting officer shall attach a copy of the certificate to the purchase order/contract. Upon receipt of the spirits, the certificate shall be returned to the contracting officer unless future orders are anticipated.

(b) When a NASA contractor requires spirits to perform a NASA contract, the contracting officer shall give the contractor a copy of the certificate to provide its vendor. Upon receipt of the spirits, the contractor shall return the certificate to the contracting officer unless future orders are anticipated. In any event, the certificate shall be returned upon completion of the contract.

PART 1830—COST ACCOUNTING STANDARDS

Subpart 1830.1—General

Sec.
1830.301 Cost Accounting Standards

Subpart 1830.3—CAS Contract Requirements

1830.304 Waiver.

Authority: 42 U.S.C. 2473(c)(1)

Subpart 1830.1—General

1830.101 Cost Accounting Standards.

To assure uniform administration of CAS requirements, NASA has determined to consider all of its contracts as "National defense" contracts for CAS purposes, whether or not they meet the definitions of "National defense" in FAR 30.102.

Subpart 1830.3—CAS Contract Requirements

1830.304 Waiver.

All requests for waiver of CAS requirements shall be forwarded through the Procurement Officer to the Assistant Administrator for Procurement (Code HC–1) after the contracting officer has made the determination required by FAR 30.304(a).

PART 1831—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 1831.1—Applicability

Sec.
1831.101 Objectives.
1831.102 Fixed-price contracts
1831.102–70 Contract clause.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1831.1—Applicability

1831.101 Objectives.

The Assistant Administrator for Procurement, NASA Headquarters (Code HP–1), is the Administrator's designee for granting individual deviations to FAR cost principles under FAR 31.101.

1831.102 Fixed-price contracts.

1831.102–70 NASA contract clause.

Include the clause at 1852.231–70, Pricing of Adjustments, in fixed-price contracts that include a Changes clause or provisions for adjustments of the contract price. The clause applies to the requirements of FAR Part 31 to contract price adjustments.

PART 1832—CONTRACT FINANCING

Subpart 1832.1—General

Sec.
1832.111 Contract clauses.
1832.111–70 NASA contract clauses
1832.170 Voluntary refunds.
1832.171 Withholding under construction contracts.

Subpart 1832.4—Advance Payments

1832.402 General.
1832.406 Letters of credit.
1832.406–70 Federal Cash Transaction Report.
1832.407 Interest.
1832.410 Findings, determination, and authorization.
1832.410–70 Instructions for determinations and findings.
1832.412 Contract clause.
1832.470 Reporting of installation advance payment approvals.

Subpart 1832.5—Progress Payments Based on Costs

1832.501 General.
1832.501–2 Unusual progress payments
1832.502 Preaward matters.
1832.502–2 Contract finance office clearance.
1832.503 Postaward matters.
1832.503–3 Initiation of progress payments and review of accounting system.
1832.504 Subcontracts.

Subpart 1832.7—Contract Funding

1832.702 Policy.
1832.702–70 NASA policy.
1832.704 Limitation of cost or funds.
1832.705 Contract clauses.
1832.705–70 Additional clauses for limitation of cost or funds.

Subpart 18–32.8—Assignment of Claims

1832.806 Contract clauses.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1832.1—General

1832.111 Contract clauses.

1832.111–70 NASA contract clauses.

(a) The contracting officer shall insert the clause at 1852.232–71, Invoices, in all fixed-price contracts and solicitations therefor, except those for construction work, architect-engineer services, or utility service.

(b) The contracting officer shall insert the clause at 1852.232–72, Payments (Letter Contracts), in letter contracts and solicitations therefor.

(c) The contracting officer shall insert the clause at 1852.232–73, Payments (Utility Services), in negotiated utility service contracts and solicitations therefor.

(d) The contracting officer shall insert the clause at 1852.232–74, Payments (Facilities), in consolidated facilities contracts and solicitations therefor.

1832.170 Voluntary refunds.

(a) *General.* A voluntary refund is a payment or credit, not required by any contractual or other legal obligation, made to the Government by a contractor or subcontractor either as a payment or as an adjustment under one or more contracts or subcontracts. It may be unsolicited or it may be made in response to a request by the Government. Where it is desired to solicit a voluntary refund from a subcontractor, the prime contractor should be encouraged to facilitate the making of such refund. In deciding whether to solicit a voluntary refund or to accept an unsolicited refund, the contracting officer shall ask legal counsel to review the contract or contracts and all data relevant thereto to determine whether the Government's rights would be jeopardized or impaired by the contracting officer's proposed action.

(b) *Solicited refunds.* Voluntary refunds may be requested during or after contract performance. They shall be

requested only when it is considered that the Government was overcharged under a contract or was inadequately compensated for the use of Government-owned property or in the disposition of contractor inventory, and retention by the contractor or subcontractor of the amount in question would be contrary to good conscience and equity. Generally, retention by the contractor or subcontractor shall not be considered contrary to good conscience and equity, and thus a voluntary refund shall not be requested, unless the overcharge or inadequate compensation was due, at least in part, to the fault of the contractor or subcontractor. The decision to solicit a voluntary refund shall be made by the Deputy Administrator or designee after coordination with the Assistant Administrator for Procurement.

(c) *Disposition of voluntary refunds.* (1) If a refund is offered prior to final payment, it is preferable that the contract price be appropriately modified to reflect the refund. In such a case, the amount of the refund shall be credited to the applicable appropriation cited in the contract.

(2) In cases where the refund is to be made by check rather than by an adjustment in the contract price, the check shall be made payable to the National Aeronautics and Space Administration and shall be forwarded immediately to the Financial Management Office of the appropriate installation. When forwarded, the check shall be accompanied by a letter identifying it as a voluntary refund, giving the number of the contract or contracts involved and, where possible, giving the account number of the appropriation to which the refund should be credited.

1832.171 Withholding under construction contracts.

This section is applicable only to contracts containing the clause at FAR 52.232–5, Payments Under Fixed-Price Construction Contracts. When satisfactory progress has not been achieved by a contractor during any period for which a progress payment is to be made, a percentage of the progress payment may be retained until completion of all contract requirements. Retainage should not be used as a substitute for good contract management, and contracting officers should not withhold funds without cause. Determinations regarding the use of retainage and the specific levels to be withheld shall be made by the contracting officers on a case-by-case basis. Such decisions will be based on the contracting officer's assessment of past performance and the likelihood that such performance will continue. The level of retainage withheld shall not exceed 10 percent of the amount billed by the contractor in accordance with the terms of the contract and may be adjusted as the contract approaches completion to recognize better than expected performance, the ability to rely on alternative safeguards, and other factors. Upon completion of all contract requirements, retained amounts shall be paid promptly.

Subpart 1832.4—Advance Payments

1832.402 General.

(a) Advance payments are authorized only for contracts with nonprofit organizations and educational institutions.

(b) Determinations, and Findings in support thereof, not required to be made by higher authority including those in paragraphs (b) (1) and (2) below may be made regarding contracts by the Assistant Administrator for Procurement. The contracting officer may make the determinations and findings in paragraph (b)(2) below regarding individual purchases and contracts:

(1) The determination required by 10 U.S.C. 2307(c) and 2310(b) for the basic contract if the advance payment amount equals or exceeds $1,000,000, the advance payment is to a foreign entity, or the organization receiving the advance payment is also receiving a fee for the effort involved. If the amount of the advance payment is under $1,000,000 for the basic contract and a foreign entity or organization receiving a fee is not involved, the Procurement Officer may make the determination required, *Provided,* that such action has been coordinated with the Installation Financial Management Officer.

(2) The determination required by 10 U.S.C. 2307(c) and 2310(b) for all modifications, supplemental agreements, or extensions to an existing contract which require an increase in the amount of an advance payment previously authorized; *Provided*, that such action has been coordinated with the Installation Financial Management Officer.

1832.406 Letters of credit.

For the purposes of FAR 32.406(b)(1), each installation is considered a contracting agency.

1832.406–70 Federal Cash Transaction Report.

The report required by paragraph (m) of the clause at FAR 52.232–12, Advance Payments, shall be submitted on Standard Form 272, Federal Cash Transaction Report, if the letter of credit method is used.

1832.407 Interest.

Advance payments without interest are hereby authorized, pursuant to FAR 32.407(d)(1).

1832.410 Findings, determination, and authorization.

1832.410–70 Instructions for determinations and findings.

(a) A request for Headquarters approval of advance payment provisions in accordance with 1832.402(b)(1) will be prepared in final form (original and one official file copy) and forwarded to the Assistant Administrator for Procurement (Code HS–1). The request should include the following: (1) The name of the cognizant NASA Headquarters Program or Staff Office; (2) the negotiation exception to support the requirement, if it is other than 10 U.S.C. 2304(a)(5); (3) if a fee is contemplated, the estimated cost, amount and percent of fee, the total cost and fee, and the factors that were considered in determining the fee (see Subpart 1815.9); and (4) the name and phone number of the contracting officer or negotiator.

(b) Modifications to adapt to special facts and circumstances are permitted provided that they do not conflict with the statutory requirements set forth in 10 U.S.C. 2307 or other cited statutory authority.

(c) 10 U.S.C. 2307 will normally be the statutory authority cited for authorizing advance payments. When appropriate, advance payments are also authorized pursuant to 42 U.S.C. 2473(c)(5) and Pub. L. 85–804 as implemented by Executive Order 10789 (see FAR Part 50).

(d) Generally, the format in FAR 32.410 should be in accordance with the instructions therein used with the following changes:

(1) In the second sentence of format paragraph (a)(4), delete the reference to a special bank account.

(2) Use format paragraph (a)(6) or (a)(8).

(3) At the end of format paragraph (b), use "is in the public interest."

1832.412 Contract clause.

The contracting officer, in consultation with General Counsel, may require special security provisions if appropriate in particular cases. For example, the clause at 1852.232–75, Security for Advance Payments, may be included in solicitations and contracts with nonprofit organizations or educational institutions that include the

clause at FAR 52.232–12, Advance Payments.

1832.470 Reporting of installation advance payment approvals.

Each Installation shall report to Headquarters by the tenth of January and July each year, Attention: Code BF–6, a listing of Advance Payment amounts and recipients approved at the Installation during the prior six months' period.

Subpart 1832.5—Progress Payments Based on Costs

1832.501 General.

1832.501–2 Unusual progress payments.

Requests for unusual progress payments must have the specific approval of the Assistant Administrator for Procurement with the concurrence of the Director, Financial Management Division.

1832.502 Preaward matters.

1832.502–2 Contract finance office clearance.

The approving authority for the actions specified in FAR 32.502–2 is the Assistant Administrator for Procurement. Any such approvals should be coordinated with the Director, Financial Management Division.

1832.503 Postaward matters.

1832.503–3 Initiation of progress payments and review of accounting system.

In connection with the situations mentioned in FAR 32.503–3(b), the Financial Management Officer shall be notified.

1832.504 Subcontracts.

The Government approval mentioned in FAR 32.504(c) shall be as specified in 1832.502–2 above.

Subpart 1832.7—Contract Funding

1832.702 Policy.

1832.702–70 NASA policy.

(a) Cost-reimbursement contracts may be incrementally funded only if—

(1) The total value of the contract (including options as defined in FAR Subpart 17.2) is $1,000,000 or more;

(2) The period of performance under the contract is in excess of twelve months or the period of performance overlaps the succeeding fiscal year; and

(3) Funds are not available to fully fund the total contract value at the time of entering into the contract.

(b) Fixed-price contracts for other than research and development shall not be incrementally funded.

(c)(1) Fixed-price contracts for research and development may be incrementally funded only if—

(i) The total fixed price of the contract (including options as defined in FAR Subpart 17.2) is $1,000,000 or more;

(ii) The period of performance under the contract is in excess of twelve months or the period of performance overlaps the succeeding fiscal year;

(iii) Funds are not available to fund the total fixed price of the contract at the time of entering into the contract; and

(iv) Initial funding of the contract is not less than 50 percent of the total fixed price.

(2) Notwithstanding the grant of authority to incrementally fund contracts under the foregoing circumstances, it is emphasized that fixed-price contracts shall be fully funded wherever possible and that, accordingly, incremental funding of such contracts should be kept to the absolute minimum.

1832.704 Limitation of cost or funds.

When a contract contains the clause at 1852.232–77, Limitation of Funds (Fixed-Price Contract), the procedures in FAR 32.704 are applicable.

1832.705 Contract clauses.

1832.705–2 Clauses for limitation of cost or funds.

1832.705–270 Additional clauses for limitation of cost or funds.

(a) The contracting officer shall insert the clause at 1852.232–76, Authority to Obligate Funds, in letter contracts and solicitations therefor.

(b) The contracting officer shall insert the clause at 1852.232–77, Limitation of Funds (Fixed-Price Contract), in fixed-price incrementally funded contracts for research and development, and solicitations therefor.

Subpart 1832.8—Assignment of Claims

1832.806 Contract clauses.

The Prohibition of Assignment of Claims clause prescribed at FAR 32.806(b) shall be inserted in negotiated contracts for utilities services, and solicitations leading thereto, unless a prospective contractor requests and the contracting officer determines that use of the Assignment of Claims clause prescribed at FAR 32.806(a) is in the public interest.

PART 1833—DISPUTES AND APPEALS

Sec.
1833.009 Suspected fraudulent claims.
1833.011 Contracting officer's decision.
1833.014 Contract clause.

Authority: 42 U.S.C. 2473(c)(1).

1833.009 Suspected fraudulent claims.

The contracting officer shall report suspected fraudulent claims to the Office of Inspector General (Code W) and the Office of General Counsel (Code G).

1833.011 Contracting officer's decision.

Contracting officers shall alter the paragraph at FAR 33.011(a)(4)(v) to include (a) the address of the NASA Board of Contract Appeals, Code NC–9, Room 6057, 4th and Maryland Avenue, SW, Washington, DC 20546 and (b) to reference the Board's small claims procedure for claims $10,000 or less and their accelerated procedure for claims $50,000 or less.

1833.014 Contract clause.

The contracting officer shall use the clause at FAR 52.233–1, Disputes, with its Alternate I where continued performance is vital to National security, the public health and welfare, critical/major agency programs, or other essential supplies or services whose timely reprocurement from other sources would be impracticable.

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

PART 1834—MAJOR SYSTEM ACQUISITION

1834.002 Policy.

NASA's implementation of OMB Circular No. A–109 and FAR Part 34 is contained in NMI 7100.14, Major System Acquisitions.

(42 U.S.C. 2473(c)(1))

PART 1835—RESEARCH AND DEVELOPMENT CONTRACTING

Sec.
1835.003 Policy.
1835.003–70 Scientific and Technical Information Service.
1835.015 Contracts for research with educational institutions and nonprofit organizations.
1835.070 NASA contract clauses.
1835.071 Space Transportation System Personnel Reliability Program.

Authority: 42 U.S.C. 2473(c)(1).

1835.003 Policy.

(a) For NASA policy regarding cost sharing see 1816.303.

(b) NASA policy regarding recoupment is in NMI 5109.13, Recoupment Policy for the Use of NASA Technology.

1835.003–70 Scientific and Technical Information Service.

In conformance with section 203(a) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2473) in the interest of conserving time and funds, and to avoid unnecessary duplication of effort, it is NASA policy to encourage contractors to use scientific and technical information in the possession of NASA in direct support of all NASA contracts involving research and development work. This information includes past and current reports on research, development, test, and evaluation. Certain information (*e.g.*, Scientific and Technical Aerospace Reports (STAR), which announces current publications covering aeronautics, space, and supporting disciplines) is available to contractors free of charge; other types of information (*e.g.*, automatic distribution of reports on a specific subject) or services (*e.g.*, searches of the NASA data base or on-line access to the NASA data base through NASA/RECON) may be subject to charges for a contractor. In order that such scientific and technical information may be provided in a timely manner, it is necessary for the contractor to furnish NASA the information specified in the clause at 1852.235–70.

1835.015 Contracts for research with educational institutions and nonprofit organizations.

(a) In addition to the requirements of FAR 35.015(a)(1)(iv), the institution must obtain the contracting officer's approval when it plans to continue the research work during a continuous period in excess of three months without the participation of an approved principal investigator or project leader.

(b) For NASA policy regarding advance payments under contracts with educational institutions see 1832.4.

1835.070 NASA contract clauses.

(a) The Contracting Officer shall insert the clause at 1852.235–70, Scientific and Technical Information Service, in all research and development contracts and in cost-type supply contracts where research and development work is involved.

(b) The Contracting Officer shall insert the clause at 1852.235–71, Key Personnel and Facilities, in contracts when source selection has been substantially predicated upon the possession by a given contractor of special capabilities, as represented by either key personnel or facilities.

1835.071 Space Transportation System Personnel Reliability Program.

The Space Transportation System is a national source providing a capability to support a wide range of scientific, applications, commercial, defense and international uses. Criteria and procedures for assuring the highest standards of reliability in personnel assigned to mission-critical positions in connection with the Space Transportation System are set forth in NMI 8610, Space Transportation System Reliability Program (see 1814.201–5(a) and 1815.406–5(a)(10)).

PART 1836—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 1836.2—Special Aspects of Contracting for Construction

Sec.

1836.203 Government estimate of construction costs.
1836.205 Statutory cost limitations.
1836.209 Construction contracts with architect-engineer firms.

Subpart 1836.6—Architect-Engineer Services

1836.600 Scope of subpart.
1836.600–70 Interorganizational acquisition of architect-engineer services.
1836.602 Selection of firms for architect-engineer contracts.
1836.602–1 Selection criteria.
1836.602–2 Evaluation Boards.
1836.602–3 Evaluation Board Functions
1836.602–4 Selection Authority.
1836.602–5 Short selection processes for contracts not to exceed $10,000.
1836.602–70 Selection of architect-engineers for master planning.
1836.602–71 Conflict of interest.
1836.603 Collecting data on and appraising firms' qualifications.
1836.609 Contract clauses.
1836.609–70 NASA contract clause.
1836.670 Acquisition requiring Headquarters approval.

Subpart 1836.7—Standard Forms for Contracting for Construction, Architect-Engineer Services, and Dismantling, Demolition, or Removal of Improvements

1836.702 Forms for use in contracting for architect-engineer services.
1836.770 Binding schedule for construction contracts.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1836.2—Special Aspects of Contracting for Construction

1836.203 Government estimate of construction costs.

(a) The Government estimate shall be designated "For Official Use Only" unless the nature of the information therein requires a security classification, in which event it shall be handled in accordance with applicable security regulations. The "For Office Use Only" designation shall be removed only when the estimate is made public in accordance with instructions below.

(b) If the acquisition is by formal advertising, a sealed copy of the detailed Government estimate shall be filed with the bids until bid opening. After the bids are read and recorded, the "For Official Use Only" designation shall be removed and the estimate shall be read and recorded in the same detail as the bids.

(c) If the acquisition is by negotiation, cost breakdown figures in the Government estimate may be disclosed during negotiations but only to the extent deemed necessary for arriving at a fair and reasonable price and provided that the overall amount of the Government estimate, however, is not thereby disclosed prior to award. At the time of award, the "For Official Use Only" designation shall be removed. After award, the Government estimate may be revealed, upon request, to those firms or individuals who submitted proposals.

1836.205 Statutory cost limitations.

The term "statutory cost limitations" refers to cost limitations which may be included in an agency's annual appropriation act.

1836.209 Construction contracts with architect-engineer firms.

(a) Except as provided in paragraph (c) below, offers for the construction of a facility shall not be solicited from the firm furnishing architect-engineer services for that facility, its subsidiaries, or affiliates; and unsolicited offers from that firm, its subsidiaries, or affiliates shall not be considered.

(b) An architect-engineer firm selected for negotiation of an architect-engineer services contract under the procedures set forth in 1836.602 shall be advised of the policy set forth in paragraph (a) above prior to the initiation of negotiations, if that firm possesses construction capabilities either within its own organization or through subsidiaries or affiliates. The firm shall have the option of either—

(1) Declining to enter into contract negotiations in order to be eligible to compete for the related construction contract; or

(2) Entering into contract negotiations with the clear understanding that, if such negotiations are successful, the firm, its subsidiaries, or affiliates will be ineligible to compete for the related construction contract.

(c)(1) The policy in FAR 36.209 is not applicable to—

(i) Those cases where the Assistant Administrator for Procurement specifically authorizes, prior to the initiation of negotiations, the use of a cost-plus-a-fixed-fee contract for both the design and construction of a specialized facility; or

(ii) Those cases in which a contract is awarded on the basis of performance specifications for the construction of a facility, and the contract requires the contractor to furnish construction drawings, specifications, or site adaption drawings of the facility.

(2) Requests for authorization pursuant to paragraph (c)(1)(i) above shall be in sufficient detail to establish the need for procuring both design and construction under one contract. In neither of the excepted cases in paragraph (c)(1) above shall the firm that prepared the drawings and specifications be engaged to supervise and inspect, on behalf of the Government, the construction of the facility involved.

Subpart 1836.6—Architect-engineer Services

1836.600 Scope of subpart.

1836.600-70 Interorganizational acquisition of architect-Engineer services.

Procedures for acquiring architect-engineer services through the construction organization of the Corps of Engineers, Department of the Army, are set forth in "NASA-Corps of Engineers Agreement for Performance of Construction Services."

1836.602 Selection of firms for architect-engineer contracts.

1836.602-1 Selection criteria.

(a) As permitted by FAR 36.602-1(a)(6), in evaluating architect-engineer firms, the architect-engineer selection board shall apply any criteria set forth in the public notice on a particular contract and the volume of work previously awarded to the firm by NASA, with the object of effecting an equitable distribution of contracts among qualified architect-engineer firms including minority-owned firms and firms that have not had prior NASA contracts.

(b) It should be noted that the above evaluation criteria, and those listed in FAR 36.602-1(a), are not listed in order of importance, since the relative weight to be assigned to each criterion may vary with the particular requirements of the individual procurement.

1836.602-2 Evaluation boards.

In compliance with FAR 36.602-2, the Head of each Installation shall establish an architect-engineer selection board to be composed of not less than three members. Appointment of members who are not Government employees is not authorized.

1836.602-3 Evaluation board functions.

The report required by FAR 36.602-3(d) should, as a minimum, speak to each criterion for each offeror and explain why one firm is rated higher than the others.

1836.602-4 Selection authority.

The Head of each Installation is designated as the selection authority for that installation for the purposes of FAR 36.602-4.

1836.602-5 Short selection processes for contracts not to exceed $10,000.

(a) Use of the procedures of FAR 36.602-5 is permitted when authorized by the Head of the Installation.

(b) The Head of the Installation is designated as the selection authority for the purposes of FAR 36.602-5(b)(2).

1836.602-70 Selection of architect-engineers for master planning.

(a) *Definition of master plan.* A master plan is an integrated series of documents which present in graphic, narrative, and tabular form the present composition of the installation and the plan for its orderly and comprehensive development to perform its various missions in the most efficient and economical manner.

(b) *Selection.* Where it is proposed to select an architect-engineer to develop a master plan in connection with the establishment of a new NASA activity or installation, the report prepared by the architect-engineer selection board in accordance with FAR 36.602-3(d) will be forwarded by the Head of the Installation, with that individual's concurrence in the selection, to the cognizant Institutional Director, NASA Headquarters, for the approval of the Administrator and the concurrences of the Deputy Administrator and the Associate Administrator. The cognizant Institutional Director will refer the report for review to the Assistant Administrator for Procurement (Code H), the Facilities Engineering and Computer Management Division (Code NX-2), and to other offices as appropriate under the circumstances. After receipt of comments and recommendations from the reviewing offices, the cognizant Institutional Director will revise, modify, or concur in the report, as appropriate, and forward it to the Administrator, via the Associate Administrator.

1836.602-71 Conflict of interest.

(a) The chairman and members of an architect-engineer selection board will have on permanent file with the appointing official a written certification that their respective participation will not create a conflict of interest within the provisions of the current "Standard of Conduct for NASA Employee" (NHB 1900.1B) regarding Conflict of Interest. Any other participants in an evaluation or selection for a given architect-engineer requirement will file or have on file a similar certification. Personnel unwilling or unable to furnish such a certification will be barred from further participation in the case. The chairman, members, or other participants with certifications on file shall inform the chairman or the appointing official, as appropriate and in writing, if participation in a particular selection or evaluation presents a real or apparent conflict of interest situation. If the situation warrants, the person(s) shall be disqualified from participating.

(b) The chairman, members, or other participants shall promptly report, in accordance with the procedures of NMI 3711.6, Employee-Management Communications Channels, any activity that would give rise to a real or apparent conflict of interest situation, including any indications of extraneous influences being brought to bear on the selection or evaluation process.

1836.603 Collecting data on and appraising firms' qualifications.

The architect-engineer selection boards (see 1836.602-2) are designated as NASA's evaluation boards for the purposes of FAR 36.603.

1836.609 Contract clauses.

1836.609-70 NASA contract clause.

The contracting officer may include the clause at 1852.236-70, Option for Supervision and Inspection Services, in fixed-price architect-engineer contracts, and solicitations therefor, if supervision and inspection services by the architect-engineer during construction are contemplated. The details of such services must be set out in Appendix A of the contract.

1836.670 Acquisition requiring Headquarters approval.

Contracts for architect-engineer services that require the prior approval of the Assistant Administrator for Procurement are specified in 1807.7102(a)(2). The request for approval shall include all information required to be developed by FAR 36.605 and 36.606, and in particular, shall set forth the detailed cost breakdown on which the

determination was based that the proposed fee is fair, reasonable, and consistent with the provisions of FAR 15.903(d)(1)(ii).

Subpart 1836.7—Standard Forms for Contracting for Construction, Architect-Engineer Services and Dismantling, Demolition, or Removal of Improvements

1836.702 Forms for use in contracting for architect-engineer services.

(a) *Architect-Engineer contract (Standard Form 252). Instruction for Block entries are as follows:*

(1) *Block 5-Project Title and Location.* Include a short description of the construction project and the estimated cost of constructing the facilities for the project. If the space provided is insufficient, include a more detailed description in Appendix A of the contract and list the Appendix A in Block 10.

(2) *Block 6-Contract For (General description of services to be provided).* Include a brief description of the services and state that these services are fully set out in Appendix A (Scope of Work). Clearly specify the date by which design services must be completed. If supervision and inspection services during construction are to be procured, also clearly specify the date by which such services must be completed and add a statement that the Government may extend such period as provided in the Changes clause of the contract.

(3) *Block 7-Contract Amount.* If the contract is for both design and supervision and inspection services, set out the figures separately.

(b) *Statement of architect-engineer services.* The services to be furnished by an architect-engineer should be carefully defined during negotiation of the contract and a statement of such services inserted in Appendix A (Scope of Work) of the contract. The statement should clearly state the nature and extent of the services in a concise form and include any special services such as the nature and extent of sub-surface exploration prior to designing foundations, etc. A similar statement of supervision and inspection services should be prepared for inclusion in Appendix A (Scope of Work) of the contract if supervision and inspection services are included.

1836.770 Bidding schedule for construction contracts.

If the work is divided into separate schedules a bidding schedule showing a breakdown for each such separate schedule should be attached to the invitation for bids and a statement referring thereto made on Standard Form 1442, Solicitation, Offer, and Award (Construction, Alteration, or Repair).

Bidding Schedule

(To be attached to bid form when required by the Invitation for Bids)

(The following paragraphs shall be printed on the last page of the bidding schedule immediately below the schedule.)

Note.—*Use additional page if necessary.* All extensions of the unit prices shown will be subject to verification by the Government. In case of variation between the unit price and the extension, the unit price will be considered to be the bid.

If a modification to a bid based on unit prices is submitted, which provides for a lump sum adjustment to the total estimated cost, the application of the lump sum adjustment to each unit price in the bid schedule must be stated. If it is not stated, the bidder agrees that the lump sum adjustment shall be applied on a pro rata basis to every unit price in the bid schedule.

PART 1837—SERVICE CONTRACTING

Sec.

1837.000 Scope of part.

Subpart 1837.1—Service Contract—General

1837.104 Personal services contracts.
1837.105 Competition in service contracting.
1837.106 Funding and term of service contracts.

Subpart 1837.2—Consulting Services

1837.200 Scope of subpart.
1837.203 Types of consulting services.
1837.204 Policy.
1837.204–70 NASA policy.
1837.205 Management controls.
1837.205–70 Request for approval.
1837.205–71 Negotiation of contracts.
1837.205–72 Contract award and approval
1837.205–73 Copies of reports and recommendations.

Authority: 42 U.S.C. 2473(c)(1).

1837.000 Scope of part.

For purposes of this part, construction is not considered a service.

Subpart 1837.1—Service Contracts—General

1837.104 Personal services contracts.

It is NASA policy not to obtain personal services by contract.

1837.105 Competition in service contracting.

(a) See FAR 15.204 and 1815.204 regarding negotiation for personal and professional services.

(b) Frequently it becomes essential to the needs of NASA to contract for certain services which require immediate performance by a contractor after a minimum prior notice to proceed. Typical of such requirements are contracts for engineering services; maintenance, repair or overhaul of specialized equipment; and printing or reproduction and data processing services to be furnished on a "call basis" where time is of the essence to meet priority requirements.

(c) When soliciting prospective contractors to perform services of this nature, the NASA policy of obtaining competition to the maximum practicable extent will be observed. Geographic limitations imposed on prospective contractors are apt to appear arbitrary to the business community and therefore are proper only in those cases where such limitations are demonstrably justifiable. Even in those circumstances, however, no firm desiring to compete for the procurement shall be denied the opportunity to do so, merely because it is located outside the geographic area. Such firms will be permitted to submit provided they can substantiate their capability to establish a facility in a location which complies with any such required geographical limitation.

(d) A preferred method of obtaining services or supplies, which are required on a prompt response basis, is by clearly setting forth in the solicitation such requirement in terms of maximum time which may elapse between placement of the order or call and delivery date. Such time limitations, when required by the nature of the procurement, will normally meet the needs of NASA for prompt delivery without introducing any unnecessary restrictive criteria on the competitive field of prospective contractors.

(e) Solicitations that contemplate either a geographical area or time of performance limitation will be reviewed and approved by the Procurement Officer, or a designee, prior to distribution.

1837.106 Funding and term of service contracts.

See 1817.102(b) for multi-year overseas service contracts.

Subpart 1837.2—Consulting Services

1837.200 Scope of subpart.

This subpart supplements FAR subpart 37.2 and the procedures of NMI 5104.5, Policy and Guidelines for the Use of Consulting Services Obtained by Contract, and, in particular, establishes the procedures to be followed in contracting for consulting services.

1837.203 Types of consulting services.

Consulting services do not include services obtained under OMB Circular A–76 guidelines and services that only provide data in support of NASA

administrative and program management. If the primary purpose of a task is to conduct research and development (such as data analysis, studies related to basic and applied research, technology development, concept and demonstration development, full-scale development and testing, and evaluation), it is not considered a consulting service. In addition, contractor reviews of technical activities such as hardware and hardware-oriented activities, and evaluation of proposals are excluded. See Attachment A of NMI 5104.5 for examples of services to which this subpart does not apply.

1837.204 Policy.

1837.204-70 NASA policy.

In addition to the prohibitions regarding consulting services listed at FAR 37.204(c)—

(a) Consulting services will normally be obtained only on an intermittent or temporary basis; repeated or extended arrangements are not to be entered into except under extraordinary circumstances;

(b) Consulting services of individual experts and consultants will normally be obtained by appointment rather than be contract (see NMI 3304.1, Employment of Experts and Consultants);

(c) Grants and cooperative agreements shall not be used as legal instruments for consulting service arrangements;

(d) Consulting service tasks assigned to the Jet Propulsion Laboratory and amend contract NAS 7-100 must be reviewed and approved by the Associate Administrator for Management Operations (Code N);

(e) Persons or organizations employed as NASA consultants must be free from conflict of interest as delineated in FAR Subpart 9.5 and NMI 5101.19, Avoiding Conflict-of-Interest Situations in Placing of NASA Contracts. Caution will also be exercised when considering former Government employees for consulting-service arrangements in order to avoid potential post-employment statutory prohibition (18 U.S.C. 207).

1837.205 Management controls.

1837.205-70 Request for approval.

(a) When a NASA field installation or NASA Headquarters Office considers that consulting services are necessary and desirable, in accordance with the policy in FAR 37.204 and 1837.204-70, the requiring activity is responsible for preparing the required documentation (see FAR 37.205) and securing the prior approval of the Associate Administrator for Management Operations.

(b) Prior to processing any procurement action for consulting services, the contracting officer shall (1) provide advice, as necessary, to the requiring activity on the preparation of the documentation required by NMI 5104.5 and (2) ensure that the required documentation, including the necessary concurrences/approvals, is included in the official contract file. When there is a question whether a requirement is for consulting services, regardless of dollar value, and such requirement has not been submitted to Code N for review, the contracting officer shall determine if the requirement is for consulting services. If it is the procurement request will be returned to the originating office for processing in accordance with NMI 5104.5. In all such cases, the contracting officer's determination shall be final.

1837.205-71 Negotiation of contracts.

(a)(1) Contracting officers shall include in the solicitation a requirement that each offeror furnish the following information with the proposal notwithstanding the type of contract anticipated:

(i) The name(s) and qualifications of principal members of the contractor organization who will be responsible for the project.

(ii) The title of each official and the number of employees who will participate.

(iii) The estimated number of person-hours that each official and employee will contribute to the proposed project.

(iv) The standard billing rate per hour for each official and employee.

(2) The contract shall establish requirements to ensure that the proposal of the successful offeror will be adhered to (as negotiated and agreed to) in each of the above respects (see 1835).

(b) In addition, the solicitation and the resulting contract shall require that:

(1) The contractor warrant the rates quoted are not in excess of those charged nongovernmental clients for the same services performed by the same individuals;

(2) The Government has the right to the working papers used by the participating officials and employees of the firm or organization in connection with the projects;

(3) Publication or distribution of the study, data, or other related material is prohibited, except to the extent authorized by the contracting officer; and

(4) The contractor agree that any reports regarding organizational matters (as required by the contract) shall include, when feasible, in addition to the recommendations, alternative methods to be considered and the pros and cons of each alternative.

1837.205-72 Contract award and approval.

Unless otherwise required by Subpart 1804.72, or by direction of Code N, awards may be made without further reference to Headquarters after Code N approval has been obtained (1837.205-70(a)).

1837.205-73 Copies of reports and recommendations.

Upon completion of the services required and prior to contract closeout, the initiating office shall forward one copy of the final report or recommendations made by the contractor along with a written evaluation of contractor performance to the Chief, Management Processes Branch, Management Support Office (Code NSM-23). These reports will show the following information on the cover:

(a) Name and business address of the contractor.

(b) Contract number.

(c) Contract dollar amount.

(d) Whether the contract was competitively or noncompetitively awarded.

(e) Name, office identification, and location of the sponsoring individual.

SUBCHAPTER G—CONTRACT MANAGEMENT

PART 1842—CONTRACT ADMINISTRATION

Subpart 1842.1—Interagency Contract Administration and Audit Services

Sec.

1842.101 Policy.
1842.102 Procedures.
1842.102-70 Management of subcontracts.
1842.170 Assignment of NASA personnel at contractor plants.
1842.171 Contractor performance on a NASA installation.
1842.172 Contract administration by DoD personnel on a NASA installation.
1842.173 Reimbursement for contract administration services.
1842.174 Reporting requirements.
1842.175 Functional management responsibility.

Subpart 1842.2—Assignment of Contract Administration

1842.202 Assignment of contract administration.
1842.202-70 Delegations to contract administration offices.
1842.202-71 Delegations to audit offices.
1842.203 Retention of contract administration.

Subpart 1842.7—Indirect Cost Rates

1842.705 Final indirect cost rates.
1842.705-70 Policy.

1842.705–71 Procedure.
1842.705–72 Coordination.

Subpart 1842.8—Disallowance of Costs

1842.803 Disallowing costs after incurrence.

Subpart 1842.10—Negotiating Advance Agreements for Independent Research and Development/Bid and Proposed Costs

1842.1004 Location of negotiators in a central office.
1842.1008 Administrative appeals.

Subpart 1842.12—Novation and Change-of-Name Agreements

1842.1200 Scope of subpart.
1842.1202 Responsibility for executing agreements.
1842.1203 Processing agreements.
1842.1203–70 Processing novation agreements and change-of-name agreements by the Department of Defense on behalf of NASA.

Subpart 1842.14—Traffic and Transportation Management

1842.1405 Discrepancies incident to shipment of supplies.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1842.1—Interagency Contract Administration and audit Services

1842.101 Policy.

It is NASA policy to make optimum use of the contract administration audit and related support functions available from the Department of Defense (DOD) and other Government agencies. A list of NASA agreements with Government agencies regarding the delegation and performance of contract administration and related field support functions is published in NMI 1050.4, Listing of NASA Interagency Agreements. NASA shall retain technical direction of all contracts awarded regardless of the agency responsible for contract administration.

1842.102 Procedures.

DOD contract administration and audit offices will accomplish the delegated functions in accordance with DOD regulations and procedures, except that the following shall take precedence over DOD regulations and procedures:

(a) NASA letters of delegation, including any special instructions attached thereto.

(b) Applicable requirements of NASA Quality Publication NHB 5300.4(2B), Quality Assurance Provisions for Government Agencies.

(c) Any written agency agreements between NASA and DOD.

1842.102–70 Management of subcontracts.

Contractors are responsible for managing their subcontracts; therefore, contract administration functions shall be performed by the Government for subcontracts only as necessary to meet specific NASA requirements. Delegations for contract administration at subcontractors' plants normally shall be made by or through contract administration offices that are responsible for the prime contractors. Where a direct delegation is made for performance of contract administration functions at a subcontractor's plant (such as for quality assurance), the contracting officer shall coordinate in advance with the contract administration office responsible for the prime contractor and shall provide copies of the delegation to that office.

1842.170 Assignment of NASA personnel at contractor plants.

(a) NASA personnel normally shall not be assigned at or near a contractor's facility to perform any contract administration functions listed in FAR 42.302(a). Before making such an assignment, a written request shall be forwarded to the cognizant program director for approval and the concurrence of the Assistant Administrator for Procurement. The following supporting information shall be forwarded with the request to make the assignment:

(1) A statement of the special circumstances which necessitate the assignment.

(2) The contract administration services to be performed.

(3) A summary of any discussions held with the cognizant contract administration organization.

(4) A staffing plan for a three year period or such shorter period as may be appropriate. The provisions of this paragraph do not apply to NASA audit personnel assigned to the field installations, to NASA technical personnel covered by 1842.101 and paragraph (b) below, unless they are performing any of the contract administration functions listed in FAR 42.302(a), or to personnel assigned to contractors' plants that are located on either NASA or other Government agency installations.

(b) NASA may assign technical personnel (such as quality assurance, reliability, or engineering representatives) to contractors' plants or laboratories to provide direct liaison with NASA and technical assistance and guidance to the contractor and DOD. The duties and responsibilities of the technical representatives assigned shall be clearly defined and shall not conflict, duplicate, or overlap functions delegated to DOD personnel. All DOD and contractor organizations shall be advised of duties and responsibilities of NASA technical personnel with whom they will be concerned. Where such NASA technical personnel are performing any of the contract administration functions listed in FAR 42.302(a), the provisions of paragraph (c) below apply.

(c) When a NASA resident office and a DOD contract administration office are performing contract administration functions on NASA contracts at the same contractor's facility, the two offices shall execute a written agreement clearly establishing the relationship between the two organizations and the contractor. The agreement should eliminate duplication in the performance of contract administration functions and minimize procedural misunderstandings between the two organizations. Such agreements shall be consistent with existing delegations to the contract administration offices concerned and shall include the relationship of NASA nonprocurement resident personnel with their DOD and contractor counterparts when such personnel are, or intend to be, involved in any aspect of contract administration.

1842.171 Contractor performance on a NASA installation.

When a NASA contract requires contractor performance on another NASA installation or NASA-controlled launch site, a delegation shall be made to the contracting office of the NASA installation on which performance will take place. Normally, delegations will include the functions listed in FAR 42.302(a) less any functions retained under 1842.202, and shall include the contracting officer security functions (when required in the performance of the contract on the installation or site) and the administration of any NASA support to be provided to the contractor.

1842.172 Contract administration by DOD personnel on a NASA installation.

If DOD personnel performing contract administration functions will be required on a NASA installation for more than 30 work days (either continuous or intermittent), the NASA contracting officer shall obtain prior approval of the Head of the Installation where the DOD personnel will be located and the concurrence of the Assistant Administator for Procurement (Code HP). Such approvals will normally be governed by the following criteria:

(a) The delegation of any functional area (e.g., production, property administration, and quality assurance) shall include all of the administrative responsibilities for that functional area listed in FAR 42.302(a) that the DOD

contract administration office is capable of performing.

(b) The delegated functions will be directed by the contract administration office.

1842.173 Reimbursement for contract administration services.

The basis for reimbursement to DOD for contract administration and related support services is the NASA-DOD agreement (see NMI 1050.4A). Budgeting, funding, and payment for these services will be accomplished in accordance with NMI 7410.1, Budgeting, Funding and Payment for Contract Administration and Related Field Services Performed by Others. Budgeting, funding, and payment of carrier bills of lading for transportation performed as a result of a traffic management delegation are the responsibility of the NASA installation issuing the delegation.

1842.174 Reporting requirements.

(a) NASA installations semi-annually shall assess their delegation activity in relation to DOD to determine changes in delegation patterns that could result in significant increases or decreases in future DOD manpower requirements or that could have other important impacts on DOD contract administration activities. Events such as major program cutbacks or expansions, changes in locations of major programs, and sizeable new procurements should be considered in the assessment.

(b) When an event will have a significant impact on DOD manpower matters as described in paragraph (a) above, a summary of the survey shall be submitted to the Assistant Administrator for Procurement (Code HP). The summary shall include at least the following:

(1) A description of the change in work requirements or delegation pattern.

(2) An estimate of the period of time that the impact will be felt.

(3) An estimate of the magnitude of the impact on DOD in terms of changes in manpower requirements or other costs.

(c) The anticipated impact on the DOD shall be discussed with the DOD contract administration offices concerned, and the results of these discussions, such as DOD agreement or disagreement with the estimated impact, shall be included in the report.

1842.175 Functional management responsibility.

NASA contracting officers shall retain functional management responsibility for their contracts. Utilization of the contract administration services of another Government agency or NASA installation in no way relieves the NASA contracting officer of ultimate responsibility for the proper and effective management of the contract. Therefore, the NASA contracting officer must ensure that complete understanding has been achieved with the contract administration office regarding the respective duties and responsibilities of each office in connection with each NASA contract. NASA contracting officers shall also keep themselves fully informed on contractor performance and progress by the establishment and maintenance of effective communications with contract administration offices.

Subpart 1842.2—Assignment of Contract Administration

1842.202 Assignment of contract administration.

(a) *Withholding normal functions.* (1) *Mandatory (to withhold).* The functions listed below are the responsibility of the NASA contracting officer and shall not be delegated to DOD or to another Government agency:

(i) Execution of supplemental agreements involving new procurements, spare parts, or terminations (see FAR 42.302(a) (22) and (23)); however, see 1842.202(a)(2) (i) and (ii) below regarding negotiation.

(ii) Issuance of decisions under the Disputes clause (see FAR 42.302(a)(10)).

(iii) Countersigning NASA Form 456, Notice of Contract Costs Suspended and/or Disapproved (see FAR 42.302(a)(8)).

(iv) Approval of the completion voucher (see FAR 42.302(a)(7)).

(v) Contract payment (see FAR 42.302(a)(13)).

(2) *Optional (to withhold).* The functions listed below may be delegated to DOD or to another Government agency:

(i) Negotiate settlement agreements involving partial or complete contract terminations for convenience upon request of the NASA contracting officer on NASA Form 1432, Letter of Contract Administration Delegation—Termination, and forward for the signature of the NASA contracting officer (see FAR 42.302(a)(23)).

(ii) Negotiate supplemental agreements for spare parts and other items selected through provisioning procedures and forward for the signature of the NASA contracting officer (see FAR 42.302(a)(22)).

(iii) Issue work requests under maintenance, overhaul, and modification contracts insofar as such work requests do not constitute obligation of funds not available under the contract (see FAR 42.302(a)(21)).

(iv) In connection with classified contracts, administer those portions of the Industrial Security Program designated as administrative contracting officer responsibilities in Appendix C, Industrial Security Regulation, DOD 5220.22R (see FAR 42.302(a)(20)).

(v) Consent to placement of subcontracts (see FAR 42.302(a)(51)).

(vi) Perform transportation and packaging functions (see FAR 42.302(a) (35), (36), and (37)).

(vii) Perform reliability and quality assurance functions including reliability and quality assurance engineering functions (see FAR 42.302(a) (38), (40), and (41)).

(viii) Perform systems support engineering functions (as differentiated from production and reliability, and quality assurance engineering) (see FAR 42.302(a)(41)).

(b) When the performance of contract administration functions other than those authorized for retention under 1842.202 is necessary to the administration of a contract and that function is retained for administration or modified by the NASA contracting officer, the NASA contracting officer shall (1) justify, in writing, the retention or modification of that function, (2) obtain written approval of the justification from the Procurement Officer or a designee, and (3) include the approved justification in the contract file. The NASA contracting officer shall then advise the contract administration office of the retention or modification of the function by means of written special instructions on NASA Form 1430A, Letter of Contract Administration Delegation, Special Instructions, accompanying the letter of delegation. For any function listed in FAR 42.302(a) that is not necessary to the administration of the contract, no notice of its retention of a function need be issued. The provisions of this paragraph do not apply to contracts and situations described in 1842.203(a), 1842.171, and 1842.172.

(c) *Withholding other than normal functions.* (1) *Mandatory (to withhold).* The functions listed below are the responsibility of the NASA contacting officer and shall not be delegated to DOD or to another Government agency:

(i) Execution of change orders.

(ii) Termination for default or for convenience of the Government.

(2) *Optional (to withhold).* The functions listed below may be delegated to DOD or to another Government agency:

(i) Negotiate supplemental agreements resulting from change orders and forward for the signature of the NASA contracting officer. Prior to completion of negotiations, any delivery schedule change shall be approved by the NASA contracting officer (see FAR 42.302(b) (1) and (3)).

(ii) Negotiate prices and execute priced exhibits for unpriced orders issued by the NASA contracting officer under basic ordering agreements (see FAR 42.302(b)(2)).

1842.202-70 Delegations to contract administration offices.

(a) *General.* The following procedures shall apply for delegations to contract administration offices (for delegations to audit offices, see 1842.202-71):

(1) NASA contracting officers shall review contract performance requirements as early as possible in the acquisition cycle to determine the nature and extent of contract administration functions to be performed. This review shall be coordinated with appropriate installation activities, including program managers, to insure that all essential requirements are incorporated in the delegation. A similar review shall be made before amending letters of delegation under paragraph (a)(7) below.

(2) A planning conference shall be held with representatives of the contract administration office when—

(i) A contract is expected to exceed $5,000,000;

(ii) Contract performance is required at or near another NASA installation or NASA-controlled launch site;

(iii) The delegation will impose an abnormal demand on the resources of the contract administration office receiving the delegation;

(iv) The circumstances indicate that complex contract management problems are anticipated; or

(v) The NASA contracting officer considers it advisable.

(3) Contracting offices shall prepare, within 15 days after contract award, NASA Form 1430, Letter of Contract Administration Delegation, General, for the delegation, redelegating, and amending of Contract Administration functions. NASA Form 1430A, Letter of Contract Administration Delegation, Special Instructions, shall be used to supplement NASA Form 1430 to—

(i) Delegate any *optional* functions listed in 1842.202 (a)(2) or (c)(2).

(ii) Modify previously delegated functions.

(iii) Retain the administration of functions listed in FAR 42.302(a).

(iv) Provide additional or peculiar information concerning the contract that may assist the contract administration office to more effectively perform the delegated contract administration responsibilities (except see paragraph (a)(4) below).

(4) Letters of delegation and special instructions shall not include any clauses or other requirements that are or should be contained in the contract and shall not—

(i) Repeat the functions covered in FAR 42.302(a) or other information covered in DOD issuances or cite administrative procedures;

(ii) Place restrictions on administrative contracting officers; or

(iii) Include references to NASA issuances, unless specific written NASA/DOD agreements exist which include references to such issuances, or unless the NASA issuances are a requirement of the contract. Where it is appropriate to cite DOD issuances in a letter of delegation, the NASA contracting officer shall assure that the issuances are applicable to the contract administration office concerned (i.e., that Air Force issuances are not cited in delegations to Navy or DCAS contract administration offices).

(5) Delegations and amendments thereto should be accompanied by documentation and supporting information which will ensure a complete understanding of the contract administration services to be performed. Contract administration offices shall be kept fully informed of all actions which may affect the performance of the delegated functions. Copies of all significant documents should be furnished to the contract administration office throughout the period of performance of the contract. Significant documents include but are not limited to—

(i) All contractual documents such as the contract, specifications and drawings, change orders, supplemental agreements, and contractor proposals when referenced in the contract;

(ii) Negotiation memoranda covering negotiations of contracts or contract changes in excess of $100,000;

(iii) Copies of any delegation and amendments thereto sent to other contract administration offices which have a bearing on the contract, including those issued pursuant to 1842.102-70; and

(iv) Any other correspondence affecting contract performance under the contract.

(6) Amendments to letters of delegation shall be issued when amendments to the contract are of a nature that will change the scope of functions previously delegated, when additional functions are required to be delegated, or when previously delegated functions are to be terminated in whole or part. However, when a contract administration office has retired the original letter of delegation with the records of a physically completed but administratively open contract, a new letter of delegation shall be issued to support any additional reimbursable services required under the delegation. In order to minimize the need for a duplicate delegation to be issued at a later date on a contract that is nearing closeout, the NASA contracting officer shall advise the contract administration office to hold the contract in open status when conditions exist or are anticipated that justify extension of the contract period of performance. Appropriate NASA forms listed in Part 1853 shall be used in the amendment process. The forms shall be clearly annotated as an amendment to the original delegation.

(7) NASA Form 1431, Letter of Acceptance of Contract Administration Delegation, shall be forwarded with each NASA Form 1430 and amendment thereto. The form, when returned, shall be used by the NASA contracting officer as evidence that the delegation has been received and accepted by the contract administration office and as a reference for points of contact for each of the functional areas delegated.

(8) Delegations shall be sent to DOD contract administration offices in accordance with the instructions contained in the DOD Directory of Contract Administration Services Components (DOD 4105.59H).

(9) The distribution of copies of the contract and letters of delegation for contract administration (including amendments thereto) shall be as follows:

(i) DCAS and all other Government contract administration offices except DOD military contract administration offices, when two or more functional areas are delegated: Five copies of the contract and NASA Form 1430 and three NASA Forms 1431.

(ii) DOD military component offices when two or more functional areas are delegated: Three copies of the contract and three NASA Forms 1430 and 1431.

(iii) Any contract administration office when a single functional area is delegated: Two copies of the contract and two NASA Forms 1430 and 1431.

(iv) The contractor: One NASA Form 1430.

(b) *Reliability and quality assurance.* When special instructions for reliability or quality assurance are necessary, the requirements shall be clearly identified by the NASA installation personnel responsible for the reliability and quality assurance function and shall be

furnished to the contracting officer on NASA Form 1430A for inclusion in the letter of delegation. The procedures for arranging, preparing, and finalizing such delegations and the requirements for NASA direction and management of these functions are contained in NHB 5330.7, Management of Government Quality Assurance Functions for Supplier Operations.

(c) *Transportation and packaging.* Transportation and packaging functions may be delegated at the option of the NASA installation personnel responsible for the transportation and packaging function. When such delegations are contemplated on a particular contract, special instructions will be furnished to the NASA contracting officer on NASA Form 1430A. The form shall also specify the limit of the value of Government bills-of-lading that may be issued without further consent of the NASA contracting officer and shall provide appropriate funding information.

(d) *Industrial security.* NASA industrial security policies and procedures are set forth in NMI 1650.1, Industrial Security Policies and Procedures, which stipulates that the industrial security function on NASA contracts will be performed automatically by DOD. The basis for DOD performance of this function is the NASA/DOD Agreement, NMI 1050.4A. Nonindustrial security functions, which are the responsibility of the NASA contracting officer, may be delegated to DOD at the option of the NASA contracting officer and shall be delegated when contract performance is to be accomplished at another NASA installation (see 1842.171). These contracting officer security functions, when delegated to DOD or to another NASA installation, shall be specifically identified on NASA Form 1430A.

(e) *Services not requiring letters of delegation.* (1) When it is desired that a contract administration or audit office perform services which precede the award of a contract such as cost, price, or technical evaluations (but exclusive of preaward surveys), NASA Form 1434, Letter of Request for Pricing-Audit-Technical Evaluation Services, shall be used. Preaward surveys shall be requested on SF 1403, Preaward Survey of Prospective Contractor (General). Oral requests made to contract administration offices to expedite these services are authorized but shall be confirmed in writing immediately through the use of NASA Form 1434 or SF 1403, as appropriate.

(2) Preaward and postaward services, such as verification of labor and overhead rates, and similar information which is readily available within contract administration and audit offices and which is not normally subject to reimbursement by NASA, may be obtained either orally without written confirmation or through the use of NASA Form 1434, as appropriate.

1842.202-71 Delegations to audit offices.

The following procedures shall apply when delegations are made to audit offices:

(a) NASA installations shall utilize the services of other Government audit organizations for performance of contract cost audit and other audit functions except in those instances where audits are to be performed by NASA auditors. The Defense Contract Audit Agency (DCAA) has been designated as the DOD agency responsible for the performance of audit functions for NASA contracts, except those awarded to educational institutions for which other agencies have audit cognizance pursuant to Federal Management Circular Number 73-6, those with Canadian contractors (see paragraph (e) below), and those accomplished by NASA. To ensure that audit services are performed expeditiously, audit delegations shall be sent to the appropriate audit office immediately after execution of all cost-reimbursement, labor-hour, and time-and-material type contracts, and fixed price contracts containing cost-reimbursement or price adjustment provisions. Audit functions include but are not limited to contract cost and price audits, estimating systems surveys, review of accounting systems, and approval of vouchers for provisional payment.

(b) Delegations shall be sent to cognizant audit offices as listed in the Defense Contract Audit Agency Directory (Headquarters and Field Offices) or in other Government agency directories, as appropriate.

(c) NASA Form 1433, Letter of Audit Delegation, shall be used to delegate the audit function and to amend previous delegations when necessary. The distribution of copies of the contract and NASA Form 1433 shall be as follows:

(1) Audit Office: One copy of the contract and three NASA Forms 1433.

(2) Cognizant NASA Regional Audit Office: One NASA Form 1433.

(3) Contractor: One NASA Form 1433.

(4) Cognizant NASA Fiscal or Financial Management Office: One NASA Form 1433.

(d) NASA contracting officers may request assistance from NASA audit representatives when required. Special audits or additional audit functions may be requested by the NASA audit representative. Arrangements for such audits are the responsibility of the NASA audit representative, unless processed through the NASA contracting officer.

(e)(1) On contracts with the Canadian Commercial Corporation (CCC), audits are automatically arranged by the Department of Defence Production (Canada) (DDP) in accordance with agreements between the National Aeronautics and Space Administration and Department of Defence Production (Canada). Audit reports are furnished to the DDP. Upon advice from DDP, the CCC will certify the invoice and forward it with Standard Form 1034, Public Voucher, to the contracting officer for further processing and transmittal to the fiscal or financial management officer.

(2) On contracts placed directly with Canadian firms, audits are requested by the contracting officer from the Audit Services Branch, Comptroller of the Treasury, Department of Finance, Ottawa, Ontario, Canada. Invoices are approved by the auditor on a provisional basis pending completing of the contract and final audit. These invoices, accompanied by SF 1034, are forwarded to the contracting officer for further processing and transmittal to the fiscal or financial management officer. Periodic advisory audit reports are furnished directly to the contracting officer.

(3) Audits performed by the Audit Services Branch are normally conducted under DDP regulations.

1842.203 Retention of contract administration.

The assignment of contract administration is optional for the contracts and situations listed below:

(a) Research and development study contracts not involving deliverable hardware or Government property in the hands of contractors.

(b) All contracts with delivery schedule of 90 days or less.

(c) Purchase orders having no Government source inspection requirements.

(d) Contract work performed on the installation awarding the contract.

(e) Contract work performed in the vicinity of the installation awarding the contract and for which DOD contract administration services are not reasonably available.

Subpart 1842.7—Indirect Cost Rates

1842.705 Final indirect cost rates.

18-42.705-70 Policy.

(a) Since many NASA contractors are under the Department of Defense (DOD)

negotiated overhead rate procedure, it is the policy of NASA to participate in joint negotiations with the DOD. The NASA participant will be a representative of either the Assistant Administrator for Procurement or an installation contracting office designated by the Assistant Administrator for Procurement.

(b) Where NASA contractors are not under the DOD negotiated overhead rate procedure or negotiation responsibility has not otherwise been assigned to another Government agency, the negotiation or settlement of overhead cost will be conducted by the Assistant Administrator for Procurement or designee.

1842.705–71 Procedure.

When a contractor is under NASA cognizance, the procedure for the establishment and use of negotiated final overhead rates will generally consist of submission by the contractor of an overhead rate proposal, obtaining an advisory audit report from the cognizant auditor, holding a prenegotiation conference for review of the contractor's proposal and the advisory audit report, conduct of negotiation, preparation of a negotiation report or summary, and execution and distribution of the overhead rate agreement.

(a) The contractor shall submit a copy of its proposal to the contracting officer of each NASA installation with which it has contracts, with a copy to the cognizant audit activity and the Assistant Administrator for Procurement (Code HC).

(b) The cognizant audit activity will review the contractor's overhead rate proposal using FAR Part 31 as a basis for determining allowable costs. An advisory audit report will be submitted to the contracting officer of each NASA installation having a contract with the contractor and a copy to the cognizant NASA Regional Audit Office. Such report shall (1) include a list of contracts subject to the overhead rates to be negotiated, (2) identify any advance agreements and special provisions governing specific contracts, (3) set forth the findings of the audit activity, and (4) include the results of any discussions of such findings with the contractor.

(c) A prenegotiation conference will be held by the negotiating authority with attendance by the auditor, representatives of NASA installations as designated by the Assistant Administrator for Procurement (Code HC) and other Government procurement and audit activities interested in or planning to attend the negotiations. This conference will (1) relate to the areas of difference between the advisory audit report and the contractor's proposal and any other factors pertaining to the negotiations, (2) decide upon the approach to the negotiations, and (3) establish a consolidated negotiation position. As a further aid to the negotiating authority, a representative of the audit activity and/or a representative of the NASA Audit Division will, upon request, attend the negotiation conference.

(d) The negotiation conference will be conducted by the Assistant Administrator for Procurement or designee. The allowability of costs and methods of cost allocation will be governed by FAR Part 31 and any advance agreements or special contractual provisions governing specific contract negotiations shall encompass an agreement on final overhead rates, the specific items to be treated as direct charges, and, when applicable, the billing rates for the succeeding period. Such agreement shall be binding on all applicable Government contracts.

(e) At the completion of negotiations, the negotiating authority shall prepare an overhead rate agreement (see FAR 42.705–1(b)(5)(ii)). The agreement shall include a list of affected contracts, identifying those with advance agreements or special provisions and the rates applicable thereto, and shall be executed by the contractor and the NASA negotiating authority. In addition, the negotiating authority shall prepare a negotiation memorandum (see FAR 42.705–1(b)(5)(iii)) listing the names, titles, and organizations of those persons in attendance, the rates negotiated, the reasons for variation from the audit report, if any, the period of rate applicability, the basis for the determination of such rates, the specific items treated as direct costs, and, when applicable, the billing rates agreed upon for application in the succeeding period. A copy of the overhead rate agreement and the negotiation memorandum shall become a part of the official file of each affected contract. Sufficient copies of the agreement and report shall be forwarded to the Assistant Administrator for Procurement for distribution to all affected activities under FAR 42.706.

1842.705–72 Coordination.

In compliance with FAR 42.705–1(b)(3), DOD will, when appropriate, advise the Assistant Administrator for Procurement (Code HC) of a pending overhead rate negotiation. All NASA field installations and headquarters activities having an interest in the negotiation will be notified by the aforementioned office of the scheduled negotiation. The notification will designate the NASA representative in such negotiations. Should it be impossible for the designated representative to attend, the Assistant Administrator for Procurement (Code HC) shall be notified, and arrangements will be made to ensure that NASA is represented. Such representative shall be responsible for prenegotiation coordination with all affected NASA installations and for the furnishing of the overhead rate agreement and the negotiation memorandum (Code HC) for further distribution to interested NASA installations. Final overhead rates negotiated under the above arrangements are those rates contemplated under paragraph (d) of the Allowable Cost and Payment clause at FAR 52.216–7 or the Predetermined Indirect Cost Rates clause at FAR 52.216–15, and such rates shall be automatically incorporated into the contract upon execution of the overhead rate agreement.

Subpart 1842.8—Disallowance of Costs

1842.803 Disallowing costs after incurrence.

(a) Under the authority of FAR 42.803(b), NASA has designated the contract auditor as the authorized representative of the contracting officer for (1) examining reimbursement vouchers received directly from contractors, (2) transmitting those vouchers approved for provisional payment to the cognizant fiscal or financial management officer, and (3) regarding costs claimed but not considered allowable, preparing and sending to the cognizant contracting officer NASA Form 456, Notice of Contract Costs Suspended and/or Disapproved. Normally, the NASA Form 456 is initiated by the auditor; however, the contracting officer also may initiate it or direct its initiation, e.g., contracts with Canadian contractors (see 1842.102). The contract auditor will examine and approve (but see paragraph (b) below) separate fee vouchers and fee portions of vouchers for provisional payment under the contract Schedule and any instructions received from the contracting officer. After examination by the auditor, completion vouchers shall be forwarded to the contracting officer for approval and transmittal to the cognizant fiscal or financial management officer.

(b) When delegating audit functions, special instructions may be issued to the contract auditor to—

(1) Require submission of separate vouchers for reimbursable costs and for payment of earned fee; and/or

(2) Reserve to the contracting officer approval of separate fee vouchers and all vouchers submitted by contractors performing on a NASA installation.

(c) Unless otherwise notified, the contractor shall submit public vouchers to the auditor as follows:

(1) One original SF 1034, SF 1035, or equivalent contractor's attachment.

(2) Seven copies of SF 1034a, SF 1035a, or equivalent contractor's attachment.

(3) The contractor shall mark SF 1034a copies 1, 2, 3, 4, and such other copies as may be directed by the contracting officer by insertion in memorandum block names and addresses as follows:

(i) Copy 1 NASA contracting officer
(ii) Copy 2 Defense Contract Audit Agency auditor
(iii) Copy 3 Contractor
(iv) Copy 4 Contract administration office
(v) Copy 5 Project management office (when required by the NASA contracting officer)

(4) The auditor shall retain an unpaid copy of the voucher.

(5) When a voucher contains one or more individual direct freight charges of $100 or more, an additional copy of SF 1034a and SF 1035a shall be submitted and marked for return to the contractor after payment. This copy shall be transmitted quarterly by the contractor with the freight bills to the General Accounting Office. When a voucher is identified as the "Completion Voucher," an additional copy shall be submitted for transmittal to the NASA contracting officer.

(d) Following a prompt and careful review of the facts and circumstances leading the auditor to initiate the NASA Form 456 and after coordination with other NASA and DOD contracting officers administering contracts with the same contractor where a NASA Form 456, or a DCAA Form 1 in the case of a DOD contract, has been issued for the same items of cost, the contracting officer shall take one of the following actions:

(1) Countersign the NASA Form 456 disapproving the costs.

(2) Countersign the NASA Form 456 suspending the costs.

(3) Issue a new NASA Form 456 suspending the costs rather than disapproving them pending resolution of the issues.

(4) Have the contractor issue a new voucher removing the costs in question from its claim and return the NASA Form 456 to the auditor unsigned.

(5) Return the NASA Form 456 unsigned to the auditor with a detailed explanation of why the suspension or disapproval is not being countersigned, and process the contractor's claim for payment.

(e) The contracting officer, when in agreement with the NASA Form 456 initiated by the auditor, shall assign a notice number and shall countersign the form. An original and three copies (which includes two acknowledgement copies, one each for return to the contracting officer and the auditor) of the form shall be sent to the contractor by certified mail, return receipt requested; one copy shall be attached to the SF 1034 and each copy of the SF 1034a (see paragraph (c) above) on which the deduction is made, and one copy shall be sent to the auditor.

(f) The total amount suspended or disapproved as shown on the NASA Form 456, shall be inserted in the Differences block of the SF 1034 and SF 1034a, as follows:

NASA Form 456 No.: $ _____
Net Amount Approved: $ _____

(g) If the amount of the deduction is more than the amount of the public voucher, the installment method of deduction shall be applied to this and subsequent public vouchers until the amount is fully liquidated. The deductions on any voucher shall not exceed the amount thereof to avoid processing of a voucher in a credit amount. Public voucher(s) with zero amounts must be forwarded to the fiscal or financial management office for appropriate action. If deductions are in excess of contractor claims, recovery may be made through a direct refund from the contractor, in the form of a check payable to the Treasurer of the United States, or by a set-off deduction from the voucher(s) submitted by the contractor under any other contract, except where those contracts contain a "no set-off" provision. If a set-off is effected, the voucher(s) from which the deduction is made should be annotated to identify the contract and appropriation affected and the applicable NASA Form 456.

(h) When necessary, the contracting officer should consult with the auditor or the financial management officer concerning preparation, examination, and payment of vouchers. Functions to be performed by auditors and financial management and fiscal office personnel during the examination of vouchers are in FMM 9630–20b(1).

Subpart 1842.10—Negotiating Advance Agreements for Independent Research and Development/Bid and Proposal Costs

1842.1004 Location of negotiators in a central office.

Within NASA, the central office responsible for advance agreements is the Contract Pricing and Finance Office (Code HC), Office of Procurement, NASA Headquarters.

1842.1008 Administrative appeals.

The NASA administrative appeals hearing group shall consist of the Assistant Administrator for Procurement, who shall be chairman, the Deputy Associate Administrator for Aeronautics and Space Technology, and the Deputy General Counsel.

Subpart 1842.12—Novation and Change-of-Name Agreements

1842.1200 Scope of subpart.

This subpart implements and supplements FAR Subpart 42.12 and prescribes policies and procedures for processing novation or change-of-name agreements initiated by either a NASA installation or the DOD on behalf of NASA.

1842.1202 Responsibility for executing agreements.

When none of the affected contracts has been assigned to an Administrative Contracting Officer (ACO) (see FAR 42.1202(a)(2)), the contracting officer shall require the contractor to provide the documentation enumerated in FAR 42.1204(c) or, as appropriate, FAR 42.1205(a) to the NASA installation with which it has the largest amount of unliquidated obligations. This installation shall be the "designated installation" for processing and executing novation agreements and change-of-name agreements with the contractor.

1842.1203 Processing agreements.

(a) The installation shall immediately notify the Assistant Administrator for Procurement (Code HM) of the request to execute a successor-in-interest or change-in-name agreement. The notification shall include (1) the names of the firms involved, (2) the name of the installation which will execute the agreement, and (3) the type of agreement.

(b) When preparing the Standard Form 30 required by FAR 42.1203(f)(1), a supplemental agreement number need not be obtained for contracts other than for the one under which the supplemental agreement is written. For

distribution purposes, the Standard Form 30 will also include the names and addresses of the installations with contracts subject to the agreement.

(c) After execution of the supplemental agreement, the designated installation shall—

(1) Forward one authenticated copy to Code HM; and

(2) Advise each of the affected installations by letter of the consummation of the supplemental agreement, requesting that an administrative change be issued for each affected contract and enclosing a copy of the supplemental agreement.

(d) For each such affected contract, the contracting officer shall prepare an administrative change acknowledging the change in name or successor in interest. The administrative change will receive the same distribution as the affected contract. It will indicate the nature of the transaction, the result attained, and will cite the number of the contract with which the original relevant documents and supplemental agreement are filed.

1842.1203-70 Processing novation agreements and change-of-name agreements by the Department of Defense on behalf of NASA.

(a) Appendix E of the NASA/DOD agreement for contract administration and contract audit services covers the accomplishment of novation and change-of-name agreements by DOD on behalf of NASA.

(b) Installations shall be notified by Code HS when DOD is processing a proposed novation agreement on behalf of NASA. Within 20 days after receiving it, the installation shall submit comments to Code HS for transmittal to DOD. If an installation wishes to make separate agreement with the contractor and presents rationale for doing so with which Code HS concurs, DOD shall be so notified. Code HS will notify the designated NASA installation of its concurrence (see 1842.1202), and a separate agreement shall be processed in accordance with FAR 42.1203.

(c) Copies of agreements entered into by DOD on behalf of NASA shall be maintained by Code HS.

Subpart 1842.14—Traffic and Transportation Management

1842.1405 Discrepancies incident to shipment of supplies.

In addition to the applicable regulations and procedures referenced at FAR 42.1405(a), NASA personnel shall report discrepancies and adjust claims for loss of and damage to Government property in transit as prescribed in NHB 6200.1, NASA Transportation and General Traffic Management.

PART 1843—CONTRACT MODIFICATIONS

Subpart 1843.2—Change Orders

Sec.

1843.205 Contract clauses.

1843.205-70 NASA contract clause.

1843.270 Originating engineering change proposals.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1843.2—Change Orders

1843.205 Contract clauses.

1843.205-70 NASA contract clause.

The contracting officer may use the clause at 1852.243-70 to require a contractor to submit engineering change impact evaluation information, including the maximum equitable adjustment resulting from the change.

(a) Use Alternate I when it is desirable to preclude a large number of small-dollar, contractor-initiated engineering changes and to reduce the administrative cost of reviewing such changes.

(b) Use Alternate II in cost-reimbursement type contracts.

1843.270 Originating engineering change proposals.

Engineering changes may be originated by either party to the contract. The Government needs to obtain detailed information supporting and documenting the proposed change in order to evaluate the technical, cost, and schedule effects of implementing the change and to price the change in advance when possible (see 1843.205-70).

PART 1844—SUBCONTRACTING POLICIES AND PROCEDURES

Subpart 1844.1—General

Sec.

1844.102 Policy.

1844.102-70 Special contracting officer consent requirements for critical subcontracts.

1844.102-71 Headquarters review of critical subcontracts.

1844.102-72 New sources of scientific and technical competence.

1844.170 NASA contract clause.

Subpart 1844.3—Contractor's Purchasing Systems Review

1844.302 Requirements.

1844.302-70 Contractor's purchasing system reviews conducted by the Department of Defense.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1844.1—General

1844.102 Policy.

1844.102-70 Special contracting officer consent requirements for critical subcontracts.

If the contracting officer (in conjunction with the technical representative, when appropriate) determines that a proposed subcontract may be critical because of special considerations in the source selection, in the incentive arrangements, or other reasons, provisions shall be included in the Schedule of the prime contract (if not already provided for in the standard Subcontracts clause) for the contracting officer to consent to the critical subcontract prior to award by the contractor.

1844.102-71 Headquarters review of critical subcontracts.

(a) If a requirement is established by the Headquarters Source Selection Official or the Assistant Administrator for Procurement for a Headquarters review of a critical subcontract prior to its award, the contracting officer shall—

(1) Include a provision in the contract Schedule (if not already provided for in the standard Subcontracts clause) for advance notification and consent of the contracting officer prior to award of the subcontract; and

(2) Prior to consenting to the subcontract, submit to the Assistant Administrator for Procurement, Code HS, for review, the—

(i) Subcontract;

(ii) Contractor documentation in support of the subcontract (including that documentation required by notification provisions of the Subcontracts clause); and

(iii) Contracting officer's review and evaluation (in accordance with FAR 44.202) with appropriate recommendations.

(b) Consent shall not be granted by the contracting officer until notification (with limitations and objections, if any) is received from the Assistant Administrator for Procurement.

1844.102-72 New sources of scientific and technical competence.

As a Government agency whose mission calls for substantial Federal expenditures and use of substantial national resources, NASA has a strong interest in assisting in the accomplishment of collateral national economic goals within the framework of applicable statutory and administrative authority in such manner as will not impair program effectiveness. Utilization and the accompanying development of

the potential of all geographical regions in the space program will effectively contribute to achieving national goals. To advance the further development of competence and capacity of sources, it is NASA's policy to encourage the placing of subcontracts over wider geographic areas. To carry out these objectives, the clause at 1852.244–70, Geographic Participation In the Aerospace Program, shall be used as prescribed at 1844.170.

1844.170 NASA contract clause.

The contracting officer shall insert the clause at 1852.244–70, Geographic Participation in the Aerospace Program, in all research and development solicitations anticipated to exceed $500,000 and contracts of $500,000 or over to be performed with the United States.

Subpart 1844.3—Contractors' Purchasing Systems Review

1844.302 Requirements.

1844.302–70 Contractors' purchasing system reviews conducted by the Department of Defense.

(a) Delegation of the contractor purchasing system review (CPSR) function shall include authority for the cognizant DOD contracting officer to grant, continue, withhold, or withdraw approval of the contractor's procurement system.

(b) NASA installations desiring to participate in a DOD CPSR shall forward a request for such participation to the Assistant Administrator for Procurement, Code HP, for approval.

(c) Contracting officers will advise the cognizant DOD contract administration officer of weaknesses in a contractor's procurement system that have come to light during the review of subcontracts or from other sources.

(d) Contracting officers are responsible for reviewing DOD Summary Reports (which include present system status, comments, conclusions, recommendations, and significant changes effected since the review) and notifications to the contractors; and, when there is a determination that is at variance with the Summary Report or actions taken by DOD, the contracting officer will forward a request for approval of alternate actions, with justification, to Code HP. Similarly, a contracting officer desiring the withdrawal of a DOD approval of a contractor procurement system on the basis of a determination that there has been a deterioration of the contractor's procurement system or to otherwise protect the interests of the Government shall forward a request for such withdrawal to Code HP with appropriate justification.

1844.302–71 NASA-conducted contract or purchasing systems reviews.

If a NASA activity is the cognizant administration office, that office may use Supplement No. 1 to the Defense Acquisition Regulation, Contractors Purchasing System Review (CPSR) Program, as a guide.

PART 1845—GOVERNMENT PROPERTY

Subpart 1845.1—General

Sec.
1845.102 Policy.
1845.102–70 Procedures.
1845.104 Review and correction of contractors' property control systems.
1845.104–70 Contract property administration by the Government.
1845.106 Government property clauses.
1845.106–70 NASA contract clauses.

Subpart 1845.3—Providing Government Property to Contractors

1845.301 Definitions.
1845.302 Providing facilities.
1845.302–1 Policy.
1845.302–3 Other contracts.

Subpart 1845.4—Contractor Use and Rental of Government Property

1845.403 Rental—Use and Charge clause.
1845.405 Contracts with foreign governments or international organizations.
1845.407 Non-Government use of plant equipment.

Subpart 1845.5—Management of Government Property in the Possession of Contractors

1845.501 Definitions.
1845.502 Contractor responsibility.
1845.502–1 Receipts for Government property.
1845.502–70 Conditions for the provision of Government property.
1845.502–71 Goverment-furnished property.
1845.502–72 Contractor-acquired property.
1845.505 Records and reports of Government property.
1845.505–6 Special reports of plant equipment.
1845.505–670 Reporting centrally reportable equipment.
1845.505–14 Reports of Government property.
1845.506 Physical inventories.

Subpart 1845.6—Reporting, Redistribution, and Disposal of Contractor Inventory

1845.606 Inventory schedules.
1845.606–1 Submission of inventory schedules.
1845.608 Screening of contractor inventory.
1845.608–1 General.
1845.608–6 Waiver of screening requirements.
1845.610 Sale of surplus contractor inventory.
1845.610–2 Exemptions from sale by GSA.
1845.610–4 Contractor inventory in foreign countries.
1845.613 Property disposal determinations.
1845.615 Accounting for contractor inventory.

Subpart 1845.70—Equipment Visibility System

1845.7001 Policy.
1845.7002 Application.
1845.7003 General.
1845.7004 Interface with EVS Coordinators and technical project office.
1845.7005 Retention of EVS equipment.

Subpart 1845.71—Forms Preparation

1845.7101 Instructions for the preparation of NASA Form 1018.
1845.7102 Instructions for the preparation of DD Form 1342.
1845.7103 Instructions for the preparation of DD Form 1419.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1845.1—General

1845.102 Policy.

(a) The reason for the policy in FAR 45.102 that contractors shall ordinarily furnish all property is that providing Government property (whether Government furnished or contractor acquired) increases the Government's administrative burden and requires record keeping and personnel. It may dilute the contractor's overall responsibility and may weaken the effect of guarantees, end item delivery requirements, and other terms of the contract. Furnishing property places NASA between the source of the property and the contractor. When NASA assumes responsibility for scheduling delivery of the property, NASA may be responsible for certain delays.

(b) Nevertheless, there are circumstances where it may be essential to contractor performance or otherwise advantageous to NASA to provide Government property to a contractor. For example, it may be necessary for uniformity of product to provide standardized production property and raw material or to reduce the production cycle by eliminating the lead time necessary for the contractor to acquire or fabricate production property. It may be advantageous to NASA to broaden the competitive base by offering property to firms not otherwise willing (due to risk of program cutback or cancellation) or able to acquire their own, or by offering production property or critical material not generally available throughout the industry. NASA may achieve a lower contract cost by offering existing Government property or new Government property attainable at prices lower than those

available to the contractor. NASA may also provide Government property to educational or other nonprofit institutions to facilitate scientific research.

1845.102–70 Procedures.

(a) The contracting officer shall, when applicable, include in each solicitation a—

(1) List of any Government-furnished property (showing location and condition), including Government-owned tooling, which will be furnished for the performance of the contract and any related special provisions;

(2) Requirement that information be furnished regarding any Government-owned facilities, industrial equipment, or special tooling intended to be used in the performance of the contract, the value thereof, identification of the Government contract under which acquired, rental provisions, and other relevant information;

(3) Requirement that additional facilities to be provided by the Government be described and identified by category, such as "Land," "Buildings," "Machinery," and "Equipment" (see Subpart 1845.71);

(4) Requirement that additional special test equipment to be provided by the Government be described and its intended use, estimated cost, and proposed location be shown.

1845.104 Review and correction of contractors' property control systems.

(a) When review of the contractor's property control system is not delegated to DOD, the NASA contracting officer or property administrator will conduct the review as required in Subpart 1845.70.

(b) The contracting officer shall include in each solicitation under which use of Government property is contemplated a requirement for the offeror to (1) furnish the date of the last review by the Government of its property control and accounting system and describe actions taken to correct any deficiencies found, (2) state that the contractor has reviewed, understands, and can comply with all property management and accounting procedures in the solicitation, FAR Subpart 45.5, and NASA FAR Supplement Subpart 1845.70, and (3) state whether or not the costs associated with paragraph (b)(2) above are included in its cost proposal.

1845.104–70 Contract property administration by the Government.

Contract property administration by the Government shall comply with NASA Procurement Notice 84–1.

1845.106 Government property clauses.

1845.106–70 NASA contract clauses.

(a) The contracting officer shall insert the clause at 1852.245–70, Acquisition of Existing Government Equipment, in all solicitations and contracts which include a Government property clause (see 1852.245–70 and also 1845.7103(f) or instructions for preparing DD Form 1419).

(b) The contracting officer shall insert the clause at 1852.245–71, Installation-Provided Government Property, in solicitations and contracts when Government property is to be provided to on-site contractors:

(1) The clause may also be used when Government property is provided to off-site local support service contractors. In the latter case, the concurrence of the installation supply and equipment management officer must be obtained and indicated in the procurement request. The nature and extent of such property shall be identified in the Schedule of the contract and the property made available to the contractor on a no-charge-for-use basis by the installation supply and equipment management officer. The applicable installation property management directives shall also be listed in the contract.

(2) Any property provided under a Government property clause, but which is not also subject to the clause shall be clearly identified in a separate schedule. Any specific maintenance considerations (for example, requiring use of a central calibration facility) will be addressed elsewhere in the contract.

(3) Requests for deviation (see FAR Subpart 1.4) shall be coordinated with the Chief, Supply and Equipment Management Branch (Code NIE–8), NASA Headquarters, and shall include a determination of costs that will be avoided (for example, additional costs to the installation's property management systems and staffing) and costs that will be incurred (for example, reimbursable costs of the contractor to implement, staff, and operate separate property management systems on-site and resources to be committed to performance of, or reimbursement for, property administration) under the proposed deviation.

(c) The contracting officer shall insert the clause at 1852.245–72, Liability for Government Property Furnished for Repair and Service, in solicitations and contracts for repair (modification, rehabilitation) or other servicing of Government property, when such property is furnished to a contractor for that purpose. If a substantial quantity of parts or material will be furnished to the contractor, or a significant amount of scrap will result from the work to be performed, or if other Government property will be furnished to or acquired by the contractor, the contract will also contain the appropriate Government property clause (see FAR 45.106(b)) and the Schedule of the contract shall provide that such property shall be governed by the terms of the clause. When minor repairs are obtained under small purchases procedures, the procedures of this paragraph will not apply. Contracting officers shall not require additional insurance under the clause unless the circumstances clearly indicate advantages to the Government.

(d) The clause at 1852.245–73, Financial Reporting of Government-Owned/Contractor-Held Property, shall be inserted in all contracts except where it is virtually certain that Government property will *not* be furnished to or acquired by the contractor (i.e., as in most study contracts and certain contracts for services), or where the only property to be provided is provided for the purpose of repair or servicing (see 1852.245–72).

Subpart 1845.3—Providing Government Property to Contractors

1845.301 Definitions.

"Space property" (see 1845.501).

1845.302 Providing facilities.

1845.302–1 Policy.

(a) The Directors of NASA field installations have been designated (see NMI 5101.24, Delegation of Authority—To Take Actions in Procurement, Grants, Cooperative Agreements, and Related Matters (Various Officials) to make determinations required by FAR 45.302–1(a)(4) on providing Government facilities.

(b) When one of the conditions listed in FAR 45.302–1(d) is met, the requirements of FAR 45.302–1(a)(4) do not apply.

1845.302–3 Other contracts.

In addition to the conditions listed in FAR 45.302–3, facilities may also be provided to a contractor under a contract other than a facilities contract when the contract is for less than 6 months or provides less than 6 items of plant equipment and no other facilities.

Subpart 1845.4—Contractor Use and Rental of Government Property

1845.403 Rental—Use and Charges clause.

The directors of NASA field installations, with input from the Chief

of Supply and Equipment Management, have been designated (see NMI 5101.24, Delegation of Authority—To Take Actions in Procurement, Grants, Cooperative Agreements, and Related Matters (Various Officials) to make the determinations required by FAR 45.403(a) on modified rental rates.

1845.405 Contracts with foreign governments or international organizations.

(a) It is NASA policy that a fair share of the cost of Government production and research property shall be recovered when such property is used in the performance of services or the manufacture of articles for foreign countries or international organizations.

(b) The prior written approval of the Assistant Administrator for Procurement is required for the use of Government production and research property on work for foreign countries or international organizations. Prior to approval the concurrence of the Chief of Supply and Equipment Management, the General Counsel, and the Director, International Affairs shall be obtained.

(c) Requests for approval shall be forwarded to the Assistant Administrator for Procurement along with a summary of the circumstances involved which includes at least the following:

(1) Names of the requesting contractors.

(2) The number of the contract under which the equipment is controlled.

(3) A description of the equipment in question.

(4) The name of the foreign contractor and its relationship to its government or to an international organization if appropriate.

(5) A description of the articles to be manufactured.

(6) A statement that such will not interfere with the current or foreseeable requirements of the United States or require use of the property beyond the anticipated date that NASA contracts will be compeleted.

(7) A statement that the foreign government's placement of the contract directly with the contractor and the use of the government production and research property is consistent with the best interests of the United States.

(8) A statement that such use is legally authorized.

(9) Evidence, if any, of endorsement by another U.S. Government agency on the basis of National Security or Foreign Policy interest of the United States.

(d) Such use, if approved, shall be subject to rent in accordance with FAR 45.403.

1845.407 Non-Government use of plant equipment.

Consistent with the guidelines in FAR 45.407, the following procedures apply to the non-Government use of plant equipment.

(a) The prior written approval of the contracting officer is required for any non-Government use of active Government-owned plant equipment. Before non-Government use exceeding 25 percent may be authorized, prior approval of the Assistant Administrator for Procurement shall be obtained. In addition, non-Government use of machine tools and secondary metalforming and cutting machines (Federal Supply Classes 3405, 3408, 3410, 3411 through 3419, and 3441 through 3449) in excess of 25 percent shall require the advance approval of the Assistant Administrator for Procurement with the concurrence of the Chief of Supply and Equipment Management. Requests requiring the approval of the Assistant Administrator for Procurement shall be submitted at least six weeks in advance of the projected use and shall include—

(1) The total number of active plant equipment items involved and total acquisition cost thereof; and

(2) An itemized listing of active equipment having an acquisition cost of $25,000 or more, showing for each such item the nomenclature, production equipment code, year of manufacture, and the acquisition cost.

(b) The percentage of Government and non-Government use shall be computed on the basis of time available for use. For this purpose,the contractor's normal work schedule, as represented by scheduled production shift hours, shall be used. All active plant equipment located at any single plant having a unit acquistition cost of less than $25,000 may be averaged over a quarterly period. Equipment having a unit acquisition cost of $25,000 or more shall be considered on an item-by-item basis.

(c) The approvals under paragraph (a) may be granted only when it is in the interest of the Government (1) to keep the equipment in a high state of operational readiness through regular usage, (2) because substantial savings to the Government would accrue through overhead cost sharing and receipt of rental, or (3) to avoid an inequity to the contractor required, at the Government's request, to retain the equipment in place, often intermingled with contractor-owned equipment required for commercial production. Approval for non-Government use shall be for a period of not more than one year. Approval for non-Government use in excess of 25 percent shall be for a period of not less than three months.

(d) Rent-free use of Government property for independent research and development generally will discouraged except in unusual circumstances where it is determined that—

(1) Such use is clearly in the best interests of the Government (for example, the project can reasonably be expected to be of value in specific Government programs; and

(2) The policy in FAR 45.201 is adhered to in that no competitive advantage will accrue to the contractor through such authorized use of Government property.

Subpart 1845.5—Management of Government Property in the Possession of Contractors

1845.501 Definitions.

"Space property" means personal property which is peculiar to aeronautical and space programs of NASA and is not otherwise included in the categories of property in FAR 45.501. It includes such items as aircraft, engines, space vehicles, and other similar components and related support equipment. The term "space property" is synonomous with the term "agency peculiar property" as defined in FAR 45.301.

"Centrally Reportable Equipment" means that plant equipment, special test equipment (including components), special tooling, and non-flight space property (including ground support equipment) which is generally (a) commercially available and used as a separate item or component of a system, (b) is valued at $1,000 or more, and (c) is identifiable by a manufacturer and model number.

1845.502 Contractor responsibility.

1845.502–1 Receipts for Government property.

Receipts for Government property shall comply with the instructions for preparation of NASA Form 1018, Report of Govenment-Owned/Contractor-Held Property (see NASA Procurement Notice 84–1 and 1853.245–1018).

1845.502–70 Conditions for the provision of Government property.

NASA policy on the provision of Government property (both Government furnished and contractor acquired) is prescribed in FAR 45.102 and 1845.102.

1845.502–71 Government-furnished property

(a) All Government-furnished property (GFP) must be described in the

contract schedule or specifications, regardless of property category. Additional GFP must be described in a bilateral modification to the contract with the property categorized and priced. Furthermore, to obtain additional Government-furnished facilities, the contractor must submit a written statement prescribed by FAR 45.302-1(a)(4). In the event a formal facilities application is also required by the contracting officer, its justification statement of financing will satisfy this requirement.

1845.502-72 Contractor-acquired property

All contractor-acquired property must be authorized by the contract and is subject to a determination by the contracting officer that it is allocable to the contract and reasonably necessary. The acquisition (and fabrication) of Government property is further subject to the following conditions, depending on category of property:

(a) *Facilities.* (1) Prior contracting officer approval, if not already described in a contract Schedule as contractor acquired.

(2) Submission of DD Form 1419, DOD Industrial Plant Requisition, and return of Certificate of Nonavailability if it qualifies as Centrally Reportable Equipment (CRE).

(3) Submission of a written statement prescribed by FAR 45.302-1(a)(4).

(b) *Special test equipment.* (1) Contracting officer approval 30 days in advance if not identified in the invitation for bids (on formally advertised procurements) or in the contract (on negotiated procurements).

(2) Submission of DD Form 1419 and return of Certificate of Nonavailability if it (or any component) qualifies as CRE.

(c) *Special tooling.* (1) If a Subcontracts clause is part of the contract, advance notification to the contracting officer and contracting officer consent as may be required by that clause.

(2) If a fixed-price contract, submission of list to the contracting officer within 60 days after delivery of the first production end items (or later as prescribed by the contracting officer) unless already identified in the solicitation.

(3) Submission of DD Form 1419 and return of Certificate of Nonavailability if it (or any component) qualifies as CRE.

(d) *Material.* If a Subcontracts clause is part of the contract, advance notification to the contracting officer and contracting officer consent as may be required by that clause.

(e) *Space Property.* (1) If a Subcontracts clause is part of the contract, advance notification to the contracting officer and contracting officer consent as may be required by that clause.

(2) Submission of DD Form 1419 and return of Certificate of Nonavailability if it (or any component) qualifies as CRE.

1845.505 Records and reports of Government property.

1845.505-6 Special reports of plant equipment.

1845.505-670 Reporting centrally reportable equipment.

(a) NASA requires that certain NASA-furnished or contractor-acquired CRE as defined in 1845.502 be reported to the Equipment Visibility System (EVS). The contractor shall report all unreported items in the contractor's possession and, subsequently, shall report equipment items of EVS (1) at the time of receipt and acceptance of accountability, (2) when major changes occur in the data initially submitted to NASA, and (3) when the equipment is no longer required for or actively being used in pursuit of NASA programs or projects. Reporting will be accomplished by completion of Section I of DD Form 1342, DOD Property Record (see 1853.245-1342), or by other means acceptable to the contracting officer provided DD Form 1342 equivalent-line-item data is furnished. The data furnished at the time the equipment is reported pursuant to subparagraph (a)(3) above will include the equipment's current condition code. Reportable data shall be forwarded through the contracting officer of the cognizant NASA installation marked for the Equipment Visibility System (EVS). Reportable data will be prepared and forwarded within 15 working days after the event which created the need for its preparation and forwarding.

(b) The forms prepared for components will be clearly marked with the word "COMPONENT." Reporting of newly listed items which are in the possession of the contractor shall be accomplished within 180 days following the date of the new handbook or the page change.

(c) Each year as of June 30 the contractor will be provided a verification listing of EVS data bank records for that contractor. The contractor shall verify the correctness of this listing or provide the necessary corrections.

1845.505-14 Reports of Government property.

(a) *Property accounts.* The contractor's property control system shall be such as to provide annually the dollar amount of Government property and material for which the contractor is accountable in the following classifications in accordance with the instructions in Subpart 1845.71:

(1) Land and rights therein.

(2) Buildings.

(3) Other structures and facilities.

(4) Leasehold improvements.

(5) Plant equipment.

(6) Special tooling.

(7) Special test equipment.

(8) Material.

(9) Space hardware.

(b) *Facilities, special tooling, and special test equipment.* The contractor's accounts covering items in paragraphs (a) (1) through (7) above will be susceptible to local reconciliation in totals and subtotals as to whether contractor-acquired or Government-furnished.

(c) *Material and Space Hardware.* The contractor's property control system shall be such as to provide the dollar value of items in subparagraphs (a) (8) and (9) above for which it is accountable. However, reporting of material is required only when the value of this account is $50,000 or more, and, reporting of space hardware is required only by specific direction of the contracting officer.

(d) *Submission of reports.* When required by the contract (see 1845.106-70(d)), the contractor will prepare, annually, a report of Government-Owned/Contractor-Held Property, NASA Form 1018, prescribed in 1853.245 in accordance with the instructions in Subpart 1845.71. Four copies of the NASA Form 1018, or a negative report when appropriate, for the period ending June 30, shall be submitted by the contractor in accordance with the clause at 1852.245-73, Financial Reporting of Government-Owned/Contractor-Held Property, not later than July 31 of each year.

1845.506 Physical inventories.

NASA contractors shall complete reconciliations of inventories described in FAR 45.508 with the official property records and shall submit reports to the property administrator within 30 days after the completion of an inventory. All instances of loss of property and discovery of unrecorded property shall be investigated by the contractor to determine (a) the cause of the discrepancy and (b) actions needed to prevent recurrence of the discrepancy.

Subpart 1845.6—Reporting, Redistribution, and Disposal of Contractor Inventory

1845.606 Inventory schedules.

1845.606-1 Submission of inventory schedules.

See 1845.506-6 for special instructions on intra-agency screening of Centrally Reportable Equipment.

1845.606 Screening of contractor inventory.

1845.606-1 General.

In addition to the screening instructions described in FAR 45.606, EVS Coordinators are the focal points of NASA installations for intra-agency screening of Centrally Reportable Equipment (see 1845.506-6). Property Disposal Officers (PDO's) are the focal points at NASA installations for intra-agency screening of all other contractor inventory. EVS Coordinators/PDO's shall acknowledge receipt of inventory schedules within 30 days of receipt and, at the same time, provide the plant clearance officer a NASA screening completion/release date. Screening shall be accomplished in accordance with NHB 4200.1 and NHB 4300.1.

1845.606-6 Waiver of screening requirements.

The Chief of Supply and Equipment Management (Code NIE) has been designated to authorize exceptions to screening requirements.

1845.610 Sale of surplus contractor inventory.

1845.610-2 Exemptions from sale by GSA.

Letters seeking exemptions from GSA-conducted sales shall be directed to the Chief of Supply and Equipment Management, Code NIE.

1845.610-4 Contractor inventory in foreign countries.

Foreign disposals shall comply with NHB 4300.1.

1845.613 Property disposal determinations.

Determinations to abandon or destroy NASA contractor inventory shall be referred to the installation PDO for subsequent review by the Property Disposal Review Board under NHB 4300.1.

1845.615 Accounting for contractor inventory.

In addition to the distribution requirements for SF 142, Inventory Disposal Report, a copy of the form shall be provided to the NASA installation Industrial Property Officer or Property Disposal Officer.

Subpart 1845.70—Equipment Visibility System

1845.7001 Policy.

Consistent with the policies in FAR Part 8, new equipment will not be designed, developed, or procured unless it is determined that the requirement cannot be satisfied with items already available. Accordingly, prior to acquisition by an installation or the issuance of an authorization to a contractor to acquire new Centrally Reportable Equipment (see 1845.501), the Equipment Visibility System (EVS) will first be screened and a certificate of non-availability issued by the cognizant installation EVS Data Center attesting to the non-availability of existing Government-owned equipment to satisfy the acquisition requirement.

1845.7002 Application.

The requirements of EVS are applicable to all NASA acquisitions under which equipment reportable to EVS is acquired either by NASA or a NASA contractor for use in the performance of NASA work.

1845.7003 General.

The EVS is a data acquisition and retrieval system designed to provide basic information for reutilization purposes about items of equipment valued at $1,000 or more held by NASA installations or NASA contractors. General purpose or standard items of commercial manufacture are registered in the EVS Central Data Bank (CDB).

1845.7004 Interface with EVS coordinators and technical project office.

NASA contracting officers with contracts subject to EVS requirements will maintain close interface with the installation EVS Coordinator and the Technical Project Office in (a) the conduct of contractor reporting to the EVS, (b) the screening of EVS records prior to authorizing contractors to acquire equipment, (c) the reporting and processing of equipment no longer required for NASA programs or projects, and (d) in all other matters pertaining to compliance with the property provisions of NASA contracts.

1845.7005 Retention of EVS equipment.

The contracting officer may authorize retention of EVS equipment provided the contractor requests such approval in writing concurrently with reporting to the EVS under the provisions of 1845.505-6 and provided the equipment is (a) being held for approved future NASA programs and projects identified to a specific requirement, or (b) being used on other Government work as approved by the contracting officer. Approval for the use of equipment on other Government work shall not exceed 6 months in duration beyond its use on NASA work unless loan of the equipment under an interagency agreement has been arranged or action has been initiated for transfer of the equipment to the using agency and appropriate time is allowed for completion of the transfer action.

Subpart 1845.71—Forms Preparation

1845.7101 Instructions for the preparation of NASA Form 1018.

This instruction provides guidance in the preparation of NASA Form 1018 which is required annually of all contractors who are furnished, or who have acquired, Government-owned property under the terms of their contract. The classification of property, the related costs to be reported, the reporting requirements and a sample format are set forth below:

1. Property Classification Accounts

The following property classifications and related costs apply only to financial reporting under this Form:

(a) *Land.* The classification "land" includes costs of land, capital improvements thereto (except buildings and other structures and facilities), and costs incidental to the acquisition and preparation of land for use such as appraisal fees, clearing costs, drainage, grading, landscaping, plats and surveys, removal and relocation of the property of others as part of purchase contract, removal or destruction of structures or facilities purchased but not used, and legal fees and expenses.

(b) *Buildings.* The classification "buildings" includes costs of buildings, improvements to buildings, and fixed equipment which is normally required for the functional use of the building and becomes permanently attached to and made a part of the building which cannot be removed without cutting into the walls, ceilings, or floors, such as plumbing, heating and lighting equipment, elevators, central air conditioning systems, and built-in safes and vaults. It also includes the cost of all equipment of any type built-in, affixed to, or installed in real property where the installation cost, including special foundations or unique utilities or services, or the facility restoration cost after removal is substantial.

(c) *Other Structures and Facilities.* The classification "other structure and facilities" includes costs of acquisitions and improvements of other structures and facilities such as airfield pavements; harbor and port facilities; power production facilities and distribution systems; reclamation and irrigation facilities; flood control and navigation aids; storage, industrial, service, and research and development facilities other than buildings; utility systems (heating, sewage, water, and electrical) when they serve several buildings and/or structures; communication systems; traffic aids; roads

and bridges; railroads; monuments and memorials; and other nonstructural improvements such as sidewalks, parking areas, and fences. It also includes the cost of all equipment of any type built-in affixed to, or installed where the installation cost including special foundations or unique utilities or services, or the facility restoration cost after removal is substantial.

(d) *Leasehold Improvements.* The classification "leasehold improvements" includes NASA-funded costs of long-term capital improvements (more then 3 years) to leases, rights, interests, and privileges relating to land such as easements, rights-of-way, permits, use agreements, water rights, air rights, and mineral rights. It also includes the NASA-funded costs of improvements (costing $1,000 or more and determined to be a capital asset) made to land, buildings and other structures and facilities occupied by a NASA contractor but leased either indirectly through contract of directly by NASA rather then owned by NASA. However, the cost of NASA-owned buildings and other structures and facilities (and improvements thereto that meet the criteria for capitalization) occupied by a NASA contractor and located on land not owned by NASA shall be included in the appropriate account(s) described in paragraphs (a), and (b), and (c). A single improvement shall not be accomplished in increments of less than $1,000 in order to avoid adjustment to the fixed asset accounts.

(e) *Plant Equipment.* The classification "plant equipment" includes costs of personal property of a capital nature consisting of furniture, equipment, machine tools, test equipment (but excluding special tooling, special test equipment and space hardware—see paragraphs (f), (g), and (i)), vehicles, and accessory and auxiliary items used or capable of use in the manufacture of supplies, in the performance of services, or for any administrative or general plant purpose which—

(1) Has a unit cost of $500 or more;

(2) Has a life expectancy of more than one year;

(3) Will not be substantially modified so as to lose its identity or will not be incorporated into other equipment; or

(4) Will not be consumed during an experiment.

(f) *Special Tooling.* The classification "special tooling" includes the cost of all jigs, dies, fixtures, molds, patterns, taps, gauges, other equipment and manufacturing aides, and replacements thereof, which are of such a specialized nature that, without substantial modification or alteration, their use is limited to the development or production of particular supplies or parts thereof, or the performance of particular services. The term includes all components of such items, but does not include—

(1) Consumable property (material);

(2) Special test equipment;

(3) Buildings and collateral structures (except foundations and similar improvements necessary for the installation of special tooling), general or special machine tools, or similar capital items; or

(4) Costs that do not materially increase the basic intrinsic value of the item.

(g) *Special Test Equipment.* The classification "special test equipment" includes costs of either single or multipurpose integrated test units engineered, designed, fabricated, or modified to accomplish special purpose testing in the performance of the contract. Such testing units comprise electrical, electronic, hydraulic, pneumatic, mechanical, or other items or assemblies of equipment that are mechanically, electrically, or electronically interconnected so as to become a new functional entity, causing the individual item or items to become interdependent and essential in the performance of special purpose testing in the development or production of particular supplies or services. The term "special test equipment" does not include—

(1) Consumable property (material);

(2) Special tooling;

(3) Buildings and collateral structures (except foundations and similar improvements necessary for the installation of special test equipment and not included elsewhere);

(4) Plant equipment items used for general plant testing purposes; or

(5) Costs that do not materially increase the basic intrinsic value of the item.

(h) *Material.* The classification "material" includes costs of property which may be incorporated into or attached to an end item to be delivered under a contract or which may be consumed or expended in the performance of a contract. It includes, but is not limited to, raw and processed material, parts, components, assemblies, and small tools and supplies which may be consumed in normal use in the performance of a contract. It is not intended that this category include material which is part of space hardware work in process reported on NASA Form 1018, Schedule II, when required by the terms of the agreement, or material which has been issued from inventory and charged to a contract item. It is intended to include all Government-owned material which normally would be considered as materials inventory for balance sheet purposes.

(i) *Space Hardware.* The classification "space hardware" applies only to those items of space property, and components thereof, specifically identified in the Annual List of Selected Items of Space Hardware (see paragraph 6). It includes the cost of personal property which is unique to aeronautical and space programs of NASA and is not otherwise included in the classification of property set forth in paragraphs (a) through (h) above. Space hardware is subdivided as follows for financial reporting purposes:

(1) Completed space hardware, systems, and subsystems (includes the cost, actual or estimated, of such items as aircraft, engines, space vehicles, satellites, spacecraft, and rockets including components provided for prototypes, mock-ups, fit checks, or for such other reasons as may be specified in the contract).

(2) Space parts and components (includes the cost, actual or estimated, of deliverable spare parts and components employed as spare parts to be used for the purpose of emergency, replacement, repair, or modification subsequent to the fabrication of space hardware.) These types of property are commonly referred to as "logistics spares" or "test support spares" and do not include components utilized by the contractor which are not deliverable as spares and which are included as work in process.

(3) Space hardware work in process (includes the actual or estimated fabrication costs as of the date of the report of undelivered space hardware and such associated systems, subsystems, spare parts, and components which are provided or acquired and charged to work in process pending incorporation into an end items.) These types of items are included in what is sometimes called production inventory and include programmed extra units to cover replacement during the fabrication process (production spares). Also included are progress payments to firm fixed-price subcontractors for undelivered items.

2. Transfers of Property

In order for NASA to properly control and account for contractor-held Government property (both Government-furnished and contractor-acquired), all transfers to another contract, contractor, NASA installation, or other Government agency shall be adequately documented. Such transfers shall only be accomplished through the NASA installation responsible for the contract from which the property is being transferred.

(a) *Transfers By Contractors.*

(1) *Approval and Notification.* Property transfers by contractors shall be made only upon the approval of the NASA contracting officer (or designee) of the contractor making shipment. The shipping document shall specify the appropriate property-classification such as plant equipment, special test equipment, special tooling, or space hardware. The cognizant property administrator or the shipping contractor shall be informed of property transfers by a copy of the shipping document. Shipping and receiving contractors shall promptly notify their respective NASA financial management office when accountability of Government property reportable on NASA Form 1018 is transferred to, or received from, other contracts, contractors, NASA installations, or other Government agencies. Copies of shipping/receiving documents will suffice in most instances.

(2) *Documentation.* The shipping contractor shall prepare an acceptable form of documentation such as DD Form 250, Material Inspection and Receiving Report, DD Form 1149, Requisition and Invoice/Shipping Document, or similar forms to cover movement of Government property to other Government agencies. Established procedures for the use of such forms shall be strictly followed. As a minimum, each shipping document must contain contract number(s), shipping reference(s), property classification(s) in which the item(s) is (are) recorded, unit price(s), and any other appropriate identifying or descriptive data. Unit prices on the shipping document shall be obtained from records maintained pursuant to the provisions of FAR Part 45 and Part 18-45.

(3) *Reporting.* In addition to the required shipping documentation, all transfers of reportable property which occur during the reporting period shall be reflected in column

(b), Government-Furnished Additions, of NASA Form 1018 by the receiving contractor and in column(e), Disposals, of NASA Form 1018 by the shipping contractor.

(4) *Reclassification.* Reclassifications between property accounts shall be accomplished by the contractor in possession of the property at the time reclassification takes place. Where property is transferred to another contract or contractor, it shall first be recorded by the receiving contractor in the same property classification and amount as reflected on the shipping document. (For example, in the event a contractor received an item by transfer from another contractor or NASA installation which is identified on the shipping document as plant equipment but which the recipient intends to incorporate into special test equipment, the recipient shall first enter the transferred item in the plant equipment account and subsequently reclassify it as special test equipment.) The reclassification of Plant Equipment, Special Tooling, Special Test Equipment, and/or Space Hardware shall not be made without prior notification to the property administrator and approval of the contracting officer.

(5) *Incomplete Documentation.* Where transfer documents are received by contractors without sufficient detail to properly record the transfer (e.g., omission of property classification, unit prices, etc.), the missing data shall be requested directly from the shipper or through the property administrator as provided in FAR 45.505–2. Contractors may append a Government-furnished property list to the NASA Form 1018 report when they are unable to obtain the required data, provided that the list includes the following information:

(i) Description of the property.

(ii) Quantity.

(iii) Shipping document reference.

(iv) Identity of shipper.

(v) Dates shipped and/or received.

(vi) Date(s) price data were requested and from whom requested (shipper or property administrator).

(vii) NASA Form 1018 line item (type/account) to be adjusted.

(b) *Other Transfers.*

(1) *Intra-Contractor Transfers.* Any transfer of Government property between contracts of a single contractor, whether administered by the same NASA installation or by a different NASA installation, requires the same approval, notification, and documentation as set forth in paragraph (a) above.

(2) *Transfer to Government Agencies Other Than NASA.* Transfers of Government property to such other Government agencies can only be accomplished through the NASA contracting officer and requires the same approval, notification, and documentation as set forth in paragraph (a) above.

(3) *Recovered Space Hardware.* Space hardware recovered after flight and transferred to a contractor for analysis, repair, refurbishment, or for other purposes shall not be reported on subsequent NASA Form 1018 as Space Hardware unless accountability has been transferred and the contractor is specifically directed to report the item.

3. Submission of Reports

(a) When the clause entitled "Financial Reporting of Government-Owned/Contractor-Held Property" is included in the contract, the contractor shall prepare a Report of Government-Owned/Contractor-Held Property, NASA Form 1018, in accordance with the instructions set forth herein and on the NASA Form 1018.

(b) Four copies of NASA Form 1018 for the period ending June 30 shall be submitted by the contractor in accordance with the clause entitled "Financial Reporting of Government-Owned/Contractor-Held Property" not later than July 31 of each year.

(c) Negative reports shall be submitted when appropriate.

(d) A final report shall be submitted within 30 days after disposition of all property subject to reporting under the contract and shall not be withheld until the next regular report due date.

4. Report Coverage

(a) The NASA Form 1018 shall include the cost of all Government-owned property, except as noted in Section 5 below, in the possession of the contractor and first-tier subcontractors under each prime contract using the prime contractor's records to the extent practicable where the subcontractor reporting is delayed.

(b) Government-owned material held in storage for issue by the contractor and subcontractor shall be reported only when the balance on hand at the end of the reporting period amounts to $50,000 or more for each prime contract, including subcontracts.

(c) Where materials are accountable under more than one contract with a single NASA installation, the contractor may request the contracting officer to authorize one report covering materials for all such contracts. This exception does not eliminate the requirement to maintain separate records of materials for each contract.

(d) Space hardware shall be reported only if specifically requested in writing by the contracting officer, and reporting shall be limited to those items identified on the Annual List of Selected Items of Space Hardware (see Section 6).

5. Exclusions

The following items shall not be reported on NASA Form 1018:

(a) Plant equipment having a unit cost of less than $500.

(b) Industrial facilities in process of construction or material held for use in construction of industrial facilities.

(c) Scrap or salvage.

(d) Items ordinarily reportable but furnished to the contractor for repair and return to NASA (except as required in subparagraph 2(b)(3)).

(e) Work in process except as required in Schedule II, Space Hardware Reportable Items, of NASA Form 1018.

(f) Materials issued for consumption.

(g) Materials held in storage for issue where the cost at the close of the reporting period is less than $50,000.

(h) NASA shipping containers.

(i) Space hardware on firm fixed-price contracts and subcontracts, except where progress payments are specified (see subparagraph 1(i)(3)).

(j) Space property, except those items specifically identified as space hardware and required to be reported in accordance with Section 6.

(k) Installation property made available pursuant to the clause at 18–52.245–21.

6. Space Hardware Reporting Requirements

(a) Space hardware reporting shall be required on cost and incentive type contracts and first-tier subcontracts on a selective basis where the estimated cost and fee of the total contract exceeds $100,000 and any one or combination of the individual reporting categories (i.e., completed space hardware, components and spare parts, and work in process) exceeds $50,000.

(b) Space hardware items to be reported or deleted shall be specified by the contracting officer prior to June 1 of each year based on the Annual List of Selected Items of Space Hardware issued by the Director of Financial Management, NASA Headquarters.

(c) Reporting shall become effective with the next report period beginning July 1, and will continue annually thereafter until all specified items of space hardware are delivered under the terms of the contract, the contract is terminated, or the item is removed from the Annual List of Selected Items of Space Hardware.

(d) The reports shall contain—

(1) The reportable items on hand, consisting of the cost and quantity of completed space hardware and the cost of related independent completed systems and subsystems;

(2) The total amount for completed spare parts and components relating to item (1), above; and

(3) The total amount for work in process of fabrication relating to one or both of the preceding items.

(e) Costs reported on Schedule II will not be a consideration in reimbursement to the contractor for work performed or for termination proceedings. Costs will be computed in accordance with accepted accounting principle, will be reasonably accurate, and will be the product of any one, or a combination of, the following:

(1) Abstract of cost data from the contractor's property or financial records.

(2) Computations based on engineering and financial data.

(3) Estimates based on NASA Form 533 reports.

(4) Formula procedures (e.g., using a 50 percent factor for work in process items based on updated SF 1411 estimates or the contractor's approved estimating and pricing system).

(5) Other approved methods.

(f) When the same item is being fabricated for more than one project, the completed space hardware, related independent systems and subsystems, spare parts, and work in process shall be reported by contract item.

(g) When a contract provides for two or more different completed space hardware items, some of which are not included in the Annual List of Selected Items of Space Hardware, cost of those items to be reported

shall be determined on an actual basis where possible or on a basis considered reasonable within the contractor's records or as provided in paragraph (e) above.

(h) The cost of items of space hardware, systems, and subsystems shall be reported using the contractor's records which are a part of the prescribed property or financial control system as provided in Section 3; however, fee, tooling, and other nonrecurring costs shall be excluded. Fabrication costs shall be based on the contractor's approved estimating and pricing system or property control system and should include—

(1) Direct labor;

(2) Direct materials and purchased parts (costs of purchased items shall be consistent with the contractor's approved pricing methods);

(3) Other direct costs (e.g., computer costs, travel, and transportation);

(4) Overhead—a percentage factor or rate applied to the direct costs or other applicable base; and

(5) Costs of Government-furnished property applied (data available from the shipping document—e.g., DD Form 250, 1149, or similar form—or estimated where necessary).

7. Completed Space Hardware

(a) Completed space hardware shall include completed configurations of spacecraft, satellites, rockets, etc. (including integrated systems and subsystems) and completed, but not yet integrated, systems and subsystems which are held by the prime contractor and first tier subcontractors.

(b) Deliverable completed items of space hardware covered in paragraph (a) above shall not be broken down into systems and subsystems for the purpose of reporting.

(c) The cost of items returned for modifications or rehabilitation shall be redetermined by the contractor to include the appropriate amount of original costs plus any improvement thereto. Costs to modify single shelf items to perform specific tests shall not be included. Space hardware shall be dropped from reporting by the contractor when launched, delivered to another contractor or to the Government, or disposed of as authorized by the contracting officer.

8. Completed Spare Parts and Components for Space Hardware

(a) The reporting of completed spare parts and component items for space hardware shall include, as a single amount for each contract item (as provided in paragraph 6(d)), the aggregate cost of those spares and components (see subparagraph 1(i)(2)) related to the selected list of completed items.

(b) Standard items available from commercial or other sources and held on an inventory basis until requisitioned for use are excluded here but shall be included in "Material" on NASA Form 1018. Items of spares or components reported in Schedule II, Space Hardware Reportable Items, of NASA Form 1018 shall not be included in "Material" on page 1, NASA Form 1018.

9. Space Hardware Work in Process

(a) Space hardware work in process shall consist of the total costs by contract item as provided in paragraph 6(d). The costs as of the date of the report of those unfinished space hardware units pertaining to the selected list of completed items to be reported shall be computed as provided in paragraph 6(e). This shall include the costs of such associated systems, subsystems, and spare parts and components which are provided or acquired and charged to work in process pending incorporation into a finished item. These types of items comprise what is sometimes called production inventory and includes programmed extra units to cover replacement during the fabrication process (production spares). Also included are end items on which work has begun, either by the prime contractor or a subcontractor.

(b) Space hardware spare parts and components returned for repair or modification normally shall not be included in the in-process inventory (or spare parts and components inventory) unless accountability has been transferred to the contractor. Units or lots which are not complete for any reason, such as obsolescence, faulty fabrication, or by direction of the contracting officer shall not be reported in NASA Form 1018, Schedule II.

(c) "Work in Process" historical costs on NASA Form 533, Contractor Financial Management Reports may be used (see paragraph 6(e)) if such costs apply to the selected items to be reported and are consistent with the costing of completed items. When costs are taken from the NASA Form 533, the cost of applicable Government-furnished property shall be added (where applicable) or listed as provided in subparagraph 2(a)(5). These costs shall then be adjusted for completed items and spare parts, etc., inventoried elsewhere or shipped to and accepted by a third party.

10. Contractor's Privileged Financial and Business Information

Where a transfer of property between contractors involves costs of a proprietary nature, applicable unit prices shall be furnished only on the copy of the shipping documents sent to the shipping and receiving NASA installations. The property shall be transferred to the receiving contractor on a no-cost basis.

1845.7102 Instructions for the preparation of DD Form 1342.

This instruction is to be used in the preparation of DD Form 1342, DOD Property Record, to report newly acquired equipment, items not previously reported, when major changes occur in the data initially submitted, or equipment which is no longer required for or actively being used in the pursuit of NASA programs or projects. Only one initial report is required. In-use items will be reported initially to the Equipment Visibility System (EVS) through the contracting officer (see 1845.505–6) by use of this form by marking "active" and "initial" in Block 1. Idle items being initially reported are to be identified by marking "idle" and "initial" in Block 1.

Block 1. Check appropriate boxes to indicate "Active" or "Idle" report and that the report is an "Initial" or "Changed" report.

Block 2. Enter the Julian date of preparation of the form. The first character will be the last digit of the current calendar year, and the next three characters will be the Julian date of the year.

Block 3. Enter the Identification Number/ Government Tag Number as recorded on the identification plate affixed to the equipment.

Section I—Inventory Record

Block 4. Not applicable.

Block 5. Enter the first four digits of the National Stock Number, if known.

Block 6. Indicate in dollars (omit any symbols, decimal points, commas, etc.) the acquisition cost used for property accounting purposes. The acquisition cost will be the price of the basic item plus accessories and auxiliary equipment procured and delivered with the basic unit. If the initial acquisition cost data are not available, an appraised acquisition cost (based on known costs at the time of manufacture of the some or similar equipment), price lists for the period involved, or the best available price from other sources in NASA or DOD should be used, which will achieve conformity of prices for like items of equipment.

Block 7. Not applicable.

Block 8. Enter the last two digits of the year the item was manufactured. If the actual year of manufacture cannot be determined, estimate the date, and place an "E" immediately preceding the entry.

Block 9. Not applicable.

Block 10. Not applicable.

Block 11. Not applicable.

Block 12. Not applicable.

Block 13. Not applicable.

Block 14. Enter the name of the manufacturer of the equipment being reported. Do not use a distributor's or vendor's name.

a. Enter the name of the manufacturer under which the item is listed in the Directory of Metalworking Machinery, Directory of Welding, Heat Cutting, and Metalizing Equipment or appropriate handbook. In some cases, manufacturers have merged or become subsidiaries of another company; therefore, in reporting the manufacturer's name, use the appropriate manufacturing division of subsidiary name and not the parent company.

b. Enter the work "Unknown" when the name of the manufacturer is not known.

Block 15. This is a five digit numerical code identifying the manufacturer. The manufacturer's code will be obtained from Cataloging Handbook H4–1.

Block 16.

a. Enter the manufacturer's model, style, or catalog number for the equipment being reported. Always use the model number, if available. Style number would be next in preference. When the manufacturer does not assign a model, style, or catalog number, the word "None" will be inserted.

b. When unable to locate a model number, refer to manufacturer's brochure or purchase order. If the model number is obtained from other than the equipment, indicate the source in "Remarks," Block 54.

Block 17. Enter the serial number taken from the equipment. If a serial number is not assigned to the item, enter "NONE."

Blocks 18 through 24. Not applicable.

Block 25. Enter the complete contract number which the contractor is accountable for the item. This normally will be a facility contract number. Otherwise, procurement contract number will be entered.

Block 26. Enter the complete description of the item.

Block 27. Not applicable.

Block 28. Enter the NASA installation or company name, street address, city, state, and zip code of the actual location of the equipment. If the actual location is a subcontractor's plant, enter the name of the prime contractor above the subcontractor's name. Do not use the office address if different from the plant address. If no street address exists, insert "No Street Address."

Block 28a. Not applicable.

Block 29. Not applicable.

Section II—Inspection Record

Not applicable, except for Block 52, which should be completed when reporting (in accordance with 1845.505–6) that an item is no longer required for or actively being used in pursuit of NASA programs or projects.

Section III—Remarks

Not applicable.

Section IV—Disposition Record

Not applicable.

Section V—Validation Record

Not applicable.

1845.7103 Instructions for the preparation of DD Form 1419.

(a) The essential information covering Sections I and II is required to be completed prior to submission of DD Form 1419, DOD Industrial Plant Equipment Requisition, to the EVS coordinator who will review each submission for completeness and authenticity. Incomplete or invalid requests will be returned for correction. The original and two copies of the approved DD Form 1419 may be forwarded to DIPEC for screening of inventories. Upon completion of the screening process, DIPEC will annotate the results of the screening in section IV or V. Certification of nonavailability when cited in Section V is evidence that screening has been accomplished by NASA/DIPEC. The original and one copy of the request will be returned by DIPEC to the EVS coordinator of the cognizant NASA installation indicated in Section III.

(b) When a suitable item is allocated in Section IV, inspection of the equipment is recommended. Notification of acceptance or rejection of the item offered must reach NASA/DIPEC within 30 days after allocation. A copy of the DD Form 1419 will serve as the clearance document to inspect the equipment at the storage site. Acceptance or rejection of item, without inspection or after inspection, is to be noted in Section VI. If it is determined that the item is acceptable, Section VII is to be executed. The NASA appropriation symbol must be cited where applicable in Section VII. In either instance, acceptance or rejection, the original of the DD Form 1419 is to be returned to DIPEC by the EVS coordinator when items have been offered by DIPEC.

Requisition Number. The EVS coordinator will assign a requisition number to each DD Form 1419 request. When DIPEC is to be screened, each number assigned will be coded for automatic data processing by DIPEC. It will also identify the requiring installation and provide a serial number and date of submission for subsequent reference. The requisition number will begin with the appropriate FEDSTRIP/MILSTRIP Activity Address Code set forth below:

Ames Research Center	809101
Goddard Space Flight Center	803201
Johnson Space Center	807402
Kennedy Space Center	804200
Langley Research Center	803301
Lewis Research Center	805501
Marshall Space Flight Center	804101
NASA Headquarters	803302
NASA Resident Procurement Office-JPL	809143
National Space Technology Laboratories	804412

Next will be a four digit entry comprised of the last digit of the current calendar year and the Julian date of the year, i.e. 9035 for February 4, 1969. The last entry will be a four digit number from 0001 to 9999 to sequentially number requisition forms prepared on the same date. For example: the ninth requisition prepared on February 1, 1969 would be 9032–0009 preceded by the FEDSTRIP/MILSTRIP Activity Address Code, an example being Langley—"803301 3032–0009." When submitting subsequent DD Forms 1419 related to the item requested, the same requisition number is to be used and alpha code added to the end of the requisition number to indicate a second or third action on the basic request. Alpha "A" would indicate a second request, "B" a third, etc. In this manner, all actions, correspondence, etc., relative to a given request can be identified at all levels of processing by the use of the requisition number.

Section I

Item Description. It is necessary to provide a complete description of the item desired, to obtain maximum screening results. Requests for single purpose or general purpose equipment with special features must contain detailed descriptive data as to the size and capacities, setting forth special operating features or particular operations required to be performed by the item.

Block 1. Not applicable.

Block 2. Enter the manufacturer's name and Federal supply code for manufacturer (Cataloging Handbook H4–1) of the item requested.

Block 2a. Enter the manufacturer's model, style, or catalog number assigned to the equipment being requisitioned. Always use the model number if available. The style number is the next preference. Insert "NONE" in this block if the model, type, or catalog number is not known.

Block 3. Enter the 4 digit Federal Supply Class (FSC).

Block 4. Not applicable.

Block 5. Self-explanatory.

Block 6. Place and "X" in the applicable block to indicate whether physical inspection prior to acceptance is or is not desired.

Block 7. Self-explanatory.

Block 8. Enter the complete description of the item. Continue the item description in Block 51 if additional space is required to describe the item desired.

Section II

Block 9. Enter the contractor's name, street address, city, state, and zip code from which the requisition is being initiated. The address should be the one to which inquiries of a technical nature are to be referred. Include the name and telephone number of the individual to be contacted concerning the item requested.

Blocks 10 and 10a. Enter the contract number or document number and the date of the document which authorizes the acquisition of the items shown in Section I. Normally this will be a facility contract number, otherwise it should be a purchase order number or purchase request number.

Block 11. Not applicable.

Block 12. Disregard the "Military" block. Show NASA contract number and program for which item is to be used.

Block 13. Enter the specific function to be performed by the equipment. When applicable, enter the tolerances, capacities, specifications, etc., which equipment must satisfy.

Block 14. Enter the date the item must be installed in place to meet production requirements. From this date, deduct the estimated number of days required for installation. Enter the adjusted date in this block.

Block 15. Enter the date by which NASA must issue a Certificate of Nonavailability. The date will be developed by subtracting the procurement leadtime and 30 days administrative leadtime from the date shown in Block 14.

Block 16. Enter the Defense Material System Priority Rating that is assigned to the contract or anticipated purchase order, if applicable.

Block 17. Place an "X" in the appropriate box. If for replacement, identify the item to be replaced and the reason for replacement.

Block 18. Enter an "X" in the appropriate box. Show the appropriation symbol if answer is "yes."

Block 19. Not applicable.

Blocks 20 and 21. In addition to the offical's title and signature, enter the signing official's typed name, office symbol or name, and telephone number and extension. The signing official should be the company representative who prepares and submits the requirement to the cognizant NASA certifying office.

Block 22. Self-explanatory.

Block 23. Certification of need for the item requisitioned is the function of the contracting officer of the NASA installation

having jurisdiction over the contract. For NASA in-house requirements, certification can be made by the EVS coordinator.

Block 23a. Not applicable.

Block 23b. Name and address of the installation certifying the requirement.

Block 23c. Signature of the property administrator or contracting officer at plant level.

Block 23d. Self-explanatory.

Block 23e. Signature of NASA installation official certifying the requirement.

Block 23f. Self-explanatory.

Section III.

This section is for the EVS coordinator's certification of the requirement to DIPEC, when applicable.

Block 24. Self-explanatory.

Block 25. Self-explanatory.

Block 26. Self-explanatory.

Block 27. Self-explanatory.

Section IV.

To be completed by DIPEC (copy is used for admittance to storage site for inspection of property offered).

Section V.

To be completed by DIPEC or EVS Coordinator if equipment is not available.

Section VI.

Blocks 42, 43, 44, and 45. To be completed by the requesting official signing the requisition in Section II. (See Block 20.) Reasons for non-acceptance are to be shown in Section VIII, Remarks, or by separate document attached to the DD Form 1419.

Section VII.

Block 46. Enter complete name, street address, city, state, and zip code of the contractor or installation to which the item is to be shipped. Indicate rail head and truck delivery points when other than the address named.

Block 47. Self-explanatory.

Block 48.

Blocks 49a and b. Insure that NASA appropriation symbols are included with work order number.

Block 49c. Enter NASA appropriation symbol chargeable for any special work ordered, i.e., rebuild, repair, accessory replacement.

Block 49b. Enter NASA installation and office symbol which will make payment for transportation and packing, crating, and handling of item requisitioned.

Block 50. Self-explanatory.

Block 51. This block can be used to expand or explain entries made in Blocks 1 through 50. When requisitioning equipment from excess listings, identify issuing office, list number, date, control number, and item number assigned to equipment.

1846.672–5 Packing list instructions.
1846.672–6 Receiving instructions.
1846.673 Distribution of DD Form 250 and DD Form 250c.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1846.6—Material Inspection and Receiving Reports

1846.670 Introduction.

1846.670–1 General.

(a) This Subpart 1846.6 contains procedures and instructions for the use, preparation, and distribution of the Material Inspection and Receiving Report (MIRR) (DD Form 250 series) and suppliers' commercial shipping/packing lists used to evidence Government Procurement Quality Assurance (PQA).

(b) MIRR's are used to document PQA, acceptance of supplies and services, and shipments; they are used by receiving, status control, technical, contracting, inventory control, requisitioning, and paying activities. MIRR's are not required to be used for—

(1) Shipments by subcontractors where direct shipment is not made to the Government;

(2) Shipment of contractor inventory (see FAR 45.601); or

(3) Movement of Government property unless for original acquisition.

(c) To preclude delays in shipments or payments and avoid multiple corrections, contractors are encouraged to consult with the cognizant Government representative regarding implementation of this Subpart.

1846.670–2 Applicability

(a) The provisions of this Subpart are applicable to all deliveries of supplies or services procured by or for NASA. Exceptions are as follows:

(1) Procurements effected under FAR Part 13.

(2) Negotiated subsistence procurements.

(3) Subcontracts where direct shipment is not made to the Government.

(4) Contracts for which the end item is a technical or scientific report.

(b) When NASA provides PQA and/or Acceptance services for non-NASA activities, the MIRR shall be prepared in accordance with the instructions of this Subpart unless otherwise specified in the contract.

1846.670–3 Use.

(a) The DD Form 250 is a multi-purpose report used for—

(1) PQA—to provide evidence of PQA at origin or destination;

(2) Acceptance—to provide evidence of acceptance at origin or destination;

(3) Packing list;

(4) Receiving;

(5) Shipping;

(6) Contractor invoice;

(7) Contractor invoice support; and

(8) Contractor internal use.

1846.670–4 Application.

(a) The DD Form 250 shall be used for delivery of contract line, subline, exhibit line, or exhibit subline items.

(b) If the "Shipped To," "Marked For," "Shipped From," "PQA," and "Acceptance" data are the same for more than one shipment made on the same day under the same contract one MIRR shall be prepared to cover all such shipments, except that, if the volume of the shipments precludes the use of a single car, truck, or other vehicle, either a copy of the single MIRR or a separate MIRR shall be provided for each vehicle.

(c) The DD Form 250 may be, but is not required to be, used under imprest fund purchases, purchase orders, delivery orders placed against Federal Supply Schedule contracts, delivery orders placed against an indefinite-delivery type contract, delivery orders placed against a blanket purchase agreement, or whenever the purchasing, requisitioning, or ordering document adequately provides for inspection and/or acceptance.

1846.670–5 Forms.

(a) Contractors may obtain from the contracting office upon request and at no cost MIRR forms required for use in connection with Government contracts.

(b) Contractors may print forms provided that the format and dimensions (DD Forms 250 and 250c—8 1/2 in. x 11 in.) are identical to the MIRR forms printed by the Government and that the forms are cast to provide for 78 characters per printed image horizontally and 62 lines vertically border to border for the DD Form 250 and 61 lines vertically border to border for the DD Form 250c.

1846.671 Procurement quality assurance on shipments between contractors.

(a) The suppliers' commercial shipping document/packing list shall indicate performance of required PQA actions at subcontract level. The following entries shall be made on the supplier's

commercial shipping document/packing list:

Required PQA of listed items has been performed.

Date: (Signature of Authorized Government Representative) (Typed Name and Office)

(b) Distribution for Government purposes shall be one copy—

(1) With shipment;

(2) For the Government representative at consignee (via mail); and

(3) For the Government representative at consignor.

1846.672 Preparation of the DD Form 250 and DD Form 250c.

1846.672-1 Preparation instructions.

DD Form 250, Material Inspection and Receiving Report (MIRR), and DD Form 250c, Material Inspection and Receiving Report—Continuation Sheet, shall be prepared as follows:

(a) *General.*

(1) The date, where required, shall utilize seven spaces consisting of the last two digits of the year, three alphabetic month abbreviation, and two digits for the day. For example, 07AUG07, 07SEP24.

(2) The address, where required, shall consist of the name, street address/P.O. Box, city, state, and ZIP code.

(3) When the DD Form 250c is used, the data entered in the blocks at the top of the form shall be identical to the comparable entries as shown in Blocks 1, 2, 3, and 6 of the DD Form 250.

(4) Overflow data of the DD Form 250 shall be entered in Block 16 or in the body of the DD Form 250c with appropriate block cross reference. Additional DD Form 250c sheets, solely for continuation of Block 23 data, shall not be numbered or distributed as part of the MIRR.

(b) *Classified information.* Classified information shall not be included in or appear on the MIRR, nor shall the MIRR be classified.

(c) *Block 1*—CONTRACT NUMBER.

(1) Enter the contract number as contained in the contractual document, including the applicable call/order number, if any.

(2) Enter the name of the contracting office immediately below the contract number. This requirement may be satisfied by inclusion of the approved prefix used in the contract number to identify the contracting office.

(d) *Block 2*—SHIPMENT NO.

(1) The shipment number is composed of a three-alpha character prefix and a four-character numeric or alpha-numeric serial number.

(i) The shipment number prefix shall be controlled and assigned by the prime contractor and shall consist of three alphabetic characters for each "Shipped From" address (Block 11).

(ii) The first shipment under a prime contract from each "Shipped From" address shall be numbered 0001; all subsequent shipments under that prime contract shall be consecutively numbered.

(A) Alpha-numeric numbers shall be used when more than 9,999 numbers are required. Alpha-numeric numbers shall be serially assigned with the alpha in the first position followed by the three-position numeric serial number. The following alpha-numeric sequence shall be (the letters I and O shall not be used)—

(*1*) A001 through A999 (10,001 through 10,999);

(*2*) B001 through B999 (11,001 through 11,999); to

(*3*) Z001 through Z999 (34,001 through 34,999).

(B) When this series is completely used, numbering shall revert to 0001.

(2) The shipment number of the initial shipment shall be reassigned where a "Replacement Shipment" is involved (see Block 16(b)(4)).

(3) The prime contractor shall control deliveries and on the last shipment of the contract shall suffix the shipment number with a "Z" in addition to that required for line items (see Block 17). Where the contract final shipment is from other than the prime contractor's plant, the prime contractor may elect to direct the subcontractor to suffix the "Z" or, on receipt of the subcontractor final shipment information, to correct the DD Form 250 (see FAR Subpart 12.1) covering the last shipment from the prime contractor's plant by addition of a "Z" to that shipment number.

(e) *Block 3*—DATE SHIPPED. Enter the date the shipment is released to the carrier or the date of completion of services. If the shipment will be released after the date of PQA and/or Acceptance, enter the estimated date of release. When the date is estimated, enter an "E" after the date. Distribution of the MIRR shall not be delayed for entry of the actual shipping date. Reissuance of the MIRR is not required to show the actual shipping date.

(f) *Block 4*—B/L TCN. When applicable, enter—

(1) The commercial or Government bill of lading number after "B/L"; and

(2) The Transportation Control Number after "TCN."

(g) *Block 5*—DISCOUNT TERMS. The discount, in terms of percentages and corresponding days allowed, shall be entered as described below:

(1) The contractor may, at its option, enter the discount terms on all copies of the MIRR.

(2) When the MIRR is used as an invoice, see 18-46.672-4.

(h) *Block 6*—INVOICE NO./DATE. Enter the invoice number and date as described below:

(1) The contractor may, at its option, enter the invoice number and date on all copies of the MIRR.

(2) When the MIRR is used as an invoice, see 18-46.672-4.

(i) *Block 7*—PAGE/OF. Consecutively number the pages comprising the MIRR. On each page, enter the total number of pages of the MIRR.

(j) *Block 8*—ACCEPTANCE POINT. Enter an "S" for Origin or "D" for Destination as specified in the contract as the point of acceptance. Enter an alphabetic "O" for Other if the point of acceptance is not specified in the contract.

(k) *Block 9*—PRIME CONTRACTOR. Enter the address.

(l) *Block 10*—ADMINISTERED BY. Enter the address of the contracting office cited in the contract.

(m) *Block 11*—SHIPPED FROM/CODE/FOB.

(1) Enter the code and address of the "Shipped From" location. If identical to Block 9, enter "See Block 9."

(2) For performance of services line items which do not require delivery of items upon completion of services, enter the code and address of the location at which the services were performed. If the DD Form 250 covers performance at multiple locations or if identical to Block 9, enter "See Block 9."

(3) Enter on the same line and to the right of "FOB" and "S" for Origin or "D" for Destination as specified in the contract. Enter an alphabetic "O" if the FOB point cited in the contract is other than origin or destination.

(n) *Block 12*—PAYMENT WILL BE MADE BY. Enter the address of the payment office cited in the contract.

(o) *Block 13*—SHIPPED TO. Enter the address of the consignee as contained in the contract or shipping instructions.

(p) *Block 14*—MARKED FOR. Enter the "Marked For" address and/or other designation as contained in the contract or shipping instructions.

(q) *Block 15*—ITEM NO. Enter the contract line item, subline line, exhibit line, or exhibit subline identification as set forth in the contract. If four or less digits are used, they will be positioned to the left of the vertical dashed line. Where a six-digit identification is used, enter the last two digits to the right of the vertical dashed line.

(r) *Block 16*—STOCK/PART NO./DESCRIPTION.

(1) Enter, as applicable, for each line item, using single spacing between each line item, the following:

(i) The Federal Stock Number (FSN) or noncatalog number and, if applicable, prefix or suffix. When a number is not provided or it is necessary to supplement the number, include other identification, e.g., manufacturer's name or Federal Supply Code, as published in Cataloging Handbook H4-1, and part numbers. Additional part numbers may be shown in parentheses. Also enter the descriptive noun of the item nomenclature and, if provided, the Government-assigned management/material control code. In the case of equal kind supply items, the first entry shall be the description without regard to kind, i.e., "Resistor" or "Vacuum Tube". Below this description, enter the contract line item number in Block 15 and Stock/Part number followed by the size or type in Block 16.

(ii) On the next printing line if required by the contract for control purposes, enter the make, model, serial number, lot, batch, hazard indicator, and/or similar description.

(iii) On the next printing line, enter the FEDSTRIP requisition number(s) when provided in the contract or shipping instructions.

(2) In addition to entries required above, enter on the next line the following as appropriate (where applicable to all line item numbers identified in the MIRR, enter such

data only once after the last line entry. Entries may be extended through Block 20):

(i) Enter in capital letters any special handling instruction/limits for material environmental control, i.e., temperature, humidity, aging, freezing, and shock.

(ii) When an FSN is required by, but not cited in, a contract and has not been furnished by the Government, shipment may be made without such FSN at the direction of the contracting officer. Enter the authority for such shipment.

(iii) When Government-furnished property (GFP) is included with or incorporated into the line item, enter the letters "GFP."

(iv) When shipment consists of replacements for supplies previously furnished, enter in capital letters "REPLACEMENT SHIPMENT." (See subparagraph (s)(3) below for replacement indicators.)

(v) For items shipped with missing components, enter and complete the following: "Item(s) shipped short of the following component(s): FSN or comparable identification ———, Quantity ———, Estimated Value ———, Authority ———."

(vi) When shipment is made of components which were short on a prior shipment, enter and complete the following: "These components were listed as shortages on Shipment Number ———, date shipped ———."

(vii) When shipments involve drums, cylinders, reels, containers, skids, and so forth designated as returnable under contract provisions, enter and complete the following: "Return to ———, Quantity ———, Item ———, Ownership *(Government/contractor)*."

(viii) Enter shipping container number(s), the type, and the total number of the shipping container(s) included in the shipment.

(ix) The MIRR shall be used to record and report the waivers and deviation from contract specifications, including the source and authority for the waiver or deviation; for example, the contracting office authorizing the waiver or deviation and the identification of the authorizing document.

(x) For shipments involving discount terms, enter "DISCOUNT EXPEDITE" in at least one-inch outline-type style letters.

(xi) When test/evaluation results are a condition of acceptance and are not available prior to shipment, the following note shall be entered if the shipment is approved by the contracting officer: "Note: Acceptance and payment are contingent upon receipt of approved test/evaluation results." The contracting officer shall advise (A) the consignee of the results (approval/disapproval) and (B) the contractor to withhold invoicing pending attachment to its invoice of the approved test/evaluation results.

(xii) The copy of the DD Form 250 required to support payment for destination acceptance (top copy of the four with shipment) or ARP origin acceptance (additional copy furnished to the QAR) shall be identified entering "PAYMENT COPY" in approximately one-half inch outline-type style letters with "FORWARD TO BLOCK 12 ADDRESS" in approximately one-quarter inch letters immediately below. Do not obliterate any other entries.

(xiii) A double line shall be drawn completely across the form following the last entry.

(s) *Block 17*—QUANTITY SHIPPED/RECEIVED.

(1) Enter the quantity shipped, using the unit of measure indicated in the contract for payment. When a second unit of measure is used for purposes other than payment, enter the appropriate quantity directly below in parentheses.

(2) Enter a "Z" below the first digit of the quantity when—

(i) The total quantity of the line item is delivered, including variations within contract terms; and

(ii) All shortages on items previously shipped short are delivered.

(3) If a replacement shipment is involved, enter below the first digit of the quantity the letter "A" to designate first replacement, "B" for second replacement, and so forth. The final shipment indicator "Z" shall not be used when a final line item shipment is replaced.

(t) *Block 18*—UNIT. Enter the abbreviation of the unit of measure as indicated in the contract for payment. Where a second unit of measure is indicated in the contract for purposes other than payment or used for shipping purposes, enter the second unit of measure directly below in parentheses. Authorized abbreviations are listed in MIL-STD-129, Marketing and Storage.

(u) *Block 19*—UNIT PRICE. Enter the unit price on all MIRR copies whenever the MIRR is used for voucher or receiving purposes.

(v) *Block 20*—AMOUNT. Enter the extended amount when the unit price is entered in Block 19.

(w) *Block 21*—PROCUREMENT QUALITY ASSURANCE. The words "conform to contract" contained in the printed statements in Blocks A and B relate to contract obligations pertaining to quality and to the quantity of the items on the report. The statements shall not be modified. Notes taking exception shall be entered in Block 16 or on attached supporting documents with appropriate block cross reference.

(1) "A ORIGIN."

(i) The authorized Government representative shall—

(A) Place an "X" when applicable in the appropriate PQA and/or Acceptance box(es) to evidence origin PQA and/or Acceptance. When the contract requires PQA at destination in addition to origin PQA, an asterisk will be entered at the end of the statement and an explanatory note entered in Block 16;

(B) Enter the date of signature;

(C) Sign; and

(D) Enter the typed, stamped, or printed name of the signer and office code.

(2) "B. DESTINATION."

(i) When acceptance at origin is indicated in Block 21A, no entries shall be made in Block 21B.

(ii) When PQA and Acceptance or Acceptance is at destination the authorized Government representative shall—

(A) Place an "X" in the appropriate box(es);

(B) Enter the date of signature;

(C) Sign; and

(D) Enter typed, stamped, or printed name and title.

(x) *Block 22*—RECEIVER'S USE. This block shall be used by the receiving activity (Government or contractor) to denote receipt, quantity, and condition. The receiving activity shall enter in this block the date the supplies arrived. For example, when off-loading or in-checking occurs subsequent to the day of arrival of the carrier at the installation, the date of the carrier's arrival is the date received for purposes of this block.

(y) *Block 23*—CONTRACTOR USE ONLY This block is provided and reserved for contractor use.

1846.672-2 Consolidated shipments.

When individual shipments are held at the contactor's plant for authorized transportation consolidation to a single destination on a single bill of lading, the applicable DD Forms 250 may be prepared at the time of PQA or Acceptance prior to the time of actual shipment (see Block 3).

1846.672-3 Correction instructions.

When, because of errors or omissions, it is necessary to correct the MIRR after distribution has been made, it shall be revised by correcting the original master and distributing the corrected form. The corrections shall be made as follows:

(a) Circle the error and place the corrected information in the same block. If space is limited, enter the corrected information in Block 16, referencing the error page and block.

(b) The words "CORRECTIONS HAVE BEEN VERIFIED" shall be entered on page 1. The authorized Government representative shall date and sign immediately below the statement.

(c) MIRR's shall not be corrected for Blocks 19 and 20 entries.

(d) Pages of the MIRR requiring correction shall be clearly marked "CORRECTED COPY," avoiding obliteration of any other entries. Where corrections are made only on continuation sheets, page 1 shall also be marked "CORRECTED COPY."

(e) Page 1 and only those continuation pages marked "CORRECTED COPY" shall be distributed to the initial distribution. A complete MIRR with corrections shall be distributed to new addressee(s) created by error corrections.

1846.672-4 Invoice instructions.

Contractors are encouraged to use copies of the MIRR as an invoice in lieu of a commercial form, but are not required to do so. When used as an invoice, four copies shall be prepared and forwarded to the payment office as follows:

(a) Complete Blocks 5, 6, 19, and 20.

(b) Mark, in letters approximately one inch high, the first copy "ORIGINAL INVOICE" and the remaining three copies "INVOICE COPY."

(c) Forward the four copies to the payment office (Block 12 address).

1846.672–5 Packing list instructions.

Copies of the MIRR may be used as a packing list. If so, the packing list copies shall be in addition to the copies of the MIRR required for distribution (see 1846.673) and shall be marked "PACKING LIST."

1846.672–6 Receiving instructions.

When the MIRR is used for receiving purposes, procedures shall be as prescribed by local directives. If PQA and Acceptance or Acceptance of supplies is required upon arrival at destination, see Block 21B for instructions.

1846.673 Distribution of DD Form 250 and DD Form 250c.

(a) Subject to the requirements of paragraph 217 of NHB 5330.7, Management of Government Quality Assurance Functions for Supplier Operations, DD Forms 250 and 250c shall be distributed in accordance with the procedures prescribed by the installation.

(b) The contractor is responsible for distributing DD Forms 250 and 250c in accordance with the provisions of the contract or instructions of the contracting officer.

PART 1847—TRANSPORTATION

Subpart 1847.2—Contracts for Transportation or for Transportation-Related Services

Sec.

1847.200 Scope of subpart.
1847.200–70 Charter of aircraft.

Subpart 1847.3—Transportation in Supply Contracts

1847.304 Determination of delivery terms.
1847.304–3 Shipments from CONUS for overseas delivery.
1847.304–370 NASA export privilege.
1847.305 Solicitation provisions, contract clauses, and transportation factors.
1847.305–10 Packing, marking, and consignment instructions.
1847.305–13 Transit arrangements.
1847.305–70 NASA contract clause.

Subpart 1847.5—Ocean Transportation by U.S.-Flag Vessels

1847.506 Procedures.
1847.506–70 Compliance with the Cargo Preference Act.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1847.2—Contracts for Transportation or for Transportation-Related Services

1847.200 Scope of subpart.

1847.200–70 Charter of aircraft.

When procuring aircraft by charter, contracting officers shall comply with NMI 7910.1, NASA Aircraft Management.

Subpart 1847.3—Transportation in Supply Contracts

1847.304 Determination of delivery terms.

1847.304–3 Shipments from CONUS for overseas delivery.

1847.304–370 NASA export privilege.

NASA has certain export licensing privileges for the moving of commodities to foreign destinations. Advice should be obtained from the transportation officer to make full use of these privileges.

1847.305 Solicitation provisions, contract clauses, and transportation factors.

1847.305–10 Packing, marking, and consignment instructions.

In contracts which provide for delivery f.o.b. origin and shipment under Government bills of lading, consignment instructions may be limited to the mail address of the consignee (receiving activity), provided the contract instructions state that "Shipment other than mail shall be consigned as indicated on the Government bill of lading furnished to the contractor." Various receiving activities may have different consignment points for the various transportation media or for particular carriers within a medium, depending on the weight, shape, size, or nature of the shipment involved.

1847.305–13 Transit arrangements.

(a) When using the provision in FAR 52.247–56, the solicitation also shall state that offers will be evaluated on the basis of the lowest overall cost to the Government, including transportation costs to NASA from point of origin to final destination, taking into account any applicable transit privileges.

(b) If the nature of the procurement is such that carload or truckload shipments may be made by the contractor from one point (such as a subcontractor's plant) to another point for processing or fabrication and delivery to the Government, solicitations shall provide for the contractor to furnish information that will enable the Government to benefit from any transit privilege that might apply in shipment to final destination.

1847.305–70 NASA contract clause.

Insert the clause at 1852.247–70, Returnable Gas Cylinders, in contracts involving the purchase of gas in contract-furnished returnable cylinders where the contractor retains title to the cylinders. The clause may be used, with appropriate modification, in contracts for other supplies involving reels, spools, drums, carboys, liquid petroleum gas containers, or other reusable containers, where the contractor is to retain title to the containers.

Subpart 1847.5—Ocean Transportation by U.S.-Flag Vessels

1847.506 Procedures.

1847.506–70 Compliance with the Cargo Preference Act.

(a) A register will be established and maintained by the transportation officer in each field installation to reflect adherence to the Cargo Preference Act. Where there is no transportation officer available, it will be maintained by the procurement office. Such registers shall contain pertinent details of ocean shipments, including, but not limited to, the ports of origin and destination of shipments, commodity descriptions, and gross weight, freight revenue, name of vessel, operator of vessel, and date of loading. Registers shall be maintained on a current basis and organized so that adherence to the Cargo Preference Act can be ascertained at all times. Insofar as practicable, compliance with the 50 percent minimum requirements of the Cargo Preference Act shall be maintained on a quarter-year basis. Any deficiencies to maintain such compliance shall be corrected by the end of the calendar year.

(b) On the basis of the registers maintained under (a) above, quarterly reports reflecting actual ocean shipments shall be submitted to the Division of National Cargo, Maritime Administration, Department of Transportation, Washington, D.C. 20590 (see FAR 47.506(d)). Negative reports are required when applicable. Such reports will be made by the transportation officers and contracting officers responsible for maintaining the registers described in paragraph (a) above.

PART 1848—VALUE ENGINEERING

Subpart 1848.1—Policies and Procedures

Sec.

1848.102 Policies.

Subpart 1848.2—Contract Clauses

1848.202 Clause for construction contracts.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1848.1—Policies and Procedures

1848.102 Policies.

As authorized at FAR 48.102(a), NASA has elected to exempt all contracts other than fixed-price construction contracts from value engineering requirements at FAR Part 48.

Subpart 1848.2—Contract Clauses

1848.202 Clause for construction contracts.

(a) The contracting officer shall insert the clause at FAR 52.248–3, Value Engineering—Construction, only in those fixed-price construction solicitations and contracts when the contract amount is estimated to be $100,000 or more.

(b) Questions on the implementation and administration of this clause that cannot be resolved at the local level should be referred to the Assistant Administrator for Procurement (Code HP–1).

PART 1849—TERMINATION OF CONTRACTS

Subpart 1849.1—General Principles

Sec.

1849.101 Authorities and responsibilities.
1849.101–70 Appointment/Delegation.
1849.101–71 Termination authority.
1849.102 Notice of termination.
1849.102–70 Prior clearance of significant contract terminations.
1849.105 Duties of termination contracting officer after issuance of notice of termination.
1849.105–70 Termination docket checklist.
1849.110 Negotiation memorandum.
1849.111 Review of proposed settlements.
1849.111–70 Settlement Review Boards.
1849.111–71 Required review and approval.
1849.111–72 Scope of review.
1849.111–73 Action by the Board.
1849.111–74 Subcontracts.

Subpart 1849.5—Contract Termination Clauses

1849.502 Termination for convenience of the Government.
1849.503 Termination for convenience of the Government and default.
1849.505 Other termination clauses.

Subpart 1849.6—Contract Termination Forms and Formats

1849.670 Format for Termination Contracting Officer's Settlement Memorandum for fixed-price type contract terminated for convenience of the Government.
1849.671 Format for Termination Contracting Officer's Settlement Memorandum for cost-reimbursement type contracts.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1849.1—General Principles

1849.101 Authorities and responsibilities.

1849.101–70 Appointment/Delegation.

(a) Heads of installations shall appoint a termination contracting officer (TCO) (see FAR 2.101) to perform specific duties relating to contract termination as that individual's primary function. Such duties should include—

(1) Receiving and reviewing NASA Forms 1412, Termination Authority.

(2) Reviewing the contract and other related documents prior to issuing the notice of termination to ensure protection of the Government's rights under the contract.

(3) Issuing notices of termination, reinstatement, and recission to contractors.

(4) Assigning termination docket control numbers.

(5) Developing, maintaining, and managing basic controls relating to contract termination and settlement actions.

(6) Carrying out the duties, functions, and responsibilities in FAR Part 49 and this Part 1849.

(b) Contracting offices shall utilize the services of DOD and other Government agencies whenever possible to administer and negotiate settlement of terminated contracts. Delegation of the termination function will be made in accordance with FAR Subpart 42.2 and Subpart 1842.2.

1849.101–71 Termination authority.

NASA Form 1412, Termination Authority, is prescribed for use by cognizant NASA installations when initiating action to terminate a contract for either convenience of the Government or for default of the contractor. The termination authority shall normally be originated by the project manager or other NASA officials responsible for the decision to terminate and shall be submitted to the contracting office for use in recording subsequent decisions regarding the type of termination and assignment of the responsibility for final settlement.

1849.102 Notice of termination.

1849.102–70 Prior clearance of significant contract terminations.

(a) Prior NASA Headquarters clearance of the information release is required before any notice or any information concerning a proposed contract termination involving a reduction in employment of 100 or more contractor employees is released to a contractor and release of information to Congress or the public is the responsibility of NASA Headquarters through its liaison point designated in paragraph (b) below. In a labor surplus area, a lesser number than 100 may be significant and, if so, should be similarly cleared.

(b) The following information will be submitted to the Office of Legislative Affairs, NASA Headquarters (Code C), which, in coordination with the Office of External Relations (Code L), has been designated the NASA liaison point.

(1) Contract number, date of award, type of contract.

(2) Name of company.

(3) Nature of contract or end item.

(4) Reasons for the termination.

(5) Contract price of items terminated.

(6) Total number of contractor employees involved including the Government's estimate of the number that may be discharged.

(7) Statement of anticipated impact on the company and the community (identify). Identify area labor category and whether contractor is large or small business, and include any known impact on hardcore disadvantaged employment programs.

(8) Total number of subcontractors involved as well as the impact in this area, if known.

(9) Unclassified draft of suggested press release of information.

(c) Clearance to release the information will be requested as soon as possible after the decision has been made to terminate a contract. Pending receipt of clearance to release, information pertinent to the termination will require "For Official Use Only" handling unless a security clearance is required. Copies of the above will be furnished to the Office of External Relations (Code L), the cognizant Program Office, and the Assistant Administrator for Procurement (Code HP–1).

(d) The liaison office will act promptly on the request for clearance to release information (not days after receipt) to avoid the accrual of termination costs.

1849.105 Duties of termination contracting officer after issuance of notice of termination.

1849.105–70 Termination docket checklist.

NASA Form 1413, Termination Docket Checklist, is prescribed for use as a checklist to ensure adequacy of records under FAR 49.105.

1849.110 Negotiation memorandum.

Recommended memorandum formats for settlements requiring review board action appear in 1849.670.

1849.111 Review of proposed settlements.

1849.111-70 Settlement Review Boards.

Procurement Officers at each NASA installation shall establish a Settlement Review Board (the Board) to review proposed settlements or determinations as required by 1849.111-71(a). Each Board should be composed of at least three qualified employees of the installation who shall possess broad business and contracting experience. The membership of each Board should include a lawyer, an engineer or industrial specialist, and, in appropriate cases an accountant. Three members of the Board shall constitute a quorum; the Board may act by a majority of the members present. No person shall serve as a member of a Board in reviewing a settlement in which that member has participated.

1849.111-71 Required review and approval.

(a) *When required.* Prior to executing a settlement agreement, issuing a determination of the amount due under the termination clause of a contract, or approving or ratifying a subcontract settlement, the TCO shall submit each such settlement or determination for review and approval by the Board if—

(1) The settlement or determination involves $50,000 or more (see FAR 49.002(d));

(2) The settlement or determination is limited to adjustment of the fee of a cost-reimbursement contract or subcontract and (i) in the case of a complete termination, the fee, as adjusted, is $50,000 or more; or (ii) in the case of a partial termination, the fee, as adjusted, with respect to the terminated portion of the contract or subcontract is $50,000 or more;

(3) The Procurement Officer concerned determines that a review is desirable; or

(4) The TCO desires review by the Board.

(b) *Submission of information.* The TCO shall submit to the Board the Termination Settlement Supplemental Agreement, supported by such detailed documentation as is required for an adequate review. The supporting documentation should normally include copies of (1) the contractors's or subcontractor's settlement proposal, (2) the audit report, (3) termination inventory schedules, (4) consolidated SF 1424, Inventory Disposal Report, (5) the TCO's negotiation memorandum explaining the settlement (see FAR 49.110), and (6) when appropriate, the opinion of any other Settlement Review Board which previously reviewed the settlement. The Board will prescribe the number of copies of the information it requires and may require the submission of additional information.

1849.111-72 Scope of review.

The function of the Board is to determine the overall reasonableness of the proposed settlement agreement or determination from the standpoint of protecting the Government's interest. The Board may vary the scope and intensity of the review according to the size and complexity of the proposed settlement agreement or determination and any other relevant factors. It is not intended that the Board examine in detail every element entering into the proposed settlement agreement or determination, but the Board may inquire into selected elements of the proposed settlement agreement or determination to assure that it has been conducted competently and is based on adequate information.

1849.111-73 Action by the Board.

The Board shall submit to the TCO a written opinion regarding the proposed settlement agreement or determination and any other matter considered by the Board setting forth its approval or disapproval thereof or other decision thereon. Failure of the Board to submit a written opinion as to any proposed settlement agreement or determination within 30 days after submission to the Board of all the information required under 1849.111-71(b) shall operate as an approval by the Board.

1849.111-74 Subcontracts.

A TCO may authorize the contract administration office cognizant of an upper-tier subcontractor to grant approval or ratification, including necessary board approvals, of proposed subcontractor settlements described in FAR 49.108-3(c), which are first reviewed and referred by the prime contractor to the TCO. This procedure may be used only for specific contracts and is not applicable to settlements between the contractor and its immediate subcontractors.

Subpart 1849.5—Contract Termination Clauses

1849.502 Termination for convenience of the Government.

The clause at 1852.249-70 shall be used in all letter contracts contemplating fixed-priced type definitive contracts.

1849.503 Termination for convenience of the Government and default.

The clause at 1852.249-71 shall be used in all letter contracts contemplating cost reimbursement type definitive contracts.

18-49.505 Other termination clauses.

The contracting officer shall insert the clause at 1852.249-72, Termination (Utilities), in all contracts for utilities services.

Subpart 1849.6—Contract Termination Forms and Formats

1849.670 Format for Termination Contracting Officer's Settlement Memorandum for fixed-price type contract terminated for convenience of the Government.

The following settlement memorandum is required for use by TCO's (see FAR 18-49.110). Contractors and subcontractors should be encouraged to use this format appropriately modified to cover subcontract settlements submitted for review and approval.

Part I—General Information

(a) *Identification.* (Identify memorandum as to its purpose and content.)

(1) Name and address of the contractor. Comment on any pertinent affiliation between prime and subcontractors relative to the overall settlement.

(2) Name and titles of both contractor and Government personnel who participated in the negotiation.

(b) *Description of terminated contract.*

(1) Date of contract and contract number.

(2) Type of contract.

(3) General description of contract items.

(4) Total contract price.

(5) Cite the applicable contract termination provisions and clause.

(c) *Termination notice.*

(1) Reference termination notice and state effective date of termination.

(2) Scope and nature of termination (complete or partial), items terminated, unit price, and total price of items terminated).

(3) State whether termination notice was amended, and if so, explain.

(4) State whether contractor stopped work on effective termination date. If it did not, furnish details. Also state whether subcontracts were terminated promptly.

(5) Statement as to diversion of common items and return of goods to suppliers, if any.

(6) Furnish information as to contract performance and timely deliveries on part of contractor.

Part II—Contractor's Settlement Proposal

(a) *Date and amount.* Indicate date and location where claim was filed. State gross amount of claim. (If interim settlement proposals were filed, furnish information for each claim.)

(b) *Basis of claim.* State whether claim was filed on inventory, total cost, or other basis. Explain approval granted in connection with submission on other than inventory basis.

(c) *Examination of proposal.* State type of reviews made and by whom (audit, engineering, legal, or other).

Part III—Tabular Summary of Contractor's Claim

Prepare a summary substantially as follows:

(WHERE FIELD RECOMMENDATIONS ARE TO BE CONSIDERED, EXPAND THE FORMAT TO INCLUDE SUCH RECOMMENDATIONS.)

Auditor's Recommendation	Item Claimed	Contractor's Proposal	$ Accepted		TCO Negotiated Amount
			Cost Questioned	Unresolved Items	
1. Contractor's Costs as set forth on Settlement Proposal, Metals, Raw materials, etc. Total					
2. Profit					
3. Settlement Expense					
4. Total					
5. Settlement with Subs					
6. Acceptable Finished Product					
7. Gross Total					
8. Disposal and Other Credits					
9. Net Settlement					
10. Partial, Progress & Advance Payments					
11. Net Payment Requested					

Part IV—Discussion of Settlement

(a) Contractor's cost.

(1) If the settlement was negotiated on the basis of individual items, specify the factors and consideration with respect to each item.

(2) In the case of a lump sum settlement, comment on the general basis for and major factors concerning each element of cost and profit included therein.

(3) Comment on any important adjustments made to costs claimed or any significant amounts in relation to the total claim.

(4) If a partial termination is involved, state whether the contractor has requested an equitable adjustment in the price of the continued portion of the contract.

(5) Comment on any unadjusted contractual changes which are included in the settlement.

(6) Comment on whether or not a loss would have been incurred and explain adjustment for loss, if any.

(7) Furnish other information believed helpful to the Settlement Review Board or any reviewing authority in understanding the recommended settlement.

(b) *Profit.* Explain the basis and factors considered in arriving at a fair profit.

(c) *Settlement expenses.* Comment on and summarize those expenses not included in audit review.

(d) *Subcontractor's settlements.*

	No. of Settlements	Net Amount
Approved by contracting officer		
Concluded by contractor under delegation of authority		
Approved by Settlement Review Board		
No Cost Settlements		
Total		

(e) *Partial payments.* Furnish total amount of partial payments, if any.

(f) *Progress or advance payments.* Furnish total of unliquidated amounts, if any.

(g) *Claims of the Government against the contractor included in Settlement Agreement reservations.* List all outstanding claims, if any, which the Government has against the contractor in connection with the terminated contract or terminated portion thereof.

(h) *Assignments.* List any assignments, giving name and address of assignee.

(i) *Disposal credits.* Furnish information as to applicable disposal credits and, give dollar amounts of all disposal credits.

(j) *Plant clearance.* State whether all plant clearance action has been completed and all inventory sold, retained, or otherwise properly disposed of in accordance with applicable plant clearance regulations. Comment on any unusual matters pertaining to plant clearance. Consolidated closing plant clearance report is attached.

(k) *Government property.* State whether all Government property has been accounted for.

(l) *Special tooling.* If involved, furnish comment on disposition.

(m) *Summary of settlement.* Summarize the settlement in tabular form substantially as follows:

TABULAR SUMMARY FOR COMPLETE OR PARTIAL TERMINATION

	Amount Claimed	Allowed Amount
Prime Contractor's Charges (before disposal credits)		
Plus: Subcontractor charges (after disposal credits)		
Gross Settlement		
Less: Disposal Credits—Prime		
Net Settlement		
Less: Prior Payment Credits (This Settlement)		
Previous Partial Settlements		
Other Credits or Deductions		
Total		
Net Payment		
Total Contract Price (Complete Termination)		
CPIT (for partial termination)		
Less: Total Payments to date		
Net Payment from this Settlement		
Fund Reserved for Reservations		
Final Contract Price (Terminated Portion for partial termination)		
Reduction in Contract Price		

(n) *Exclusions.* Describe any proposed reservation of rights to the Government or to the contractor.

Part V—Recommendation

(a) *Recommendation.* Include statement as to the amount of the gross settlement and recommendation that it is fair and reasonable to the Government and the contractor.

(b) *Signature.* The Contracting Officer will sign and date the memorandum.

1849.671 Format for Termination Contracting Officer's Settlement Memorandum for cost-reimbursement type contracts.

The following settlement is required for use by TCO's (see FAR 1849.110). This format may be appropriate by modified and used to cover subcontract settlements.

Part I—General Information

(a) *Identification.* (Identify memorandum as to its purpose and content.)

(1) Name and address of the contractor. Comment on any pertinent affiliation between prime and subcontractors relative to the overall settlement.

(2) Names and titles of contractor and Government personnel who participated in the negotiation.

(b) *Description of terminated contract.*

(1) Date of contract and contract number.

(2) Type of contract.

(3) General description of contract items.

(4) State total contract cost and fee data if complete termination.

(5) Cite the applicable contract termination provisions and clauses.

(c) *Termination notice.*

(1) Reference termination notice and state effective date of termination.

(2) Scope and nature of termination (complete or partial, items terminated, estimated costs and fee data applicable to items terminated).

(3) State whether termination notice was amended, and if so, explain.

(4) Explain scope of the settlement as to whether settlement concerns fee only or whether costs are also included.

Part II—Contractor's Settlement Proposal

(a) *Date and amount.* Indicate data and location where claim was filed. State gross amount of claim. (If interim settlement proposals were filed, furnish information for each claim.)

(b) *Examinations of proposal.* State type of reviews made and by whom (audit, engineering, legal, or other).

Part III—Tabular Summary of Settlement

(a) *Summary.* Summarize the proposed settlement in tabular form substantially as shown in Attachments A and B. Partial settlements may be summarized on Attachment B.

(b) *Comments.* Furnish comments in amplification of tabular summaries. Summary of final settlement is at Attachment A.

(1) If the auditor's final report was not available for consideration, state the circumstances.

(2) Explain how the fixed fee was adjusted. Identify basis used, such as percentage of completion. Include a description of factors considered and how they were considered. Include any tabular summaries and breakdowns deemed helpful to an understanding of the process.

(3) Briefly identify matters included in liability for property and other charges against the contractor arising from the contract.

(4) Identify reservations included in the settlement that are other than standard reservations required by regulations and which are concerned with pending claims and refunds.

(5) Explain substantial or otherwise-important adjustments made in cost figures submitted by the contractor in arriving at the proposed settlement.

(6) If unreimbursed costs were settled on a lump-sum basis, explain the general basis for and the major factors considered in arriving at this settlement.

(7) Comment on any unusual items of cost included in the claim and on any phase of cost allocation requiring particular attention and not covered above.

(8) If auditor's recommendations for nonacceptance were not followed, explain briefly the main reasons why they were not.

(9) On items recommended for further consideration by the auditor, explain, in general, the basis for the action taken thereon.

(10) If any cost previously disallowed by a contracting officer is included in the proposed settlement, identify and explain the reason for inclusion of such costs.

(11) Show settlements with subcontractors by breakdown as follows:

	Number Settlements	Total Dollar Amount
Approved by Termination Contracting Officer		
Concluded by contractor under delegation of authority		
Approved by Settlement Review Board		
No Cost Settlements		
Total		

(12) The following summary will be followed where settlement includes costs and fixed fee in a complete termination.

Gross Settlement	
Less: Disposal credits	
Net Settlement	
Less: Prior Payments	
Other credits or deductions	
Total	
Net Payment	
Total contract estimated cost plus fixed fee	
Less: Net settlement	
Estimated returns for exclusions	
Final contract price (Consisting of $—— for reimbursement of costs and $—— for adjusted fixed fee)	
Reduction in contract price (credit)	

(13) If the settlement is restricted to an adjustment of the fixed fee only, then the following summary will be included.

Amount of reduction in estimated costs	
Amount of reduction in fixed fee	
Reduction in contract price (credit)	

Part IV—Recommendation

(a) *Recommendation.* Set forth the amount of the proposed negotiated settlement and make recommendation that the settlement is fair and reasonable to the Government and the contractor and should be approved.

(b) *Signature.* The termination contracting officer and negotiator will sign and date the memorandum.

Attachment A

SUMMARY OF SETTLEMENT—COST TYPE CONTRACT[1]

Contract No. —— Termination No. ——

	Amount Claimed	Amount Allowed
1. Previous Reimbursed Costs—Prime and Subs	$	$
2. Previous Unreimbursed Costs	$	$
3. Total Cost Settlement	$	$
4. Previous Fees Paid—Prime		
5. Previous Fees Unpaid—Prime	$	$
6. Total Fee Settlement		
7. Gross Settlement	$——	$——
Less: Deductions not reflected in Items 1–7:		
a. Disposal credits	$——	
b. Other charges against contractor arising from contract	$——	
8. Net Settlement		$
Less: Prior Payment Credits		$
9. Net Payment		
10. Amount allowed for prime contractor acquired property taken over by Government in connection with this settlement		$
11. Recapitulation of previous settlements (insert number of previous partial settlements effected on account of this particular termination):		
Aggregate gross amount of previous partial settlements		$——
Aggregate net amount of previous partial settlements		$——
Aggregate net payment provided in previous partial settlements		$——
Aggregate amount allowed for prime contractor acquired property taken over by the Government in connection with previous partial settlements		$——
12. Status of Contract (Fill out to extent applicable):		
a. Date of discontinuance of Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal		—— Date
b. Audit Status Date		—— Date
c. Total amount of any GAO Exceptions outstanding at date of settlement		$——

[1] Use applicable portion for partial settlement.

Attachment B

UNREIMBURSED COSTS SUBMITTED ON DD FORM 547 [1]

Costs	Amounts claimed by Contractor's Proposal	Auditor's Recommendation		TCO's Computation
		Cost Questioned	Unresolved Items	
1. Direct material.				
2. Direct labor.				
3. Indirect factory expense.				
4. Dies, jigs, fixtures and special tools.				
5. Other costs.				
6. General and administrative expense.				
7. Fee.				
8. Settlement expense.				
9. Settlement with subs.				
10. Total costs (Items 1–9)				

[1] Expand the format to include recommendations of technical personnel as required.

PART 1850—EXTRAORDINARY CONTRACTUAL ACTIONS

Subpart 1850.1—General

Sec.

1850.102 Policy.

Subpart 1850.2—Delegation of and Limitations on Exercise of Authority

1850.202 Contract adjustment boards.

Subpart 1850.3—Contract Adjustments

1850.305 Processing cases.
1850.305–70 Submission of request to the Contract Adjustment Board.
1850.306 Disposition.

1850.306–70 Implementation of Contract Adjustment Board's decision.

Subpart 1850.4—Residual Powers

1850.401 Standards for use.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1850.1—General

1850.102 Policy.

It is NASA policy not to use the "residual powers" authorized by the Act and FAR Subpart 50.4. It is also NASA's policy not to include in its contracts the clause at FAR 52.250–1, Indemnification Under Pub. L. 85–804.

Subpart 1850.2—Delegation of and Limitations on Exercise of Authority

1850.202 Contract adjustment boards.

NMI 1152.5, Contract Adjustment Board, establishes the Contract Adjustment Board as the approving authority to consider and dispose of requests for extraordinary contractual adjustments by NASA contractors.

Subpart 1850.3—Contract Adjustments

1850.305 Processing cases.

1850.305–70 Submission of request to the Contract Adjustment Board.

(a) After completing the investigation of the facts and issues relevant to the contractor's request, the cognizant contracting officer shall forward the request to the Chairman, Contract Adjustment Board (CAB), NASA Headquarters (Code GG–1), and shall include the following in the forwarding letter:

(1) The nature of the case.

(2) The disposition recommended for the request.

(3) If contractual action is recommended, the opinion of the contracting officer that such action will facilitate the national defense.

(b) The forwarding letter shall enclose the contractor's request and all supporting material submitted by the contractor together with such additional material as the contracting officer has obtained from Government sources or personnel in the course of investigating the facts and issues relevant to the request. The contracting officer's forwarding letter and all enclosures shall be submitted in duplicate. Any classified information included in the material forwarded shall be so identified. The CAB, acting through its Counsel, may further investigate the facts and issues involved to obtain such additional facts and evidence, from the contractor, the contracting officer, or others, as are necessary to make a determination on the contractor's entitlement to the relief requested or to other equitable relief.

1850.306 Disposition.

1850.306–70 Implementation of Contract Adjustment Board's decision.

(a) Copies of the CAB's decision will be transmitted to the cognizant contracting officer, who shall take such action as is authorized by the decision. Where the CAB's decision is to reject the contractor's request for relief, the cognizant contracting officer shall advise the contractor of that decision.

(b) Except as provided in paragraph (c) below, immediately upon execution of a contract or contract amendment implementing the CAB decision, the contracting officer shall forward two copies of the contractual document to the CAB Chairman, marked for the attention of its Counsel, for retention with the CAB's permanent files.

(c) Contracts or contract amendments for which approval of NASA Headquarters is otherwise required under the provisions of the FAR or this Regulation shall be forwarded for such approval. After approval has been received, the contracting officer shall comply with paragraph (b) above.

Subpart 1850.4—Residual Powers

1850.401 Standards for use.

See 1850.102.

PART 1851—USE OF GOVERNMENT SOURCES BY CONTRACTORS

Subpart 1851.1—Contractor Use of Government Supply Sources

1851.101 Policy.

1851.102 Authorization to use Government supply sources.

1851.102–70 Acquisition of filing cabinets by contractors.

1851.103 Ordering from Government supply sources.

1851.104 Furnishing assistance to contractors.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1851.1—Contractor Use of Government Supply Sources

1851.101 Policy.

The policy governing the use of official Government mailing privileges by NASA contractors is in NMI 1450.11, NASA Mail Management Program.

1851.102 Authorization to use Government supply sources.

(a) In addition to the requirements of FAR 51.102(a) (1) through (5), the contracting officer shall also consider the potential for abuse by contractors authorized access to Government supply sources.

(b) Letters of authorization shall be forwarded by the contracting officer to the installation Supply and Equipment Management Officer, Attention: Activity Address Code Coordinator, who will forward the authorization to the Supply and Equipment Management Division, NASA Headquarters (Code NIE–8), for verification and transmittal to the General Services Administration. Letters of autorization forwarded to Headquarters must include copies of the supporting determination and findings. This latter document will not be forwarded to GSA.

(c) Substantially the following format shall be used for the determination and findings authorizing contractor use of Government supply sources:

Subject: Authorization to Lease, Rent or Purchase from General Services Administration Supply Sources

(Contractor's name)
(Address)

(1) You are hereby authorized to act for the Government in the following matters:

(i) The acquisition of property under Contract No. —— which is available for purchase by Government agencies either directly from the General Services Administration stock or under Federal Supply Schedules, including GSA nonmandatory ADTS/ADP schedule contracts and GSA ADP requirements contracts, subject to the limitations set forth herein.

(ii) The leasing or rental of equipment for use on Contract No. —— which is available for lease or rental by Government agencies under Federal Supply Schedules, including GSA nonmandatory ADTS/ADP schedule contracts and GSA ADP requirements contracts, subject to the limitations set forth herein.

(iii) The issuance of tax exemption certificates in lieu of the payment of State or other taxes for which the Government is not liable on property purchased under this authorization.

(2)(i) *Purchase orders under GSA schedules and contracts.* Orders shall be placed in accordance with the terms and conditions of GSA schedules and/or contracts and this authorization. A copy of this authorization shall be attached to the order (unless a copy was previously furnished to the applicable GSA contractor) and shall contain the following statement:

This order is placed on behalf of the National Aeronautics and Space Administration in furtherance of United States Government Contract No. (———), pursuant to written authorization dated ——, a copy of which (is attached) (you have on file). In the event of any inconsistency between the terms and conditions of this order and those of the applicable GSA schedule/contract, the latter will govern.

(ii) *Orders for items in the General Services Administration Supply Catalog.* Orders shall be placed in accordance with the General Services Administration Supply Catalog and this authorization. Include the

address to which billings are to be sent. Bills are not issued by General Services Administration until after shipment has been made and should therefore be paid promptly. Necessary adjustments, if any, will be made by General Services Administration subsequent to payment. All orders shall contain the following statement:

This order is placed on behalf of the National Aeronautics and Space Administration, in furtherance of United States Government Contract No. (———), pursuant to written authorization dated ——, a copy of which (is attached) (you have on file).

(iii) (Insert any other provisions and restrictions.)

(iv) This authority hereby granted is not transferable or assignable.

———— *(Contracting Officer)*

(d) When requisitioning from the Veterans Administration, the contractor should use FEDSTRIP or MILSTRIP, as appropriate, Optional Form 347, or Center-prescribed form.

1851.102–70 Acquisition of filing cabinets by contractors.

(a) Prior to ordering filing cabinets where title to such equipment vests in the Government, NASA contractors are required to take the following actions:

(1) Transfer inactive records to contractor storage areas.

(2) Dispose of unnecessary records in accordance with their corporate procedures.

(3) Use less expensive shelf filing methods.

(4) Take other actions which will reduce needs for filing cabinets.

(5) Furnish statement to cognizant contracting officer that the above prerequisite actions have been taken and that sufficient additional filing capacity has not been produced.

(b) The contractor will then submit its request to the contracting officer who will confer with the Records Management Officer, Property and Supply Officer, and Project Officer and, if appropriate, will certify on all letter requests that the prerequisite actions have been taken by the contractor and that such actions have not produced the required filing cabinets.

(c) If the need for the filing cabinets is approved by the contracting officer, excess items of the type requested will be furnished, if available, through appropriate property accountability channels.

(d) Approved requests which cannot be filled from excess will be returned to the originating contractor, with an authorization to obtain file cabinets, preferably through GSA.

1851.103 Ordering from Government supply sources.

(a) All orders for GSA stock shall contain the statement in paragraph (c)(2)(ii) of the format for authorization in 1851.102(f).

(b) Contracting officers shall use NMI 4050.2, Assignment and maintenance of FEDSTRIP and MILSTRIP Activity Address Codes, to obtain FEDSTRIP/MILSTRIP activity codes.

1851.104 Furnishing assistance to contractors.

When necessary, assist the contractor in preparing and submitting the initial FEDSTRIP or MILSTRIP requisitions, the Optional Form 347, or Center-prescribed forms.

SUBCHAPTER H—CLAUSES AND FORMS

PART 1852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Sec.

1852.000 Scope of part.

Subpart 1852.1—Instructions for Using Provisions and Clauses

1852.101 Using FAR Part 52.
1852.102 Incorporating provisions and clauses.
1852.102–2 Incorporation in full text.
1852.103 Identification of provisions and clauses.
1852.104 Procedures for modifying and completing provisions and clauses.
1852.107 Provisions and clauses prescribed in FAR Subpart 52.1.
1852.107–70 NASA contract clause.

Subpart 1852.2—Texts of Provisions and Clauses

1852.203–70 Contracts between NASA and former NASA employees.
1852.204–70 Report on NASA subcontracts.
1852.204–71 NASA Financial Management Reporting.
1852.204–72 NASA Financial Management Reporting (Monthly Analysis Report).
1852.208–7000 [Reserved]
1852.208–7001 [Reserved]
1852.208–7002 Rates.
1852.208–7003 Public regulation and change of rates.
1852.208–7004 Change in class of service.
1852.208–7005 Contractor's facilities.
1852.208–7006 Technical provisions.
1852.208–7007 Renewal of contract.
1852.208–7008 Change in rates.
1852.208–7009 Connection charge.
1852.208–7010 Termination charge.
1852.208–7011 Multiple service locations.
1852.208–7012 Contractor's facilities (short form).
1852.209–70 Product removal from qualified products list.
1852.209–71 Limitation of future contracting.
1852.210–70 Brand name or equal.
1852.212–13 Stop-work order.
1852.212–70 Notice of delay.
1852.214–23 Late submissions, modifications, and withdrawals of technical proposals under two-step formal advertising.
1852.215–2 Audit—negotiation.
1852.215–10 Late submissions, modifications, and withdrawals of proposals.
1852.215–70 Increase in estimated costs.
1852.215–71 Adjustment for subcontract price redetermination.
1852.216–7 Allowable cost and payment.
1852.216–13 Allowable cost and payment—facilities.
1852.216–7001 Economic price adjustment—basic steel, aluminum, brass, bronze, or copper mill products.
1852.216–7002 Economic price adjustment—nonstandard steel items.
1852.216–7003 Evaluation of bids subject to economic price adjustment.
1852.216–7004 Estimated cost and cost sharing.
1852.216–7005 Estimated cost and fixed fee.
1852.216–7006 Payment of fixed fee.
1852.216–7007 Award fee.
1852.222–70 Facilities nondiscrimination notice.
1852.222–71 Facilities nondiscrimination.
1852.223–70 Safety and health.
1852.223–71 Frequency authorization.
1852.225–70 Percent foreign content.
1852.225–71 Nondomestic construction materials.
1852.228–70 Aircraft ground and flight risk.
1852.228–71 Aircraft—flight risks.
1852.228–470 Reimbursement for war hazard losses.
1852.231–70 Pricing of adjustments.
1852.232–1 Payments.
1852.232–2 Payments under fixed-price research and development contracts.
1852.232–4 Payments under transportation contracts and transportation-related services contracts.
1852.232–7 Payments under time-and-materials and labor-hour contracts.
1852.232–10 Payments under fixed-price architect-engineer contracts.
1852.232–70 [Reserved]
1852.232–71 Invoices.
1852.232–72 Payments (letter contracts).
1852.232–73 Payments (utility services).
1852.232–74 Payments (facilities).
1852.232–75 Security for advance payments.
1852.232–76 Authority to obligate funds.
1852.232–77 Limitation of funds (fixed-price-contract).
1852.233–1 Disputes.
1852.235–70 Scientific and Technical Information Service.
1852.235–71 Key personnel and facilities.
1852.236–70 Option for supervision and inspection services.
1852.243–70 Engineering change proposals.
1852.244–70 Geographic participation in the aerospace program.
1852.245–70 Acquisition of existing Government equipment.
1852.245–71 Installation-provided Government property.
1852.245–72 Liability for Government property furnished for repair or other services.
1852.245–73 Financial reporting of Government-owned contractor-held property.

1852.247–70 Returnable gas cylinders.
1852.249–70 Termination—fixed-price letter contract.
1852.249–71 Termination—cost-reimbursement type letter contract.
1852.249–72 Termination (Utilities).
1852.250–1 Indemnification under Public Law 85–804.
1852.252–70 Compliance with NASA FAR Supplement.

Authority: 42 U.S.C. 2473(c)(1).

1852.000 Scope of part.

This part, in conjunction with FAR Part 52, (a) gives instructions for using provisions and clauses prescribed by this regulation, (b) contains those solicitation provisions and contract clauses, and (c) presents composite matrices listing both the FAR and NASA FAR Supplement provisions and clauses applicable to each principal contract type and/or purpose.

Subpart 1852.1—Instructions for Using Provisions and Clauses

1852.101 Using FAR Part 52.

NASA contracting offices prescribing or developing clauses under the authority of FAR 52.101(b)(2)(i) (B) or (C) shall ensure that the requirements of FAR Subpart 1.4 and Subpart 1801.4 are met.

1852.102 Incorporating provisions and clauses.

1852.102–2 Incorporation in full text.

All provisions and clauses prescribed or developed by NASA contracting offices (see FAR 52.101(b)(2)(i) (B) or (C)) shall be incorporated in solicitations and/or contracts in full text as required by FAR 52.102–2(a)(4).

1852.103 Identification of provisions and clauses.

In the hypothetical example of clause identification at FAR 52.103(d)(2), NASA contracting offices shall number their first clause 52.236–90, the second clause 52.236–91 etc. (see FAR 1.303(a) and 1801.104–2(b)).

1852.104 Procedures for modifying and completing provisions and clauses.

NASA FAR Supplement provisions and clauses shall not be modified (see FAR 52.101(a)) unless authorized by this regulation, and when authorized, contracting officers must comply with the procedures in FAR 52.104.

1852.107 Provisions and clauses prescribed in FAR Subpart 52.1.

1852.107–70 NASA contract clause.

The contracting officer shall insert the clause at 1852.252–70, Compliance with the NASA FAR Supplement, in all contracts including letter contracts.

1852.203–70 Contracts between NASA and former NASA employees.

As prescribed at 1803.7002, insert the following provision in all solicitations:

Contracts Between NASA and Former NASA Employees (April 1984)

The offeror represents that he or she () is, or () is not, an individual who was employed by NASA during the past two (2) years, or a firm in which such former employee is a partner, principal officer, majority shareholder, or which is otherwise controlled or predominantly staffed by such former employees.

(End of provision)

1852.204–70 Report on NASA subcontracts.

As prescribed in 1804.672–1, insert the following clause in all NASA contracts of $500,000 or more and contracts where a modification increases the contract amount to $500,000 or more.

Report on NASA Subcontracts (April 1984)

(a) The Contractor agrees to submit information on NASA Form 667 to the National Aeronautics and Space Administration (Code HM–1), Washington, DC 20546, substantially as follows with respect to each subcontract or modification thereof exceeding $10,000 as soon as possible after execution thereof:

(1) The name and address of the prime contractor and the NASA prime contract number;

(2) The name and address of the subcontractor;

(3) Whether the subcontractor is a large or small business concern and/or a minority business concern;

(4) Whether the type of effort being performed involves research and development;

(5) A brief description of the subcontract work;

(6) The amount of the subcontract; and

(7) The principal location where the subcontract work is to be performed, if known.

(b) The Contractor and its subcontractors will submit negative reports annually, when applicable, on each prime contract and first-tier subcontract subject to this reporting requirement. The negative reports will be submitted not later than October 31 for the 12 months' period ending September 30th of each year. The negative reporting will be continued until the contract or subcontract has been physically completed and the National Aeronautics and Space Administration (Code HM–1), Washington, DC 20546, so notified by the Contractor or subcontractor.

(c) The term "subcontract" as used herein means procurement in excess of $10,000 by the Contractor or first-tier subcontractor of articles, materials, or services entering into the performance of this contract, except purchases, regardless of amount, of stock items, materials, or services which cannot be specifically identified with this contract.

(d) The term "research and development" as used herein means basic and applied research, and design and development of prototypes and processes to (1) pursue a planned search for new knowledge, with or without reference to a specific application, (2) apply existing knowledge in the creation of new products or processes and (3) apply existing knowledge in the improvement or modification of present products and processes. It excludes subcontracts for the purchase of standard commercial items and services.

(e) The Contractor further agrees to insert the provisions of paragraphs (a), (b), (c) and (d) of this clause in each subcontract in excess of $50,000. The Contractor will instruct its subcontractors to submit their reports directly to the National Aeronautics and Space Administration (Code HM–1), Washington, DC 20546, and will provide its subcontractors with the number of the NASA prime contract.

(End of clause)

1852.204–71 NASA Financial Management Reporting.

As prescribed by 1804.675–1(a), insert the following clause in contracts that require financial management reporting in accordance with NMI 9501.1B and NHB 9501.2A.

NASA Financial Management Reporting (April 1984)

(a) Financial Management Reports shall be submitted by the Contractor on NASA Form 533 series of reports in accordance with the instructions set forth in NASA Handbook "Procedures for Contractor Reporting of Correlated Cost and Performance Data" (NHB 9501.2A) and on the reverse side of the form, as supplemented in the Schedule of this contract. The detailed reporting categories to be used, which shall be correlated with the technical/schedule reporting, will be set forth in the Schedule of this contract. Implementation by the Contractor of reporting requirements under this clause shall include NASA approval of the definitions of the content of each reporting category, and will give due regard to the Contractor's established financial management information system.

(b) Lower level detail, which the Contractor utilizes for its own management purposes to validate information reported to NASA, shall be compatible with NASA requirements.

(c) Reports shall be submitted in the number of copies, at the time, and in the manner set forth in the Schedule of this contract or as designated administratively in writing by the Contracting Officer. Upon completion, and acceptance by NASA, of all contract schedule line items, the contractor, unless otherwise directed in writing by NASA, shall discontinue submitting the detailed NASA Form 533 report, and shall limit subsequent reporting to specific line items reflecting cost increases or decreases on a quarterly basis.

(d) The Contractor agrees to insert the substance of this clause in all first-tier cost type subcontracts specifically identified in writing by the Contracting Officer and shall include the cost of such subcontracts in his cost reports.

(e) During the performance of this contract, if NASA requires a change, either an increase or decrease in the information or reporting requirements specified in the Schedule, or as provided for in (a) or (c) above, such change shall be effected by the Contracting Officer in accordance with the procedures of the Changes clause of this contract.

(End of clause)

1852.204–72 NASA Financial Management Reporting (Performance Analysis Report).

As prescribed in 1804.675–1(b), insert the following clause in contracts that require the Monthly Performance Analysis Report in accordance with NMI 9501.1B and NHB 9501.2A.

NASA Financial Management Reporting (Performance Analysis Report) (April 1984)

Monthly reporting of contract performance shall be accomplished on the NASA Monthly Contractor Financial Management Performance Analysis Report (NASA Form 533P) in accordance with the instructions set forth in NASA Handbook "Procedures for Contractor Reporting of Correlated Cost and Performance Data" (NHB 9501.2B) and on the reverse side of the form, as supplemented in the Schedule of this contract.

(End of clause)

1852.208–7000 [Reserved]

1852.208–7001 [Reserved]

1852.208–7002 Rates.

Insert the following clause as prescribed in 1808.309(a)(1).

Rates (April 1984)

(a) For and in consideration of the faithful performance of the stipulations of this contract, the Contractor shall be paid at the rates set out in Appendix A, *provided* that the Government shall be liable for the minimum monthly charge, if any, specified in this contract commencing with the billing period in which service is initially furnished thereto, and continuing until this contract is terminated, except that the minimum monthly charge, if any, specified in this contract shall be equitably prorated for the billing periods in which commencement and termination of this contract shall become effective.

(b) The Contractor hereby declares that the rates applicable to the service furnished under this contract are not in excess of the lowest rates available to any prospective customer under like conditions, and agrees that during the life of this contract the Government shall continue to be billed at the lowest rates applicable for similar conditions of service.

(End of clause)

1852.208–7003 Public regulation and change of rates.

Insert the following clause as prescribed in 1808.309(a)(2).

Public Regulation and Change of Rates (April 1984)

(a) Rates established under this contract shall be subject to regulation in the manner and to the extent prescribed by law by any Federal, State, or local regulatory agency having jurisdiction. The Contractor agrees to give the Contracting Officer written notice of the filing of an application for rate changes concurrently with the filing of the application. Such notice shall fully describe the proposed rate change. If during the term of this contract the public regulatory agency having jurisdiction approves rates that are higher or lower than those stipulated herein, for like conditions of service, the Contractor agrees to continue to furnish service as stipulated in this contract and the Government agrees to pay for such service at the higher or lower rates from and after the date when such rates are made effective. In the event that the regulatory agency promulgates any regulation concerning matters other than rates which affects this contract, the Contractor shall immediately notify the Contracting Officer. The Government shall not be bound to accept any new regulation inconsistent with Federal laws or regulations.

(b) In the event the Contractor, during the term of this contract, shall make effective any new rate schedule or amended rate schedule applicable to the class of service furnished the Government at the service location, which may contain a lower rate or conditions more favorable to the Government for such class of service, the Contractor shall forward to the Contracting Officer a copy of such rate schedule or amended rate schedule within 15 days after the effective date thereof, and, upon receipt of written request from the Government, shall substitute such rate schedule or amended rate schedule for the rate schedule then in effect hereunder for such service location, commencing with the billing period in which such written request is received.

(End of clause)

1852.208–7004 Change in class of service.

Insert the following clause as prescribed in 1808.309(a)(3).

Change in Class of Service (April 1984)

(a) In the event of a permanent change in the class of service furnished the Government at the service location, service shall be furnished to such service location at the lowest available rate schedule of the Contractor which is applicable to the class of service furnished following such permanent change subject to the clause hereof entitled "Rates."

(b) Where the Contractor's rate schedule on file with the regulatory agency and applicable to services provided by the Contractor does not contain a schedule applicable to the class of service furnished the Government, no clause in this contract shall preclude the parties from negotiating a rate schedule applicable to the class of service finished.

(End of clause)

1852.208–7005 Contractor's facilities.

Insert the following clause as prescribed in 1808.309(a)(4).

Contractor's Facilities (April 1984)

(a) The Contractor, at its expense, shall furnish, install, operate, and maintain all facilities required to furnish service hereunder to, and measure such service as of, the point of delivery specified in the Service Specifications. Title to all such facilities shall be and remain in the Contractor and the Contractor shall be responsible for all loss or damage to such facilities.

(b) The Government hereby grants to the Contractor, free of any rental or similar charge, but subject to the limitations specified in this contract, a revocable permit or license to enter the service location for any proper purpose under this contract, including use of the site or sites agreed upon by the parties hereto for the installation, operation, and maintenance of the facilities of the Contractor required to be located upon Government premises, all of which facilities shall be and remain the sole property of the Contractor and shall, at all times during the life of this contract, be operated and maintained by the Contractor at its expense; and all taxes and other charges in connection therewith, together with all liabilty of the Contractor in construction, operation, or maintenance of such facilities, shall be assumed by the Contractor. Authorized representatives of the Contractor will be allowed access to the facilities of the Contractor at suitable times to perform the obligations of the Contractor regarding such facilities. Such facilities shall be removed and Government premises restored to their original condition by the Contractor at its expense within a reasonable time after the Government shall revoke the permit or license herein granted and in any event a reasonable time after termination of this contract, *provided* that in the event of termination of this contract due to the fault of the Contractor such facilities may be retained in place at the option of the Government until service comparable to that provided for hereunder is obtained elsewhere. It is expressly understood, however, that proper Government authority may limit or restrict the right of access herein granted in any manner considered by such authority to be necessary for the National security.

(End of clause)

1852.208–7006 Technical provisions.

Insert the following clause as prescribed in 1808.309(a)(5). Minor changes may be made in the following clause when insisted upon by the contractor to conform with established procedure or with procedures contained in the contractor's published rates filed with a regulatory agency. The following types of changes, when made for this purpose, are not considered within the intent of 1808.307–71 relating to contracts requiring NASA Headquarters approval.

(a) *Measurement of service.* (1) The words "billed conjunctively" in the second sentence of paragraph (a)(1) refer to the combination of similar quantities measured by two or more meters into a single quantity for the purpose of billing as if the bill were prepared for a single meter. This

sentence may be deleted, or the word "separately" may be inserted in lieu of the word "conjunctively" to conform to the contractor's regulated practice and/or when the schedule under which bills are computed is such that billing separately will be more economical than billing conjunctively.

(2) In paragraph (a)(2), the periodic intervals prescribed between meter readings may be changed to conform to the contractor's regulated practice.

(b) *Meter test.* (1) The first sentence of paragraph (b), requiring testing at intervals not exceeding one year, may be changed to provide for meter tests in accordance with the Contractor's regulated practice.

(2) In the third sentence of paragraph (b), the percentage error (shown as 2 percent) may be changed to comply with the Contractor's regulated practice.

(c) *Continuity of service and consumption.* (1) In paragraph (d)(1), the adjustment provision may be deleted or changed, if necessary, to conform with the provisions of the Contractor's field rate schedules. This subparagraph may be ended after the word "facilities" and before the word "provided" for the period "10 hours" may be changed.

(2) Paragraph (d)(2) may be deleted or changed, if the contractor's filed rates contain a provision requiring a continuation of demand, or similar charges, on a ready-to-serve basis during a period that the Government is unable to operate the service location for any cause beyond its control.

Technical Provisions (April 1984)

(a) *Measurement of service.*

(1) All service furnished by the Contractor shall be measured by suitable metering equipment of standard manufacture, to be furnished, installed, maintained, calibrated, and read by the Contractor at its expense. When more than a single meter is installed at the service location, the readings thereof shall be billed conjunctively. In the event any meter fails to register or registers incorrectly the service furnished therethrough, the parties shall agree upon the length of period during which such meter failed to register or registered incorrectly and the quantity of service delivered therethrough during such period and, upon agreement, an appropriate adjustment based thereon shall be made in the Government's bills. For the purpose of the preceding sentence, any meter which registers not more than 2 percent slow or fast shall be deemed correct.

(2) The Contractor shall read meters on the same day of each month; if, however, that day falls on a Saturday, Sunday, or legal holiday, or if the Contractor is otherwise prevented from reading the meters on that day, the Contractor shall read the meters on the next succeeding business day on which it is able to do so, *providing* that all bills based on meter readings of less than 27 days or more than 33 days shall be prorated accordingly, and *providing further* that there shall be no more than 12 billings in any one year.

(b) *Meter test.* The Contractor, at its expense, shall periodicaly inspect and test the meters installed by it at intervals not exceeding 1 year. At the written request of the Contracting Officer, the Contractor shall make additional tests of any or all of such meters in the presence of Government representatives. The cost of such additional tests shall be borne by the Government if the percentage of errors is found to be not more than 2 percent slow or fast. No meter shall be placed in service or allowed to remain in service which has an error in registration in excess of 2 percent under normal operating conditions.

(c) *Change in volume or character.* Reasonable notice shall, so far as possible, be given by the Contracting officer to the Contractor regarding any material changes proposed in the volume or characteristics of the utility service required at each location.

(d) *Continuity of service and consumption.* (1) The Contractor shall use reasonable diligence to provide a regular and uninterrupted supply of service at the service location, but shall not be liable for damages, breach of contract or otherwise to the Government for failure, suspension, diminution, or other variations of service occasioned by or in consequence of any cause beyond the control of the Contractor, including but not limited to acts of God or of the public enemy, fires, floods, earthquakes, or other catastrophes, strikes, or failure or breakdown of transmission or other facilities; *provided* that when any such failure, suspension, diminution, or variation of service shall aggregate more than 10 hours during any billing period hereunder, an equitable adjustment shall be made in the monthly rates specified in this contract (including the minimum monthly charge).

(2) In the event the Government is unable to operate the service location in whole or in part for any cause beyond its control, including but not limited to acts of God or of the public enemy, fires, floods, earthquakes, other catastrophes, or strikes, an equitable adjustment shall be made in the monthly rates specified in this contract (including the minimum monthly charge) if the period during which the Government is unable to operate such service location in whole or in part shall exceed 15 days during any billing period hereunder.

(End of clause)

1852.208–7007 Renewal of contract.

Insert the following clause as prescribed in 1808.309(b)(1).

Renewal of Contract (April 1984)

This contract is renewable on an annual basis at the option of the Government, by the Contracting Officer giving written notice of renewal to the Contractor at least — days before this contract is to expire. If the Government exercises this option for renewal, the contract as renewed shall be deemed to include this option provision. However, the total duration of this contract, including the exercise of any options under this clause, shall not exceed — years.

(End of clause)

1852.208–7008 Change in rates.

Insert the following clause, as prescribed in 1808.309(b)(2), in lieu of the clause in 1852.7003 if the rates applicable to the service furnished under the contract are negotiated between the contractor and the Government without recourse to the approval of any Federal, State, or local regulatory agency, or if the service to be furnished under the contract is otherwise not subject to regulation by any Federal, State, or local regulatory agency, or if the contractor also acts as the local public regulatory agency and its decisions are not subject to review by a higher regulatory agency.

Change in Rates (April 1984)

(a) If at any time during the term of this contract either of the parties hereto considers it appropriate that all or part of the rates applicable to the service furnished under this contract be changed, the parties agree to promptly negotiate such rates upon receipt by one party of a written request from the other (1) specifying the rates as to which a change is considered appropriate, (2) setting forth the proposed change in rates, and (3) stating in detail the reasons for the proposed changes. Any rate changes agreed to by the parties as the result of such negotiations shall be made a part of this conract by the issuance of a supplemental agreement hereto and shall become effective as of the date of the request for a change in rates, unless otherwise agreed to by the parties.

(b) The Contractor agrees that a duly authorized representative of NASA shall have access to and the right to examine any directly pertinent books, documents, papers, and records of the Contractor relating to costs which form the basis for the rate.

(End of clause)

1852.208–7009 Connection charge.

Insert the following clause, as prescribed in 1808.309(b)(3) when (a) a connection charge is to be paid by the Government, and (b) the conditions permitting the incorporation of a nonrecurring, nonrefundable fee in Appendix A do not exist. Also attach Appendix C to the contract (see 1808.304–572(a)(4)).

Connection Charge (April 1984)

(a) *Charge.* The Government, in consideration of the furnishing and installation by the Contractor at the Contractor's expense of the New Facilities described in Appendix C, attached hereto and made a part hereof, shall pay the Contractor, as a connection charge, after receipt of satisfactory evidence of completion of the facilities, the sum $ — representing the sum of $ — less the agreed salvage value in the amount of $ — as shown in Appendix C; *provided* that, as a condition precedent to final payment, the Contractor shall, if

required by the Contracting Officer, execute a release in terms acceptable to the Contracting Officer, of claims against the Government arising under or by virtue of such installation.

(b) *Ownership, operation, and maintenance of new facilities to be provided hereunder.* The facilities to be supplied by the Contractor under this clause, notwithstanding the payment by the Government of a connection charge, shall be and remain the property of the Contractor and shall, at all times during the life of this contract or any renewals thereof, be operated and maintained by the Contractor at its expense, and all taxes and other charges in connection therewith, together with all liability arising out of the construction, operation, or maintenance of such facilities, shall be the obligation of the Contractor.

(c) *Credits.* (1) The Contractor agrees to allow the Government on each monthly bill for service furnished under this contract to the Service Location, a credit of — percent of the amount of each such bill as rendered until the accumulation of credits shall equal the amount of such connection charge, provided that the Contractor may at any time so allow a credit up to 100 percent of the amount of each such bill.

(2) In the event the Contractor, prior to any termination of this contract but subsequent to completion of the facilities provided for in this clause, serves any customer other than the Government (regardless of whether the Government is being served simultaneously, intermittently, or at all) by means of such facilities, the corresponding benefit to the Contractor is hereby recognized. It is therefore agreed that upon initiation of such service, the Contractor shall promptly pay in full to the Government the uncredited balance of the connection charge, or accelerate the credits provided for under subparagraph (c)(1) of this clause to 100 percent of each monthly bill until there is fully credited a sum equitably representing the same proportion of the uncredited balance of the connection charge as of the date of initiation of such service, as agreed upon by the parties hereto, as the portion of the facilities utilized in serving such customer bears to complete facilities described in Appendix C.

(d) *Termination prior to completion of facilities.* The Government reserves the right to terminate this contract at any time prior to completion of the facilities provided for herein with respect to which the Government is to pay a connection charge. In the event the Government exercises this right, the Contractor shall be paid fair compensation, exclusive of profit, with respect to such facilities.

(e) *Termination subsequent to completion of facilities.*

(1) *Termination by the Government.* In the event the Government terminates this contract subsequent to completion of the facilities provided for herein with respect to which the Government is to pay a connection charge, but prior to the crediting in full by the Contractor of any connection charge in accordance with the terms of this contract, the possible continued usefulness of such facilities is hereby recognized. It is, therefore, agreed that upon such termination the Contractor shall have the following options:

(i) To retain in place for twelve months or more after the notice of termination by the Government such facilities on condition that (A) if, during such twelve month period, the Contractor serves any other customer by means of such facilities, the Contractor shall, in lieu of allowing credits, pay the Government during such period installments in like amount, manner, and extent as the credits provided for under paragraph (c) of this clause prior to such termination and (B) immediately after such twelve-month period the Contractor shall promptly pay in full to the Government the uncredited balance of the connection charge.

(ii) To remove such facilities at the Contractor's own expense within twelve months after the effective date of the termination by the Government; *provided,* that if the Contractor elects to so remove such facilities, the Government shall then have the option of purchasing such facilities at the agreed salvage value set forth in Appendix C hereto; and *provided further,* that the Contractor will, at the request of the Government, leave in place such facilities located on Government property which the Contractor elects to so remove and which the Government elects to purchase at the agreed salvage value.

(2) *Termination by the Contractor.* In the event the Contractor terminates service under, or otherwise defaults in performance of, this contract prior to the crediting in full, in accordance with the terms of this contract, of any connection charge paid by the Government, the Contractor shall pay to the Government an amount equal to the uncredited balance of the connection charge as of the date of such termination.

(End of clause)

1852.208–7010 Termination charge.

Insert the following clause, as prescribed in 1808.309(b)(4), and also attach Appendix C to the contract when a payment is to be made to the contractor upon termination of service in lieu of a connection charge upon completion of the facilities. The length of time, not in excess of 60 months, as negotiated with the contractor will be entered in the first blank. In the second blank enter the amount of the maximum termination charge as negotiated with the contractor, but not in excess of cost of facilities furnished and installed by the contractor less the agreed salvage value, as shown in Appendix C. Enter in the third blank the figure obtained by dividing the figure in the second blank by the figure in the first blank. The use of this clause does not affect the term of the contract; however, its use is subject to Headquarters approval in accordance with 1808.307–71.

Termination Charge (April 1984)

In consideration of the furnishing and installation by the Contractor at its expense of the New Facilities described in Appendix C, attached hereto and made a part hereof the Government shall, in the event of termination of this contract by the Government prior to ——— months from the date on which service commences, pay the Contractor as a termination charge ——— less ——— multiplied by the number of months service has been received prior to the date of such termination.

(End of clause)

1852.208–7011 Multiple service locations.

Insert the following clause, as prescribed in 1808.309(b)(5), when it is desired to provide for possible alternative service locations.

Multiple Service Locations (April 1984)

(a) The Contracting Officer may at any time, by written order, designate any service location within the service area of the Contractor at which service shall be furnished or discontinued thereunder, and the contract shall be modified in writing accordingly by adding to or deleting from the Service Specifications the name and location of the appropriate service location, by specifying a different rate if applicable, the appropriate point of delivery, different service specifications if applicable, and any other appropriate terms and conditions.

(b) The minimum monthly charge specified in this contract shall be equitably prorated from the billing period in which commencement or discontinuance of service at any service location designated under the Service Specifications shall become effective.

(End of clause)

1852.208–7012 Contractor's facilities (short form).

As prescribed in 1808.309(a)(6) insert the following clause only when the estimated annual cost is $2,500 or less.

Contractor's Facilities (Short Form) (April 1984)

The Contractor, at its expense, shall furnish, install, operate, maintain, retain title to, and be responsible for all loss of or damage to all facilities required to furnish the service provided for herein. The Contractor will be allowed access to its facilities on Government premises at suitable times and shall, at the Contractor's expense, remove them and restore the premises to original condition within a reasonable time after termination of this contract.

(End of clause)

1852.209–70 Product removal from qualified products list.

As prescribed in 1809.208–71, the contracting officer shall insert the following clause in all solicitations/contracts that contain either of the clauses at FAR 52.209–1 or 52.209–2.

Product Removal From Qualified Products List (April 1984)

If, during the performance of this contract, the product being furnished is, for any reason, removed from the Qualified Product

List, the Government may terminate this contract for default pursuant to the clause of this contract entitled Default, in the case of fixed-price contracts, or Termination in the case of cost-reimbursement type contracts.

(End of clause)

1852.209–71 Limitation of future contracting.

As prescribed in 1809.508–2, the contracting officer may insert a clause substantially as follows in solicitations and contracts in compliance with FAR 9.508.

Limitation of Future Contracting (April 1984)

(a) The Contracting Officer has determined that this acquisition may give rise to a potential organizational conflict of interest. Accordingly, the attention of all prospective offerors is invited to FAR Subpart 9.5—Organizational Conflicts of Interest.

(b) The nature of this conflict is (describe the conflict).

(c) The restrictions upon future contracting are described below:

(1) If the Contractor, under the terms of this contract, or through the performance of tasks pursuant to this contract, is required to develop specifications or statements of work and such specifications or statements of work are to be incorporated into a solicitation, the Contractor shall be ineligible to perform the work described within that solicitation as a prime or first-tier subcontractor under an ensuing NASA contract. Such restrictions shall remain in effect for a reasonable time as agreed to by the Contracting Officer and the Contractor sufficient to avoid the circumstances of unfair competitive advantage or potential bias; but, usually for a period no less than when the first production contract using the Contractor's specifications or work statement is awarded. It is further agreed that NASA will not unilaterally require the Contractor to prepare such specification or statements of work under this contract.

(2) To the extent that the work under this contract requires access to proprietary, business confidential, or financial data of other companies, and as long as such data remains proprietary or confidential, the Contractor shall protect such data from unauthorized use and disclosure and agrees not to use it to compete with such companies.

(End of clause)

1852.210–70 Brand name or equal.

As prescribed in 1810.011, insert the following provision in solicitations where a "brand name or equal" purchase description is included. The provision may be modified for use in negotiated procurements:

Brand Name or Equal (April 1984)

(a) As used in this provision the term "brand name" includes identification of products by make and model.

(b) If items called for by this Invitation for Bids have been identified in the Schedule by a "brand name or equal" description, such identification is intended to be descriptive, but not restrictive, and is to indicate the quality and characteristics of products that will be satisfactory. Bids offering "equal" products, including products of the brand name manufacturer other than the one described by brand name will be considered for award if such products are clearly identified in the bids and are determined by the Government to meet fully the salient characteristics requirements referenced in the Invitation for Bids.

(c) Unless the offeror clearly indicates in the bid that it is offering an "equal" product, the bid shall be considered as offering a brand-name product referenced in the Invitation Bids.

(d)(1) If the offeror proposes to furnish an "equal" product, the brand name, if any, of the product to be furnished shall be inserted in the space provided in the Invitation for Bids or such product shall be otherwise clearly identified in the bid. The evaluation of bids and the determination as to equality of the product offered shall be the responsibility of the Government and will be based on information furnished by the offeror or identified in the bid, as well as other information reasonably available to the contracting activity. CAUTION TO OFFERORS. The contracting office is not responsible for locating or securing any information which is not identified in the bid and reasonably available to the contracting office. Accordingly, to insure that sufficient information is available, the offeror must furnish as a part of his bid all descriptive material (such as cuts, illustrations, drawings, or other information) necessary for the contracting office to (i) determine whether the product offered meets the salient characteristics requirements of the Invitation for Bids and (ii) establish exactly what the offeror proposes to furnish and what the Government would be binding itself to purchase by making an award. The information furnished may include specific references to information previously furnished or to information otherwise available to the contracting office.

(2) If the offeror proposes to modify a product so as to make it conform to the requirements of the Invitation for Bids, it shall (i) include in the bid a clear description of such proposed modifications and (ii) clearly mark any descriptive material to show the proposed modifications.

(3) Modifications proposed after bid opening to make a product conform to a brand name product referenced in the Invitation for Bids will not be considered.

(End of provision)

1852.212–13 Stop-work order.

The clause at FAR 52.212–13 is not authorized for use in research contracts with educational or other nonprofit institutions.

1852.212–70 Notice of delay

As prescribed at 1812.104(a), insert the following clause when desired:

Notice of Delay (April 1984)

If the Contractor becomes unable to complete the contract work at the time specified because of technical difficulties, notwithstanding the exercise of good faith and diligent efforts in the performance of the work called for hereunder, the Contractor shall give the Contracting Officer written notice of the anticipated delay and the reasons therefor. Such notice and reasons shall be delivered promptly after the condition creating the anticipated delay becomes known to the Contractor but in no event less than forty-five (45) days before the completion date specified in this contract, unless otherwise directed by the Contracting Officer. When notice is so required, the Contracting Officer may extend the time specified in the Schedule for such period as deemed advisable.

(End of clause)

1852.214–23 Late submissions, modifications, and withdrawals of technical proposals under two-step formal advertising.

Deviation. As prescribed at 1814.20–6, substitute the following for paragraphs (a) and (b) of the provisions at FAR 52.214–23 in step one of all two-step formally advertised procurements:

(a) Any technical proposal or any modification of a technical proposal under step one of two-step formal advertising received at the office designated in this solicitation after the exact time specified for receipt need not be considered unless it is received before the invitation for bids in step two is issued and it—

(1) Was sent by registered or certified mail not later than the 5th calendar day before the date specified for receipt of technical proposals (e.g., a technical proposal submitted in response to a solicitation requiring receipt of technical proposals by the 20th of the month must have been mailed by the 15th);

(2) Was sent (i) by mail, or (ii) if authorized, by telegram (including mailgram) (a telegram (or mailgram) is authorized for submitting modifications to technical proposals), and it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the Government installation; or;

(3) Is the only technical proposal received.

(b) However, the Government reserves the right to consider technical proposals for modifications thereof received after the date indicated for such purpose, but before the invitation for bids in step two is issued, should such action be in the best interest of the Government.

1852.215–2 Audit—negotiation.

As prescribed at 1815.106–270 insert the clause at FAR 52.215–2 in the supplemental agreement and make it applicable to the set-aside portion only.

1852.215–10 Late submissions, modifications, and withdrawals of proposals.

As prescribed in 1815.407, substitute the following Alternate I for paragraphs (a) and (b) of FAR 52.215–10 in NASA solicitations:

NASA Alternate I (April 1984)

(a) Any proposal or any modification of a proposal (except a modification resulting from the Contracting Officer's request for "best and final" offers) received at the office designated in the solicitation after the exact time specified for receipt need not be considered unless it is received before award is made and it—

(1) Was sent by registered or certified mail not later than the fifth calendar day before the date specified for receipt of offers (e.g., an offer submitted in response to a solicitation requiring receipt of offers by the 20th of the month must have been mailed by the 15th);

(2) Was sent by mail (or telegram if authorized) and it is determined by the Government that the late receipt was due solely to mishandling by the Government after receipt at the Government installation; or

(3) Is the only proposal received.

(b) However, the Government reserves the right to consider proposals or modifications thereof received after the date indicated for such purpose, but before award is made, should such action be in the best interest of the Government.

1852.215–70 Increases in estimated costs.

The contracting officer shall insert the following solicitation provision, as prescribed at 1815.613–72:

Increases in Estimated Costs (April 1984)

Once the prospective Contractor has been selected, the estimated costs submitted with its proposal shall not be subject to increase, except for changes in certified cost or pricing data submitted with the proposal, unless changes are made in the requirements of the request for proposals. Furthermore, increases shall be considered only in regard to those requirements that are actually affected by the changes (whether the changes result in an increase or decrease in the requirements and whether they are initiated by the Government or the offeror), and then only to the extent that such changes are specifically identified and justified. Negotiation of such increases will be conducted separately, and not as part of a combined overall negotiation of the estimated cost and fee of the proposed contract.

(End of provision)

1852.215–71 Adjustment for subcontract price redetermination.

In accordance with 1815.870–2, insert the clause below in contract modifications to price redetermination or fixed-price incentive contracts that established revised contract prices in those cases when final subcontract prices have not been determined. The clause provides for adjustment of the total amount paid or to be paid under the contract due to subsequent redetermination of the specified subcontracts:

Adjustment for Subcontract Price Redetermination (April 1984)

Promptly upon the establishment of firm prices for each of the subcontracts listed below, the Contractor shall submit, in such form and detail as the Contracting Officer may reasonably require, a statement of costs incurred in the performance of such subcontract and the firm price established therefor. Thereupon, notwithstanding any other provisions of this contract as amended by this modification, the Contractor and the Contracting Officer shall negotiate an equitable adjustment in the total amount paid or to be paid under this contract to reflect such subcontract price revision. The equitable adjustment shall be evidenced by a modification to this contract.

[List Subcontracts]

(End of clause)

1852.216–7 Allowable cost and payment.

In paragraph (h)(2)(ii)(B) of the Allowable Cost and Payment clause at FAR 52.216–7 the period of years may be increased to correspond with any statutory period of limitation applicable to claims of third parties against the contractor; provided that a corresponding increase is made in the period for retention of records required in paragraph (d) of the clause at FAR 52.215–1, Examination of Records by Comptroller General.

1852.216–13 Allowable cost and payment—facilities.

In paragraph (g)(2)(ii) of the Allowable Cost and Payment—Facilities clause at FAR 52.216–13 the period of years may be increased to correspond with any statutory period of limitation applicable to claims of third parties against the contractor; provided that a corresponding increase is made in the period for retention of records required in paragraph (d) of the clause at FAR 52.215–1, Examination of Records by Comptroller General.

1815.216–7001 Economic price adjustment—basic steel, aluminum, brass, bronze, or copper mill products.

As prescribed in 1816.203(b), insert the following clause when applicable.

Economic Price Adjustment—Basic Steel, Aluminum, Brass, Bronze, or Copper Mill Products (April 1984)

(a) The Contractor warrants that the unit price stated herein for . . . is not in excess of the Contractor's applicable established price in effect on the date set for opening of bids (or the contract date if this is a negotiated contract) for like quantities of the same item. The term "unit price" excludes any part of the price which reflects requirements for preservation, packaging, and packing beyond standard commercial practice. The term "established price" means one which is an established catalog or market price for a commercial item sold in substantial quantities to the general public and thus meets the criteria of paragraph 15.804–3(c) of the Federal Acquisition Regulation. Such price is the net price after applying any applicable standard trade discounts offered by the Contractor from its catalog, list, or schedule price.

(b) The Contractor shall promptly notify the Contracting Officer as to the amount and effective date of each decrease in any applicable established price, and each corresponding contract unit price shall be decreased by the same percentage that the said established price is decreased. Such decrease shall apply to items delivered on and after the effective date of the decrease in the Contractor's established price, and this contract shall be modified accordingly. The Contractor shall certify on each invoice that each unit price stated therein reflects all decreases required by this clause or shall certify on the final invoice that all price decreases required by this clause have been applied in the manner herein required.

(c) If the Contractor's applicable established price is increased after the date set for opening of bids (or the contract date, if this is a negotiated contract) the corresponding contract unit price shall be increased, upon the Contractor's request in writing to the Contracting Officer, by the same percentage that the established price is increased and the contract shall be modified accordingly; *provided* that—

(1) The aggregate of the increases in any contract unit price under this clause shall not exceed 10 percent of the original contract unit price;

(2) The increased contract unit price shall be effective on the effective date of the increase in the applicable established price if the Contractor's written request is received by the Contracting Officer within 10 days thereafter but, if not, the effective date of increased unit price shall be the date of receipt by the Contracting Officer of such request;

(3) The increased contract unit price shall not apply to quantities scheduled under the contract for delivery before the effective date of the increased contract unit price unless the Contractor's failure to deliver before such date results from causes beyond the control and without the fault or negligence of the Contractor within the meaning of the Default clause of this contract.

(4) No modification incorporating an increase in a contract unit price shall be executed under this clause until the increase in the applicable established price has been verified by the Contracting Officer.

(d) Within 30 days after receipt of the Contractor's written request, the Contracting Officer may cancel, without liability to either party, any portion of the contract affected by the requested increase and undelivered at the time of such cancellation. However, if the Contractor certifies to the Contracting Officer by notice received within 10 days after the Contractor receives the cancellation notice that certain items were completed or in the

process of manufacture at the time the Contractor received the cancellation notice, the Contractor may then deliver those items, and the Government shall pay for them at the increased contract unit price to the extent provided by paragraph (c) above. Any standard steel supply shall be deemed to be in the process of manufacture when the steel therefor is in any state of processing after the beginning of the furnace melt.

(e) Pending any cancellation of this contract as provided in paragraph (d) above and thereafter if there is no cancellation, the Contractor shall continue deliveries according to the delivery schedule of the contract and shall be paid for such deliveries at the contract unit price increased to the extent provided by paragraph (c) above.

(End of clause)

1852.216–7002 Economic price adjustment—nonstandard steel items.

As prescribed in 1816.203(b), insert the following clause when applicable.

Economic Price Adjustment—Nonstandard Steel Items (April 1984)

(a) The term "established price," as used in this clause, is one which is an established catalog or market price of commercial items sold in substantial quantities to the general public and thus meets the criteria of paragraph 15.804–3(c) of the Federal Acquisition Regulation. Such a price is the net price after applying any applicable standard trade discounts offered by the Contractor from its catalog, list, or scheduled price. (But see subparagraph (i)(8) below.)

(b) Each contract unit price shall be subject to revision under this clause to reflect changes in the cost of labor and steel. For the purpose of any such price revision, the proportion of the contract unit price attributable to costs of labor not otherwise included in the price of the steel item identified in paragraph (d) below shall be . . . percent, and the proportion of the contract unit price attributable to the cost of steel shall
be . . . percent. (See subparagraph (i)(1) below.)

(c) For the purposes of this paragraph, the term "labor index" shall mean the average straight-time hourly earnings of the Contractor's employees in the . . . shop of the contractor's . . . plant (see subparagraph (i)(2)) for any particular month. The word "month" as used herein means "calendar month;" *provided*, however, that if the Contractor's accounting period does not coincide with the calendar month, then such accounting period shall be used throughout the clause in lieu of "month". Unless otherwise specified in this contract, the labor index shall be computed by dividing the total straight time earnings of the Contractor's employees in the particular shop identified above for any given month by the total number of straight time hours worked by such employees in that month. Any revision in a contract unit price to reflect changes in the cost of labor shall be computed solely by reference to the "base labor index," which shall be the average of the labor indices for the three months consisting of the month of . . . , 19 . . . , (see subparagraph (i)(3)) the month immediately preceding and the month immediately following, and to the "current labor index," which shall be the average of the labor indices for the month in which delivery of suppliers is required to be made in accordance with the terms of this contract and the month preceding.

(d) Any revision in a contract unit price to reflect changes in the cost of steel shall be computed solely by reference to the base "base steel index," which shall be the Contractor's established price (see subparagraph (i)(8)) including all applicable extras of $ . . . per . . . (see subparagraph (i)(4)) for . . . (see subparagraph (i)(5)) on . . . , 19 . . . , (see subparagraph (i)(6)) and the "current steel index," which shall be the Contractor's established price (see subparagraph (i)(8)) of said item including all applicable extras in effect . . . days (see subparagraph (i)(7)) prior to the first day of the month in which delivery of supplies is required to be made in accordance with the terms of the contract.

(e) Each contract unit price shall be revised for each month in which, by the terms of this contract, delivery of supplies is required to be made, and such revised contract unit price shall apply to the deliveries of those quantities of supplies required to be made in that month regardless of when actual delivery is made of said quantities of supplies. Each revised contract unit price for any month shall be computed by adding together the following three amounts: (1) The amount (representing the adjusted cost of labor) obtained by multiplying . . . percent of the contract unit price by a fraction, the numerator of which shall be the current labor index and the denominator of which shall be the base labor index; (2) the amount (representing the adjusted cost of steel) obtained by multiplying . . . percent of the contract unit price by a fraction, the numerator of which shall be the current steel index and the denominator of which shall be the base steel index; and (3) the amount equal to . . . percent of the original contract unit price (representing that portion of such unit price which relates neither to the cost of labor nor to the cost of steel and which is therefore not subject to revision (see subparagraph (i)(1)); provided, however, that any revised contract unit price made under this clause shall in no event exceed 110 percent of the original contract unit price. All computations shall be made to the nearest one-hundredth of one cent.

(f) Pending revisions of the contract unit prices, if any, to be made under this clause, the Contractor shall be paid the contract unit prices for deliveries made. Within thirty days after the final delivery of supplies or within such further period of time as may be authorized by the Contracting Officer, the Contractor shall furnish a statement setting forth and certifying the correctness of (1) the average straight-time hourly earnings of the Contractor's employees in the shop of the Contractor identified in paragraph (c) above which earnings are relevant to the computations of the "base labor index" and the "current labor index" and (2) the Contractor's established prices (see subparagraph (i)(8)) including all applicable extras for like quantities of the item identified in paragraph (d) above, which prices are relevant to the computation of the "base steel index" and the "current steel index." Upon request of the Contracting Officer, the Contractor shall make available its records used in the computation of the labor indices. After the receipt of such certificate by the Contracting Officer, the revised contract unit prices shall be computed in accordance with this clause and this contract shall be modified accordingly. However, no modification to this contract shall be made under this clause until the revised established price (see subparagraph (i)(8)) has been verified by the Contracting Officer.

(g) In the event of any total or partial termination of any item of this contract for the convenience of the Government, the month in which notice of such termination is received by the Contractor, if prior to the month in which the delivery is required by this contract, shall be considered the month in which delivery of such terminated or partially terminated item is required for the purpose of determining the current labor and steel indices under paragraphs (c) and (d) hereof; *provided*, however, that as to the quantity of such item which is not terminated for convenience, the month in which delivery is required by this contract shall continue to apply for determining said indices. In the case of termination of any steel item for default of the Contractor, any price revision shall be limited to the quantity of such item which has been delivered by the Contractor and accepted by the Government prior to receipt by the Contractor of notice of termination for default.

(h) As used in this clause, the month in which delivery of supplies is required to be made under this contract means any month in which a specific quantity of units of the supplies called for by this contract is required to be delivered; *provided*, however, that if the failure of the Contractor to make delivery of such quantity shall have arisen out of causes beyond the control and without the fault or negligence of the Contractor, within the meaning of the Default clause of this contract, the quantity not delivered shall be required to be delivered as promptly as possible after the cessation of the cause of such failure, and the delivery schedule in this contract shall be amended accordingly.

(i) Offerors shall complete all blanks above in accordance with the following:

(1) Insert the same percentage figures for the corresponding blanks in paragraphs (b) and in (e)(1) and (2). In paragraph (e)(3); bidder insert the percentage representing the difference between the sum of the percentages inserted in paragraph (b) and 100 percent.

(2) Identify the shop and plant in which the standard steel mill item identified in paragraph (d) will be finally fabricated or processed into the contract item.

(3) Insert the month of bid opening, or the month in which the Contractor submitted his proposal if this is a negotiated contract.

(4) Insert the unit price and unit measure of the standard steel mill item used by the Contractor in the manufacture of the contract item.

(5) Identify the standard steel mill item used by the Contractor in the manufacture of the contract item.

(6) Insert the date set for bid opening, or the date of the Contractor's quotation if this is a negotiated contract.

(7) Insert the number of days which represents the Contractor's best estimate of the period of time required for processing the standard steel mill item in the shop identified in paragraph (c).

(8) If this is a negotiated procurement and when there is no "established price" or when it is not desirable to use such price, refer to another appropriate price basis in paragraph (d), such as an established interplant price.

(End of clause)

1852.216–7003 Evaluation of bids subject to economic price adjustment.

As prescribed at 1816.203–4(h), insert the following provision:

Evaluation of Bids Subject to Economic Price Adjustment (April 1984)

Notwithstanding the requirements of the clause entitled "*. . . .," bids shall be evaluated on the basis of quoted prices without an amount for economic price adjustment being added. Bids which provide for a ceiling lower than that stipulated, if a ceiling is stipulated in the clause, will also be evaluated on this basis, but any resultant award will be made at the lower ceiling. Bids which provide for adjustment that may exceed the maximum adjustment stipulated, if a maximum adjustment is stipulated in the clause, or which limit or delete the downward adjustment, if a downward adjustment is stipulated in the clause, shall be rejected as nonresponsive.

**Insert the title of the clause providing for economic price adjustment.*

(End of provision)

1852.216–7004 Estimated cost and cost sharing.

As prescribed at 1816.303(d)(4), insert the following clause in all contracts resulting from unsolicited proposals and under which the contractor will share costs.

Estimated Cost and Cost Sharing (April 1984)

(a) It is estimated that the total cost of performing the work under this contract will be *(insert total estimated cost)* $. . . .

(b) For the performance of the work under this contract, the Contractor shall be reimbursed for not more than . . . percent of the costs of performance determined to be allowable under the clause of this contract entitled Allowable Cost and Payment. The remaining . . . percent or more of the costs of performance so determined shall constitute the Contractor's share for which it will not be reimbursed by the Government.

(c) For purposes of the clause of this contract entitled Limitation of Cost, the total estimated cost to the Government is hereby established as *(insert estimated Government share)* $. . . .; this amount is the maximum cost for which the Government is obligated.

(d) The Contractor will maintain records of all contract costs claimed by the Contractor as constituting part of its share, and such records shall be subject to audit by the Government. Cost contributed by the Contractor shall not be charged to the Government under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program).

(End of clause)

1852.216–7005 Estimated cost and fixed fee.

As prescribed at 1816.307–70(a) insert the following clause:

Estimated Cost and Fixed Fee (April 1984)

The estimated cost of this contract is . . . exclusive of the fixed fee of . . . The total of estimated cost and fixed fee is . . . . .

(End of clause)

1852.216–7006 Payment of fixed fee.

As prescribed at 1816.307–70(b), insert the following clause:

Payment of Fixed Fee (April 1984)

The fixed fee shall be paid in monthly installments based upon the percentage of completion of work as determined by the Contracting Officer.

(End of clause)

1852.216–7007 Award fee.

As prescribed at 1816.405, the contracting officer shall include the following clause in solicitations and contracts when a cost-plus-award-fee contract is contemplated:

Award Fee (April 1984)

(a) The Government shall pay the Contractor for performing this contract such base fee, if any, and such additional fee as may be awarded, as provided in the Schedule.

(b) Payment of the base fee and award fee shall be made as specified in the Schedule; *provided*, that after payment of 85 percent of the base fee and potential award fee, the Contracting Officer may withhold further payment of the base fee and award fee until a reserve is set aside in an amount that the Contracting Officer considers necessary to protect the Government's interest. This reserve shall not exceed 15 percent of the total base fee and potential award fee or $100,000, whichever is less.

(c) Award fee determinations made by the Government under this contract are not subject to the Disputes clause.

(End of clause)

1852.222–70 Facilities nondiscrimination notice.

As prescribed at 1822.7002(a), insert the following clause in all solicitations involving leases and resulting leases:

Facilities Nondiscrimination Notice (April 1984)

If the total annual rental under this lease exceeds $10,000 per year, or if the total annual rental under this lease combined with the total annual rental under all other NASA leases of space in the building in which the space covered by this lease is located exceeds $10,000 per year, the lessor agrees to comply with the requirements of the Facilities Nondiscrimination clause.

1852.222–71 Facilities nondiscrimination.

As prescribed at 1822.7002(b), insert the following clause in leases:

Facilities Nondiscrimination (April 1984)

(a) As used in this clause, the term "facility" means stores, shops, restaurants, cafeterias, restrooms, and any other facility of a public nature in the building in which the space covered by this lease is located.

(b) The lessor agrees not to discriminate by segregation or otherwise against any person or persons because of race, color, religion, or national origin in furnishing or by refusing to furnish, to such person or persons the use of any facility, including any and all services, privileges, accommodations, and activities provided thereby. Nothing herein shall require the furnishing to the general public of the use of any facility customarily furnished by the lessor solely to tenants, their employees, customers, patients, clients, guests, and invitees.

(c) It is agreed that the lessor's noncompliance with the provisions of this clause shall constitute a material breach of this lease. In the event of such noncompliance, the Government may take appropriate action to enforce compliance, may terminate this lease, or may pursue such other remedies as may be provided by law. In the event of termination, the lessor shall be liable for all excess costs of the Government in acquiring substitute space, including but not limited to the cost of moving to such space. Substitute space shall be obtained in as close proximity to the lessor's building as is feasible and moving costs will be limited to the actual expenses thereof as incurred.

(d) It is agreed that from and after the date hereof the lessor will, at such time as any agreement is to be entered into or a concession is to be permitted to operate, include or require the inclusion of the foregoing provisions of this clause in every such agreement or concession pursuant to which any person other than the lessor operates or has the right to operate any facility. Nothing herein contained, however, shall be deemed to require the lessor to include or require the inclusion of the foregoing provisions of this clause in any existing agreement or concession arrangement or one in which the contracting party other than the lessor has the unilateral right to renew or extend the agreement or arrangement, until the expiration of the existing agreement or arrangement and the unilateral right to renew or extend. The lessor also agrees that it will take any and all lawful actions as expeditiously as possible, with respect to any such agreement as NASA may direct as a means of enforcing the intent of this clause, including, but not limited, to termination of the agreement or concession and institution of court action.

(End of clause)

1852.223-70 Safety and health.

As prescribed at 1823.7004, insert the following clause:

Safety and Health (April 1984)

(a) The Contractor shall take all reasonable safety and health measures in performing under this contract and shall, to the extent set forth in the Schedule of the contract, submit a safety plan and a health plan for the Contracting Officer's approval. The Contractor shall comply with all applicable Federal, State and local laws, applicable to safety and health which are in effect on the date of this contract and with the safety and health standards, specifications, reporting requirements, and provisions as set forth in the Schedule of the contract.

(b) The Contractor shall take or cause to be taken such other safety and health measures as the Contracting Officer may direct. To the extent that the Contractor may be entitled to an equitable adjustment for such measures under the terms and conditions of this contract, such equitable adjustment shall be determined pursuant to the procedures of the changes clause of this contract; *provided,* that no adjustment shall be made under this clause for any change for which an equitable adjustment is expressly provided under any other provision of this contract.

(c) The Contractor shall immediately notify and promptly report to the Contracting Officer or a designee any accident, incident or exposure resulting in fatality, lost-time occupational injury, occupational disease, contamination of property beyond any stated acceptable threshold limits set forth in the Schedule of the contract, or property loss of $25,000 or more arising out of work performed under this contract; *provided,* however, the Contractor will not be required to include in any report an expression of opinion as to the fault or negligence of any employee. Service Contractors (excluding construction contracts) will provide quarterly reports which specify lost-time frequency rate, number of lost-time injuries, exposure, and accident/incident dollar losses as specified in the Schedule of the contract. The Contractor will investigate all such work-related incidents or accidents to the extent necessary to determine their causes and furnish the Contracting Officer with a report, in such form as the Contracting Officer may require, of the investigative findings and proposed or completed corrective actions.

(d)(1) The Contracting Officer may notify the Contractor in writing of any noncompliance with the provisions of this clause and may also specify corrective actions to be taken. The Contractor shall promptly take and report any necessary corrective action.

(2) If the Contractor fails or refuses to institute prompt corrective action in accordance with subparagraph (1) above, the Contracting Officer may invoke the provisions of the Stop Work Order clause in this contract or any other remedy legally available to the Government in the event of such failure by the Contractor.

(e) The Contractor (or subcontractor or supplier) shall cause the substance of this clause including this paragraph (e) and any applicable Schedule provisions, with appropriate changes of designations of the parties, to be inserted in subcontracts of every tier which (1) amount to $1,000,000 or more unless the Contracting Officer makes a written determination that this is not required, (2) require construction, repair, or alteration in excess of $25,000, or (3) regardless of dollar amount, involve the use of hazardous materials or operations.

(f) The Contractor agrees that authorized Government representatives of the Contracting Officer shall have access to and the right to examine the sites or areas where work under this contract is being performed in order to determine the adequacy of the Contractor's safety and health measures under this clause.

(g) As a part of the Contractor's safety plan (and health plan, where applicable) and to the extent required by the Schedule, the Contractor shall furnish a list of all hazardous operations to be performed, including operations indicated in paragraphs (a) and (b) of this clause, and shall in addition furnish a list of other major or key operations required or planned in the performance of the contract although not deemed hazardous by the Contractor. NASA and the Contractor will jointly decide which operations are to be considered hazardous, with NASA as the final authority. Before hazardous operations commence, the Contractor will develop and submit for NASA concurrence *either or both* of the following as required by the Schedule of the contract or as may be required at the direction of the Contracting Officer:

(1) Written Hazardous Operating Procedures for all hazardous operations.

(2) A certification program for personnel involved in hazardous operations.

(End of clause)

1852.223-71 Frequency authorization.

As prescribed at 1823.7101, insert the following clause:

Frequency Authorization (April 1984)

(a) Authorization of radio frequencies required in support of this contract shall be obtained through the Contracting Officer by the Contractor or subcontractor in need thereof. Frequency management procedures furnished by the Contracting Officer shall be followed in obtaining radio frequency authorization.

(b) For any experimental, developmental, or operational equipment for which the appropriate frequency allocation has not been made, the Contractor or subcontractor shall provide the technical operating characteristics of the proposed electromagnetic radiating device to the Contracting Officer during the initial planning, experimental, or developmental phase of contractual performance. NASA Form 566, "Application for Radio Frequency Assignment," shall be used for this purpose and shall be prepared in accordance with instructions contained on the form.

(c) This clause including this paragraph (c), shall be included in all subcontracts which call for developing, producing, testing, or operating a device for which a radio frequency authorization is required.

(End of clause)

1852.225-70 Percent foreign content.

As prescribed at 1825.109-70, insert the following provision in all solicitations except those made outside the United States:

Percent Foreign Content (April 1984)

Approximately . . . . percent of the proposed contract price represents foreign content or effort.

(End of provision)

1852.225-71 Nondomestic construction materials.

As prescribed at 1825.205-70, insert the following clause in all construction contracts.

Nondomestic Construction Materials (April 1984)

The requirements of the clause entitled "Buy American Act—Construction Materials" do not apply to construction materials or their components as set forth below:

(End of clause)

1852.228-70 Aircraft ground and flight risk.

As prescribed in 1828.370-1(a), the contracting officer shall insert the following clause:

Aircraft Ground and Flight Risk (April 1984)

(a) Notwithstanding any other provisions of this contract, except as may be specifically provided in the Schedule as an exception to this clause, the Government, subject to the definitions and limitations of this clause, assumes the risk of damage to, loss, or destruction of aircraft "in the open," during "operation," and in "flight", as these terms are defined below, and agrees that the Contractor shall not be liable to the Government for any such damage, loss, or destruction, the risk of which is so assumed by the Government.

(b) For the purposes of this clause, the following definitions apply:

(1) Unless otherwise specifically provided in the Schedule, the term "aircraft" means—

(i) Aircraft (including (A) complete aircraft, and (B) aircraft in the course of being manufactured, disassembled, or reassembled; *provided,* that an engine or a portion of a wing or a wing is attached to a fuselage of such aircraft) to be furnished to the Government under this contract (whether before or after acceptance by the Government); and

(ii) Aircraft (regardless of whether in a state of disassembly or reassembly) furnished by the Government to the Contractor under this contract; including all property installed therein, or in the process of installation, or temporarily removed from such aircraft; *provided,* however, that such aircraft and property are not covered by a separate bailment agreement.

(2) The term "in the open" means located wholly outside of buildings on the

Contractor's premises or at such other places as may be described in the Schedule as being in the open for the purposes of this clause, except that aircraft furnished by the Government shall be deemed to be in the open at all times while in the Contractor's possession, care, custody, or control.

(3) The term "flight" means any flight demonstration, flight test, taxi test, or other flight, made in the performance of this contract, or for the purpose of safeguarding the aircraft, or previously approved in writing by the Contracting Officer. With respect to land based aircraft, "flight" shall commence with the taxi roll from a flight line on the Contractor's premises, and continue until the aircraft has completed the taxi roll in returning to a flight line on the Contractor's premises. With respect to seaplanes, "flight" shall commence with the launching from a ramp on the Contractor's premises and continue until the aircraft has completed its landing run upon return and is beached at a ramp on the Contractor's premises. With respect to helicopters, "flight" shall commence upon engagement of the rotors for the purpose of take-off from the Contractor's premises and continue until the aircraft has returned to the ground on the Contractor's premises and the rotors are disengaged. With respect to vertical take-off aircraft, "flight" shall commence upon disengagement from any launching platform or device on the Contractor's premises and continue until the aircraft has been re-engaged to any launching platform or device on the Contractor's premises; *provided*, however, that aircraft off the Contractor's premises shall be deemed to be in flight when on the ground or water only during periods of reasonable duration following emergency landing, other landings made in the performance of this contract, or landings approved by the Contracting Officer in writing.

(4) The term "Contractor's premises" means those premises designated as such in the Schedule or in writing by the Contracting Officer, and any other place to which aircraft are moved for the purpose of safeguarding the aircraft.

(5) The term "operation" means operations and tests, other than on any production line, of aircraft, when not in flight, whether or not the aircraft is in the open or in motion during the making of any such operations or tests, and includes operations and tests of equipment, accessories, and power plants only when installed in aircraft.

(6) The term "flight crew members" means the pilot, copilot, and unless otherwise specifically provided in the Schedule, the flight engineer and navigator when required or assigned to their respective crew positions to conduct any flight on behalf of the Contractor.

(c)(1) The Government's assumption of risk under this clause, as to aircraft in the open, shall continue in effect unless terminated pursuant to subparagraph (3) below. Where the Contracting Officer finds that any of such aircraft is in the open under unreasonable conditions, the Contracting Officer shall notify the Contractor in writing of the conditions found to be unreasonable and require the Contractor to correct such conditions within a reasonable time.

(2) Upon receipt of such notice, the Contractor shall act promptly to correct such conditions, regardless of whether it agrees that such conditions are in fact unreasonable. To the extent that the Contracting Officer may later determine that such conditions were not in fact unreasonable, an equitable adjustment shall be made in the contract price to compensate the Contractor for any additional costs incurred in correcting such conditions and the contract shall be modified in writing accordingly.

(3) If the Contracting Officer finds that the Contractor has failed to act promptly to correct such conditions or has failed to correct such conditions within a reasonable time, the Contracting Officer may terminate the Government's assumption of risk under this clause, as to any of the aircraft which is in the open under such conditions, such termination to be effective at 12:01 A.M. on the 15th day following the day of receipt by the Contractor of written notice thereof. If the Contracting Officer later determines that the Contractor acted promptly to correct such conditions or that the time taken by the Contractor was not in fact unreasonable, an equitable adjustment shall, notwithstanding paragraph (g) of this clause, be made in the contract price to compensate the Contractor for any additional costs incurred as a result of termination of the Government's assumption of risk under this clause and the contract shall be modified in writing accordingly.

(4) If the Government's assumption of risk under this clause is terminated in accordance with subparagraph (3) above, the risk of loss with respect to Government-furnished property shall be determined in accordance with the Government Property clause of this contract, if any, until the Government's assumption of risk is reinstated in accordance with subparagraph (5) below.

(5) When unreasonable conditions have been corrected, the Contractor shall promptly notify the Government thereof. The Government may or may not elect to again assume the risks and relieve the Contractor of liabilities as provided in this clause, and the Contracting Officer shall notify the Contractor of the Government's election. If, after correction of the unreasonable conditions the Government elects to again assume such risks and relieve the Contractor of such liabilities, the Contractor shall be entitled to an equitable adjustment in the contract price for costs of insurance, if any, extending from the end of the third working day after the Contractor notifies the Government of such correction until the Government notifies the Contractor of such election. If the Government elects not to again assume such risks and such conditions have in fact been corrected, the Contractor shall be entitled to an equitable adjustment for costs of insurance, if any, extending after such third working day.

(d) The Government's assumption of risk shall not extend to damage to or loss or destruction of such aircraft—

(1) Resulting from failure of the Contractor, due to willful misconduct or lack of good faith of any of the Contractor's managerial personnel, to maintain and administer a program for the protection and preservation of aircraft in the open and during operation, in accordance with sound industrial practice (the term "Contractor's managerial personnel" means the Contractor's directors, officers, and any managers, superintendents, or other equivalent representatives, who have supervision or direction of all or substantially all of the Contractor's business or of the Contractor's operations at any one plant or separate location at which this contract is performed or a separate and complete major industrial operation in connection with the performance of this contract);

(2) Sustained during flight if the flight crew members conducting such flight have not been approved in writing by the Contracting Officer;

(3) While in the course of transportation by rail or by conveyance on public streets, highways, or waterways, except for Government-furnished property;

(4) To the extent that such damage, loss, or destruction is in fact covered by insurance;

(5) Consisting of wear and tear, deterioration (including rust and corrosion), freezing, or mechanical, structural, or electrical breakdown or failure, unless such damage is the result of other loss, damage, or destruction covered by this clause; *provided*, however, in the case of Government-furnished property, if such damage consists of reasonable wear and tear or deterioration or results from inherent vice in such property, this exclusion shall not apply;

(6) Sustained while the aircraft is being worked upon and directly resulting therefrom, including but not limited to any repairing, adjusting, servicing or maintenance operation, unless such damage, loss, or destruction is of a type which would be covered by insurance which would customarily have been maintained by the Contractor at the time of such damage, loss, or destruction, but for the Government's assumption of risk under this clause.

(e) With the exception of damage to or loss or destruction of aircraft in "flight," the Government's assumption of risk under this clause shall not extend to the first $1,000 of loss or damage resulting from each event separately occurring. The Contractor assumes the risk of and shall be responsible for the first $1,000 of loss of or damage to aircraft "in the open" or during "operation" resulting from each event separately occurring, except for reasonable wear and tear and except to the extent the loss or damage is caused by negligence of Government personnel. If the Government elects to require that the aircraft be replaced or restored by the Contractor to the condition in which it was immediately prior to the damage, the equitable adjustment in the price authorized by paragraph (i) below shall not include the dollar amount of the risk assumed by the Contractor under this paragraph. In the event the Government does not elect repair or replacement, the Contractor agrees to credit the contract price or pay the Government $1,000 (or the amount of the loss if smaller) as directed by the Contracting Officer.

(f) A subcontractor shall not be relieved from liability for damage to or loss or destruction of aircraft while in its possession or control, except to the extent that the

subcontract, with the prior written approval of the Contracting Officer, provides for relief of the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of such aircraft in as good condition as when received, except for reasonable wear and tear or for the utilization of the property in accordance with the provisions of this contract. Where a subcontractor has not been relieved from liability for any damage, loss, or destruction of aircraft and any damage, loss, or destruction occurs, the Contractor shall enforce the liability of the subcontractor for such damage to or loss or destruction of the aircraft for the benefit of the Government.

(g) The Contractor warrants that the contract price does not and will not include, except as may be otherwise authorized in this clause, any charge or contingency reserve for insurance (including self-insurance funds or reserves) covering any damage to or loss or destruction of aircraft while in the open, during operation, or in flight, the risk of which has been assumed by the Government under the provisions of this clause, whether or not such assumption may be terminated as to aircraft "in the open."

(h)(1) In the event of damage to, or loss or destruction of, aircraft "in the open," during operation, or in flight, the Contractor shall take all reasonable steps to protect such aircraft from further damage, separate damaged and undamaged aircraft, put all aircraft in the best possible order, and, further, except in cases covered by paragraph (e) above, the Contractor should furnish to the Contracting Officer a statement of—

(i) The damaged, lost, or destroyed aircraft;

(ii) The time and origin of the damage, loss, or destruction;

(iii) All known interests in commingled property of which aircraft are a part; and

(iv) The insurance, if any, covering any part of the interest in such commingled property.

(2) Except in cases covered by paragraph (e) above, an equitable adjustment shall be made in the amount due under this contract for expenditures made by the Contractor in performing its obligations under this paragraph (h), and this contract shall be modified in writing accordingly.

(i) If, prior to delivery and acceptance by the Government, any aircraft is damaged, lost, or destroyed and the Government has under this clause assumed the risk of such damage, loss, or destruction, the Government shall either require that such aircraft be replaced or restored by the Contractor to the condition in which it was immediately prior to such damage or shall terminate this contract with respect to such aircraft. In the event that the Government requires that the aircraft be replaced or restored, an equitable adjustment shall be made in the amount due under this contract and in the time required for its performance, and this contract shall be modified in writing accordingly. If, in the alternative, this contract is terminated under this paragraph with respect to such aircraft, and under this clause the Government has assumed the risk of such damage, loss, or destruction, the Contractor shall be paid the contract price for said aircraft (or, if applicable, any work to be performed on said aircraft) less such amounts as the Contracting Officer determines (1) that it would have cost the Contractor to complete the aircraft (or any work to be performed on said aircraft), together with anticipated profit, if any, on any such uncompleted work and (2) to be the value, if any, of the damaged aircraft or any remaining portion thereof retained by the Contractor. The Contracting Officer shall have the right to prescribe the manner of disposition of the damaged, lost, or destroyed aircraft or any remaining parts thereof, and, if any additional costs of such disposition are incurred by the Contractor, a further equitable adjustment will be made in the amount due to the Contractor.

(j) In the event the Contractor is at any time reimbursed or compensated by any third person for any damage, loss, or destruction of any aircraft, the risk of which has been assumed by the Government under the provisions of this clause and for which the Contractor has been compensated by the Government, it shall equitably reimburse the Government. The Contractor shall do nothing to prejudice the Government's rights to recover against third parties for any such damage, loss, or destruction and, upon the request of the Contracting Officer, shall at the Government's expense furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment or subrogation in favor of the Government) in obtaining recovery.

(End of clause)

Alternate I (APRIL 1984) In paragraph (b) of the basic clause, certain of the defined terms may be modified by insertion of appropriate additional definitions, (see subparagraphs (a) through (c) below). The purpose of the clause is to have the Government assume risks which generally entail unusually high insurance premiums and which are not covered by the contractor's "contents," "work-in-process," or other similar insurance. It is recognized that all of the definitions prescribed in the clause may not cover all situations which should be covered if the above purpose is to be accomplished.

(a) Since the standard definition of "aircraft" contemplates conventional types of winged aircraft, a modified definition is necessary if the contract covers helicopters, vertical take-off aircraft, lighter-than-air airships, or other non-conventional types of aircraft. The modified definition should take into consideration that the aircraft has reached a point of manufacture comparable to that required in the standard definition.

(b) The definition of "in the open" may be modified to include "hush houses," test hangars, comparable structures, and other designated areas.

(c) "Contractor's premises" shall be expressly defined in the Schedule and shall be limited to those locations where aircraft may be located during and for the performance of the contract. "Contractor's premises" may include, but are not limited to, premises owned or leased by the contractor or premises for which the contractor has a permit, license, or other right of use either exclusively or jointly with others, including Government airfields.

Alternate II (APRIL 1984). Paragraph (d)(3) of the baisc clause may be varied to provide for Government assumption of risk of transportation by conveyance on streets or highways were the Contracting Officer determines that such transportation is limited to the vicinity of the contractor's premises and is merely an incident to work performed under the contract.

1852.228–470 Reimbursement for war-hazard losses.

As prescribed at 1828.309, insert the following clause:

Reimbursement for War-Hazard Losses (April 1984)

(a) The Contractor's costs for assuming liability for employee protection against war-hazard risks pursuant to paragraph (b) of the clause of this contract entitled "Worker's Compensation and War-Hazard Insurance Overseas" shall be an allowable cost under this contract, subject to the following:

(1) The Contractor shall submit proof of loss files to support payment or denial of each claim.

(2) As soon as practicable, but no later than one year after the expiration or termination of this contract, unless the time shall be extended by the Contracting Officer, the Contractor shall convert each claim which has not been finally settled into a suitable arrangement under which the claim can be extinguished by the Contractor with a lump sum payment. Subject to approval by the Contracting Officer, the Contractor shall thereupon obtain necessary release documents and settle the claim by lump sum arrangement, taking into account any payments previously made.

(3) As to any potential claim which is known to, or reasonably should be within the knowledge of, the Contractor at the time of final settlement under this contract, the Contractor shall, at the time, present to the Government a full report and evaluation, indicating as to each potential claim that a reasonable investigation of the circumstances has been made, the results thereof, an evaluation of the merits, and an estimate of the amount involved should the potential claim mature into a valid obligation.

(4) The cost of insurance against a liability reimbursable under this clause shall not be an allowable cost or otherwise recoverable under this contract.

(b) The Government may require the Contractor to assign to the Government in the manner, at the times, and to the extent directed by the Contracting Officer all right, title, and interest of the Contractor to any refund, rebate, or recapture arising out of any claim settlement. The Government may handle such assigned entitlements in such manner as it deems appropriate and may recover any benefits related to claim settlements.

(c) The Contractor shall, as soon as practicable after an occurrence which appears to give rise to a claim under this portion of the contract, perform such investigations as may be appropriate and promptly notify the Contracting Officer in writing of any additional amount estimated to

be necessary to be obligated on account of such claim or potential claim. In addition, the Contractor shall give the Government or its representatives immediate written notice of any suit or action filed, the cost or expense of which may be reimbursable to the Contractor under this clause. The Contractor agrees to render full assistance to the Government in connection with any third party suit or claim relating to this clause or its subject matter which the Government elects to prosecute or defend in its own behalf.

(End of clause)

1852.228–71 Aircraft—flight risks.

(a) As prescribed in 1828.311–70, insert the following clause:

Aircraft—Flight Risks (April 1984)

(a) Notwithstanding any other provision of this contract (particularly paragraph (g) of the Government Property (Cost-Reimbursement, Time-and-Materials, or Labor-Hour Contracts) clause and paragraph (c) of the Insurance—Liability to Third Persons clause), the Contractor shall not (1) be relieved of liability for, damage to, or loss or destruction of aircraft sustained during flight or (2) be reimbursed for liabilities to third persons for loss of or damage to property or for death or bodily injury which are caused by aircraft during flight, unless the flight crew members have previously been approved in writing by the Contracting Officer.

(b) For the purposes of this clause—

(1) Unless otherwise specifically provided in the Schedule, the term "aircraft" means any aircraft, whether furnished by the Contractor under this contract (either before or after acceptance by the Government) or furnished by the Government to the Contractor under this contract, including all Government Property placed or installed therein or attached thereto; *provided,* however, that such aircraft and property are not covered by a separate bailment agreement.

(2) The term "flight" means any flight demonstration, flight test, taxi test, or other flight made in the performance of this contract or for the purpose of safeguarding the aircraft or previously approved in writing by the Contracting Officer. As to land-based aircraft, "flight" shall commence with the taxi roll from a flight line and continue until the aircraft has completed the taxi roll to a flight line. As to sea planes, "flight" shall commence with the launching from a ramp and continue until the aircraft has completed its landing run and is beached at a ramp. As to helicopters, "flight" shall commence upon the engagement of the rotors for the purpose of take-off and continue until the aircraft has returned to the ground and rotors are disengaged. For vertical take-off aircraft, "flight" shall commence upon disengagement from any launching platform or device and continue until the aircraft has been re-engaged to any launching platform or device.

(3) The term "flight crew members" means the pilot, copilot, and, unless otherwise specifically provided in the Schedule, the flight engineer and navigator when required or assigned to their respective crew positions to conduct any flight on behalf of the Contractor.

(c) If any aircraft is damaged, lost, or destroyed during flight and if the amount of such damage, loss, or destruction exceeds $100,000 or 20 percent of the estimated cost, exclusive of any fee, of this contract, whichever is less, and if the Contractor is not liable for the damage, loss, or destruction under the Government Property (Cost-Reimbursement, Time-and-Materials, or Labor-Hour Contracts) clause of this contract or under paragrah (a) above, then an equitable adjustment for any resulting repair, restoration, or replacement that is required under this contract shall be made (1) in the estimated cost, delivery schedule, or both and (2) in the amount of any fee to be paid to the Contractor, and the contract shall be modified in writing accordingly; *provided,* in determining the amount of adjustment in the fee that is equitable, any fault of the Contractor, its employees, or any subcontractor which materially contributed to the damage, loss, or destruction shall be taken into consideration.

(End of clause)

Alternate I (APRIL 1984). In paragraph (b) of the basic clause, the definition of "aircraft" may be appropriately modified if the contract covers helicopters, vertical take-off aircraft, lighter-than-air airships, or other nonconventional types of aircraft.

1852.231–70 Pricing of adjustments.

In accordance with 1831.102–70, include the following clause in fixed-price contracts that include a Changes clause or provisions for adjustment of the contract price.

Pricing of Adjustments (April 1984)

When costs are a factor in any determination of a contract price adjustment pursuant to the Changes clause or any other provision of this contract, such costs shall be in accordance with Part 31 of the Federal Acquisition Regulation as in effect on the date of this contract.

(End of clause)

1852.232–1 Payments.

When using the clause at FAR 52.232–1 delete the words "upon submission of proper invoices" from the first sentence and substitute the words "within 30 days after receipt of proper invoices, as determined under the 'Invoices' clause of this contract."

1852.232–2 Payments under Fixed-Price Research and Development Contracts.

When using the clause at FAR 52.232–2, delete the words "upon submission of proper invoices" from the first sentence and substitute the words "within 30 days after receipt of proper invoices."

1852.232–4 Payments under Transportation Contracts and Transportation-Related Services Contracts.

When using the clause at FAR 52.232–4, delete the words "upon the submission of properly certified invoices or vouchers" from the first sentence and substitute the words "within 30 days after receipt of properly certified invoices, as determined under the 'Invoices' clause of this contract."

1852.232–7 Payments under Time-and-Materials and Labor-Hour Contracts

When using the clause at FAR 52.232–7, in the last sentence of subparagraph (a)(1) delete the word "Promptly" and substitute the words "Within 30 days." In the third sentence of paragraph (e) delete the word "promptly" and substitute the words "within 30 days."

1852.232–10 Payments under Fixed-Price Architect-Engineer Contracts

When using the clause of FAR 52.232–10, in the first sentence of paragraph (b) delete the words "payment upon properly executed vouchers shall be made to the Contractor, as soon as practicable", and substitute the words "within 30 days after receipt of properly certified vouchers, payment shall be made to the Contractor."

1852.232–70 [Reserved]

1852.232–71 Invoices.

As prescribed in 1832.111–70(a), insert the following clause in fixed-price contracts and solicitations therefor, except those for construction work, architect-engineer services, or utility services:

Invoices (April 1984)

(a)(1) An invoice is a written request for payment under the contract for supplies delivered or for services rendered. In order to be proper, an invoice must include as applicable the following:

(i) Invoice date.

(ii) Name of Contractor.

(iii) Contract number (including order number, if any), contract line item number, contract description of supplies or services, quantity, contract unit of measure and unit price, and extended total.

(iv) Shipment number and date of shipment (bill-of-lading number and weight of shipment will be shown for shipments on Government bills of landing).

(v) Name and address to which payment is to be sent (which must be the same as that in the contract or on a proper notice of assignment).

(vi) Name (where practicable), title, phone number and mailing address of person to be notified in event of a defective invoice.

(vii) Any other information or documentation required by other provisions of the contract (such as evidence of shipment).

(2) Invoices shall be prepared and submitted in quadruplicate (one copy shall be marked "original") unless otherwise specified.

(b) For purposes of determining if interest begins to accrue under the Prompt Payment Act (Pub. L. 97–177)—

(1) A proper invoice will be deemed to have been received when it is received by the office designated in the contract for receipt of invoices and acceptance of the supplies delivered or services rendered has occurred;

(2) Payment shall be considered made on the date on which a check for such payment is dated;

(3) Progress payments if authorized under this contract, are solely for financing purposes and shall not accrue interest under the Prompt Payment Act;

(4) Payment terms (e.g., "net 20") offered by the Contractor will not be deemed a "required payment date;" and

(5) The following periods of time will not be included:

(i) After receipt of an improper invoice and prior to notice of any defect or impropriety, but not to exceed 15 days (or any lesser period established by this contract).

(ii) Between the date of a notice of any defect or impropriety and the date a proper invoice is received. When the notice is in writing, it shall be considered made on the date shown on the notice.

(End of clause)

1852.232-72 Payments (letter contracts).

As prescribed in 1832.111-70(b), insert the following clause in letter contracts and solicitations therefor.

Payments (Letter Contracts) (April 1984)

(a) If this Letter Contract is on a fixed-price basis, and is governed generally by the provisions of a fixed-price contract, the Government will pay to the Contractor, not to exceed the maximum amount specified in Article IIIa of the Schedule, within 30 days of receipt of proper invoices or vouchers, the prices, if any, specified in Article III of the Schedule for supplies delivered and accepted or services rendered and accepted, less deductions, if any, provided for in this Letter Contract. Unless otherwise specified, payment will be made on partial deliveries accepted by the Government.

(b) If this Letter Contract is on a cost-reimbursement basis and is governed generally by the provisions of a cost-reimbursement type contract, the Government will make payments to the Contractor within 30 days after receipt of each proper invoice or voucher in accordance with the Payments of Allowable Costs Before Definitization clause of this Letter Contract.

(c) Nothing shall be paid under this Letter Contract to the Contractor for profit or fee, except as provided in the Termination clause of this Letter Contract.

(d) This clause shall not be applicable after this Letter Contract is converted into a fully definitized contract.

(End of clause)

1852.232-73 Payments (utility services).

As prescribed in 1832.111-70(c), insert the following clause in negotiated utility service contracts and solicitations therefor:

Payments (Utility Services) (April 1984)

(a) Payments for the service rendered under this contract shall be made monthly by the designated disbursing office or officer under the terms and conditions of this contract upon the submission of proper invoices.

(b) All bills shall be paid without penalty or interest and the Government shall be entitled to any discounts customarily applicable to payment of bills by all customers of the Contractor.

(c) Invoices for services rendered hereunder shall contain statements of the meter readings at the beginning of the billing period, meter constants, consumption during the billing period, and such other pertinent data as shall be required by the Government.

(End of clause)

1852.232-74 Payments (facilities).

As prescribed in 1832.111-70(d), insert the following clause in consolidated facilities contracts and solicitations therefor:

Payments (Facilities) (April 1984)

The Government will make payments to the Contractor within 30 days after receipt of each proper invoice or voucher and statement of cost, in accordance with paragraph (b) of the Allowable Cost and Payment—Facilities clause of this contract, except as otherwise may be provided in this contract, subject to the provisions of paragraph (f) of the aforementioned clause.

(End of clause)

1852.232-75 Security for advance payments.

As prescribed in 1832.412, the contracting officer, in consultation with General Counsel, may require special security provisions if appropriate in particular cases. For example, the following clause may be included in publications and contracts with nonprofit organizations or educational institutions that include the clause at FAR 52.232-12, Advance Payments:

Security for Advance Payments (April 1984)

During the period of time that advance payments may be made hereunder and so long as any such advance payments remain unliquidated, the Contractor shall not mortgage, pledge, or otherwise encumber, or suffer to be encumbered, any of the assets of the Contractor now owned or hereafter acquired, or permit any preexisting mortgages, liens, or other encumbrances to remain on or attach to any assets of the Contractor that are allocated to the performance of this contract and with respect to which the Government has a lien hereunder, without the prior written consent of the Contracting Officer.

(End of clause)

1852.232-76 Authority to obligate funds.

As prescribed in 1832.705-270(a), insert the following clause in letter contracts and solicitations therefor:

Authority To Obligate Funds (April 1984)

The maximum amount for which the Government shall be liable if this contract is terminated is specified in the Limitation of Liability clause, and any expenditure or obligation by the Contractor in excess of that amount, in furtherance of performance hereunder, shall be at the Contractor's own risk.

(End of clause)

1852.232-77 Limitation of funds (fixed-price-contract).

As prescribed in 1832.705-270(b), insert the following clause in fixed-price incrementally-funded contracts for research and development, and solicitations therefor. Contracting officers are authorized, in appropriate cases, to revise paragraphs (a), (b), and (g) of the clause to specify the work required under the contract in lieu of contract numbers. The 60-day period may be varied from 30 to 90 days, and the 75 percent from 75 to 85 percent:

Limitation of Funds (Fixed-Price Contract) (April 1984)

(a) Of the total price of items . . . through . . ., the sum of $ . . . is presently available for payment and allotted to this contract. It is anticipated that from time to time additional funds will be allocated to this contract in accordance with the following schedule until the total price of said item is allotted:

Schedule for Allotment of Funds

Date ——— Amounts ———.

The Contractor agrees to perform or have performed work on said items up to the point at which, in the event of termination of this contract pursuant to the Termination for Convenience of the Government clause of this contract, the total amount payable by the Government (including amounts payable in respect of subcontracts and settlement costs) pursuant to paragraphs (f) and (g) thereof, would in the exercise of reasonable judgment by the Contractor approximate the total amount at the time allotted to the contract. The Contractor shall not be obligated to continue performance of the work beyond such point. The Government shall not be obligated in any event to pay or reimburse the Contractor in excess of the amount from time to time allotted to the contract, anything to the contrary in the Termination for Convenience of the Government clause of this contract notwithstanding.

(c) It is contemplated that funds presently allotted to this contract will cover the work to be performed until . . . . In the event funds allotted are considered by the Contractor to be inadequate to cover the work to be performed until the above date, or an agreed date in substitution thereof, the Contractor shall notify the Contracting Officer in writing when within the next 60 days the work will reach a point at which, in the event of termination of this contract pursuant to the Termination for Convenience of the Government clause of this contract, the total amount payable by the Government (including amounts payable in respect of subcontracts and settlement costs) pursuant to paragraphs (f) and (g) thereof will approximate seventy-five percent (75%) of the

total amount then allotted to the contract. The notice shall state the estimated date when such point will be reached and the estimated amount of additional funds required to continue performance to the above or an agreed substituted date. The Contractor shall, 60 days prior to the date above written or agreed substituted date, advise the Contracting Officer in writing as to the estimated amount of additional funds which will be required for the timely performance of the contract for a further period as may be specified in the contract or otherwise agreed to by the parties. If after such latter notification, additional funds are not allotted by the date above written or by an agreed date in substitution thereof, the Contracting Officer will, upon written request of the Contractor, terminate this contract on such date or the date set forth in the request, whichever is later, pursuant to the provisions of the Termination for Convenience of the Government clause of this contract.

(d) When additional funds are allotted from time to time for continued performance of the work under this contract, the parties shall agree on the applicable period of contract performance which shall be covered by such funds. The provisions of paragraphs (b) and (c) above shall apply to such additional allotted funds and substituted date pertaining thereto, and the contract shall be amended accordingly.

(e) If the Contractor incurs additional costs, or is delayed in the performance of the work under this contract, solely by reason of the failure of the Government to allot additional funds in amounts sufficient for the timely performance of this contract, and if additional funds are alloted, an equitable adjustment shall be made in the price or prices (including appropriate target, billing and ceiling prices where applicable) of said items or in the time of delivery or both.

(f) The Government may at any time prior to termination, and, with the consent of the Contractor, after notice of termination, allot additional funds for this contract.

(g) The provisions of this clause with respect to termination shall in no way be deemed to limit, the rights of the Government under the Default clause of this contract. The provisions of this clause are limited to the work on and allotment of funds for the items set forth in paragraph (a) above. This clause shall become inoperative upon the allotment of funds for the total price of said work except for rights and obligations then existing under this clause.

(h) Nothing in this clause shall affect the right of the Government to terminate this contract pursuant to the Termination for Convenience of the Government clause of this contract.

(End of clause)

1852.233–1 Disputes.

Insert the Alternate I at FAR 52.233–1, as prescribed in 1833.014.

1852.235–70 Scientific and technical information service.

Insert the following clause as prescribed in 1835.070(a):

Scientific and Technical Information Service (April 1984)

(a) The Contractor, if not already registered with the NASA Scientific and Technical Information Facility, is encouraged to register by requesting registration forms from the address below. Registration forms will inform the Contractor of the products and services available in support of work under the contract—

NASA Scientific and Technical Information Facility
Attn: Registration
P.O. Box 8757
Baltimore/Washington, International Airport, MD 21240

(b) NASA reserves the right, in the event of the unavailability of any scientific and technical information requested, to notify the Contractor of such unavailability. Failure of NASA to furnish any information requested shall not entitle the Contractor to any adjustment in the price, cost (estimated or target), fee, time required for performance, or delivery schedule of the contract.

(End of clause)

1852.235–71 Key personnel and facilities.

Insert the following clause as prescribed in 1835.070(b):

Key Personnel and Facilities (April 1984)

The personnel and/or facilities listed below (or as specified in the Schedule of this contract) are considered essential to the work being performed hereunder. Prior to removing, replacing, or diverting any of the specified individuals or facilities, the Contractor shall notify the Contracting officer reasonably in advance and shall submit justification (including proposed substitutions) in sufficient detail to permit evaluation of the impact on this contract. No diversion shall be made by the Contractor without the written consent of the Contracting Officer; *provided*, that the Contracting Officer may ratify in writing the change, such ratification shall constitute the consent of the Contracting Officer required by this clause. The personnel and/or facilities listed below (or as specified in the Schedule of this contract) may, with the consent of the Contracting parties, be amended from time to time during the course of the contract to either add or delete personnel and/or facilities, as appropriate.

(End of clause)

1852.236–70 Option for supervision and inspection services.

As prescribed in 1836.609–70, the following clause may be included in fixed-price architect-engineer contracts, and solicitations therefor, if supervision and inspection services by the architect-engineer during construction are contemplated. The details of such services must be set out in Appendix A of the contract.

Option for Supervision and Inspection Services (April 1984)

At any time prior to 6 months after satisfactory completion and acceptance of the work to be furnished hereunder, the Government at its option, may direct, by a written order, the Contractor to perform any part of all of the supervision and inspection services provided under Appendix A. Upon receipt of such direction, the Architect-Engineer shall proceed with such work and services.

(End of clause)

1852.243–70 Engineering change proposals.

As prescribed in 1843.205–70, insert the following clause. The term "price" in paragraph (b) may be changed consistent with the type of contract. When desirable, delete the second reference in paragraph (a) of the clause to MIL–STD–480 and enter local format, if any.

Engineering Change Proposals (April 1984)

(a) The Contracting Officer may, at any time, request in writing, that the Contractor prepare and submit an Engineering Change Proposal (ECP) as that term is defined in MIL–STD–480. Upon receipt of the request, the Contractor shall submit to the Contracting Officer, the information specified by paragraph 4 of MIL–STD–480 in the format required therein.

(b) Any Contractor ECP shall include a "not-to-exceed" price and delivery adjustment or a "not-less-than" price* and delivery adjustment acceptable to the Contractor if the Government subsequently orders such ECP. If ordered, the equitable increase shall not exceed, nor shall the equitable decrease be less than such "not-to-exceed" or "not-less-than" amounts. This paragraph does not preclude any revision(s) or correction(s) of an ECP in accordance with paragraphs 4.10 and 4.11 of MIL–STD–480. Concurrently with the submission of any ECP under this contract in which the proposed aggregate cost is $500,000 or more, the Contractor shall submit to the Contracting Officer a completed Standard Form 1411, Contract Pricing Proposal Cover Sheet, and at the time of agreement upon the price of the ECP, the Contractor shall submit a signed Certificate of Current Cost or Pricing Data.

(End of clause)

Alternate I (APRIL 1984). As prescribed in 1843.205–70(a), include the following paragraph to the basic clause after inserting in the space provided the appropriate percentage of the contract price or dollar amount.

(c) If the price adjustment proposed for any Contractor originated ECP (excluding any Government requested ECP or Value Engineering Change Proposal) is ..... (percent of contract price) (or $.....) or less, such change shall be made at no adjustment of the contract price.

(End of clause)

Alternate II (APRIL 1984). As prescribed in 1843.205–70(b), substitute the following sentence for the first sentence in paragraph (b) of the basic clause.

Change orders issued pursuant to the Change clause of this contract shall not be

considered an authorization to the Contractor to exceed the estimated cost in the schedule in the absence of a statement in the change order or other contract modification increasing the estimated cost.

1852.244–70 Geographic participation in the aerospace program.

Insert the following clause as prescribed in 1844.170.

Geographic Participation in the Aerospace Program (April 1984)

(a) It is the policy of the National Aeronautics and Space Administration to advance a broad participation by all geographic regions in filling the scientific, technical, research and development, and other needs of the aerospace program.

(b) The Contractor agrees to use his best efforts to solicit subcontract sources on the broadest feasible geographic basis, consistent with efficient contract performance, and without impairment of program effectiveness or increase in program cost.

(c) The Contractor further agrees to insert this clause in all subcontracts of $100,000 and over.

(End of clause)

1852.245–70 Acquisition of existing government equipment

As prescribed in 1845.106–70(a), insert the following clause in all solicitations and contracts which contain a Government property clause:

Acquisition of Existing Government Equipment (April 1984)

"Centrally reportable equipment," as used in this clause means that plant equipment, special test equipment (including components), special tooling and non-flight space property (including ground support equipment) which is (a) generally commercially available and used as a separate item or component of a system, (b) is valued at $1,000 or more, and (c) is identifiable by a manufacturer and model number.

Prior to the acquisition of any item of centrally reportable equipment under this contract (unless for incorporation into deliverable end items), the Contractor shall provide the Contracting Officer, at the earliest possible date, a detailed listing of requirements for screening of existing Government inventories. DD Form 1419, DOD Industrial Plant Equipment Requisition, will be prepared for each item of centrally reportable equipment to be acquired and forwarded through the Contracting Officer to the Equipment Visibility System Coordinator at the cognizant NASA installation at least (30) days in advance of his intention to acquire or fabricate such equipment. In the event a certificate of nonavailability is not received within such period, the contractor may proceed to acquire the equipment or components, subject to any other applicable provisions of this contract. Instructions for preparing the DD Form 1419 are contained in the NASA FAR Supplement 1845.7103.

(End of clause)

1852.245–71 Installation-provided government property.

As prescribed in 1845.106–70(b), insert the following clause in solicitations and contracts when Government property is to be provided to on-site contractors:

Installation-Provided Government Property (April 1984)

(a) In performance of work under this contract, certain Government property identified in this contract shall be made available to the Contractor on a no-charge-for-use basis by the installation Supply and Equipment Management Officer. Such property shall be utilized in the performance of this contract at the installation administering this contract or at such other installation(s) or location(s) specified elsewhere in this contract. Under this clause, the Government retains accountability as well as title to the property and the Contractor assumes user responsibilities prescribed in installation property management directives, which are listed elsewhere in this contract.

(b) The official accountable record keeping and financial control and reporting of the property subject to this clause shall be retained by the Government and accomplished by the installation Supply and Equipment Management and Financial Management Officers. However, the Government will provide the Contractor a record of all items of property including copies of all transaction documents used to describe changes to this record. The Contractor shall maintain this record and transaction documentation in such a condition that at any stage of completion of work under this contract, the status of the property including location, utilization, consumption rate, and identification may be readily ascertained. The Contractor shall also adhere to all other procedures (and be subject to sanctions related thereto) prescribed by the installation director which have been established for the management of installation property. The records and documentation shall be made available, upon request, to the installation Supply and Equipment Management Officer and other formally designated representative(s) of the Contracting Officer.

(c) In the event the Government fails to provide the Government property specified in this contract such as to adversely affect the Contractor's ability to perform hereunder, the Contracting Officer shall, upon timely written request made by the Contractor, make a determination of the effect occasioned the Contractor and shall equitably adjust the contract in accordance with the procedure provided in the Changes clause of this contract. Equitable adjustments made pursuant to this paragraph, however, shall not include adjustments in fee unless the property to be provided was described in specific quantities of specific items.

(d) Government property made available under this clause shall in every respect be subject to the provisions of the Government Property clause of this contract except as provided in paragraphs (a), (b), and (c) above, and as may otherwise be provided in this contract with respect to (1) the Contractor's responsibilities for repair and maintenance of Government property, or (2) the Contractor's liability for any loss of or damage to such property which is attributable to the Contractor's failure to maintain and administer a program for maintenance and repair in accordance with sound industrial practice.

(End of clause)

1852.245–72 Liability for government property furnished for repair or other services.

As prescribed in 1845.106–70(c), insert the following clause in solicitations and contracts for repair, modification, rehabilitation, or other servicing for Government property when such property is furnished to contractor for that purpose:

Liability for Government Property Furnished for Repair or Other Services (April 1984)

(a) The provisions of this clause shall govern with respect to any Government property furnished to the Contractor for repair or other services, and which is to be returned to the Government. Such property is hereinafter referred to as "Government property furnished for servicing" and shall not be subject to the provisions of any clause of this contract entitled Government Furnished Property or Government Property.

(b) The official accountable record keeping, and financial control and reporting of the property subject to this clause shall be retained by the Government. The Contractor shall maintain adequate records and procedures to assure that the Government property furnished for repair or servicing may be readily accounted for and identified at all times while in its custody or possession or in the custody or possession of any subcontractor.

(c) The contractor shall be liable for any loss or destruction of or damage to the Government property furnished for repair or servicing (1) caused by the Contractor's failure to exercise such care and diligence as a reasonable prudent owner of similar property would exercise under similar circumstances, or (2) sustained while the property is being worked upon and directly resulting therefrom, including but not limited to, any repairing, adjusting, inspecting, servicing, or maintenance operation. The Contractor shall not be liable for loss or destruction of or damage to Government property furnished for repair or servicing resulting from any other cause except to the extent that such loss, destruction, or damage is covered by insurance (including self-insurance funds or reserves).

(d) In addition to any insurance (including self-insurance funds or reserves) carried by the Contractor and in effect on the date of this contract affording protection in whole or in part against loss or destruction of or damage to such Government property furnished for repair or servicing, the amount and coverage of which the Contractor agrees to maintain, the Contractor agrees to obtain

such additional insurance covering loss or destruction of or damage to Government property furnished to the Contractor for repair or servicing as may, from time to time, be required by the Contracting Officer. The requirements for such additional insurance shall be effected under the procedures established by the Changes clause of this contract.

(e) The Contractor shall hold the Government harmless and shall indemnify the Government against all claims for injury to persons or damage to property of the Contractor or others arising from the Contractor's possession or use of the Government property furnished for repair or servicing or arising from the presence of said property on the premises or property of the Contractor.

(End of clause)

1852.245–73 Financial reporting of government-owned/contractor-held property.

As prescribed in 1845.106–70(d), insert the following clause:

Financial Reporting of Government-Owned/Contractor-Held Property (April 1984)

(a) The Contractor shall prepare and submit annually a NASA Form 1018 Report of Government-Owned/Contractor-Held Property, in accordance with the instructions on the form and Subsection 1845.505–14 of the NASA FAR Supplement, except the reporting of space hardware shall be required only upon the written direction of the Contracting Officer identifying the specific project items to be reported.

(b) If administration of this contract has been delegated to the Department of Defense, the original and three copies of NASA Form 1018 shall be submitted through the DoD Property Administrator to the NASA office identified below. If administered by NASA, the forms shall be submitted directly to the designated NASA office:

(Insert the address and office code of the organization within cognizant NASA Installation responsible for control and distribution of the NASA Form 1018)

_____

_____

_____

(c) The annual reporting period shall be from July 1 of each year to June 30 of the following year. The report shall be submitted by July 31.

(d) The Contractor agrees to insert the reporting requirement in all first-tier subcontracts, except that such requirement shall provide for the submission of the subcontractor reports directly to the Contractor. The Contractor shall require the subcontractor reports to be submitted to him in sufficient time to meet the reporting date in paragraph (c) above.

(e) The Contractor's annual report shall consist of a consolidation of subcontractor's reports and the contractor's report.

(End of clause)

1852.247–70 Returnable gas cylinders.

As prescribed at 1847.305–70, insert the following clause. The 30 day time period in paragraph (a) may be modified to comply with the customary commercial practice for the particular type of container being rented. The clause may also be modified for use in contracts involving other reusable containers, where the contractor is to retain title:

Returnable Gas Cylinders (April 1984)

(a) Cylinders shall remain the property of the Contractor but will be loaned without charge to the Government for a period of 30 days after the date of delivery of the cylinders to the f.o.b. point specified in the contract. Beginning with the first day after the expiration of the 30 day loan period to and including the day the cylinders are delivered to the Contractor where the original delivery was f.o.b. origin, or to and including the date the cylinders are delivered or are made available for delivery to the Contractor's designated carrier in the case where the original delivery was f.o.b. destination, the Government shall pay the Contractor a rental of _____ dollars ($_____) per cylinder per day, regardless of type or capacity.

(b) This rental charge will be computed separately for cylinders of differing types, sizes and capacities, and for each point of delivery named in the contract. A credit of 30 cylinder days will accrue to the Government for each cylinder, regardless of type or capacity, delivered by the Contractor. A debit of 1 cylinder day will accrue to the Government for each cylinder for each day after delivery to the f.o.b. point specified in the contract. At the end of the contract, if the total number of debits exceeds the total number of credits, rental shall be charged for the difference. If the total number of credits equals or exceeds the total number of debits, no rental charges will be made for the cylinders. No rental shall accrue to the Contractor in excess of the replacement value per cylinder specified in paragraph (c) below.

(c) For each cylinder lost or damaged beyond repair while in the Government's possession, the Government shall pay to the Contractor the replacement value as follows, less the allocable rental paid therefor:

(1) Oxygen cylinders of 100–110 cubic foot capacity $_____;

(2) Oxygen cylinders of 200–220 cubic foot capacity $_____;

(3) Acetylene cylinders of 100–150 cubic foot capacity $_____; and

(4) Acetylene cylinders of 230–300 cubic foot capacity $_____.

(d) Cylinders lost, or damaged beyond repair, and paid for by the Government shall become the property of the Government, subject to the following: If any lost cylinder is located within _____ (insert period of time) after payment by the Government, it may be returned to the Contractor by the Government, and the Contractor shall pay to the government an amount equal to the replacement value, less rental computed in accordance with paragraph (a) above, beginning at the expiration of the 30 day loan period specified in paragraph (a) above, and continuing to the date on which the cylinder was delivered to the Contractor.

(End of clause)

1852.249–70 Termination—Fixed-Price Letter Contract.

As prescribed in 1849.502, the following clause shall be included in letter contracts which are expected to be converted to fixed-price type definitive contracts.

Termination Fixed-Price Letter Contract (April 1984)

(a) In case a definitive contract is not executed by the date specified in Article VI of the Schedule, because of the inability of the parties to agree upon a definitive contract, this Letter Contract may be terminated in its entirely by either party by delivering to the other party a notice in writing specifying the effective date of termination, which date shall not be earlier than 30 days after receipt of such notice.

(b) The performance of work under this Letter Contract also may be terminated by the Government in accordance with this clause in whole, or from time to time in part, whenever the Contracting Officer shall determine that such termination is in the best interest of the Government. Any such termination shall be affected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of work under this Letter Contract is terminated, and the date upon which such termination becomes effective.

(c)(1) After receipt of a Notice of Termination, and except as otherwise directed by the Contracting Officer, the Contractor shall—

(i) Stop work under this Letter Contract on the date and to the extent specified in the Notice of Termination;

(ii) Place no further orders or subcontract for materials, services or facilities, except as may be necessary for completion of such portion of the work under this Letter Contract as is not terminated;

(iii) Terminate all orders and subcontracts to the extent that they relate to the performance of work terminated by the Notice of Termination;

(iv) Assign to the Government, in the manner, at the times, and to the extent directed by the Contracting Officer, all of the right, title, and interest of the Contractor under the orders and subcontracts so terminated, in which case the Government shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts;

(v) Subject to the approval or ratification of the Contracting Officer, as required, which approval or ratification shall be final and conclusive for all purposes of this clause, settle all outstanding liabilities and all claims arising out of such termination of orders and subcontracts;

(vi) Transfer title and, in the manner, to the extent, and at the times directed by the Contracting Officer, delivery to the

Government (A) the fabricated or unfabricated parts, work in process, completed work, supplies, and other material produced as a part of, or acquired in respect of the performance of the work terminated by the Notice of Termination, and (B) the completed or partially completed plans, drawings, information, and other property which, if this Letter Contract had been completed, would be required to be furnished to the Government;

(vii) Use its best efforts to sell, in the manner, at the times, to the extent, and at the price or prices directed or authorized by the Contracting Officer, any property of the types referred to in (vi) above; *provided,* however, that the Contractor (A) shall not be required to extend credit to any purchaser, and (B) may acquire any such property under the conditions prescribed by and at a price or prices approved by the Contracting Officer; and *provided further* that the proceeds of any such transfer or disposition shall be applied in reduction of any payments to be made by the Government to the Contractor under this Letter Contract or shall otherwise be credited to the price or cost of the work covered by this Letter Contract or paid in such other manner as the Contracting Officer may direct;

(viii) Complete performance of such part of the work as shall not have been terminated by the Notice of Termination; and

(ix) Take such action as may be necessary, or as the Contracting Officer may direct, for the protection and preservation of the property related to this Letter Contract which is in the possession of the Contractor and in which the Government has or may acquire an interest.

(2) At any time after expiration of the plant clearance period, as defined in the Federal Acquisition Regulation, Part 45, as it may be amended from time to time, the Contractor may submit to the Contracting Officer a list, certified as to quantity and quality, of any or all items of termination inventory not previously disposed of, exclusive of items the disposition of which has been directed or authorized by the Contracting Officer, and may request the Government to remove such items or enter in to a storage agreement covering them. Not later than 15 days thereafter, the Government will accept title to such items and remove them or enter into a storage agreement covering the same; *provided,* that the list submitted shall be subject to verification by the Contracting Officer upon removal of the items, or if the items are stored, within 45 days from the date of submission of the list, and any necessary adjustment to correct the list as submitted shall be made prior to final settlement.

(d) After receipt of a Notice of Termination, the Contractor shall submit to the Contracting Officer its termination claim in the form and with the certification prescribed by the Contracting Officer. Such claim shall be submitted promptly, but in no event later than 1 year from the effective date of termination, unless one or more extensions in writing are granted by the Contracting Officer upon request of the Contractor made in writing within such 1 year period or authorized extension thereof. However, the Contracting Officer may if the facts justify such action, receive and act upon any such termination claim at any time after such 1 year period or any extension thereof. Upon failure of the Contractor to submit its termination claim within the time allowed, the Contracting Officer may, subject to any Settlement Review Board approvals required by Subpart 1849.1 of the NASA FAR Supplement in effect on the date of the execution of this Letter Contract, determine, on the basis of available information, the amount, if any, due to the Contractor by reason of the termination, and shall thereupon pay to the Contractor the amount so determined.

(e) Subject to the provisions of paragraph (d) hereof, and subject to any Settlement Review Board approvals required by Subpart 1849.1 of the NASA FAR Supplement in effect as of the date of execution of this Letter Contract, the Contractor and the Contracting Officer may agree upon the whole or any part of the amount or amounts to be paid to the Contractor by reason of the total or partial termination of work pursuant to this clause. In the event of any termination pursuant to paragraph (a) hereof, such amount or amounts shall not include any allowance for profit. In the event of any termination pursuant to paragraph (b) hereof, such amount or amounts may include a reasonable allowance for profit, but only on work actually done in connection with the terminated portion of this Letter Contract. Any such amount shall not exceed the maximum liability specified in the Schedule. Any such agreement shall be embodied in an amendment to this Letter Contract, and the Contractor shall be paid the agreed amount.

(f) In the event of the failure of the Contractor and the Contracting Officer to agree in whole or in part, as provided in paragraph (e), as to the amount or amounts to be paid to the Contractor by reason of the termination of work pursuant to this clause, the Contracting Officer shall, subject to any Settlement Review Board approvals required by NASA regulations in effect as of the date of execution of this Letter Contract, determine, on the basis of information available to him, and in accordance with the applicable cost principles of the Federal Acquisition Regulation as in the effect on the date of this Letter Contract, the amount, if any, due to the Contractor by reason of the termination and shall pay such amount to the Contractor. In the event of the termination of this Letter Contract pursuant to paragraph (a) hereof, no allowance for profit shall be included in the amount to be paid the Contractor.

(g) The Contractor shall have the right of appeal, under the Disputes clause of this Letter Contract from any determination made by the Contracting Officer under paragraph (d) or (f) above (including any disputes as to whether termination has in fact taken place pursuant to paragraph (a) hereof), except that if the Contractor has failed to submit a claim within the time provided in paragraph (d) above and has failed to request extension of such time, no such right of appeal shall exist. In any case where the Contracting Officer has made a determination of the amount due under paragraph (d) or (f) above, the Government shall pay to the Contractor the following:

(1) If there is no right or appeal hereunder or if no timely appeal has been taken the amount so determined by the Contracting Officer.

(2) If an appeal has been taken, the amount finally determined on such appeal.

(h) In arriving at the amount due the Contractor under this clause there shall be deducted—

(1) All unliquidated advance or other payments on account theretofore made to the Contractor, applicable to the terminated portion of this Letter Contract;

(2) Any claim which the Government may have against the Contractor in connection with this Letter Contract; and

(3) The agreed price for, or the proceeds of sale of, any materials, supplies, or other things acquired by the Contractor or sold pursuant to the provisions of this clause and not otherwise recovered by or credited to the Government.

(i) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on account against costs incurred by the Contractor in connection with the terminated portion of this Letter Contract whenever in the opinion of the Contracting Officer the aggregate of such payments shall be within the amount to which the Contractor will be entitled hereunder. If the total of such payments is in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand together with interest computed at the rate established by the Secretary of the Treasury under 50 U.S.C. App. (b)(2) for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government; *provided,* however, that no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until ten days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

(j) Unless otherwise provided in this Letter Contract, or by applicable statute, the Contractor, from the effective date of termination and for a period of 3 years after final settlement under this Letter Contract, shall preserve and make available to the Government at all reasonable times at the office of the Contractor, without direct charge to the Government, all its books, records, documents, and other evidence bearing on the cost and expenses of the Contractor under this Letter Contract and relating to the work terminated hereunder or, to the extent approved by the Contracting Officer, photographs, microphotographs, or other authentic reproductions thereof.

1852.249–71 Termination—cost-reimbursement type letter contract.

As prescribed in 1849.503(a), the following clause shall be included in letter contracts which are expected to be converted to cost-reimbursement type definitive contracts:

Termination—Cost-Reimbursement Letter Contract (April 1984)

(a) In case a definitive contract is not executed by the date specified in the Schedule, because of the inability of the parties to agree upon a definitive contract, this Letter Contract may be terminated in its entirety by either party by delivering to the other party a notice in writing specifying the effective date of termination, which date shall not be earlier than 30 days after receipt of such notice.

(b)(1) The performance of work under this Letter Contract also may be terminated by the Government in accordance with this clause in whole, or from time to time in part—

(i) Whenever the Contractor shall default in performance of this Letter Contract in accordance with its terms (including in the term "default" any such failure by the Contractor to make progress in the prosecution of the work hereunder as endangers such performance), and shall fail to cure such default within a period of ten days (or such longer period as the Contracting Officer may allow) after receipt from the Contracting Officer of a notice specifying the default; or

(ii) Whenever for any reason the Contracting Officer shall determine that such termination is in the best interest of the Government.

(2) Any such termination shall be effected by delivery to the Contractor of a Notice of Termination specifying whether termination is for the default of the Contractor or for the convenience of the Government, the extent to which performance of work under this Letter Contract is terminated, and the date upon which such termination becomes effective. If, after notice of termination of this Letter Contract for default under subdivision (1)(i) above, it is determined for any reason that the Contractor was not in default pursuant to subdivision (1)(i) above, or that the Contractor's failure to perform or to make progress in performance is due to causes beyond the control and without the fault or negligence of the Contractor pursuant to the provisions of the clause of this Letter Contract relating to excusable delays, the Notice of Termination shall be considered to have been issued under subdivision (1)(ii) above, and the rights and obligations of the parties hereto shall in such event be governed accordingly.

(c)(1) After receipt of a Notice of Termination and except as otherwise directed by the Contracting Officer the Contractor shall:

(i) Stop work under this Letter Contract on the date and to the extent specified in the Notice of Termination;

(ii) Place no further orders or subcontracts for materials services, or facilities, except as may be necessary for completion of such portion of the work under this Letter Contract as is not terminated;

(iii) Terminate all orders and subcontracts to the extent that they relate to the performance of work terminated by the Notice of Termination;

(iv) Assign to the Government, in the manner, at the times, and to the extent directed by the Contracting Officer, all of the right, title, and interest of the Contractor under the orders and subcontracts so terminated, in which case the Government shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts;

(v) Subject to the approval or ratification of the Contracting Officer, as required, which approval or ratification shall be final and conclusive for all purposes of this clause, settle all outstanding liabilities and all claims arising out of such termination of orders and subcontracts, the cost of which would be reimbursable in whole or in part, in accordance with the provisions of this Letter Contract;

(vi) Transfer title (to the extent that title has not already been transferred) and, in the manner, to the extent, and at the time directed by the Contracting Officer, deliver to the Government: (A) The fabricated or unfabricated parts, work in process, completed work, supplies, and other material produced as a part of, or acquired in respect of the performance of, the work terminated by the Notice of Termination, (B) the completed or partially completed plans, drawings, information, and other property which, if this Letter Contract had been completed, would be required to be furnished to the Government, and (C) the jigs, dies, and fixtures, and other special tools, and tooling acquired or manufactured for the performance of this Letter Contract for the cost of which the Contractor has been or will be reimbursed under this Letter Contract;

(vii) Use its best efforts to sell in the manner, at the times, to the extent, and at the price or prices directed or authorized by the Contracting Officer, any property of the types referred to in subparagraph (6) above, *provided*, however, that the Contractor (A) shall not be required to extend credit to any purchaser, and (B) may acquire any such property under the conditions prescribed by and at a price or prices approved by the Contracting Officer; and *provided further*, that the proceeds of any such transfer or disposition shall be applied in reduction of any payments to be made by the Government to the Contractor under this Letter Contract or shall otherwise be credited to the price or cost of the work covered by this Letter Contract or paid in such other manner as the Contracting Officer may direct;

(viii) Complete performance of such part of the work as shall not have been terminated by the Notice of Termination; and

(ix) Take such action as may be necessary, or as the Contracting Officer may direct, for the protection and preservation of the property related to this Letter Contract which is in the possession of the Contractor and in which the Government has or may acquire an interest.

(2) The Contractor shall proceed immediately with the performance of the above obligations notwithstanding any delay in determining the amount of any items of reimbursable cost, under this clause. At any time after expiration of the plant clearance period, as defined in Part 45 of the Federal Acquisition Regulation, as it may be amended from time to time, the Contractor may submit to the Contracting Officer a list, certified as to quantity and quality, of any or all items of termination inventory not previously disposed of, exclusive of items the disposition of which has been directed or authorized by the Contracting Officer, and may request the Government to remove such items or enter into a storage agreement covering them. Not later than 15 days thereafter, the Government will accept such items and remove them or enter into a storage agreement covering the same; *provided*, that the list submitted shall be subject to verification by the Contracting Officer upon removal of the items, or if the items are stored, within 45 days from the date of submission of the list, and any necessary adjustment to correct the list as submitted shall be made prior to final settlement.

(d) After receipt of a Notice of Termination, the Contractor shall submit to the Contracting Officer its termination claim in the form and with the certification prescribed by the Contracting Officer. Such claim shall be submitted promptly, but in no event later than 1 year from the effective date of termination, unless one or more extensions in writing are granted by the Contracting Officer upon request of the Contractor made in writing within such 1 year period or authorized extension thereof. However, the Contracting Officer may if the facts justify such action, receive and act upon any such termination claim at any time after such 1 year period or any extension thereof. Upon failure of the Contractor to submit its termination claim within the time allowed, the Contracting Officer may, subject to any Settlement Review Board approvals required by Subpart 1849.1 of the NASA FAR Supplement in effect on the date of the execution of this contract, determine, on the basis of information available to the Contracting Officer, the amount, if any, due to the Contractor by reason of the termination, and shall thereupon pay to the Contractor the amount so determined.

(e) Subject to the provisions of paragraph (d) hereof, and subject to any Settlement Review Board approvals required by Subpart 1849.1 of the NASA FAR Supplement in effect as of the date of execution of this Letter Contract, the Contractor and the Contracting Officer may agree upon the whole or any part of the amount or amounts to be paid to the Contractor by reason of the total or partial termination of work pursuant to this clause. In the event of any termination pursuant to paragraph (a) or (b)(1)(i) hereof, such amount or amounts shall not include any allowance for fee. In the event of any termination pursuant to paragraph (b)(1)(i) hereof, such amount or amounts may include a reasonable allowance for fee, but only on work actually done in connection with the terminated portion of this Letter Contract. Any such amount shall not exceed the maximum liability specified in the Schedule. Any such agreement shall be embodied in an amendment to this Letter Contract and the Contractor shall be paid the agreed amount.

(f) In the event of the failure of the Contractor and the Contracting Officer to agree in whole or in part, as provided in paragraph (e) above, as to the amount or amounts to be paid to the Contractor in connection with the termination of work

pursuant to this clause, the Contracting Officer shall, subject to any Settlement Review Board approvals required by Subpart 1849.1 of the NASA FAR Supplement in effect as of the date of execution of this Letter Contract, determine, on the basis of information available to him, and in accordance with the applicable cost principles of the Federal Acquisition Regulation as in effect on the date of this Letter Contract, determine, on the basis of information available to him, and in accordance with the applicable cost principles of the Federal Acquisition Regulation as in effect on the date of this Letter Contract, the amount, if any, due to the Contractor by reason of the termination and shall pay such amount to Contractor. In the event of the termination of this Letter Contract pursuant to paragraph (a) or (b)(1)(i) hereof, no allowance for fee shall be included in the amount to be paid the Contractor.

(g) The Contractor shall have the right of appeal, under the clause of this Letter Contract entitled "Disputes," from any determination made by the Contracting Officer under paragraph (d) or (f) above (including any disputes as to whether termination has in fact taken place pursuant to paragraph (a) or (b)(1)(i) hereof), except that if the Contractor has failed to submit a claim within the time provided in paragraph (d) above and has failed to request extention of such time, he shall have no such right of appeal. In any case where the Contracting Officer has made a determination of the amount due under paragraph (d) or (f) above, the Government shall pay to the Contractor the following:

(1) If there is no right of appeal hereunder or if no timely appeal has been taken, the amount so determined by the Contracting Officer.

(2) If an appeal has been taken, the amount finally determined on such appeal.

(h) In arriving at the amount due the Contractor under this clause, there shall be deducted—

(1) All unliquidated advance or other payments theretofore made to the Contractor, applicable to the terminated portion of this Letter Contract;

(2) Any claim which the Government may have against the Contractor in connection with this Letter Contract; and

(3) The agreed price for, or the proceeds of sale of, any materials, supplies, or other things acquired by the Contractor or sold pursuant to the provisions of this clause and not otherwise recovered by or credited to the Government.

(i) The Government may from time to time, under such terms and conditions as it may prescribe, make partial payments and payments on account against costs incurred by the Contractor in connection with the terminated portion of this Letter Contract whenever in the opinion of the Contracting Officer the aggregate of such payments shall be within the amount to which the Contractor will be entitled hereunder. If the total of such payments in in excess of the amount finally agreed or determined to be due under this clause, such excess shall be payable by the Contractor to the Government upon demand, together with interest computed at the rate established by the Secretary of the Treasury under 50 U.S.C. App. 1215(b)(2), for the period from the date such excess payment is received by the Contractor to the date on which such excess is repaid to the Government; *provided*, however, that no interest shall be charged with respect to any such excess payment attributable to a reduction in the Contractor's claim by reason of retention or other disposition of termination inventory until ten days after the date of such retention or disposition, or such later date as determined by the Contracting Officer by reason of the circumstances.

(End of clause)

1852.249–72 Termination (utilities).

As prescribed in 1849.505 insert the following clause in all contracts for utilities services; however, see FAR 49.505(e) and FAR 52.249–15 for communication services contracts. The period of 30 days may be varied not to exceed 90 days.

Termination (Utilities) (April 1984)

This contract may be terminated at the option of the Government by giving of not less than 30 days advance written notice of the effective date of termination.

(End of clause)

1852.250–1 Indemnification under Pub. L. 85–804.

In accordance with 1850.102, contracting officers shall not include in NASA contracts the clause at FAR 52.250–1.

1852.252–70 Compliance with NASA FAR Supplement

As prescribed in 1852.107–70, insert the following clause in all contracts, including letter contracts:

Compliance With NASA FAR Supplement (April 1984)

Any statements in this contract requiring compliance with specific provisions of the Federal Acquisition Regulation (e.g., Subpart 45.5) shall be construed to also require compliance with any corresponding implementing or supplementing provisions in the NASA FAR Supplement in effect on the date of this contract.

(End of clause)

1853.303–507 NASA Form 507, Individual Procurement Action Report.
1853.303–523 NASA Form 523, NASA-Defense Purchase Request.
1853.303–533M NASA Form 533M, Monthly Contractor Financial Management Report.
1853.303–533P NASA Form 533P, Monthly Contractor Financial Performance Analysis Report.
1853.303–533Q NASA Form 533Q, Quarterly Contractor Financial Management Report.
1853.303–543 NASA Form 543, Justification for Authority to Negotiate.
1853.303–558 NASA Form 558, Materials Requirements Report.
1853.303–566 NASA Form 566, Application For Radio Frequency Assignment.

1853.303–634 NASA Form 634, Structural Approach-Profit/Fee Objective.
1853.303–667 NASA Form 667, Report on NASA Subcontracts.
1853.303–778 NASA Form 778, Contractor's Release.
1853.303–779 NASA Form 779, Assignee's Release.
1853.303–780 NASA Form 780, Contractor's Assignment of Refunds, Rebates, Credits and Other Amounts.
1853.303–781 NASA Form 781, Assignee's Assignment of Refunds, Rebates, Credits and Other Amounts.
1853.303–1018 NASA Form 1018, Report of Government-Owned/Contractor-Held Property.
1853.303–1098 NASA Form 1098, Checklist for Negotiated and Advertised File Content (Award File).
1853.303–1356 NASA Form 1356, C.A.S.E. Report on College and University Projects.
1853.303–1412 NASA Form 1412, Termination Authority.
1853.303–1413 NASA Form 1413, Termination Docket Checklist.
1853.303–1430 NASA Form 1430, Letter of Contract Administration Delegation, General.
1853.303–1430A NASA Form 1430A, Letter of Contract Administration Delegation, Special Instructions.
1853.303–1431 NASA Form 1431, Letter of Acceptance of Contract Administration Delegation.
1853.303–1432 NASA Form 1432, Letter of Contract Administration Delegation, Termination.
1853.303–1433 NASA Form 1433, Letter of Audit Delegation.
1853.303–1434 NASA Form 1434, Letter of Request for Pricing-Audit-Technical Evaluation Services.
1853.303–1451 NASA Form 1451, Request for Procurement Plan Approval.
1853.303–1452 NASA Form 1452, Procurement Plan Signature Page (Installation).
1853.303–1611 NASA Form 1611, Contract Completion Statement.
1853.303–1612 NASA Form 1612, Contract Closeout Checklist.
1853.303–DOC–ITA–999 Department of Commerce Form ITA–999, Request for Special Priorities Assistance.
1853.303–DD–250 Department of Defense Form DD 250, Material Inspection and Receiving Report.
1853.303–DD–250c Department of Defense Form DD–250c, Material Inspection and Receving Report-Continuation Sheet.
1853.303–DD–614 Department of Defense Form DD–614, Materials Requirements (Steel and Nickel Alloys).
1853.303–DD–614–1 Department of Defense Form DD–614–1, Materials Requirements (Copper and Aluminum).
1853.303–DD–1342 Department of Defense Form 1342, DOD Property Record.
1853.303–DD–1419 Department of Defense Form 1419, DOD Industrial Plant Equipment Requisition.
1853.303–DD–1593 Department of Defense Form 1593, Contract Administration Completion Record.
1853.303–DOE EV 375 Department of Energy Form EV 375, Isotope Order Blank.
1853.303–NRC–313I Nuclear Regulatory Commission Form 313I, Application for Byproduct License, Industrial.

Authority: 42 U.S.C. 2473(c)(1).

Subpart 1853.1—General

1853.100 Scope of subpart.

This subpart contains requirements and information generally applicable to the forms prescribed in this regulation.

1853.101 Requirements for use of forms.

The requirements for use of the forms prescribed or referenced in this part are contained in Parts 1801 through 1852, where the subject matter applicable to each form is addressed. The specific location of each requirement is identified in Subpart 1853.2.

1853.102 Current editions.

The form prescriptions in Subpart 1853.2 and the illustrations in Subpart 1853.3 contain current editions, unless otherwise noted. Contracting officers shall use the current editions, unless otherwise authorized under this regulation.

1853.103 Exceptions.

Alteration of any NASA or NASA-adopted form prescribed by this regulation is prohibited, unless prior approval has been obtained from the NASA Forms Officer (through the Installation Forms Manager) who will coordinate the request with the Office of Procurement, Code H. Use for the same purpose of any form other than one prescribed by this regulation requires prior approval of Code H. Requests for exceptions to standard or optional forms, as prescribed in FAR 53.103, shall be forwarded through the Installation Forms Manager and the NASA Forms Officer to the Procurement Policy Division, Code HP–1, which will take, as appropriate, the actions set forth in FAR 53.103.

1853.104 Overprinting.

NASA and other forms may be overprinted with names, addresses, and other uniform entries that are consistent with the purpose of the form and that do not alter the form in any other way. Exception approval for overprinting is not needed.

1853.105 Computer preparation.

NASA and (NASA-adopted forms prescribed by this regulation) may be adopted for computer preparation by following the exception procedures in 1853.103. (See FAR 53.105 regarding standard or optional forms.) Such forms should correspond exactly with all other specifications pertaining to that standard form, including overall size, wording, and arrangement.

1853.106 Special construction and printing.

Contracting offices may request exceptions to NASA and NASA-adopted and standard and optional forms for special construction and printing by following the procedures of 1853.103.

1853.107 Obtaining forms.

NASA and other agency forms shall be obtained through NASA's regular forms distribution channels.

1853.108 Recommendations concerning forms.

Coordination with the FAR Secretariat, as specified in FAR 53.108, is the responsibility of the Procurement Policy Division, Code HP–1.

Subpart 1853.2—Prescription of Forms

1853.200 Scope of subpart.

This subpart prescribes NASA forms and other forms adopted by NASA for use in acquisition. The subpart is arranged by subject matter, in the same order as, and keyed to, the parts of this regulation in which the form usage requirements are addressed. (See FAR 53.200 for an example.)

1853.201 NASA regulation.

1853.204 Administrative matters.

1853.204–70 General NF's 507, 533M, 533P, 533Q, 667, 1098, 1356, DD 1593, DD 1594, DD 1597.

(a) *NASA Form 507, Individual Procurement Action Report.* NF 507, prescribed at 1804.671–4, shall be used to provide acquisition records and statistics.

(b) *NASA Form 533M, Monthly Contractor Financial Management Report.* NF 533M, prescribed at 1804.675, shall be used when financial management reporting is required.

(c) *NASA Form 533P, Monthly Contractor Financial Management Performance Report.* NF 533P, prescribed at 1804.675, shall be used when monthy performance analysis reports are required.

(d) *NASA Form 533Q, Quarterly Financial Management Report.* NF 533Q, prescribed at 1804.675, shall be used when quarterly cost projection reports are required.

(e) *NASA Form 667, Report on NASA Subcontracts.* NF 667, prescribed at 1804.673, shall be used by contractors to submit information to NASA on each subcontract or modification thereof in excess of $10,000.

(f) *NASA Form 1098, Checklist for Negotiated and Advertised Contract File Content (Award File).* NF 1098, prescribed at 1804.7205, shall be used as a guide in compiling contract files and shall accompany contracts and supplemental agreements submitted to Headquarters for approval.

(g) *NASA Form 1356, C.A.S.E. Report on College and University Projects.* NF 1356, prescribed at 1804.7202, shall be used to report information applicable to colleges and universities.

(h) *NASA Form 1611, Contract Completion Statement.* NF 1611, prescribed at 1804.804–2, shall be used for closeout of contract files when another office administers the contract.

(i) *NASA Form 1612, Contract Closeout Checklist.* NF 1612, prescribed at 1804.804–5, shall be used for contract closeout when the NASA contracting office retains contract administration.

(j) *DOD Form DD 1593, Contract Administration Completion Record.* Form DD 1593, prescribed at 1804.804–5 shall be used for closeout when the NASA contracting office retains contract administration.

1853.207 Acquisition planning (NF's 1451, 1452).

(a) *NASA Form 1451, Request for Procurement Plan Approval.* NF 1451, prescribed at 1807.170–1(a), shall be used in preparing procurement plans requiring approval by Headquarters.

(b) *NASA Form 1452, Procurement Plan Signature Page (Installation).* NF 1452, prescribed at 1807.170–1(a), shall be used in obtaining installation-level signatures request by 1807–103–2.

1853.208 Required sources of supplies and services.

1853.208–70 Other Government sources (SF 1080, NF 558, DOE EV 375, NRC 3131).

(a) *Standard Form 1080, Voucher For Transfers Between Appropriations And/or Funds (Disbursement).* SF 1080, prescribed at 1808.002–74(e), shall be used to reimburse the Air Force for Shipments of propellants.

(b) *NASA Form 558, Materials Requirements Report.* NF 558, prescribed at 1808.072(f)(1), shall be used to report periodic estimated requirements for missile propellants and related items to the Department of the Air Force.

(c) *Department of Energy Form EV 375, Isotope Order Blank.* DOE Form EV 375, prescribed at 1808.070(a), shall be used for the procurement of radioisotopes.

(d) *Nuclear Regulatory Commission Form 313I, Application for Propellant Material License, Industrial.* NRC Form 313I, prescribed at 1808.070(b), shall be used to apply for a NRC license for the procurement of radioisotopes.

1853.212 Contract delivery or performance (DD 614, DD 614–1, DOC ITA–999).

(a) *DOD Form 614, Materials Requirements (Steel and Nickel Alloys).* DD Form 614, prescribed at 1812.371–2(a), shall be used in preparing quarterly requirements for controlled materials.

(b) *DOD Form 614–1, Materials Requirements (Copper and Aluminum).* DD Form 614–1, prescribed at 1812.371–2(a), shall be used in preparing quarterly requirements for controlled materials.

(c) *Department of Commerce Form ITA–999, Request for Special Priorities Assistance.* DOC ITA–999, prescribed at 1812.372–4, shall be used for all special priorities assistance requests.

1853.215 Contracting by negotiation.

1853.215–2 Price negotiation (NF 634).

NASA Form 634, Structured Approach-Profit/Fee Objective. NF 634, prescribed at 1815.905, shall be used for determining the profit or fee objective by the structured approach.

1853.215–70 Justification for authority to negotiate (NF 543).

NASA Form 543, Justification for Negotiation. NF 543, prescribed at 1815.372, shall be prepared by the contracting officer when a justification for authority to negotiate is required.

1853.216 Types of contracts.

1853.216–70 Assignees under cost-reimbursement contracts (NF's 778, 779, 780, 781).

(a) *NASA Form 778, Contractor's Release.* NF 778, prescribed at 1816.370(a), shall be used for obtaining a release from the contractor.

(b) *NASA Form 779, Assignee's Release.* NF 779, prescribed at 1816.370(a), shall be used for obtaining a release from each assignee.

(c) *NASA Form 780, Contractor's Assignment of Refunds, Rebates, Credits, and Other Amounts.* NF 780, prescribed at 1816.370(a), shall be used in obtaining any refunds, rebates, credits or other amounts from the contractor.

(d) *NASA Form 781, Assignee's Assignment of Returns, Rebates, Credits, and Other Amounts.* NF 781, prescribed at 1816.370(a), shall be used in obtaining any refunds, rebates, credits or other amounts due from each assignee.

1853.217 Special contracting methods (NF 523).

NASA Form 523, NASA-Defense Purchase Request. NF 523, prescribed at 1817.70, shall be used for requesting procurement of supplies or services from all activities of the Military Departments.

1853.223 Environment, conservation, and occupational safety (NF 566).

1853.223–566 NASA Form 566 Application for Radio Frequency Assignment.

NF 566, prescribed at 1823.7102(a), shall be used to request all frequency assignments.

1853.232 Contract financing (SF 272, 272A).

(a) *1853.232–272, Standard Form 272, Federal Cash Transaction Reports.* SF 272, prescribed at 1832.406–70, will be submitted on contracts with non-profit organizations which receive advance funding by the letter of credit method.

(b) *1853.232–272A, Standard Form 272A, Federal Cash Transaction Report.* SF 272A, prescribed at 1832.406–70, will be submitted by non-profit organizations which receive funding by the letter of credit method.

1853.242 Contract administration.

1853.242–70 Delegation (NF's 1430, 1430A, 1431, 1432, 1433).

(a) *NASA Form 1430, Letter of Contract Administration Delegation, General.* NF 1430, prescribed at 1842.202–70(a)(4), shall be used to delegate and redelegate contract administration functions and to amend existing contract administration delegations.

(b) *NASA Form 1430A, Letter of Contract Administration Delegation, Special Instructions.* NF 1430A, prescribed at 1842.20–70(a)(4), shall be used to supplement NF 1430 when special instructions are necessary.

(c) *NASA Form 1431, Letter of Acceptance of Contract Administration Delegation.* NF 1431, prescribed at 1842.202–70(a)(8), shall be used in conjunction with NF 1430 to evidence receipt and acceptance of delegation by other agencies.

(d) *NASA Form 1432, Letter of Contract Administration Delegation, Termination.* NASA Form 1432, presecribed at 1842.202(a)(2)(i), shall be used to delegate and redelegate termination functions and to amend existing termination delegations.

(e) *NASA Form 1433, Letter of Audit Delegation.* NF 1433, prescribed at 1842.202–71(c), shall be used to delegate and redelegate audit functions and to amend existing audit delegations.

1853.242-71 Administrative service request (NF 1434).

NASA Form 1434, Letter of Request for Pricing Audit Technical Evaluation Services. NF 1434, prescribed at 1842.202-70(f), shall be used to request contract administration and audit services incident to pre-award of a contract, but exclusive of pre-award surveys.

1852.242-72 Notifications (NF 456)

NASA Form 456, Notice of Contract Costs Suspended and/or Disapproved. NF 456, prescribed at 1842.803, will be used by the auditor and contracting officer to notify the contractor of any suspended and/or disallowed contract costs.

1853.245 Property (NF 1081, DD 1342, DD 1419).

The following forms are prescribed, as specified below, for use in reporting redistribution, and disposal of contractor inventory (defined in FAR 45.601) and in accounting for this property.

(a) *NASA Form 1018, Report of Government-Owned/Contractor-Held Property.* NF 1018, prescribed at 1845.505-14(d), shall be used by contractors for reporting Government-owned property.

(b) *DOD Form 1342, DOD Property Record.* Form DD 1342, prescribed at 1845.505-670., shall be used by contractors for reporting NASA-furnished or contractor-acquired centrally reportable equipment.

(c) *DOD Form 1419, DOD Industrial Plant Equipment Requisition.* Form DD 1419, prescribed by the clause at 1852.245-70, shall be used by contractors to list requirements for centrally reportable items for screening of existing Government inventories.

1853.246 Quality assurance (DD 250, DD 250c).

(a) *DOD Form 250, Material Inspection and Receiving Report.* Form DD 250, prescribed at 1846.670-7100, shall be used to document procurement quality assurance, acceptance of supplies and services, and shipments.

(b) *DOD Form 250c, Material Inspection and Receiving Report-Continuation Sheet.* Form DD 250c, prescribed at 1846.670-7100, shall be used to document procurement quality assurance, acceptance of supplies and services, and shipments.

1853.249 Termination of contracts (NF's 1412, 1413).

The following forms are prescribed for use in connection with the termination of contracts, as specified in Subpart 1849.6:

(a) *NASA Form 1412, Termination Authority.* NF 1412, prescribed at 1849.101-71, shall be used for initiating action to terminate a contract for either default or convenience of the Government.

(b) *NASA Form 1413, Termination Docket Checklist.* NF 1413, prescribed at 1849.101-71, shall be used to ensure adequacy of termination records.

Subpart 1853.3—Illustrations of Forms

1853.300 Scope of subpart.

This subpart contains illustrations of those NASA Forms and other forms which are used by NASA in acquisitions, but which are not prescribed by FAR. Suffixed parenthetical letters are used here for pagination purposes, when the form itself consists of more than one page.

1853.301 Standard forms.

This section illustrates standard forms that are specified by this NASA FAR supplement for use in acquisitions.

1853.303 Agency forms.

This section illustrates agency forms that are specified by this NASA FAR supplement for use in acquisitions. The forms are arranged numerically by agency, following an initial listing of NASA forms.

Note.—NASA forms will not appear in the Code of Federal Regulations.

FORMS

INSTRUCTIONS

Please type or print legibly. Items 1, 2, 8, 9, 10, 11d, 11e, 11h, and 15 are self explanatory, specific instructions for other items are as follows:

Item	Entry
3	Enter employer identification number assigned by the U.S. Internal Revenue Service or the FICE (institution) code. If this report covers more than one grant or other agreement, leave items 4 and 5 blank and provide the information on Standard Form 272-A, Report of Federal Cash Transactions—Continued; otherwise;
4	Enter Federal grant number, agreement number, or other identifying numbers if requested by sponsoring agency.
5	This space reserved for an account number or other identifying number that may be assigned by the recipient.
6	Enter the letter of credit number that applies to this report. If all advances were made by Treasury check, enter "NA" for not applicable and leave items 7 and 8 blank.
7	Enter the voucher number of the last letter-of-credit payment voucher (Form TUS 5401) that was credited to your account.
11a	Enter the total amount of Federal cash on hand at the beginning of the reporting period including all of the Federal funds on deposit, imprest funds, and undeposited Treasury checks.
11b	Enter total amount of Federal funds received through payment vouchers (Form TUS 5401) that were credited to your account during the reporting period.
11c	Enter the total amount of all Federal funds received during the reporting period through Treasury checks, whether or not deposited.
11f	Enter the total Federal cash disbursements, made during the reporting period, including cash received as program income. Disbursements as used here also include the amount of advances and payments less refunds to subgrantees or contractors, the gross amount of direct salaries and wages, including the employee's share of benefits if treated as a direct cost, interdepartmental charges for supplies and services, and the amount to which the recipient is entitled for indirect costs.
11g	Enter the Federal share of program income that was required to be used on the project or program by the terms of the grant or agreement.
11i	Enter the amount of all adjustments pertaining to prior periods affecting the ending balance that have not been included in any lines above. Identify each grant or agreement for which adjustment was made, and enter an explanation for each adjustment under "Remarks." Use plain sheets of paper if additional space is required.
11j	Enter the total amount of Federal cash on hand at the end of the reporting period. This amount should include all funds on deposit, imprest funds, and undeposited funds (line e, less line h, plus or minus line i).
12	Enter the estimated number of days until the cash on hand, shown on line 11j, will be expended. If more than three days cash requirements are on hand, provide an explanation under "Remarks" as to why the drawdown was made prematurely, or other reasons for the excess cash. The requirement for the explanation does not apply to prescheduled or automatic advances.
13a	Enter the amount of interest earned on advances of Federal funds but not remitted to the Federal agency. If this includes any amount earned and not remitted to the Federal sponsoring agency for over 60 days, explain under "Remarks." Do not report interest earned on advances to States.
13b	Enter amount of advance to secondary recipients included in item 11h.
14	In addition to providing explanations as required above, give additional explanation deemed necessary by the recipient and for information required by the Federal sponsoring agency in compliance with governing legislation. Use plain sheets of paper if additional space is required.

FORMS

INSTRUCTIONS

The NASA-Defense Purchase Request is to be used by NASA to request the procurement of supplies or services from the Department of Defense. These instructions pertain to preparation and use of the form by NASA activities. Attachments should be prepared in sufficient quantity so that each copy of a request is complete with a copy of every attachment listed therein.

Block 4: The original and 5 copies of the purchase request, each complete with all attachments, will be forwarded to the DOD activity shown in this block.

Block 6b: Describe the required services or supplies accurately and in sufficient detail to enable the purchasing activity to understand the requirement. When applicable, the particular NASA program and/or project to which the request or amendment pertains will be indicated. Attachments may be used as required. For items of hardware stocked by DOD, the item identification of the Army, Navy or Air Force and the National Stock Number will be entered if known. When applicable, the specification number, manufacturer's part number and other descriptive data, such as the desired grade, style, type, color, size, rating, etc.

SHIPPING INSTRUCTIONS: When names and addresses of consignees of all supplies to be delivered are not contained herein, or otherwise furnished, request for the issuance of shipping instructions shall be made to the appropriate NASA originating office not less than 30 days prior to date on which any of the articles is to be ready for shipment. Three copies of shipping documents shall be forwarded to the NASA originating office and each consignee.

DISPOSITION OF PROPERTY: Include instructions for the disposition of any non-expendable or other residual property purchased with NASA funds.

PRIORITY RATING: Include applicable priority rating and claimant program identification *(Example: Priority Rating DO-A2)*. In procurement for DX programs, identification will also include the unclassified program name.

Block 8: If this request or any part of the supplies or services covered by this request is subject to Section 305 of the National Aeronautics and Space Act of 1958 *(42 U.S.C. 2457)*, a copy of the long form or short form New Technology clause, together with the appropriate instructions for the inclusion of the clause in contracts shall be furnished the purchasing activity in accordance with NASA Procurement Regulations *(9.107-9)*

Block 10: Cite appropriation symbol, cost coding, or any other accounting data to be included in the ensuing documentation.

Security Classification: If the purchase request or any part thereof is classified, DD Form 254, "DOD Contract Security Classification Specification" *(NASA Procurement Regulation 16.811)*, or other written notice of security requirements will be prepared.

Changes: All changes that affect the contents of the purchase request must be processed as a purchase request amendment. This includes such changes as a decrease in quantity, increase or decrease in funds, change in the specifications or in the part, stock or drawing numbers, etc. Such changes may be made initially by expeditions means such as telegraph or telephone communication, but each change will be confirmed by a purchase request amendment. The original and 5 copies of purchase request amendments will be forwarded to the DOD recipient of the original purchase request. In preparing an amendment, Blocks 1 through 5 must always be completed. Only those remaining blocks of the form that are applicable to the change or revision of the data in the purchase request or prior amendments thereto need be filled in. The unused blocks, however, should have "N/C" inserted to reflect no change.

FORMS

INSTRUCTIONS

General Information: All paragraph references below refer to NASA Handbook NHB 9501.2A which includes additional instructions for completing the NASA 533 series of reports. Copies of the handbook are available thru the NASA Contracting Officer or from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Forms: Forms will be obtained by the contractor thru the contracting officer When directed or approved by the contracting officer, other means than the NASA Form 533 may be used for transmitting the data required by these instructions; e.g., punched cards, tapes, or electronic transmission such as transceivers or TWX machines.

Security Classification: If the information in the report is classified, appropriate security classification shall be given the report (see par. 107).

Submission: The NASA Form 533M report is due in the office of the addressee on a negotiated date not later than the 10th operating day following the close of the contractor's accounting month being reported (operating day: any calendar day worked within the contractor's fiscal accounting period). For Initial Reports and other related items of significance see par. 300-5, 301 and the contract. The addresses and number of copies to be submitted will be as specified by the contract or by an administrative instruction.

Amounts: Report dollar amounts in even thousands and hours in tenths of thousands (e.g., $32,600 as $33 or 462 hours as .5).

Instructions for Form Headings: The form headings shall be completed as follows.

1. To – Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.

2. From – Enter the full name and address of the contractor, and if applicable, the contractor's division performing the contract.

Preparation Instructions:

1. Description of Contract:

a. Type - Cost Plus Fixed Fee, Cost Plus Incentive Fee, etc.

b. Number – Enter complete letter or contract symbol, number and number of latest definitized amendment.

c. Scope of Work – Enter a brief description of the contract effort. Identify the service, project, system or subsystem and where hardware is concerned, the quantity being procured or proposed for the contract.

d. Signature and Date – The authorized Contractor Representative shall sign and date his approval. When such Representative is other than the project manager, the project manager shall add his signature to signify his review of the content. Date shall signify date of approval and signature of report.

2. Report for Month Ending (Report Date) – Enter the ending date of the contractor's accounting month and the number of operating days for that accounting month

3. Contract Value – Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the latest definitized amendment as noted in 1b above. For all incentive contracts, enter the negotiated target cost and target fee

4. Fund Limitation – Enter the total funding obligated and the latest corresponding contract amendment number as of the report date.

5. a. Invoice Amounts Billed – Enter the total amount of invoices billed by the contractor against this contract and the latest invoice number as of the report date.

b. Total Payments Received – Enter the total amount of payments received by the contractor for this contract as of the report date.

6. Reporting Category – Enter the captions of the reporting categories specified in the contract. (See par. 301-3)

7. Cost Incurred/Hours Worked. All cost and hour data shall be reported by the categories negotiated in the contract (par. 301-4).

a. Actual During Month – Enter the total actual cost incurred/hours worked for the accounting month being reported.

b. & d. Planned Costs (optional) – Enter the planned (budgeted) cost for the month being reported in column 7b and cumulative to date in column 7d The planned costs are obtained from the time phased baseline plan which includes the original contract value plus authorized changes. The baseline plan to date consists of the sum of the budgets for all authorized work that is scheduled for completion through the report date. The plan shall include a pro rata share of the budgets for work-in-process. Identify the baseline plan used by date and revision number at the bottom of the report.

c. Cumulative Actual Cost/Hours to Date – Enter the cumulative actual cost incurred/hours worked as of the report date.

8. Estimated Cost/Hours to Complete – Enter the current estimates for performing currently authorized work which is included in the most recently executed contract amendment, plus additional authorized work (directions-to proceed) for which execution of amendments are pending. The estimates will be used for planning purposes only and will not be binding on either the contractor or NASA.

a. & b. These columns may be used at the option of the installation to obtain any desired combination of subsequent month(s), fiscal year(s) and/or balance of fiscal year data. The required data element(s) shall be specified in the contract. (See par. 301-5)

c. Enter the cost/hour data for the balance of the contract not including columns 8a and 8b. Where amounts reported in this column exceed one fiscal year, a breakdown by fiscal year may be required

9. Estimated Final Costs/Hours

a. Contractor Estimate – Enter the total estimated cost/hours for completion of the contracted effort (this should equal the sum of comumns 7c, 8a, 8b and 8c).

b. Contract Value – Enter the distribution of the Contract Value to the reporting categories. The total of this column shall agree with Item 3, above Significant differences between columns 9a and 9b shall be explained in the "Contractor's Remarks." Where there are no changes from the prior reports submitted, the data may be omitted if the contractor and the contracting officer jointly agree.

10. Unfilled Orders Outstanding – Enter the total of unfilled orders outstanding as of the report date. (See par. 301-6)

11. Contractor's Remarks:

a. Analytical remarks on significant items materially affecting historical or projected cost or preformance shall accompany each monthly report (e.g., see item 9b above and par. 304).

b. Include a reconciliation from the original contract value (Original Negotiated Baseline) to the present Contract Value as reported in Item 3. A sample format is set forth in the instructions on the back of NASA Form 533Q and par. 304.

c. Changes authorized but not finalized may be required by the field installation to be further subdivided as follows.

(1) changes negotiated but not definitized

(2) changes pending negotiation

(3) changes pending quotation

d. Report new change orders per sample format set forth in the instructions on the back of NASA Form 533Q or par. 304

FORMS

INSTRUCTIONS

General Information: All paragraph references below refer to NASA Handbook NHB 9501.2A which includes additional instructions for completing the NASA 533 series of reports. Copies of the handbook are available thru the NASA Contracting Officer or from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402

Forms: Forms will be obtained by the contractor thru the contracting officer. When directed or approved by the contracting officer, other means than NASA 533 format may be used for transmitting the data required by these instructions, e.g., punched cards, tapes or electronic transmission such as transceivers or TWX [illegible].

Security Classification: If the information in the report is classified, appropriate security classification will be given the report (see par. 107).

Submission: The NASA Form 533P report is due in the office of the addressee on a negotiated date not later than the 10th operating day following the close of the contractor's accounting month being reported (Operating Day - any calendar day worked within the contractor's fiscal accounting period). The addressee and number of copies to be submitted will be as specified by the contract or by an administrative instruction.

Amounts: Report dollar amounts in even thousands and hours in tenths of thousands (e.g., $32,600 as $33 or 462 hours as .5)

Instructions for Form Headings. The form headings shall be completed as follows:

1. To - Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.
2. From - Enter the full name and address of the contractor, and if applicable, the contractor's division performing the contract.

Preparation Instructions

1. Description of Contract:
   a. Type - Cost Plus Fixed Fee, Cost Plus Incentive Fee, etc.
   b. Number - Enter complete letter or contract symbol, number, and number of latest definitized amendment.
   c. Scope of Work - Enter a brief description of the contract effort. Identify the service, project, system or subsystem and where hardware is concerned, the quantity being procured or proposed for the contract.
   d. Signature and Date - The authorized Contractor Representative shall sign and date his approval. When such Representative is other than the project manager, the project manager shall add his signature to signify his review of the content. Date shall signify date of approval and signature of report.
2. Report for Month Ending (Report Date) - Enter the ending date of the contractor's accounting month and the number of operating days for that accounting month.
3. Contract Value - Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the lastest definitized amendment as noted in 1b above. For all incentive contracts, enter the negotiated target cost and target fee.
4. Fund Limitation - Enter the total funding obligated and the latest corresponding contract amendment number as of the report date.
5. a. Invoice Amounts Billed - Enter the total amount of invoices billed by the contractor against this contract and the latest invoice number as of the report date.
   b. Total Payments Received - Enter the total amount of payments received by the contractor for this contract as of the report date.
6. Reporting Category - Enter the captions of the reporting categories specified in the contract (see par. 303-3).
7. Planned Value of Work - The contractor shall establish a time phased baseline cost plan for each reporting category by assigning budgets at the lower levels of [illegible].
   a. Planned Value of Work Scheduled (PVWS) shall be the sum of the cumulative budgets assigned for all effort scheduled to be completed thru the period being reported. Include a pro rata share of the budgets for scheduled work in process. Identify the baseline plan used by date and revision number at bottom of form.
   b. Planned Value of Work Accomplished (PVWA) - shall be the sum of the cumulative budgets assigned for all effort actually completed thru the period being reported plus a pro rata share of the budgets assigned to completed portions of work in process.
8. Actual Cost (AC) - Report cumulative actual cost for each reporting category as of the report date. The actual cost reported on this report shall agree with the actual cost reported on the NASA Form 533M when both reports are required.
9. Variance - Variances exceeding the criteria (dollar/hour or percentage limits) set forth in the contract shall be explained in the narrative report.
   a. Schedule Variance - Enter for each reporting category the result of PVWA minus PVWS. A positive variance indicates a favorable position - ahead of schedule, a negative variance indicates an unfavorable position - behind schedule.
   b. Cost Variance - Enter for each reporting category the result of PVWA minus AC. A positive variance indicates a favorable position - an underrun of cost; a negative variance indicates an unfavorable position - an overrun of cost.
10. Contractor Estimated Final Cost - Enter the current estimates for performing currently authorized work which is included in the most recently executed contract amendment, plus additional authorized work (directions to proceed) for which execution of amendments are pending.
11. Technical Assessment of Progress - This portion of the report shall reflect the Contractor's (Technical Manager's) evaluation of the schedule and technical status for each reporting category as of the report date.
   a. Schedule and Status - Figure A illustrates the symbology to be used to reflect schedules and status.
      (1) Top Line - Enter the appropriate calendar year.
      (2) Second Line - Enter the first letter of each month.
      (3) Shaded Blocks - Enter the current NASA Approved Schedule for each reporting category and enter the date approved by the NASA Project Manager at the bottom of the form. Use inverted open triangles to indicate beginning and ending milestones.
      (4) Unshaded Blocks - Enter the Contractor's current working schedule.
         (i) Use an open schedule bar to indicate time span for which effort is planned. Use an open inverted triangle to represent beginning and ending [illegible].
         (ii) The Contractor's current working schedule may be the same as or different from the NASA Approved Schedule. If the work status as of report date indicates a necessity to revise the current working schedule, show such revision in the next monthly report.
         (iii) Black in triangles when each milestone is reached.
         (iv) To report Schedular Status, determine the length of time planned for the technical achievement to date. Black in the schedule bar to that point in time. Consider any modifications made in the current working schedule. Note: The percent ratio of the blacked in portion of the schedule bar to its total schedule is not necessarily the same as (1) the technical assessment - percent complete, or (2) the percent man hours or dollars used to date (e.g., as determined by the ratio of actuals to the total estimate).
         (v) Use arrows to indicate a break in schedule span.
         (vi) Place a number (1, 2, 3, 4, etc.) next to the triangle to indicate number of times rescheduled.
         (vii) Time Now Indicator - Use a broken vertical line to indicate report [illegible].
   b. Technical Assessment (% Complete) - Evaluate the progress toward meeting the technical requirement of each reporting category. The Contractor's project manager or system engineer makes this assessment. He should consider all aspects of progress - technical specification, quality, production of hardware, software achievement, etc. Subjective factors, such as complexity of tasks, state of the art and level of confidence that the objective can be achieved should be considered.
12. Contractor's Remarks - Analytical remarks on significant items materially affecting cost or performance are required. See paragraph 304 for more detailed [illegible].

FORMS

INSTRUCTIONS

General Information: All paragraph references below refer to NASA Handbook NHB 9501.2A which includes additional instructions for completing the NASA 533 series of reports. Copies of the handbook are available thru the NASA Contracting Officer or from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Forms: Forms will be obtained by the contractor thru the contracting officer. When directed or approved by the contracting officer, other means than NASA 533 format may be used for transmitting the data required by these instructions; e.g., punched cards, tapes, or electronic transmission such as transceivers or TWX machines.

Security Classification: If the information in the report is classified, appropriate security classification shall be given the report (see par. 107).

Submission: The NASA Form 533Q report when required is due in the office of the addressee on a quarterly frequency (i.e., calendar quarter or other designated 3 month interval) not later than the 15th day of the month preceeding the quarter being projected in columns 8a, b and c. For Initial Reports and other related items of significance see par. 300-5, 302 and the contract. The addressees and number of copies to be submitted will be as specified in the contract or by an administrative instruction.

Amounts: Report dollar amounts in even thousands and hours in tenths of thousands (e.g., $32,600 as $33 or 462 hours as .5).

Instructions for Form Headings: The form headings shall be completed as follows:

1. To – Enter the full name and address of the NASA field installation and contracting officer or other designated recipient.

2. From – Enter the full name and address of the contractor, and if applicable, the contractor's division performing the contract.

Preparation Instructions:

1. Description of Contract:

a. Type – Cost Plus Fixed Fee, Cost Plus Incentive Fee, etc.

b. Number – Enter complete letter or contract symbol, number and number of latest definitized amendment.

c. Scope of Work – Enter a brief description of the contract effort. Identify the service, project, system or subsystem and where hardware is concerned, the quantity being procured or proposed for the contract.

d. Signature and Date – The authorized Contractor Representative shall sign and date his approval. When such Representative is other than the project manager, the project manager shall add his signature to signify his review of the content. Date shall signify date of approval and signature of report.

2. Report for. Quarter Beginning (Report Date) – Enter the beginning date of the quarter being projected in columns 8a, b and c and the number of operating days in the quarter.

3. Contract Value – Enter the total definitized cost (a) and fee (b) of all work to be performed under the contract as of the report date. Include dollar amounts through the latest definitized amendment as noted in 1b above. For all incentive contracts, enter the negotiated target cost and target fee.

4. Fund Limitation – Enter the total funding obligated and the latest corresponding contract amendment number as of the report date.

5. a. Invoice Amounts Billed – Enter the total amount of invoices billed by the contractor against this contract and the latest invoice number as of the report date.

b. Total Payments Received – Enter the total amount of payments received by the contractor for this contract as of the report date.

6. Reporting Category – Enter the captions of the reporting categories specified in the contract. (See par. 302-3)

7. Cost Incurred/Hours Worked

a. Enter the cumulative actual cost incurred/hours worked thru the first two months of the quarter preceeding the quarter projected in columns 8a, 8b and 8c.

b. Enter an estimate for the month in which the report is due (see "Submission" above).

c. Enter the sum of columns 7a and 7b.

8. Estimated Cost/Hours to Complete (columns 8a thru 8i) – Enter the appropriate month, quarter and fiscal year designations in the column headings. Enter the current estimates for performing currently authorized work which is included in the most recently executed contract amendment plus additional authorized work (directions to proceed) for which execution of amendments are pending. These estimates will be used for planning purposes only and will not be binding on either the contractor or NASA. The sum of columns 8a thru 8i will be entered in 8j. If the totals reported in column 8i, Balance of Contract, exceed more than one fiscal year, each fiscal year shall be identified and reported separately.

9. Estimated Final Cost/Hours

a. Contractor Estimate – Enter the total estimated cost/hours for completion of the contracted effort for each reporting category. (This should equal the sum of columns 7c, and 8j.)

b. Contract Value – Enter the distribution of the Contract Value to the reporting categories. The total of this column shall agree with Item 3, above. Significant differences between columns 9a and 9b shall be explained in the "Contractor's Remarks." When there are no changes from the prior reports submitted, the data may be omitted if the contractor and the NASA Contracting Officer jointly agree.

10. Estimated Completion Date – Enter the estimated completion date for each subdivision of work if a correlated cost-schedule activity report is not required. The entry shall not serve as notice to NASA of late delivery or as acquiescence in such late delivery by NASA.

11. Unfilled Orders Outstanding – Enter the total of unfilled order outstanding as of the report date. (See par. 301-6)

12. Contractor's Remarks – The narrative report submitted with the quarterly cost projection report shall normally be limited to those items materially affecting projected cost and performance which have not been addressed in the preceeding monthly narrative reports. (See par. 304)

a. Explain any significant items affecting cost; e.g., technical and schedule problems, changes in plans, incurred over/under runs, etc.

b. Include a reconciliation from the original contract value (Original Negotiated Baseline) to the present Contract Value as reported in Item 3. A sample format is set forth in Figure A below.

c. Changes authorized but not finalized may be required by the field installation to be further subdivided as follows:

(1) changes negotiated but not definitized
(2) changes pending negotiation
(3) changes pending quotation

d. Report new change orders per sample format set forth in Figure B below.

ORIGINAL CONTRACT VALUE	$_____
SUPPLEMENTAL AGREEMENTS (Identify; i.e., inclusive modification numbers)	_____
PRESENT CONTRACT VALUE (Col. 9b)	$_____
CHANGES AUTHORIZED BUT NOT FINALIZED (Identify items as to change order number)	$_____
ANTICIPATED OVER (under)/RUN	_____ _____
CONTRACTOR ESTIMATE (Col. 9a)	$_____
CHANGES UNDER CONSIDERATION BUT NOT AUTHORIZED (Identify items)	$_____

NASA FORM 867 SEP 82 PREVIOUS EDITION MAY BE USED. Report on NASA Subcontracts RCS NSPUBL00433

INSTRUCTIONS—GENERAL AND SPECIFIC

A. This report form is for use by NASA prime contractors and first-tier subcontractors participating in the NASA subcontracting reporting program. (*See Paragraph 21.500 of the NASA Procurement Regulation.*) Parts I and II of the form are for use by the prime contractors; Parts I, II and III are for use by the first-tier subcontractors.

B. NASA prime contractors will complete and submit Parts I and II of the form for each subcontract (*as defined in Paragraph E, below*), placed by them which is estimated will exceed $10,000 and for each action (*modification*) in excess of $10,000 on such subcontract. Modifications to be reported include actions which result in the decommitment of funds as well as commitments.

C. First-tier subcontractors having any subcontracts which are estimated will exceed $50,000 will complete and submit the form in entirety for each subcontract (*as defined in Paragraph E, below*) placed by them which is estimated will exceed $10,000 and for each action (*modification*) in excess of $10,000 on such subcontract. Modifications to be reported include actions which result in the decommitment of funds as well as commitments.

D. For use in reporting on NASA subcontracts, "research and development" means basic and applied research, and design and development of prototypes and processes to (1) pursue a planned search for new knowledge, with or without reference to a specific application, (2) apply existing knowledge in the creation of new products or processes, and (3) apply existing knowledge in the improvement or modification of present products or processes. It excludes subcontracts for the purchase of standard commercial items and services.

E. The term "subcontract" as used herein means procurement in the excess of $10,000 by the prime contractor or first-tier subcontractor of articles, materials, or services entering into the performance of a specific NASA prime contract. It does not include purchases, regardless of amount, of stock items, materials, or services which cannot be identified with a specific NASA prime contract.

F. NASA prime contractors will provide the number of the NASA prime contract to their first-tier subcontractors for entry on the reports.

G. The report is to be submitted as soon as possible after placement of the subcontract to the National Aeronautics and Space Administration, Office of Procurement, Code HM-1, Washington, DC 20546.

H. Prime contractors will obtain a supply of the forms from their NASA Contracting Officer. Subcontractors will obtain the forms from the prime contractor.

Item 1. Enter the NASA prime contract number.

Item 2. Enter name, and division if applicable, of the prime contractor.

Item 3. Enter address (*City and State only*) of the prime contractor.

Item 4. Enter name, and division if applicable, of the subcontractor.

Item 5. Enter address of the subcontractor.

Item 6. Check applicable box. (*For definition of a small business concern, see Paragraph 1.701 of the NASA Procurement Regulation.*)

Item 7. Check applicable box. (*For definition of a disadvantaged business concern, see par. 1-701.2 of the NASA Procurement Regulation.*)

Item 8. Enter subcontract or purchase order number specified by the contractor initiating the action.

Item 9. Enter in terms of commitments, to the nearest dollar, the amount of the subcontract, or amount of modification of the subcontract. Modifications resulting in decommitments are to be enclosed in parentheses. On line 9a, enter the cumulative amount of the subcontract prior to the action being reported. If the reported action is a new subcontract, enter the word "New." On line 9b, enter the amount of the action being reported. On line 9c, enter the new cumulative amount (*total of lines 9a and 9b*).

Item 10. Enter the location (*Address, City and State*) of the principal plant or place of business where the items will be produced or supplied from stock or where the work will be performed. For construction subcontracts, enter the site of construction.

Item 11. Enter a brief description of the item to be furnished or the work to be performed under the subcontract. (*For example: Electrical Indicating Meters for Shuttle Orbiters.*)

Item 12. Check applicable box to indicate whether effort involves research and development. (*See Instruction D.*)

Items 13 through 21. See items 4 through 12.

Item 22. Enter the name of the company submitting the report. This should be the name of the prime contractor for reports on first-tier subcontracts; it should be the name of the first-tier subcontractor for reports on second-tier subcontracts.

Item 23. Typed name and signature of company individual submitting the report.

Item 24. Enter the date of signature.

FORMS

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION CONTRACTOR'S RELEASE	CONTRACT NO.

Pursuant to the terms of Contract No. _____ and in consideration of the sum of _____
(Total of amounts paid and payable)

Dollars ($ _____) which has been or is to be paid under the said contract to _____
(Contractor's name and address)

(hereinafter called the Contractor) or his assignees, if any, the Contractor upon payment of the said sum by the United States of America *(hereinafter called the Government)*, does hereby remise, release, and discharge the Government, its officers, agents, and employees of and from all liabilities, obligations, claims, and demands whatsoever under or arising from the said contract, except:

A. Specified claims in fixed amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor, as follows *(if none, so state)*: _____

B. Claims, together with reasonable expenses incidental thereto, based upon the liabilities of the Contractor to third parties arising out of the performance of the said contract, which are not known to the Contractor on the date of the execution of this release and of which the Contractor gives notice in writing to the Contracting Officer within the time period specified in said contract.

C. Claims for reimbursement of costs including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of the said contract relating to patents.

D. When the contract includes an article entitled "*Optional Data Requirements*," claims pursuant to such article when, within the one-year period after final payment under the contract, the Contracting Officer requests in writing that the Contractor furnish such data.

The Contractor agrees, in connection with patent matters and with claims which are not released as set forth above, that he will comply with all of the provisions of the said contract, including without limitation, those provisions relating to notification to the Contracting Officer and relating to the defense or prosecution of litigation.

The Contractor further agrees that payments on account of claims not released as set forth above shall be subject to adjustment in accordance with paragraph (i) of the clause of the contract entitled "Allowable Cost, Incentive Fee and Payment," if such clause is a provision of the contract.

IN WITNESS WHEREOF, this release has been executed this _____ day of _____, 19____.

_____

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION ASSIGNEE'S RELEASE	CONTRACT NO.

Pursuant to the terms of Contract No. _____ and in consideration of the sum _____
(Total of amounts paid and payable)
Dollars ($_____) which has been or is to be paid under the said contract by the United States of America *(hereinafter called the Government)* to the Contractor or his assignees, the _____
(Assignee's name and address)

(i) a corporation organized and existing under the laws of the State of _____,
(ii) a partnership consisting of _____,
(iii) an individual trading as _____,

(hereinafter called the Assignee), upon receipt of that part of the said sum due under his assignment does hereby remise, release, and discharge the Government, its officers, agents, and employees of and from all liabilities, obligations, claims, and demands whatsoever under or arising from the said contract and assignment, except:

A. Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible of exact statement by the Contractor, as follows: _____
(If none, so state)

B. Claims, together with reasonable expenses incidental thereto, based upon the liabilities of the contractor to third parties arising out of the performance of the said contract, which are not known to the Contractor or Assignee on the date of the execution of this release and of which the Contractor or Assignee gives notice in writing to the Contracting Officer within the time period specified in the said contract.

C. Claims for reimbursement of costs including reasonable expenses incidental thereto, incurred by the Contractor under the provisions of the said contract relating to patents.

D. When the contract includes an article entitled "Data Requirements," claims pursuant to such article when, within the one-year period after final payment under the contract, the Contracting Officer requests in writing that the Contractor furnish such data.

The Assignee agrees, in connection with claims which are not released as set forth above, that final payment under the said contract does not modify the requirements and limitations imposed on the Contractor or Assignee by the contract or the assignment, including without limitation those provisions relating to notification to the Contracting Officer and relating to the defense or prosecution of litigation.

The Assignee further agrees that payments on amount of claims not released as set forth above shall be subject to adjustment in accordance with paragraph (i) of the clause of the contract entitled "Allowable Cost, Incentive Fee and Payment," if such clause is a provision of the contract.

NASA — Contractor's Assignment of Refunds, Rebates, Credits, and Other Amounts

CONTRACT NO.

Pursuant to the terms of Contract No. _____ and in consideration of the reimbursement of costs and payment of fee, as provided in the said contract and any assignment thereunder, the _____ *(Contractor's name and address)* _____ *(hereinafter called the Contractor)* does hereby:

1. Assign, transfer, set over and release to the UNITED STATES OF AMERICA *(hereinafter called the Government)* all right, title, and interest to all refunds, rebates, credits, and other amounts *(including any interest thereon)*, arising out of the performance of the said contract, together with all the rights of action accrued or which may hereafter accrue thereunder.

2. Agree to take whatever action may be necessary to effect prompt collection of all refunds, rebates, credits and other amounts *(including any interest thereon)* due or which may become due, and to promptly forward to the NASA Contracting Officer certified checks *(made payable to the National Aeronautics and Space Administration)* for any proceeds so collected. The reasonable costs of any such action to effect collection shall constitute allowable cost when approved by the Contracting Officer as stated in the said contract and may be applied to reduce any amounts otherwise payable to the Government under the terms hereof.

3. Agree to cooperate fully with the Government as to any claim or suit in connection with refunds, rebates, credits, or other amounts due *(including any interest thereon)*; to execute any protest, pleading, application, power of attorney, or other papers in connection therewith; and to permit the Government to represent the Contractor at any hearing, trial, or other proceeding; arising out of such claim or suit.

(LIFT HERE: PART I INSTRUCTIONS ON BACK OF THIS PAGE) 1. ORIGINAL

CFR TITLE 48 CHAPTER 18

1984 Edition 18–53.303–1356–(A)

FORMS

INSTRUCTIONS FOR COMPLETION OF PART I BY PROCUREMENT REQUEST INITIATORS

This form must accompany all PR's for obligations to domestic or foreign colleges and universities, including their operationally affiliated nonprofit organizations or foundations *(NMI 5101.12E)*. The form is not required with procurements for training of NASA employees; for non-research procurements under $5,000 made by Purchase Order; or for obligations made during close-out well after the effort is completed.

The initiator completes blocks 1-14 for new awards, and blocks 1-11 for continuations *(and blocks 13-14 if there is a change)*. Part II is completed by the procurement office.

Block 1 - Use complete college or university name to avoid confusion among institutions with similar names.

Block 2 - Use NASA-assigned proposal number, AO, or RFP/RFQ number.

Block 3 - The principal investigator is a person proposed by the university who bears the prime responsibility for the overall technical direction of the work.

Block 12 - University named in block 1 must have a medical school if "Yes" is checked. For investigators with multiple departmental appointments, check "Yes" if primary affiliation is with a medical school component.

Block 13 - Almost all of NASA's work in educational institutions is "R" or "D." Only a few types of projects, primarily information dissemination and conferences, fall into "Other Activities Related to Science and Engineering. "R&D definitions":

Research is systematic intensive study directed toward the fuller scientific knowledge or understanding of the subject studied. Information on the distinction between basic and applied research, including examples, appears in the NASA section of the National Science Board's 10th Annual Report. *(An excerpt is available from the Headquarters Procurement Management Division.)* To summarize the definitions in the NASA context:

Basic Research is work directed toward an increase in fundamental knowledge, both general and specific, of properties and processes in fields relevant to aeronautical and space activities.

Applied Research is the application of the knowledge gained through basic research to specific problems associated with the conduct of aeronautical and space activities.

Development is systematic use of the knowledge and understanding gained from research, directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. It excludes quality control, routine product testing and production.

Block 14 - Location of selected disciplines in fields of science and engineering:

11 ASTRONOMY — Astrophysics.

13 PHYSICS — Acoustics; atomic and molecular; condensed matter; elementary particles; optics; plasma.

31 ATMOSPHERIC SCIENCES — Solar; weather modification; extraterrestrial atmospheres.

32 GEOLOGICAL SCIENCES — Geophysics; geodesy and gravity; geomagnetism; hydrology; geochemistry; paleomagetism; physical geography and cartography; seismology; soil sciences.

33 OCEANOGRAPHY — Chemical; geological; physical; marine geophysics.

44 CIVIL ENGINEERING — Environmental; hydrologic; sanitary; structural; transportation.

47 METALLURGY/MATERIALS ENGINEERING — Ceramic; mining; textile; welding.

49 OTHER ENGINEERING — Agricultural; industrial; management; nuclear; ocean; systems.

51 BIOLOGICAL SCIENCES *(Excludes environmental biology)* — Anatomy; biochemistry; biology; biometry and biostatistics; biophysics; botany; cell biology; entomology and parasitology; genetics; microbiology; neuroscience *(biological)*; nutrition; physiology; zoology.

54 ENVIRONMENTAL BIOLOGY — Ecosystem sciences; evolutionary biology; limnology; physiological ecology; population biology; population and biotic community ecology; systematics.

55 AGRICULTURAL SCIENCES — Agronomy; animal sciences; food science and technology; fish and wildlife; forestry; horticulture; plant sciences; soils and soil sciences; other agriculture.

56 MEDICAL SCIENCES — Internal medicine; neurology; opthalmology; otolaryngology; preventative medicine; pharmacology; psychiatry; radiology; surgery; dentistry; pharmacy; veterinary medicine, and other medical not otherwise classified.

61 PSYCHOLOGY-BIOLOGICAL — Animal behavior.

74 LINGUISTICS — Computational.

75 POLITICAL SCIENCE — Regional studies; international relations; public administration; management.

76 SOCIOLOGY — Complex organizations.

18-53.303-1356-(B)

1984 Edition

FORMS

DETAILED INSTRUCTIONS FOR PROCUREMENT OFFICES*

(Initiating Office Instructions Are on Back of First Page)

CONTENTS

1.00 Need for NASA Form 1356.

2.00 Organizations for which the Form is Required

3.00 Types of Actions Requiring Form Preparation

4.00 Procurement Office Actions on Forms Provided by Procurement Request Initiators

5.00 Procurement Office Actions on Part II

6.00 Contents of Forms Initiated by Procurement Offices

7.00 How Individual Blocks on Form are Completed

8.00 Corrections to Submitted Forms

9.00 What to Do with the Form

1.00 NEED FOR NASA FORM 1356. NASA Form 1356 is the primary source of information for use in a Government-wide reporting system. It is also the basis for numerous internal NASA reports, for example, NASA's University Program, a published listing of active grants, cooperative agreements and contracts. Submission is prescribed by NPR21.760 and NHH 5800.1A.

2.00 ORGANIZATIONS FOR WHICH THE FORM IS REQUIRED. The NASA Form 1356 requirement applies to all procurements from domestic and foreign institutions of higher education *(colleges and universities)*, including their operationally affiliated non-profit organizations or foundations.

3.00 TYPES OF ACTIONS REQUIRING FORM PREPARATION. A NASA Form 1356 is required for each individual obligation to an educational institution, with the exception of procurements for the training of NASA employees; for non-research procurements under $5,000 made by Purchase Order; for adjustments in the estimated cost of a contract; or for negative obligations *(de-obligations)*. Reports are not necessary for obligations made during closeout for overruns, overhead changes and similar minor adjustments, unless the ending date is changed *(See 5.11)*. The requirement applies regardless of the funding instrument used *(grant, contract, cooperative agreement, purchase order, or award made under the authority of Sec. 203(c)(5) of the Space Act)*, the solicited or unsolicited nature of the proposal, the nature of supported work, the fund source within NASA, the procuring installation, or whether the funding is full, step or incremental. Forms are prepared at the basic contract or modification level; there will be only one form per modification. For each case involving a funding action, a NASA Form 1356 must be included in the procurement package by the initiator. If the NASA Form 1356 is missing or incomplete, the procurement office must rectify matters prior to execution of the final procurement documents *(NMI 5101.12E)*. In addition, the procurement office must initiate a NASA Form 1356 in several situations not involving obligation of funds *(See 6.00)*.

4.00 PROCUREMENT OFFICE ACTIONS ON FORMS PROVIDED BY PROCUREMENT REQUEST INITIATORS.

4.10 Ensure blocks 1-3, 6-8, 12-14 have been completed for new awards; 1-3, 6-8 and 12 are required for other actions. Blocks 4, 5, and 9-11 must be completed whenever there are multiple investigators or technical officers.

4.20 Only one NASA Form 1356 is to be completed for each action; i.e., basic award or modification. Consolidate the data if multiple procurement requests covering a single procurement result in receipt of more than one NASA Form 1356; consult the procurement request initiators, if necessary, to obtain agreement on incompatible Part I entries.

4.30 Verify the information in blocks 1-11, paying particular attention to the following blocks:

4.31 Block 1 - University Name. Make sure the name is valid and uniquely identifies the proper institution. This is particularly important for new awards. The name of the parent university is listed rather than research foundation, institute or laboratory names. System names as "State University of New York (SUNY)," "University of Alabama," "University of Missouri," "University of California," are meaningless. The specific campus performing the work must be readily identifiable. For example, the SUNY Research Foundation in Albany negotiates awards on behalf of over 70 campuses in the state; awards made through the Foundation must be attributed to the performing campus.

4.32 Block 2 - Proposal Identification. Insert NASA-assigned proposal number, Announcement of Opportunity number, RFP/RFQ number, "unavailable" or "N.A." *(not applicable)*, as appropriate.

4.33 Block 3 - Principal Investigator. Make sure principal investigators are as designated on the face of the award instrument. For agreements which do not specify a principal investigator, per se, university person bearing primary responsibility for overall technical direction of the project should be named. Provide a brief explanation in blocks 3-5 if there is no principal investigator for the project.

5.00 PROCUREMENT OFFICE ACTIONS ON PART II.

5.10 For NEW AWARDS *(Type of Action 1)*.

5.11 Take actions described in 4.00.

5.12 Complete blocks 15, 17-24 and 28.

5.20 For ADDITIONAL FUNDS, SAME DURATION *(Type of Action 2)*.

5.21 Take actions described in 4.00.

5.22 Complete blocks 15-19, 23, 24 and 28.

5.30 For ADDITIONAL FUNDS AND TIME *(Type of Action 3)*:

5.31 Take actions described in 4.00.

5.32 Complete blocks 15-19, 21-24 and 28.

5.40 For INCREMENTAL FUNDING *(Type of Action 4)*. *(Follow this instruction if procurement request for augmenting an incrementally funded contract is received from a source external to the procurement office. If internally generated, see 6.30.)*

5.41 Take actions described in 4.00.

5.42 Complete blocks 15-19, 23, 24 and 28.

6.00 CONTENTS OF FORMS INITIATED BY PROCUREMENT OFFICES.

6.10 For NO-COST TIME EXTENSIONS *(Type of Action 4)*.

6.11 Complete blocks 1, 6-8, 15, 16 *(If applicable)*, 19, 22, 23 and 28. Treat an ending date change during close-out as a no-cost time extension *(See 3.00)*.

6.20 For CHANGE IN PRINCIPAL INVESTIGATOR OR TECHNICAL OFFICER *(Type of Action 5)*:

6.21 Complete blocks 1, 15 and 28.

6.22 Complete at least one of the following sets of blocks: 3-5; 6-8; 9-11.

6.23 ALTERNATIVE PROCEDURE. A copy of the letter of notification

*These instructions also apply to offices making awards under Space Act Section 203(c)(5) or (6) authority.

(Continued on other side)

(August 1982)

FORMS

Procurement Office Actions on Part II, continued)

to the institution regarding a change in principal investigator or technical officer may be submitted in lieu of a NASA Form 1356.

6.30 For INCREMENTAL FUNDING OF CONTRACTS *(Type of Action 6)*.

6.31 Where an individual procurement request from an external source is not required *(PR initiated by procurement office, funds obligated against existing PR or "master" committing document, etc.)*, procurement office must initiate NASA Form 1356 *(See also 5.40)*.

6.32 Complete blocks 1, 15-19, 23, 24 and 26.

6.33 Complete blocks 3 and 6-8 only if there has been a change since the last incremental action.

7.00 HOW INDIVIDUAL BLOCKS ON FORM ARE COMPLETED. Provide for each block only information specified on the form and in these instructions. Do not modify printed material or add explanatory notes. In the event of situations not covered by the instructions, consult the Headquarters Procurement Management Division.

7.10 Block 15 - Agreement No. Identification number must include complete prefix and suffix. Do not include modification or task order numbers, if any.

7.11 Block 16 - Modification No. Leave blank for new awards and for changes to which a modification number is not assigned.

7.12 Block 17 - Amount obligated. Report to nearest dollar only amount actually obligated by the action at hand. Do not show estimated total cost of incrementally funded contracts.

7.13 Block 18 - Cost Sharing Percentage. Use percentage figure appearing in the agreement cost sharing clause. Insert 0 if there is no cost sharing.

7.14 Block 19 - Type of Action Being Reported. In addition to the instructions in block 19, itself, note that assignment of a new modification number does not constitute a new award and that grants or cooperative agreements are, by definition, never incrementally funded.

7.15 Block 20 - Title or Brief Description of Technical Purpose of Agreement. This should be a brief, yet clear statement, suitable for public release. Avoid use of non-technical procurement-type terms or obscure abbreviations. Use of grant/cooperative agreement title or other wording on the award instrument is preferred.

7.16 Block 21 - Proposal Type. Special Announcements are Dear Colleague Letters, Space Science Notices, Applications Notices and similar widely distributed announcements of NASA's interest in receiving unsolicited proposals in certain areas. Proposals resulting from general brochures or discussion with NASA individuals would fall into the "No Announcement" category. Proposals that do not fit into the above categories would be classified as "Other."

7.17 Block 22 - Start Date This Action. For new awards, use date for which agreement authorizes initiation of effort. Where both additional funds and time *(Type of Action 3)* or no-cost extensions *(Type of Action 4)* are involved, use day next following agreement ending date as it existed before the award was made. Note that for step-funded awards *(with or without the NGL prefix)* the start date can be two to three years in the future. Leave the start date blank for Type of Action 2 *(Additional Funds, Same Duration)* and incremental funding *(Type 6)*.

7.18 Block 23 - End (Completion) Date. Use ending date as shown on agreement. Include this date even if it hasnot changed since last action. For periods of performance based on variables such as successful flight experiments, give best current estimate of ending date.

7.19 Block 24 - "Gov't Signature." Use date signed by Grants or Contracting Officer.

7.20 Block 25 - Special Data. Reserved for future use.

7.21 Block 26 - Validation by Responsible Individual. Forms must be reviewed for compliance with instructions. Reviewing individual certifies that both parts I and II have been properly prepared.

7.22 Block 27 - Ad Hoc Data. Reserved for future use.

8.00 CORRECTIONS TO SUBMITTED FORMS.

8.10 Inadequately prepared forms may be returned by Headquarters to the sender's organization for correction. A covering memo will provide handling instructions.

8.20 The initiating organization may correct a previously submitted form. Such corrections must be made on a carbon or facsimile copy of the erroneous form. Insert the correct information in red so as not to obscure the original error and forward to the Headquarters Procurement Management Division.

8.21 Correction should always be made for wrong agreement number *(Block 22)* for a new award. These and other corrections should be made no later than two months after the close of the Fiscal Year in which the error was made.

9.00 WHAT TO DO WITH FORM.

9.10 NASA Form 1356 should be completed as soon as practicable after the obligation or other action giving rise to the form is accomplished. Send it directly to Headquarters Procurement Management Division, Code HM-1.

9.20 Forms should be sent as soon as possible after completion. Preparation of special cover memos should be avoided to conserve resources.

9.30 Headquarters can accept only the original blue form as a final submission. Machine copies are not acceptable *(Except for corrections. See 8.20)*.

9.40 Carbons should be detached before transmitting form to Headquarters. Distribution of carbons is governed by individual installation guidelines; however, a copy should be retained in the official award file for future reference.

9.50 Forms submitted more than two months after the close of the Fiscal Year in which the action occurred may not be useable. Consult Headquarters prior to submitting any such "misplaced" forms.

FORMS

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
TERMINATION AUTHORITY

INSTRUCTIONS

1. This form will be used to initiate termination of a NASA contract.
2. Include all pertinent remarks or instructions for completing this termination. Attach additional pages if necessary *(one copy of attachment for each copy of this form)*.
3. Insofar as practicable, this form shall be HAND CARRIED to avoid expense to the Government occasioned by delay in accomplishing termination.
4. A complete termination is a termination of all undelivered items on a contract after the termination becomes effective. A partial termination is a termination wherein items remain on the contract to be delivered after the termination becomes effective.
5. Initiating authority will complete items 1 through 9 of this form and item 10 if a partial termination.
6. Use part III, "Remarks," if necessary.
7. Number of copies required: 6.

NASA/FAR SUPPLEMENT

18-53.303-1430-(A) 1984 Edition

FORMS

The functions listed below are delegated pursuant to paragraph 11 of this form. The functions shall be performed only when necessary to the administration of this contract and when not specifically withheld by the NASA Contracting Officer on NASA Form 1430A.

(i) Review contractor's compensation structure;

(ii) Review contractor's insurance plans;

(iii) Review and approve or disapprove contractor's requests for payments under the progress payments clause;

(iv) Negotiate provisional overhead rates, or determine billing rates, when the contract contains a negotiated overhead rates clause. Negotiate final overhead rates when the contract contains a negotiated overhead rates clause and when the contractor *is not* under the negotiation overhead rates procedure pursuant to Tri Service Negotiation;

(v) Negotiate advance understandings on particular cost items for the signature of the NASA Contracting Officer, except when responsibility is placed elsewhere;

(vi) Review and evaluate contractor's proposals for contract changes and furnish comments and recommendations to the NASA Contracting Officer. Negotiate with the contractor when requested by the NASA Contracting Officer;

(vii) Manage special bank accounts;

(viii) Assure timely notification by the contractor of any anticipated overrun or underrun of the estimated cost under cost-type contracts; evaluate and advise NASA Contracting Officer;

(ix) Review, approve or disapprove, and maintain surveillance of the contractor's procurement system when consent to the placement of subcontracts has been delegated;

(x) Monitor contractor's financial condition and advise the NASA Contracting Officer when contract performance is jeopardized thereby;

(xi) Issue tax exemption certificates when applicable, and assure that the contractor advises NASA of changes in contract price, if any;

(xii) Assist in post-award orientation conferences;

(xiii) Prepare findings of fact under the Disputes Clause and forward with recommendations to the NASA Contracting Officer;

(xiv) Assure processing of duty free entry certificates for execution by the NASA Contracting Officer;

(xv) Assure contractor's compliance with small business, labor surplus area, and minority business enterprises, mandatory subcontracting programs; conducting on an as-required basis, small business and labor surplus area set-aside surveillance; and providing advice to small business, labor surplus area concerns, and minority business enterprises;

(xvi) Issue cure and show cause letters after approval of the NASA Contracting Officer;

(xvii) Monitor the contractor's system for control of overtime;

(xviii) Assure that overtime compensation is in accordance with the terms of the contract, or in the absence of contractual coverage, that any excepted overtime charged is reasonable and properly allocable;

(xix) Perform Property Administration;

(xx) Perform plant clearance officer functions, assuring screening of contractor inventory by NASA prior to additional screening, redistribution and disposal;

(xxi) Evaluate contractor's requests for facilities and changes to existing facilities, and provide the NASA Contracting Officer with appropriate recommendations;

(xxii) Assure required screening of centrally reportable equipment items before acquisition by contractor;

(xxiii) Evaluate contractor's requests for approval to use facilities in accordance with the Use and Charges Clause and provide the NASA Contracting Officer with appropriate recommendations;

(xxiv) Assure collection of any rental due for use of facilities;

(xxv) Assure reporting of NASA centrally reportable equipment no longer needed by the contractor in support of NASA programs;

(xxvi) Perform production support and surveillance (including production engineering) and status reporting of potential and actual slippages in contract schedules;

(xxvii) Monitor compliance with labor and industrial relations matters under the contract, apprising the NASA Contracting Officer of actual or potential labor disputes, and removing material from strikebound contractor's plants upon instructions from the NASA Contracting Officer;

(xxviii) Assure contractor compliance with applicable safety requirements of the contract, including the handling of hazardous and dangerous materials and processes;

(xxix) Make appropriate comments to the NASA Contracting Officer on any inadequacies noted in specifications;

(xxx) Assure timely submission of required reports;

(xxxi) Determine adequacy of prime contractor's Disclosure Statements;

(xxxii) Determine whether prime contractor's Disclosure Statements are in compliance with Cost Accounting Standards.

(xxxiii) Determine contractor compliance with Cost Accounting Standards and Disclosure Statements, if applicable; and

(xxxiv) Negotiate price adjustments pursuant to the Cost Accounting Standards clause and advise the NASA Contracting Officer of results;

(xxxv) Analyze quarterly limitation on payments statements and recover overpayments from the contractor; and

(xxxvi) Negotiate changes to interim billing prices when authorized by the NASA Contracting Officer.

INSTRUCTIONS FOR BLOCK 5 – This block should contain the place of contract performance, if known, and not the place of contract *signature*, unless they are the same. For example, when a contract is signed by company "x" at corporate headquarters in New York, but the place of performance is Tucson, Arizona, block 5 should read "Company 'x,' Tucson, Arizona."

INSTRUCTIONS FOR FILING FORM ITA-999

Requests for Special Priorities Assistance may be filed:

A. When the regular procedures of the Defense Materials System and Defense Priorities System will not obtain delivery of materials[1] in time to meet required delivery schedules in support of authorized national defense programs,[2] and

If the applicant is a sub-contractor, he should contact his customer to ascertain the appropriate Claimant Agency. In the event the Claimant Agency cannot be determined, the application may be filed with the Priorities and Allocations Division, Room 4184, Industry and Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230.

1984 Edition 18-53.303-DOC-ITA-999-(C)

FORMS

B. to request assistance in placing rated or authorized controlled materials (ACM) orders.

Requests for assistance must establish:

A. the urgent defense related need for the products, materials or services covered by the associated mandatory acceptance order.

B. that the applicant has exercised reasonable effort to resolve the problem through employment of his own resources.

C. that the request for assistance is timely.

Applicants are required to demonstrate that reasonable efforts have been made to locate at least two alternative sources of supply prior to requesting special priorities assistance on Form ITA-999.

WHERE TO FILE – Each ITA-999 must be sponsored by a Claimant Agency [3]. Complete forms should be filed with the Government agency having jurisdiction over the contract.

Department of Defense – File with local Defense Contract Administration Services Office or plant representative.

Department of Energy (DOE) – File with appropriate Field Office.

General Services Administration – File with the contracting officer in the Regional Office or the Headquarters Office in Washington, D.C., whichever issued the contract.

COPIES TO BE FILED – The applicant should file an original and five (5) copies of this form with the appropriate Claimant Agency.

APPLICATIONS FOR PRIORITY RATING TO OBTAIN CAPITAL/PRODUCTION EQUIPMENT – Prime and subcontractor applications for a priority rating to obtain capital/production equipment for the performance of a rated order or contract for a Department of Defense Form DO-601, "Application for Rating for Production Equipment," in accordance with the instructions on that form. DOE contractors do not use Form DO-601 – contact appropriate DOE Field Office.

SPECIAL INSTRUCTIONS

If the space in any block is insufficient for a clear and complete statement of the information called for, use the "continuation" space provided or a separate sheet or letter with a copy attached to each copy of the form. Identify each such statement with the block number concerned.

Entries in block 10 must be restricted to those appearing on a single purchase order of the applicant, except in those instances where "special priorities assistance" is requested for additional purchase orders that have been placed with the same supplier for the same material or item in which case such purchase orders may be combined on one application; however, each purchase order number must be identified and the quantities and rating on each purchase order must be shown separately.

If disclosure of the use to which the particular customers will put applicant's product is prohibited by security regulations, give a general description in block 10 and enter "classified."

[1] "Material" is defined in DPS Reg. 1 as any raw, in process, or manufactured commodity, equipment, component, accessory, part, assembly, or product of any kind.

[2] "National defense programs" mean programs for military and atomic energy production and construction, and military assistance to any friendly foreign nation and directly related activities.

[3] "Claimant Agency" means the Department of Defense, the Department of Energy, Industry and Trade Administration, or other Government agencies or subdivisions thereof which may be designated as such by the Federal Preparedness Agency. (DPS Reg. 1, Schedule H, lists the Claimant Agencies which have been authorized.

"Person" means any individual, corporation, partnership, association, or any organized group of persons, and includes any agency of the United States Government or any friendly foreign government.

NASA/FAR SUPPLEMENT

18-53.303-DOE-EV 375-(A) 1984 Edition

FORMS

TERMS AND CONDITIONS

1. This order is placed in accordance with and subject to the Code of Federal Regulations, Title 10, Atomic Energy, Part 30, issued under Authority of the Atomic Energy Act of 1954, as amended.

2. Byproduct material, technical services or other isotopic materials (other than source and special nuclear material) are furnished at prices and service fees as fixed by the U.S. Department of Energy and in effect on the date of shipment of material or performance of the services. Prices in catalogs issued by the Department or the operator of any DOE facility are subject to change without notice. All transportation costs will be paid by the requisitioning agency, and materials will be shipped F.O.B. the DOE facility handling the transaction. When shipment of material pursuant to this order requires the use of returnable Government-owned containers, title to such containers shall remain in the Government. The buyer will keep the containers in good condition, will not use them for any materials other than the materials shipped therein, and will *deliver* them *to a carrier for return* to the point of shipment, transportation prepaid, within thirty days from the date of receipt *by the buyer* of the shipment. *The buyer agrees to pay to the Department a demurrage charge on each returnable Government-owned container for that period of retention which is in excess of the said 30-day period.*

3. The right to revoke or cancel this order is reserved to DOE.

4. Material ordered from a DOE facility will be shipped as nearly approximating the activity specified in the order as is possible, but no representation is made that radioisotopes will be of a particular quality, quantity, or activity, or will be delivered at specified times. The requisitioning agency agrees to report promptly any discrepancies between the material supplied and that ordered so that replacement or other appropriate adjustment may be made.

5. Payment will be made direct to the operator of the DOE facility from which the materials or services are obtained.

INSTRUCTIONS

1. This isotope order blank has been prepared for use by all Federal agencies ordering byproduct material, technical services, or other isotopic materials (other than source and special nuclear material) from DOE or DOE facilities owned by the U.S. Department of Energy and operated for DOE by contractors. No other type of order blank, purchase order, or contract will be accepted by DOE or DOE facilities.

2. When submitting this order form the requisitioning agency should furnish a prepared bill of lading on which shipment will be made. If such bill of lading is not furnished, shipment will be made collect on a commercial bill of lading to be converted at destination.

3. The DOE utilizes the services of contractors operating its facilities to perform distribution functions for DOE under cost-type contractual arrangements whereby expenses of the facilities are borne by DOE and revenue from distribution of byproduct materials, special technical services, and other isotopic materials is deposited for the account of the Government, used to reduce costs of operation, or paid over as directed by DOE in accordance with applicable contract provisions.

4. The contractor or DOE office accepting the order for DOE will retain the original and return an accepted copy of the order to the requisitioning agency.

☐ c. REMOTE HANDLING TOOLS OR EQUIPMENT, ETC
☐ d. RESPIRATORY PROTECTIVE EQUIPMENT, ETC

14. WASTE DISPOSAL

a NAME OF COMMERCIAL WASTE DISPOSAL SERVICE EMPLOYED

b IF COMMERCIAL WASTE DISPOSAL SERVICE IS NOT EMPLOYED, SUBMIT A DETAILED DESCRIPTION OF METHODS WHICH WILL BE USED FOR DISPOSING OF RADIOACTIVE WASTES AND ESTIMATES OF THE TYPE AND AMOUNT OF ACTIVITY INVOLVED. IF THE APPLICATION IS FOR SEALED SOURCES AND DEVICES AND THEY WILL BE RETURNED TO THE MANUFACTURER, SO STATE.

NRC FORM 313 I (12-81)

1984 Edition 18–53.303–NRC–313I–(B)

FORMS

INFORMATION REQUIRED FOR ITEMS 15, 16 AND 17
Describe in detail the information required for Items 15, 16 and 17. Begin each item on a seperate page and key to the application as follows: 15. RADIATION PROTECTION PROGRAM. Describe the radiation protection program as appropriate for the material to be used including the duties and responsibilities of the Radiation Protection Officer, control measures, bioassay procedures *(if needed)*, day-to-day general safety instruction to be followed, etc. If the application is for sealed source's also submit leak testing procedures, or if leak testing will be performed using a leak test kit, specify manufacturer and model number of the leak test kit. 16. FORMAL TRAINING IN RADIATION SAFETY. Attach a resume for each individual named in Items 6 and 7. Describe individual's formal training in the following areas where applicable. Include the name of person or institution providing the training, duration of training, when training was received, etc. a. Principles and practices of radiation protection. b. Radioactivity measurement standardization and monitoring techniques and instruments. c. Mathematics and calculations basic to the use and measurement of radioactivity. d. Biological effects of radiation. 17. EXPERIENCE. Attach a resume for each individual named in Items 6 and 7. Describe individual's work experience with radiation, including where experience was obtained. Work experience or on-the-job training should be commensurate with the proposed use. Include list of radioisotopes and maximum activity of each used.

18. CERTIFICATE *(This item must be completed by applicant)*	
The applicant and any official executing this certificate on behalf of the applicant named in Item 2, certify that this application is prepared in conformity with Title 10, Code of Federal Regulations, Part 30, and that all information contained herein, including any supplements attached hereto, is true and correct to the best of our knowledge and belief. **WARNING.–18 U.S.C., Section 1001; Act of June 25, 1948; 62 Stat. 749; makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.**	
a. LICENSE FEE REQUIRED *(See Section 170.31, 10 CFR 170)*	b. CERTIFYING OFFICIAL *(Signature)*
	c. NAME *(Type or print)*
(1) LICENSE FEE CATEGORY:	d. TITLE
(2) LICENSE FEE ENCLOSED: $	e. DATE

Veterans Administration

48 CFR Ch. 8

Acquisition Regulation; Interim Final Rule

VETERANS ADMINISTRATION

48 CFR Chapter 8

Acquisition Regulations

AGENCY: Veterans Administration.

ACTION: Interim Final Rule.

SUMMARY: The VA (Veterans Administration) is issuing an interim final regulation pursuant to OFPP (Office of Federal Procurement Policy) Policy Letter 83–2, section 5. This regulation will be effective April 1, 1984, but will not become a final regulation until assessment of all comments submitted by April 30, 1984. This regulation will be known as the VAAR (Veterans Administration Acquisition Regulation) and is codified as Chapter 8 of Title 48 of the Code of Federal Regulations.

The purpose of the VAAR is to implement and supplement the FAR (Federal Acquisition Regulation). The FAR was issued on September 19, 1983, in the **Federal Register** by the General Services Administration, Department of Defense and National Aeronautics and Space Administration. The FAR is a uniform system of acquisition regulations promulgated pursuant to Executive Order 12352, Federal Procurement Reforms.

The FAR becomes effective on April 1, 1984 and will take the place of the Federal Procurement Regulations, Defense Acquisition Regulations and the NASA Procurement Regulations. Consequently the VAPR (Veterans Administration Procurement Regulation) codified as Chapter 8, Title 41, CFR, is superseded by Chapter 8 of Title 48, CFR on April 1, 1984. The VAAR implements the FAR where implementation is necessary, and interprets or supplements the FAR where no FAR provisions provide specific coverage for areas unique to the VA.

DATES: This interim regulation is effective April 1, 1984. Written comments should be submitted not later than April 30, 1984, for consideration in the final regulation.

ADDRESS: Interested persons are invited to submit written comments, suggestions or objections to Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. All written comments received will be available for public inspection only at the Veterans Administration Central Office in room 132 of the above address between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until May 10, 1984.

FOR FURTHER INFORMATION CONTACT: Chris A. Figg, (202) 389–2334.

SUPPLEMENTARY INFORMATION:

I. Background

This interim regulation does not generally establish new policy. It primarily transplants the current VAPR into the new format prescribed by the FAR. However new coverage includes the designation of the Agency Procurement Executive in Part 801; new provisions in Part 849 regarding contract termination; and revised negotiation authority for scarce specialist services and mutual use, or exchange of use, of specialized medical resources (38 U.S.C. 4117 and 38 U.S.C. 5053), contained in Part 815.

To the extent that the substance of the present VAPR will be modified, those changes will consist of interpretative rules, general statements of policy or rules of VA organization procedure or practice. For the reasons discussed below, the VA finds that publication for prior public comment is impracticable, unnecessary and contrary to public interest.

Due to the extremely short time allowed for conversion of our acquisition regulation, the new VAAR published herein does not include coverage for a few acquisition subjects now included in the FAR. The VA is currently reviewing topical areas including Acquisition Plans (FAR Subpart 7.1), Contractor Versus Government Performance (FAR Subpart 7.3) and ADP Acquisitions (FAR Part 39) for possible development of additional VAAR regulations. Such development will be promulgated as proposed rules with full public participation.

Under Pub. L. 93–400 all executive agency procurement policies and regulations are subject to those prescribed by the Office of Federal Procurement Policy. Office of Federal Procurement Policy Letter 83–2, "Publicizing the Development of Procurement Policies and Regulations," prescribes the general policy for obtaining views of the public prior to issuing final procurement rules. Paragraph 5. of the Policy Letter provides for waiver of the requirement to solicit views when circumstances make such solicitation impracticable. Since it is necessary to provide VA acquisition regulation coverage consistent with the new FAR system, on the effective date of the FAR (April 1, 1984), this option is being exercised and this VAAR will become effective April 1, 1984, as an interim final rule. It is essential to have the VAAR in place on that date in order to avoid disruption, confusion, and delays in the VA procurement process, in the interest of both the VA and the VA's contractors. The VAAR will not become final until all comments are assessed and any changes warranted have been published in the **Federal Register**. This process is in accordance with OFPP Policy Letter 83–2.

II. Executive Order 12291

Pursuant to the memorandum from David Stockman, Director, Office of Management and Budget, to Donald Sowle, Administrator, Office of Federal Procurement Policy, and Christopher DeMuth, Administrator, Information and Regulatory Affairs, dated December 15, 1983, this interim final rule is exempt from Sections 3, 4, and 5 of the Executive Order 12291.

III. Regulatory Flexibility Act (RFA)

Because this interim final rule does not come within the term "rule" as defined in the RFA (54 U.S.C. 601(2)), it is not subject to the requirements of that Act. In any case, this change, in itself, will not have a significant economic impact on a substantial number of small entities because the VAAR will consist primarily of a reformating of the content of the present VAPR's. To the extent that the VAAR changes or goes beyond the VAPR's, it does so by implementing and interpreting the FAR. Any economically significant change will result from the FAR, not this implementing VA regulation.

IV. Paperwork Reduction Act

The information collection and recordkeeping requirements that are imposed upon the public under these regulations have been approved by the Office of Management and Budget, in accordance with section 3504(h) of the Paperwork Reduction Act.

Information on and copies of the information collection requirements can be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. Comments and questions about the information collections and recordkeeping requirements should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Dick Eisinger, Desk Officer for the VA, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395–6880.

List of Subjects in 48 CFR Chapter 8

Government procurement, VA acquisition regulations.

Approved: March 20, 1984.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

For the reasons set out in the preamble, Title 48 of the Code of Federal Regulations is amended by establishing Chapter 8 to read as follows:

CHAPTER 8—VETERANS ADMINISTRATION

SUBCHAPTER A—GENERAL

PART 801—VETERANS ADMINISTRATION ACQUISITION REGULATIONS SYSTEM

PART 802—DEFINITIONS OF WORDS AND TERMS

PART 803—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

PART 801—VETERANS ADMINISTRATION ACQUISITION REGULATIONS SYSTEM

Sec.

801.000 Scope of part.

Subpart 801.1—Purpose, Authority, Issuance

801.101 Purpose.
801.102 Authority.
801.103 Applicability.
801.103–70 Exclusions.
801.104 Issuance.
801.104–1 Publication and code arrangement.
801.104–3 Copies.

Subpart 801.2—Administration

801.201 Maintenance of the FAR.
801.201–1 The two councils.
801.201–70 Agency Procurement Executive.

Subpart 801.3—Agency Acquisition Regulations

801.301 Policy.
801.301–70 Paperwork Reduction Act requirements.
801.303 Codification and public participation.
801.304 Agency control and compliance procedures.

Subpart 801.4—Deviations from the FAR or VAAR

801.403 Individual deviations.
801.404 Class deviations.
801.470 Rulemaking.

Subpart 801.6—Contracting Authority and Responsibilities

801.601 General.
801.602 Contracting officers.
801.602–2 Responsibilities.
801.602–70 Legal/technical review requirements to be met prior to contract execution.
801.602–71 Processing contracts for legal/technical review.
801.602–72 Documents to be submitted for legal review.
801.602–73 Certification by reviewing official.
801.602–74 Results of General Counsel's legal review.
801.603 Selection, appointment, and termination of appointment.
801.603–3 Appointment.

801.603-4 Termination.
801.603-70 Representatives of contracting officers.
801.603-71 Representatives of contracting officers; receipt of equipment, supplies and nonpersonal services.
801.603-72 Ratification of unauthorized contract awards.
801.670 Special and limited delegation.
801.670-1 Architectural and engineering service—Central Office.
801.670-2 Construction contracts—Central Office.
801.670-3 Utility-connection and other site facility contracts—Central Office.
801.670-4 Construction contracts—field stations, supply depots.
801.670-5 Publications Service—Central Office.
801.670-6 Issue of Government bills of lading—Transportation of remains of deceased beneficiaries.
801.670-7 Issue of Government bills of lading—Transportation of property.
801.670-8 Building and Supply Service—Central Office.
801.670-9 Architectural and engineering services—field stations, supply depots.
801.670-10 Loan guaranty program.
801.670-11 Education and rehabilitation programs.
801.670-12 Medical, dental, and ancillary service.
801.670-13 Department of Memorial Affairs.
801.670-14 Letters of agreement.
801.670-15 $300 small purchase authority for Prosthetic Service personnel.
801.680 Contracting authority of the Inspector General.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

801.000 Scope of part.

This part prescribes general policies and background regarding the Veterans Administration Acquisition Regulations (VAAR). It includes information regarding the maintenance and administration of the VAAR and includes procedures for deviations from the VAAR and the Federal Acquisition Regulations (FAR).

Subpart 801.1—Purpose, Authority, Issuance

801.101 Purpose.

(a) This subpart establishes Chapter 8, Veterans Administration Acquisition Regulations, of Title 48—Federal Acquisition Regulation System, Code of Federal Regulations.

(b) The VAAR must be utilized in conjunction with the FAR. The VAAR cannot be utilized by itself.

801.102 Authority.

The VAAR and any amendments thereto are issued by the Administrator of Veterans Affairs as provided by 38 U.S.C. 210 and the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(c)).

801.103 Applicability.

(a) The FAR and the VAAR apply to all acquisitions of the agency (including construction) made with appropriated funds and procurements made with Supply Fund monies (38 U.S.C. 5021).

(b) The FAR and VAAR will apply to the special procurement programs authorized by Title 38, United States Code (Viz., Veterans Canteen Service and the Loan Guaranty programs), to the extent indicated in the VAAR.

801.103-70 Exclusions.

The FAR and VAAR will not apply to purchases and contracts which utilize General Post Funds when such regulations would infringe upon a donor's prerogative to specify the exact item to be purchased and/or the source of supply.

801.104 Issuance.

801.104-1 Publication and code arrangement.

(a) VA (Veterans Administration) acquisition policies and procedures which directly affect the public will be published in the **Federal Register** as Chapter 8 of Title 48, Code of Federal Regulations. Related material, not affecting the public, may also be published in the **Federal Register** when its inclusion will provide a logical, comprehensive statement of Veterans' Administration acquisition policies and procedures.

801.104-3 Copies.

Cumulative editions of Chapter 8 of Title 48, Code of Federal Regulations are printed annually and may be purchased by the public from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Subpart 801.2—Administration

801.201 Maintenance of the FAR.

This subpart describes the Veterans Administration's participation in the maintenance of the FAR.

801.201-1 The two councils.

A designee of the Office of Procurement and Supply will represent the Veterans Administration on the CAA (Civilian Agency Acquisition) Council.

801.201-70 Agency Procurement Executive.

The Associate Deputy Administrator for Logistics (005) is the VA Agency Procurement Executive appointed in accordance with Executive Order 12352, dated March 17, 1982. The Agency Procurement Executive is responsible for the development and oversight of agency-wide procurement systems. This responsibility includes overseeing the development of the agency position on proposed FAR policies and the implementing VAAR and the evaluation and monitoring of the agency procurement systems performance.

Subpart 801.3—Agency Acquisition Regulations

801.301 Policy.

(a) VAAR, amendments and interim changes thereto will be issued by the Administrator of Veterans Affairs after necessary reviews by cognizant VA officials.

(b) Implementing procedures, instructions and guidelines necessary to implement the VAAR and the FAR may be issued by the heads of contracting activities. Such issuances may include delegations of authority, review and approval for acquisition action up to the dollar level delegated to that contracting activity by this regulation as well as providing procedural guidance for users. Such issuances will be the minimum necessary to provide a logical implementation of FAR and VAAR requirements and will be internal to the facility, i.e., it will not specify reporting/recordkeeping requirements for the public (see 801.301-70(b)).

801.301-70 Paperwork Reduction Act requirements.

(a) It is the policy of the Government to keep to the minimum the amount of recordkeeping and reporting required of the public. This objective applies to the Veterans Administration acquisition system.

(b)(1) Contractors will not be requested to maintain systems of records unless prescribed in FAR or this VAAR. A deviation to this prohibition may be processed in accordance with § 801.403 in order to allow the contracting officer to require contractor reporting or recordkeeping beyond that prescribed in FAR and VAAR. The request for deviation will clearly specify what information or recordkeeping will be required and why it is required. The request will be signed by the head of the contracting activity.

(2) The Director, Office of Procurement and Supply (91) will review the request and upon concurrence will likewise submit the request to OMB (Office of Management and Budget) for approval as prescribed by the Paperwork Reduction Act of 1980. If approved, the Director, Office of Procurement and Supply will send the approval back to the requester with the OMB clearance number.

(c) In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the reporting or recordkeeping provisions that are included in this VAAR have been approved by OMB and have been given the following approval numbers:

48 CFR part or section where identified and described	Current OMB control number
809.504(d)	2900–0418
836.606–2	2900–0422
852.236–72(b)	2900–0422
852.236–79	2900–0422
852.236–81 through 852.236–85	2900–0422
852.236–88	2900–0422
871.201–2	2900–0418

801.303 Codification and public participation.

The VAAR is codified as Chapter 8 of Title 48, Code of Federal Regulations. Codified changes to the VAAR will be published in the **Federal Register**. The Director, Office of Procurement and Supply, arranges distribution of the issues to VA contracting activities and the Office of Procurement and Supply should be notified of changes to the distribution list.

801.304 Agency control and compliance procedures.

Office of Procurement and Supply is responsible for ensuring that the VAAR and amendments thereto are developed as prescribed by the FAR.

Subpart 801.4—Deviations From the FAR or VAAR

801.403 Individual deviations.

(a) When contracting officers, other than those assigned to the Office of Construction, consider it necessary to deviate from the policies set forth in the FAR or VAAR, a request for authority to do so will be submitted to the Director, Office of Procurement and Supply (91). The request will clearly set forth the circumstances warranting the deviation and the nature of the deviation.

(b) Contracting officers assigned to the Office of Construction will, in individual cases, secure prior authorization from the Director, Office of Construction (08) before any deviation is taken. A copy of each such authorization that is granted will be furnished the Director, Office of Procurement and Supply (91).

(c) When a deviation in an individual case is authorized by either the Director, Office of Procurement and Supply, or the Director, Office of Construction, the authorization will be filed in the purchase or contract file, whichever is appropriate. The Director, Office of Procurement and Supply, will review each deviation authorized and when considered necessary either prepare a change to the VAAR or recommend a change to the FAR through the CAA Council.

801.404 Class deviations.

The Director, Office of Procurement and Supply is responsible for determining the need for class deviations. If determined necessary, the Director, Office of Procurement and Supply will request deviation authority from the Deputy Administrator through the Agency Procurement Executive as well as complying with the provisions in FAR 1.404.

801.470 Rulemaking.

(a) VAAR amendments which implement FAR requirements, OFPP (Office of Federal Procurement Policy) directives and legislation or are related to agency management or personnel, will be issued as "Final Rules" in the **Federal Register** as provided in the Administrative Procedures Act, 5 U.S.C. 553.

(b) VAAR amendments which significantly affect the public and for which the Veterans Administration has discretion (as opposed to amendments required by FAR, OFPP or legislation) will be developed in accordance with the proposed rulemaking procedures of the Administrative Procedures Act. This procedure generally involves issuing a notice of proposed rulemaking in the **Federal Register** inviting public comment. Any comments received will be reviewed and when appropriate will be incorporated in the final rule. The final rule will also be published in the **Federal Register** and will include a discussion of the comments received and their disposition.

Subpart 801.6—Contracting Authority and Responsibilities

801.601 General.

(a) This subpart establishes general contracting officer authority and responsibility. However, other provisions in both the FAR and the VAAR contain some contracting officer limitations and it is incumbent upon each contracting officer to be aware of those limitations.

(b) Personnel, other than those designated in 801.602, may determine quality, quantity and delivery requirements for items or services to be purchased. However, under no circumstances will individuals who have not been delegated contracting authority commit the Government for purchases of supplies, equipment or services. Individuals making such commitments may be held financially liable for the amount of the obligation.

801.602 Contracting officers.

(a) Except as otherwise provided for by law, VA regulations and these acquisition regulations, the authority vested in the Administrator to execute, award, and administer contracts, purchase orders, and other agreements (including interagency agreements) for the expenditure of funds involved in the acquisition of personal property, or services (excluding construction and architect engineer service), and for the sale of personal property, is hereby delegated to the Agency Procurement Executive for further delegation to those employees of the Veterans Administration appointed or designated to the following positions:

(1) Director, Office of Procurement and Supply.

(2) Directors, VA Supply Depots.

(3) Director, VA Marketing Center.

(4) Director, Procurement Service, Central Office.

(5) Chiefs, Marketing Divisions, VA Marketing Center.

(6) Chiefs, Supply Services, VA field stations.

(b) The contracting officers named in paragraph (a) of this section may appoint one or more of their subordinates as a contracting officer and authority is hereby delegated to such subordinates, to execute, award and administer contracts, purchase orders, and other agreements for the acquisition of supplies, equipment, nonpersonal services, and for the sale of personal property. Appointments will be made in accordance with FAR 1.603–3 and 801.603–3.

(c) When exercising the authority contained in this chapter 8, the designated employee is identified as the contracting officer and will function within the limits prescribed by law, VAAR and FAR.

801.602–2 Responsibilities.

(a) In the administration of a contract, many problems can and do arise that make the advice and assistance of the General Counsel either desirable or necessary. The final decision as to the action to be taken, however, must be made by the contracting officer in each instance. To reduce to the absolute minimum the possibility of litigation resulting from his/her decision, the contracting officer shall, except as provided in paragraphs (b) and (c) of this section, submit the problem through channels in sufficient detail to the General Counsel for advice or assistance.

(b) Default action may be taken without consulting the General Counsel when the contractor fails to deliver supplies or equipment, or to render the services required within the specified time, or fails to comply with the applicable specifications, unless the contracting officer has reason to doubt that the default action is legal or proper.

(c) Contracts containing a mutual termination clause may be terminated without reference to the General Counsel.

801.802–70 Legal/technical review requirements to be met prior to contract execution.

(a) The following categories of proposed contracts and agreements will be reviewed and concurred in by the Office of Procurement and Supply and/or General Counsel.

(1) All fixed-price formally advertised (or Small Business Restricted Advertised) contracts involving $250,000 or more in either appropriated or nonappropriated funds and indefinite quantity contracts where expenditures of $250,000 or more can reasonably be expected. (Technical reviews from $250,000 through $499,999; technical and legal review for $500,000 or more.) (For contracts awarded by the Veterans Administration Marketing Center, the dollar amount is $1,000,000.)

(2) All fixed-price construction contracts involving $500,000 or more in either appropriated or nonappropriated funds.

(3) All negotiated contracts, including proposed Small Business Administration 8(a) contracts, for which it is anticipated that more than $200,000 in appropriated or nonappropriated funds will ultimately be involved. (For contracts awarded by the Veterans Administration Marketing Center, the dollar amount is $500,000.) The contract audit required by 815.805–5 and FAR 15.805–5 remains applicable as specified.

(4) All proposed agreements and contracts coming within the purview of one or more of the following:

(i) Contracts for insurance.

(ii) Utility connection agreements involving $50,000 or more.

(iii) Utility service agreements involving $50,000 or more.

(iv) Contracts for consulting services (see Subpart 837.2) and management and professional services (see 837.271).

(v) Contracts for research or research and development involving $50,000 or more.

(vi) Automatic data processing equipment, when purchased from other than a Federal Supply Service contract, involving $50,000 or more.

(vii) All contracts for scarce medical specialist services.

(viii) All contracts for the mutual use, or exchange of use, of specialized medical resources.

(ix) Agreements with other Federal agencies involving the expenditures of Veterans Administration funds of $5,000 or more.

(5) All proposed letter contracts and ensuing formal contracts involving expenditures of $5,000 or more.

(6) Any proposed agreement that is unique, novel or unusual (including all consignment agreements, regardless of anticipated dollar value).

(7) Step One of two-step formally advertised procurements when the anticipated value is more than $200,000.

(b) The review and concurrence of the General Counsel is also required for proposed change orders, final decisions or settlement agreements by contracting officers imposing additional liability upon the Government amounting to 10 percent of the amount originally obligated or $10,000, whichever is greater.

(c) In addition to the requirements of paragraphs (a) and (b) of this section, the following require review and concurrence of the General Counsel:

(1) Changes or revisions to all contract clauses.

(2) Changes or revisions to prescribed VA contract forms.

(d) In addition to meeting the legal review requirements of paragraphs (a), (b) and (c) of this section, solicitations and contracts awarded and administered by the Office of Construction also require prior legal review by the General Counsel in the situations outlined below. Requests for review will be made and recorded by the contracting officer.

(1) Terminations, including final decision (cure) letters disputes and claims in excess of $25,000.

(2) Assignment of claims.

(3) Substantive modifications, including proceed orders, of contracts. For purposes of this paragraph any modification or proceed order which may result in a change in the contract price of more than $25,000 or any modification or proceed order granting a time extension of more than 20 days, will be deemed substantive.

(4) Proposed awards to other than the low evaluated bidder.

(5) Proposed no-awards for reasons other than excessive prices.

(6) Proposed consideration of late bids, late offers and later modifications of bids, when it is anticipated that the circumstances involved may result in protest.

(7) Findings and determinations to support negotiations for contracts over $100,000.

(8) Determinations of nonresponsibility and nonresponsiveness.

(e) When legal assistance is requested by any Central Office contracting activity, the contracting officer will brief the General Counsel regarding the facts and points of issue to facilitate prompt resolution.

(f) With regard to solicitations and contracts awarded and administered by the Central Office contracting activities, the General Counsel will be requested to participate in conferences where it is expected that legal problems or contract provisions will be considered, and in meetings attended by legal representatives of private parties or other Government agencies. Assigned procurement counsel will be requested to participate in the drafting of correspondence involving controversial or sensitive contractual matters of a significant nature.

(g) All protests against award will be reviewed by General Counsel in accordance with the provisions specified in 814.407–8(a).

(h) Excluded from these legal review requirements are:

(1) Agreements, licenses, easements, or deeds dealing with management, sale, or lease of properties acquired by the Veterans Administration as a result of liquidation of guaranteed, direct, acquired or vendee loans.

(2) Orders or contracts for procurement of leased telecommunications systems, installation of and changes to telephone PBX systems at individual Veterans Administration locations or orders issued under GSA area-wide contracts with the American Telephone and Telegraph Company and local telephone companies.

801.602–71 Processing contracts for legal/technical review.

(a) All competitively awarded solicitations requiring legal and/or technical review will have such reviews completed prior to opening of bids or proposals.

(b) *Department of Medicine and Surgery Field Stations, VA Marketing Center, VA Supply Depots.* (1) Proposed contracts or agreements specified in 801.602–70(a) (1), (2), (3), (4) (iii) through (vi), (5), (6) and (7) will be forwarded by the contracting officer directly to the Director, Office of Procurement and Supply (93). The Director, Office of Procurement and Supply will review the submissions and when applicable,

forward them directly to the General Counsel (025).

(2) Proposed sharing agreements and contracts for specialized medical services specified in 801.602–70(a)(4)(vii) and (viii) will be forwarded to Central Office in accordance with 815.204 for review and submission to the General Counsel (023).

(3) Proposed interagency agreements specified in 801.602–70(a)(4)(ix) will be forwarded by the approving official to the Director, Office of Procurement and Supply (91). The Director, Office of Procurement and Supply, will review the submissions and forward them directly to the General Counsel (025).

(4) Proposed utility connection agreements specified in 801.602–70(a)(4)(ii) will be forwarded by the contracting officer directly to the Director, Engineering Service. The Director, Engineering Service, will review the submissions and forward them to the General Counsel (025) through the Director, Office of Construction.

(5) Proposed change orders specified in 801.602–70(b) will be forwarded by the contracting officer directly to the Director, Engineering Service. The Director, Engineering Service will review the submissions and forward them to the General Counsel (025).

(6) Proposed final decisions or settlement agreements specified in 801.602–70(b) will be forwarded by the contracting officer directly to the Director, Office of Procurement and Supply. The Director, Office of Procurement and Supply, will review the submissions and forward them to the General Counsel (025).

(7) Proposed revisions to contract clauses specified in 801.602–70(c) will be forwarded by the contracting officer directly to the Director, Office of Procurement and Supply. If concurred in, the Director, Office of Procurement and Supply, will forward them directly to the General Counsel.

(c) *Department of Veterans Benefits field stations.* (1) All proposed State reimbursement contracts and Guidance Center and Vocational Rehabilitation contracts which are anticipated to ultimately involve the expenditure of $100,000 or more, will be forwarded by the contracting officer directly to the Director, Vocational Rehabilitation and Counseling Service, for review and approval. The Director, Vocational Rehabilitation and Conseling Service will review the submissions and forward them to the General Counsel.

(2) Any other proposed agreement or contract specified in 801.602–70(a) will be forwarded by the station Director to the appropriate Regional Director for coordination with Director(s) of the concerned service(s) and submission to the General Counsel.

(3) Any other element of contracting falling within 801.602–70 (b) and (c) will be processed in accordance with paragraph (b)(2) of this section.

(d) *Central Office.* Any element of contracting prescribed for legal review in 801.602–70 originating in Central Office, will be submitted for legal review by the contracting officer, or approving official in the case of agreements with other Government agencies, in accordance with department and staff office instructions.

801.502–72 Documents to be submitted for legal review.

The following documents are to be submitted for legal review:

(a) For proposed construction contracts, a copy of all solicitation documents, excluding drawings. These documents will be submitted no later than at the time they are furnished to prospective bidders. Where feasible, these documents should be submitted for review prior to the time they are furnished to prospective bidders.

(b) For sharing agreements and scarce medical specialist contracts, the documents referred to in 815.204(e).

(c) For all other proposed contracts and agreements, a copy of the documents to be used in the solicitation and/or award of contract, including any other documents which support the proposed procurement action, e.g., determination and findings in the case of negotiated procurement. Solicitation documents will be submitted no later than at the time they are mailed to prospective bidders. Where feasible, these documents should be submitted for review prior to the time they are mailed to prospective bidders.

(d) Contract changes described in 801.602–70(b) and 801.602–71(a)(5).

(1) A *draft* of the proposed change order. This should be prepared on an SF (Standard Form) 30, Amendment of Solicitation/Modification of Contract, and should specify the exact language to be used. Changes in work, time and cost should be specifically described.

(2) The contracting officer's statement describing the need for the changed work. This should also be accompanied by any back-up documentation. Include a statement that the work is or is not within the original scope of the contract.

(3) A copy of the pertinent technical sections of the Master Specifications which are involved in the proposed change work. Also, include a copy of the drawing which the contracting officer's technical representative (COTR) has marked up to delineate the proposed changed work.

(4) The COTR's technical evaluation of the proposed change.

(5) Costing information including:

(i) The contractor's cost proposal in the format required by the Changes Clause in the General Conditions.

(ii) The COTR's independent cost breakdown.

(iii) The architectural engineer's independent cost breakdown.

(iv) Any other relevent costing information, such as independent market research, which will be used as negotiating critera.

(v) The COTR's technical evaluation report on the contractor's cost proposal.

(6) The telephone numbers of the contracting officer and the COTR.

(7) If a proceed order is necessary for the continuation of logical progress of construction, the Office of Procurement and Supply should be called prior to issuing the document.

801.602–73 Certification by reviewing official.

In submitting proposed agreements or contracts received from field stations to the General Counsel, the Central Office reviewing officials will state on the transmittal memorandum or within the file that the proposal conforms to the Federal Acquisition Regulations and Veterans Administration Acquisition Regulations to the best of their knowledge.

801.602–74 Results of General Counsel's legal review.

(a) Upon completion of the review, the General Counsel will advise the appropriate Central Office activity or contracting officers as to whether the proposal was approved as submitted or provide them with the recommended changes. The appropriate Central Office activity will advise the contracting officer as to whether: (1) The submission was approved as is, or (2) provide a copy of the changes required. Where changes are required, the contracting officer will take immediate action to amend the solicitation document.

(b) The General Counsel's review will be completed as expeditiously as possible, with due regard to those procurement actions where circumstances dictate an unusually short period for completing procurement action.

801.603 Selection, appointment, and termination of appointment.

801.603–3 Appointment.

(a) When an employee's qualifications are established by his/her supervisor

and the individual is to be appointed as a contracting officer in accordance with 801.602(b), SF 1402, Certificate of Appointment, will be issued for display in the employee's working area. The certificate will be signed by the next higher superior who fills one of the positions listed under 801.602(a). (Existing appointments will be confirmed by issuance of SF 1402.)

(b) The appointee's class title of position will be shown beneath the appointee's name on the SF 1402. The name of the station and organization will be entered on the face of SF 1402.

801.603-4 Termination.

(a) Appointments will remain effective, unless revoked sooner, until the contracting officer is reassigned or employment is terminated.

(b) A new Certificate of Appointment will be issued and the old certificate terminated when there is any change in the contracting officer's grade and corresponding class title of position or limitation of authority.

801.603-70 Representatives of contracting officers.

(a) In carrying out the responsibilities of FAR 1.602-2, the contracting officer may designate another Government contracting officer, or other Government employees, or another contractor:

(1) To furnish technical guidance and advice or generally supervise the work performed under the contract. Such designations will be in writing and will define the scope and limitation of the representative's authority; and, will be addressed to the designee with a copy to be forwarded to the contractor except as indicated in 801.603-71. Except as provided in paragraph (c) of this section representatives will not be authorized to make any commitments or changes which will affect the price, quantity, quality or delivery terms. (All changes to a contract must be authorized by a contracting officer acting within the scope of his/her authority.)

(2) To take actions authorized in the contract, such as issue delivery orders, reject unsatisfactory items, order replacement of such items (materials or services) and, when necessary, declare contractor in default on specific delivery orders. Except for blood, this authority will be delegated only to other Government contracting officers under centralized indefinite delivery type contracts and the contract will so state. Centralized contracts for blood will provide that contracting officers at ordering offices are authorized to designate representatives and alternate representatives to place delivery orders subject to the same restrictions stated in paragraph (a)(3) of this section.

(3) To place oral or other informal delivery orders for items such as, but not limited to, bread, milk, and blood against local indefinite delivery type contracts on which blanket purchase arrangements have been established and funds have been obligated. The designation of representatives and alternates will be in writing and will define the scope and limitations of the representative's authority, and will be addressed to the employee(s) with a copy to the contractor. Such designations will be made only by the prime contracting officer and are not redelegable.

(b) In the administration of research and development contracts, any representative appointed pursuant to this section must be acceptable both to the contracting officer and the department head or staff office director concerned. When it is necessary to designate a representative under this paragraph (b), the clause in 852.270-1 will be observed.

(c) Contracting officers of the Office of Construction may authorize resident engineers assigned to that office to make individual contract changes within the following limits:

(1) Resident engineers in grade GS-14 may be authorized to make changes not exceeding $20,000 and 20 days of time extension.

(2) Resident engineers in grade GS-13 may be authorized to make changes not exceeding $10,000 and 10 days of time extension.

801.603-71 Representatives of contracting officers; receipt of equipment, supplies, and nonpersonal services.

(a) Except as provided in paragraphs (b), (c) and (d) of this section, any contracting officer may, without prior notification to the contractor or vendor, designate the Chief, Storage and Distribution Section, or other competent personnel, to represent him/her in receiving and inspecting supplies, equipment and services at his/her station. Duties such as, but not limited to, the following will be performed by these designees:

(1) The inspection and certification as to compliance with the quality and quantity requirements of the purchase order or contract; and

(2) Inspection of supplies and equipment for condition and quantity and the acceptance of supplies, equipment, and services, based on quality inspection made by other authorized representatives.

(b) The Chief, Central Office Library Division, and the Chief, Library Service, at a field station, are designated the representatives of the contracting officer to receive, inspect and accept library books, newspapers, and periodicals. Purchase documents will specify that delivery will be made direct to the library.

(c) The Chief, Stock Control Division, VA Supply Depot, Hines, Ill., is hereby designated as the representative of each contracting officer and purchasing agent of the various marketing divisions of the VA Marketing Center, Hines, Ill., for the purpose of accepting, on behalf of the Veterans Administration, items purchased for stock. The Chief, Stock Control Division, may designate one or more employees of the Incoming Property Section, Supply Control Division, to represent him/her and authority is hereby delegated to such designees to accept such property on behalf of the Veterans Administration. Designations will be confined to those employees to whom such responsibility has been assigned by their position descriptions. The Chief, Fiscal Service, will be furnished a list of such designees. Where inspection for compliance with specifications, purity, quality, or other element must be made by the Service and Reclamation Division or other testing agency, acceptance will be contingent upon receipt of a property prepared inspection report.

(d) The Chiefs, Service and Reclamation Divisions, Veterans Administration Supply Depots at Hines, Ill., Somerville, N.J., and Bell, Calif., are hereby designated as the respresentatives of the contracting officers and purchasing agents of the various marketing divisions of the Veterans Administration Marketing Center, Hines, Ill., for the purpose of inspecting, when requested, supplies and equipment for compliance with technical, mechanical, operating, and other specifications. The results of such inspections will be forwarded to the Chief, Stock Control Division, Veterans Administration Supply Depot, Hines, IL 60141, when the item(s) involved is for stock, and to the appropriate contracting officer or purchasing agent for all other items.

(e) The Chief of each Service and Reclamation Division may designate one or more employees of his/her division to represent him/her; and, authority is hereby delegated to such designees to perform the inspection functions set forth in paragraph (d) of this section. (Designations shall be in writing with a copy furnished to the Director, Veterans Administration Marketing Center, Hines, Ill. Designations will remain in effect unless revoked. The reassignment

or termination of either the designee or the Chief, Service and Reclamation Division, issuing the designation will serve as an automatic rescission of the designation.)

801.603-72 Ratification of unauthorized contract awards.

(a) The Government is not bound by agreements or contractual commitments made to prospective contractors by persons to whom procurement authority has not been delegated. Such unauthorized acts may be in violation of the Federal Property and Administrative Services Act, other Federal laws, Chapters 1 and of Title 48, Code of Federal Regulations, and good procurement practice; e.g., certain requirements of law and regulation necessary for the proper establishment of a contractual obligation may not be met; i.e., certification of the availability of funds, determinations and findings, competition of sources, determination of contractor responsibility, certification of current pricing data, price-cost analysis, administrative approvals, negotiations of appropriate contract clauses, etc.

(1) Contracting officers shall not ratify contractual commitments made by other personnel of VA without prior approval. At field stations, the approving authority is the director of the field station concerned. For Central Office contracting officers, the approving authorities are the heads of the departments and directors of the staff offices concerned, and the Director, Office of Administration. This approval authority shall not be redelegated.

(2) Requests received by contracting officers for ratification of commitments made by personnel lacking contracting authority shall be processed as follows:

(i) The individual who made the unauthorized contractual commitment shall furnish the contracting officer all records and documents concerning the commitment and a complete, written statement of facts, including, but not limited to, a statement as to why the procurement office was not utilized, why the proposed contractor was selected and a list of other sources considered, description of work to be performed or products to be furnished, estimated or agreed contract price, citation of appropriation available, and a statement of whether the contractor has commenced performance.

(ii) The contracting officer will review the file and forward it to the approving authority with any comments or information which should be considered in evaluation of the request for ratification. If legal review is desirable, the approving authority will coordinate the request for ratification with the Office of General Counsel or the District Counsel, as appropriate.

(iii) If ratification is authorized, the file will be returned to the contracting officer for issuance of a purchase order or contract, as appropriate.

(b) In the case of otherwise proper contract awards made by contracting officers in excess of the limits of their delegated authority, the need for ratification will be brought to the attention of the head of the contracting activity. That individual will take such action as may be indicated to preclude future instances of such awards.

801.670 Special and limited delegation.

The authority vested in the Administrator to execute, award and administer contracts, purchase orders and other agreements for the expenditure of funds involved in the acquisition of the specific services set forth in this 801.670 and its subsections, is hereby delegated to the Agency Procurement Executive for further delegation to those employees appointed or designated to the positions specified in these subsections.

801.670-1 Architectural and engineering services—Central Office.

(a) Authority to execute, award, and administer contracts and related documents involving the expenditure of funds for the acquisition or architectural and engineering services and of services of artists for works of art authorized in connection with new buildings, is delegated to the following:

(1) Director, Office of Construction.

(2) Project Directors.

(b) The contracting officers named in paragraph (a) of this section may designate the Deputy Project Director and/or the Senior Project Supervisors as a contracting officer; and, authority is hereby delegated to such subordinates to execute, award, and administer contracts, purchase orders, and other agreements for the purposes stated in paragraph (a) of this section. Designations will be in writing and will specifically state the scope and limitations of the designee's contractual authority.

801.670-2 Construction contracts—Central Office.

(a) Authority to execute, award, and administer contracts and related documents involving the expenditure of funds for the acquisition of construction services is delegated to the following:

(1) Director, Office of Construction.

(2) Project Directors.

(b) The contracting officers named in paragraph (a) of this section may designate the Deputy Project Director and/or the Senior Project Director Supervisors as a contracting officer; and, authority is hereby delegated to such subordinates to execute, award, and administer contracts, purchase orders, and other agreements for the purposes stated in paragraph (a) of this section. Designations will be in writing and will specifically state the scope and limitations of the designee's contractual authority.

801.670-3 Utility-connection and other site facility contracts—Central Office.

(a) Authority to execute, award, and administer contracts and related documents involving the expenditure of funds for the acquisition of utility connections and other site facilities is delegated to the following:

(1) Director, Office of Construction.

(2) Director of Engineering.

(3) Chief, Utilities Contract Administration Division.

(b) Contracting officers identified in paragraph (a) may delegate contracting authority to the Chief, Supply Service, at the facility involved.

801.670-4 Construction contracts—field stations, supply depots.

The Chief, Supply Service, at a field station, the Director, VA Supply Depot, and any employee designated by them in accordance with 801.602(b) of this chapter are authorized to execute, award, and administer contracts for construction projects assigned by the Chief Medical Director, under delegation of the Director, Office of Construction, or those accomplished with station or depot funds. Contracting officers, in executing, awarding and administering construction contracts, including those for maintenance and repair projects, will be guided by Federal Acquisition Regulations, Veterans Administration Acquisition Regulations, and procedures established by the Director, Office of Construction.

801.670-5 Publications Service—Central Office.

Authority to place orders for printing services against contracts established by the Government Printing Office, and for specialty forms, tabulating cards, marginally punched continuous paper, and art and design services, against contracts established by the General Services Administration, and for printing, duplicating, or other reproduction services, as well as microfilming, against contracts established by the Office of Procurement and Supply, is delegated as follows:

(a) To the Director, Publications Service, Office of Administration, Central Office.

(b) To the Chief, Printing Procurement Division, and the Supervisors of both the Commercial and Government contracting activities for orders not exceeding $10,000 per transaction, when so delegated by the Director, Publications Service.

801.670-6 Issue of Government bills of lading—transportation of remains of deceased beneficiaries.

The Chief, Medical Administration Service, at a Veterans Administration medical center, or the person acting in that capacity, is delegated authority to issue and to sign as "Issuing Officer," Government bills of lading for the shipment of the remains of beneficiaries expiring in a Veterans Administration medical center.

801.670-7 Issue of Government bills of lading—transportation of property.

(a) Authority to issue and sign Government bills of lading for the transportation of supplies, material, and equipment is delegated to the following:

(1) Chiefs, Transportation Sections, VA Supply Depots.

(2) Chief, Warehouse Section, VA Forms and Publications Depot.

(3) Traffic Manager, Office of Procurement and Supply, Central Office.

(b) The employees named in paragraph (a) of this section may designate one or more of their subordinates as a contracting officer; and, authority is hereby delegated to such subordinates to issue and sign Government bills of lading for the transportation of supplies, material, and equipment. Designations will be in writing and specifically set forth the scope and limitation of the designee's authority.

801.670-8 Building and Supply Service—Central Office.

(a) Authority is delegated to the Chief, Supply Division, Building and Supply Service, Office of Administration, VA Central Office, to execute, award and administer contracts, purchase orders and other agreements for the acquisition of personal property or services and for the sale of personal property for Central Office activities as set forth below:

(1) Small purchases pursuant to FAR Part 13.

(2) Orders under existing Federal Government contracts, not to exceed the maximum order limitation specified in the contract.

(3) ADP maintenance contracts, not to exceed the small purchase limitation specified in FAR Part 13.

(4) Special space alteration services delegated to agencies by General Services Administration for space occupied by the VA Central Office within the National Capital Region.

(b) The contracting officer named in paragraph (a) of this section may designate one or more subordinates as a contracting officer; and, authority is hereby delegated to such subordinates to execute, award and administer contracts, purchase orders, and other agreements for the acquisition of supplies, equipment, nonpersonal services, and for the sale of personal property. Designations will be in writing, specifically state the scope and limitation of the designee's contractual authority and shall be confined to only those subordinates who are actively engaged in purchasing and contracting functions.

(c) When exercising the authority contained in this section, the designated employee is identified as the contracting officer and will function within the limits prescribed by law, VA Acquisition Regulations and the Federal Acquisition Regulations.

801.670-9 Architectural and engineering services—field stations, supply depots.

The Chief, Supply Service, at a field station, the Director, VA Supply Depot, and any employee designated by them in accordance with 801.602 of this chapter are authorized to execute, award, and administer contracts for the acquisition of architectural and engineering services when the cost of such services are chargeable to station or depot funds.

801.670-10 Loan guaranty program.

(a) The authority to execute, award, and administer contracts, purchase orders, and other agreements for the expenditure of funds for supplies or services necessary to carry out the provisions of chapter 37 of Title 38, United States Code, including but not limited to contracts for the services of technical fee personnel, and contracts for the maintenance, protection, repair, rehabilitation, enlargement, completion, conversion, or demolition of properties acquired under chapter 37 of Title 38, United States Code, is delegated to:

(1) Chief Benefits Director.

(2) Director, Loan Guaranty Service.

(3) Director, Regional Office.

(4) Director, VA Medical and Regional Office Center.

(5) Director, VA Center.

(6) Loan Guaranty Officer.

(7) Assistant Loan Guaranty Officer.

(b) The contracting officers named in paragraph (a) of this section may designate one or more of their subordinates as a contracting officer; and, authority is hereby delegated to such subordinates to execute, award, and administer contracts, purchase orders, and other agreements for the purposes stated in paragraph (a) of this section. Designations will be in writing and will specifically state the scope and limitations of the designee's contractual authority.

801.670-11 Education and rehabilitation programs.

(a) Except as stated in this section, the authority to negotiate, award, and administer contracts, purchase orders, and other agreements for the expenditure of funds for the vocational rehabilitation program is delegated to:

(1) Chief, Benefits Director.

(2) Director, Vocational Rehabilitation and Counseling Service.

(3) Director, Regional Office.

(4) Director, VA Medical and Regional Office Center.

(5) Director, VA Center.

(b) The Chief Benefits Director, and the Director, Education Service and Director, Vocational Rehabilitation and Counseling Service, are delegated authority to execute, award and administer contracts, agreements, or supplements thereto for correspondence courses. The authority of the Director, Vocational Rehabilitation and Counseling Service, is limited to correspondence courses for the vocational rehabilitation program.

(c) The Chief Benefits Director, Director, Vocational Rehabilitation and Counseling Service, and Directors, Regional Office and VA Medical and Regional Office Centers, are delegated authority to execute, award and administer contracts, agreements, or supplements thereto with educational institutions and other approved agencies for the purpose of providing services relative to the counseling of persons eligible for vocational rehabilitation or educational assistance under Title 38, United States Code.

(d) The Chief Benefits Director, and the Director, Education Service, are delegated authority to execute, award and administer contracts, agreements, or supplements thereto with State approving agencies for services relating to approving courses offered by educational institutions and training establishments.

(e) The contracting officers named in paragraphs (a), (b), and (c) of this section may designate one or more of their subordinates and authority is hereby delegated to such subordinates to negotiate, award, and administer contracts, purchase orders, and other agreements for the purposes stated in paragraphs (a), (b), and (c) of this

section. Designation of subordinates will be in writing by name or position title and will specifically state the scope and limitations of the contractual authority of each designee.

801.670–12 Medical, dental, and ancillary service.

(a) The Chief of Staff, the physician assigned the responsibility for the ambulatory care function, and Chief, Medical Administration Service, at a Veterans Administration station are delegated authority to execute authorizations for medical, dental, and ancillary services under $10,000 per authorization when such services are not available from existing contracts or agreements. Forms specified in Part 853 of this chapter will be used for this purpose and when ordering such services from existing contracts.

(b) The contracting officers named in paragraph (a) of this section may designate one or more or their subordinates to execute the forms for purposes stated in paragraph (a) of this section. Designations will be in writing and will specifically set forth the scope and limitations of the designee's authority.

801.670–13 Department of Memorial Affairs.

Authority for the Department of Memorial Affairs to procure supplies, equipment and nonpersonal services is delegated as follows:

(a) Authority to execute, award, and administer contracts and related documents involving the expenditures of funds for the acquisition and transportation of headstones and markers is delegated to the Director, Monument Service, the Assistant Director for Procurement, and the Chief, and Assistant Chief, Funds and Contracts Division, of the Monument Service.

(b) Authority to issue and sign Government bills of lading for the transportation of headstones and markers is further delegated to:

(1) Staff Assistant for Transportation, Monument Service.

(2) Chief, Transportation Division, Monument Service.

(c) Authority to procure, in emergency situations when the servicing supply organization cannot be utilized, and in accordance with the provisions of FAR Part 13, supplies, equipment, and nonpersonal services (including construction) required for the operation of national cemeteries is delegated to:

(1) Chief Memorial Affairs Director and Deputy Chief Memorial Affairs Director.

(2) Director and Deputy Director, National Cemetery Area Office.

(d) Authority to procure items and nonpersonal services up to $300 per transaction for the operation of national cemeteries is delegated to the Director of each national cemetery. The authority is to be used only in emergency situations when the servicing supply organization cannot be utilized, and the method of purchase is limited to the use of SF 44, Purchase Order—Invoice—Voucher, (FAR 13.505–3).

801.670–14 Letters of agreement.

(a) Authority to execute, award, and administer letters of agreement (subject to the limitation prescribed in 837.270) is delegated to the following:

(1) General Counsel.

(2) Director, Office of Personnel and Labor Relations.

(3) Chief Medical Director.

(4) Chief Benefits Director.

(5) Chief Memorial Affairs Director.

(6) Director, Office of Procurement and Supply.

(7) Inspector General.

(8) Directors, Regional Medical Education Centers (limited to obtaining instructors and training pursuant to section 4122 of Title 38, United States Code).

(9) Directors, Domiciliary and Medical Centers (limited to obtaining peer review of research (see 837.270)).

(b) The contracting officers named in paragraph (a)(1) through (7) of this section may designate one or more subordinates, and authority to execute the same duties and responsibilities is hereby delegated to such subordinates. Such subordinates will be no more than one organizational level below the contracting officers designated in paragraph (a) of this section, except that the Chief Medical Director may designate the Regional Directors. All such designations will be in writing, will specifically state the scope and limitations of the designees' contractual authority, and will also specifically prohibit further delegation by the designees. Copies of the delegation will be submitted to the Office of Procurement and Supply (93).

(c) Copies of all letters of agreement issued by the designees identified in paragraphs (a) and (b) will be forwarded to the servicing contracting activity in order that the procurement action may be entered into the Federal Procurement Data System.

801.670–15 $300 small purchase authority for Prosthetics Service personnel.

As prescribed by the VA Department of Medicine and Surgery Manual M–2, Part IX, Chapter 4, Section A, Prosthetics Service personnel at VA Medical Centers may issue orders for open market prothetic items or prosthetic items not in excess of $300 per transaction. VA Form 10–2421, Prosthetics Authorization and Invoice will be used for such orders.

801.680 Contracting authority of the Inspector General.

(a) As provided by section 6(a) of Pub. L. 95–452 (October 12, 1978), the Inspector General is authorized to enter into contracts and other arrangements for audits, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of the Act, to the extent and in such amounts as may be provided in advance by appropriations Acts.

(b) In exercising the special authority provided in paragraph (a) of this section, the Inspector General may request the assistance of the servicing Supply Service in developing appropriate contract or agreement documents.

(c) If, in the opinion of the Inspector General, a reason to exercise the special authority does not exist, the services required by the Inspector General shall be obtained by the servicing Supply Service in accordance with the provisions of FAR and VAAR.

(d) Contracts entered into under the authority of paragraph (a) of this section are subject to the provisions of the Federal Acquisition Regulations. In addition, such contracts are subject to those provisions of VAAR which implement and supplement the FAR on matters other than those stemming from or related to delegations of the Administrator's contracting authority.

PART 802—DEFINITIONS OF WORDS AND TERMS

Subpart 802.1—Definitions

802.100 Definitions.

In the Veterans Administration, "head of contracting activity" means the Director, Procurement Service, Central Office; Project Directors, Office of Construction; Director, Building and Supply Service, Central Office; Director, Publications Service, Central Office; Director, Monument Service, Central Office; Chiefs, Marketing Divisions, VA Marketing Center; and the Chief, Supply Service at a field facility.

803.203 Reporting suspected violations of the Gratuities clause.

Subpart 803.3—Reports of Identical Bids and Suspected Antitrust Violations

803.301 General.
803.303 Reporting suspected antitrust violations.

Subpart 803.4—Contingent Fees

803.408 Evaluation of the SF 119.
803.408–1 Responsibilities.
803.409 Misrepresentations or violations of the Convenant Against Contingent Fees.

Subpart 803.5—Other Improper Business Practices

803.502 Subcontractor kickbacks.

Subpart 803.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

803.603 Responsibilities of the contracting officer.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 803.1—Safeguards

803.101 Standards of conduct.

803.101–3 Agency regulations.

(a) Standards of conduct for all VA employees, including contracting officials, are found in 38 CFR Part O. From time to time supplementing guidance regarding Agency-authorized exceptions to FAR 3.101–2 and disciplinary measures for persons violating the standards of conduct, may be issued by the Administrator or the designated VA Ethics Officer. Heads of contracting activities will ensure that all employees are cognizant of the applicable regulations.

(b) Requirements for employee financial disclosure are contained in 38 CFR Part O, Subpart D. Generally contracting officers and all supervisory contracting officials must file financial disclosure statements.

(c) *Ethics in Government Act.* Former employees are not specifically prohibited under section 207 of Title 18, United States Code, from acting as consultants for the Veterans Administration. However, former employees are prohibited, for certain periods of time, from representing or otherwise acting as agents of other parties for the purpose of obtaining Government contracts.

(d) The certification in 852.203–70 will be made a part of all solicitations.

Subpart 803.2—Contractor Gratuities to Government Personnel

803.203 Reporting suspected violations of the Gratuities clause.

(a) Suspected violations of the Gratuities Clause will be reported to the head of the contracting activity through the contracting officer. The head of the contracting activity will confirm that violations are evident and that reporting these violations to officials designated in paragraph (b) would be warranted.

(b) When violations of the Gratuities Clause warrant actions described in FAR 3.204(c) the head of the contracting activity will request instructions from the VA General Counsel (025) through the Director, Office of Procurement and Supply (90).

Subpart 803.3—Reports of Identical Bids and Suspected Antitrust Violations

803.301 General.

Executive Order 10936 of April 1961 requiring reporting of identical bids to the Attorney General has been revoked by Executive Order 12430 of July 1983. Identical bids and other suspected antitrust violations will be reported in the manner prescribed in FAR 3.303 and this subpart.

803.303 Reporting suspected antitrust violations.

Instances of possible antitrust violations will be reported by procurement activities in accordance with FAR 3.303 to the Director, Office of Procurement and Supply (90) for review and submission to the General Counsel, who will determine whether or not to submit the case to the Attorney General.

Subpart 803.4—Contingent Fees

803.408 Evaluation of the SF 119.

803.408–1 Responsibilities.

When determining an appropriate course of action with respect to information furnished on a Standard Form 119, Statement of Contingent or Other Fees, the head of the contracting activity will review the contracting officer's recommendations. The review by the head of the contracting activity shall be documented on the contract file.

803.409 Misrepresentations or violations of the Covenant Against Contingent Fees.

(a) Suspected violations of the Covenant Against Contingent Fees shall be reported to the head of the contracting activity for evaluations as prescribed in FAR 3.408–2.

(b) Before taking any administrative action the head of the contracting activity shall consult with their respective VA District Counsels. Contracting officers in Central Office shall consult with the Office of the General Counsel.

Subpart 803.5—Other Improper Business Practices

803.502 Subcontractor kickbacks.

Suspected violations of the Anti-kickback Act will be reported to the Office of the General Counsel.

Subpart 803.6—Contracts With Government Employees Or Organizations Owned or Controlled by Them

803.603 Responsibilities of the contracting officer.

Excepting those contracts which pertain to the sale of manual arts and occupational therapy products, Veterans Administration contracting officer shall, prior to entering into a contract with Government employees or business concerns substantially owned or controlled by Government employees, make the written determinations required by FAR 3.603.

PART 804—ADMINISTRATIVE MATTERS

Subpart 804.1—Contract Execution

804.101 Contracting officer's signature.

(a) Contracting officers will personally sign all contracts, changes thereto and contract enforcement correspondence in accordance with FAR 4.101. The signing of the contractual documents will not be accomplished by facsimile stamps.

(b) In the event a contracting officer's name and title has been typed, stamped or printed on the contract and the contracting officer is not available to sign the contract, a designee may sign for the contracting officer. Such designee must be a contracting officer as specified in 801.602 and must have specific contracting authority to cover the contract to be signed.

(38 U.S.C. 210 and 40 U.S.C. 486(c))

PART 805—PUBLICIZING CONTRACT ACTION

Subpart 805.2—Synopses of Proposed Contracts

Sec.
805.202 Exceptions.
805.205 Special situations.
805.207 Preparation and transmittal of synopses.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 805.2—Synopses of Proposed Contracts

805.202 Exceptions.

(a) In accordance with 8(e)(1)H of the Small Business Act, as amended, competitive procurements of perishable subsistence are exempted from the requirement for synopsizing. This execption does not apply to annual requirements-type contracts (such as milk and bread) for which the synopsizing can be timely accomplished.

(b) Scarce medical specialist and mutual use, or exchange of use contracts negotiated under the authority of 38 U.S.C. 4117 and 5053, are exempt from the synopsizing requirement, when such contract awards are made pursuant to the authority contained in 815.204–70. This exemption is based upon Comptroller General Decision B–195559.2, dated November 2, 1981.

805.205 Special situations.

To facilitate the use of the alternative procedure in FAR 5.205(c)(2), contracting officers are hereby delegated authority to procure paid advertising in a daily newspaper circulated in the local area, for the purpose of publicizing a proposed procurement of architect-engineer services expected not to exceed $10,000.

805.207 Preparation and transmittal of synopses.

(a) Synopses of proposed procurements will be forwarded to the Department of Commerce for publication in the Commerce Business Daily (CBD) via teletype Advanced Records System (ARS).

(1) For this purpose the CBD synopsis form will be completed in accordance with the instructions on the reverse side of that form and forwarded to the teletype office with completed Standard Form 14, Telegraphic Message, as a cover transmittal. "See attached" will be noted on the SF 14 in the block marked "Message to be transmitted."

(2) Routing symbol "RUCHODY" will be used in transmitting the material to the Department of Commerce.

(b) At such time as an architect-engineer evaluation board is ready to advertise for architect-engineer services, it must establish the geographic area within which architect-engineer firms (including joint ventures) will be considered. The area determined must be large enough to assure selection of three to five firms highly qualified for the particular project involved, but not so large as to make the evaluation process unduly burdensome.

(1) For large projects, the area will generally be Statewide, but may be limited to sections of States or the metropolitan areas. Where there is a scarcity of qualified firms, the area of consideration may include more than one State. In addition, special consideration may be given to projects located near State lines, particularly where the economic, cultural and social centers for the worksite are located across the State boundary in a contiguous State.

(2) For small projects, the geographic area of consideration is appropriately local, but will be wide enough to assure the selection of at least three highly qualified firms.

(3) Special problems of evaluation and of contract administration arise with respect to joint-venture applications representing numerous firms from all over the nation organizing with a small local firm not otherwise qualified. Accordingly, notices may contain a statement that "Joint-venture participation will be considered and evaluated on the demonstrated interdependency of each joint-venture member on the other, which makes that union a viable design force for this particular project."

SUBCHAPTER B—ACQUISITION PLANNING

PART 808—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Sec.

808.001 Priorities for use of Government supply sources.

Subpart 808.3—Acquisition of Utility Services

808.304–1 GSA long-term contracts.
808.304–2 GSA area-wide contracts.
808.304–4 Consolidated purchase, joint use, or cross-service.
808.304–5 Agency acquisition.
808.307–2 Precontract review by GSA.
808.307–70 Alternative precontract review by VA.

Supbart 808.4—Ordering From Federal Supply Schedules

808.401 General.
808.404–1 Mandatory use.
808.404–3 Requests for waivers.
808.405–5 Termination for default.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

808.001 Priorities for use of Government supply sources.

(a) Procurement will be effected from the following sources in the descending order of priority as indicated herein:

(1) VA excess.

(2) VA supply depot stock.

(3) Other government agencies excess.

(4) Federal Prison Industries.

(5) Procurement list of products available from the Committee for Purchase from the Blind and Other Severely Handicapped.

(6) GSA stock and other Government Agency Inventory.

(7) VA decentralized contracts.

(8) Mandatory Federal Supply Schedule contracts.

(9) Optional use Federal Supply Schedule contracts.

(10) Commercial concerns, educational, or nonprofit institutions, as applicable.

(b) *Public exigency.* A source lower in priority may be utilized in a public exigency as defined in FAR 15.202 and in Federal Property Management Regulation 41 CFR 101–25.101–5. Justification for each deviation must be included in the procurement file.

(c) *Eligible Beneficiaries.* When it is determined that a therapeutic benefit to eligible beneficiaries will result from personal selection of shoes, clothing and incidentals, acquisition from the Veterans Canteen Service or commercial sources is authorized. When dress shoes similar to Federal Prison Industries, Inc., Style No. 86–A are purchased from commercial sources, FPI clearance No. 1206 will be cited on the purchase document.

Subpart 808.3—Acquisition of Utility Services

808.304–1 GSA long-term contracts.

(a) If the contracting officer determines that a GSA long-term contract may be justified in accordance with the provisions outlined in FAR 8.304–1, GSA will be requested to negotiate a long-term contract.

(b) The request will be submitted to General Services Administration, Federal Supply and Services, Public Utilities Management Division, Washington, D.C. 20406. It will state the reason a long-term contract is believed justified and will include the following information:

(1) Copy of existing contract or agreement.

(2) Copies of all current rate schedules.

(3) Record of past 12 months usage, preferably in the form of copies of bills or invoices.

(4) Statement regarding any anticipated or planned future changes.

(5) Point and characteristics of delivery.

(6) Statement covering equipment or connection requirements and ownership.

(7) Names and addresses of all suppliers, both regulated and unregulated, of the required service.

808.304–2 GSA area-wide contracts.

When a GSA area-wide contract for the required utility service is available, utility services will be procured thereunder as provided by FAR 8.304–2, unless special rates can be negotiated under the area-wide contract or a separate contract. When provided in the area-wide contract, connection agreements may also be obtained thereunder.

808.304–4 Consolidated purchase, joint use, or cross-service.

If a consolidated purchase, joint use, or cross-service agreement would be advantageous, an appropriate memorandum of understanding will be entered into, as provided by FAR 8.304–4. If assistance is required, requests will be forwarded to GSA.

808.304–5 Agency acquisition.

When either GSA area-wide contracts, GSA long-term contracts, consolidated purchase, joint use, or cross-service agreements are not available, the contracting officer will obtain required utility services and/or connections as provided in FAR 8.304–5.

808.307–2 Precontract review by GSA.

Except as provided in FAR 8.307–3, proposed utility procurements meeting the criteria of FAR 8.307–1 will be forwarded to General Services Administration, Federal Supply and Services, Public Utilities Management Division, Washington, D.C. 20406, for prior review.

808.307–70 Alternative precontract review by VA.

Prior review of contracts for utility connections and contracts for combined utility connections and services consumated by the designated contracting officer(s) in Central Office will be made by technical and administrative personnel in the Office of Construction, when required by FAR 8.307–1.

Subpart 808.4—Ordering From Federal Supply Schedules

808.401 General.

The Director, VA Marketing Center, advertises, negotiates, awards the contracts, and is responsible for contract administration for FSS (Federal Supply Schedule) Groups 65 and 89. The Director issues the Federal Supply Schedules containing the necessary information for placing delivery orders with the contractors for the above FSS Groups.

808.404–1 Mandatory use.

The contracting officer shall submit a request to the Director, VA Marketing Center to negotiate a separate contract when requirements will exceed the maximum order limitation cited in the contract.

808.404–3 Requests for waivers.

When an ordering agency finds an item which is identical to an item which is the lowest cost acceptable item available from Federal Supply Group 65 and 89 but available at a lower delivered price from a lower priority source, the ordering activity must obtain the approval of the Director, VA Marketing Center, prior to initiating purchase action with the lower priority source. An identical item is defined as: (a) Nondrug item—same manufacturer and model number, (b) drug item—having the same NDC (National Drug Code) number. Approval requests must identify the item available on contract including contract number, item number, and description, vendor and delivered price. A description of the proposed item, name of the vendor, quantity, proposed price, and the name of the vendor representative making the offer must be included.

808.405–5 Termination for default.

The Director, VA Marketing Center is the authorized contracting officer to terminate for default any and all items covered by Federal Supply Groups 65 and 89. When notified of default action by the Director, VA Marketing Center, the contracting officer shall:

(a) Refuse to accept further performance by the contractor;

(b) Place no further orders with the contractor;

(c) Repurchase against the contractor in default from sources designated by the Director, VA Marketing Center; or

(d) Proceed as otherwise directed by the Director, VA Marketing Center.

PART 809—CONTRACTOR QUALIFICATIONS

Subpart 809.1—Responsible Prospective Contractors

Sec.
809.104–2 Special standards.
809.106–1 Conditions for preaward surveys.

Subpart 809.2—Qualified Products

809.206 Acquiring qualified products.
809.207 Qualified products for convenience/labor saving foods.

Subpart 809.4—Debarment, Suspension, and Ineligibility

809.400 Scope of Subpart.
809.403 Definitions.
809.404 Consolidated list of debarred, suspended, and ineligible contractors.
809.405 Effect of listing.
809.406 Debarment.
809.406–1 General.
809.406–3 Procedures.
809.406–4—Period of debarment.
809.407 Suspension.
809.407–1 General.
809.407–3 Procedures.

Subpart 809–5—Organizational Conflicts of Interest

809.504 Contracting officer's responsibilities.
809.505 General rules.
809.508–2 Contract clause.

Subpart 809.7—Defense Production Pools and Research and Development Pools

809.702 Contracting with pools.

Authority: 38 U.S.C. 210, 40 U.S.C. 486(c) and 42 U.S.C. 2453(c).

Subpart 809.1—Responsible Prospective Contractors

809.104–2 Special standards.

Standards applicable to subsistence will be established based on preaward surveys prescribed by 809.106–1.

809.106–1 Conditions for preaward surveys.

(a) Preaward on-site evaluation will be made for contracts covering the products and services of bakeries, dairies, ice cream plants and laundry and dry cleaning activities. A committee under the direction of the contracting officer and composed of representatives of the medical service and/or using service chiefs or designees appointed by the station director will inspect and evaluate the plant, personnel, equipment and processes of the prospective contractor. Prior to any inspection, the contracting officer will inquire whether the plant has been recently inspected and approved by another Veterans Administration station or Federal agency. Approved inspection reports of another Veterans Administration station will be accepted by Veterans Administration stations and approved inspection reports of other Federal agencies may be accepted as satisfactory evidence that the facilities of the bidder meet the requirements of the Invitation for Bid, provided inspection was made not more than 6 months prior to the proposed contract period.

(b) Preaward on-site evaluation of dairy plants will not be made by the Veterans Administration when acceptable bids are received from suppliers of those dairy products designated as No. 1 in the Federal Specifications. Suppliers must have received, prior to opening of bids, a pasteurized milk rating of 90 percent or more for the type of product being

supplied, on the basis of the U.S. Public Health Service milk ordinance and code. Such rating must be current (not over 2 years old), and will have been determined by certified State milk sanitation rating officer in the State of origin or by the Public Health Service and will continue at 90 percent or more during the period of the contract. Firms not so rated may only offer dairy products designated as No. 2 in the Federal Specifications. Award to such firms may be made only after completion of a preaward on-site evaluation conducted in accordance with paragraph (a) of this section.

(c) Prior to any open market purchase of fresh bakery products (such as pies, cakes, cookies), the plant where these products are produced or prepared will be inspected and evaluated as provided in paragraph (a) of this section. On-site evaluation will be made at least annually.

Subpart 809.2—Qualified Products

809.206 Acquiring qualified products.

(a) Federal Qualified Products Lists are lists of products qualified under the applicable Federal or interim Federal specification. Such lists may be used as authorized by the appropriate department or staff office. Requests to receive copies of existing Federal Qualified Products Lists will be submitted to the Director, Office of Procurement and Supply (91) for transmittal to General Services Administration. Requests to establish a Federal Qualified Products List for a commodity will be submitted to the Director, Office of Procurement and Supply (91), supported by one or more of the following justifications:

(1) The time required for testing after award would unduly delay delivery of the supplies being purchased.

(2) The cost of repetitive testing would be excessive.

(3) The tests would require expensive or complicated testing apparatus not commonly available.

(4) The interest of the Government requires assurance, prior to award, that the product is satisfactory for its intended use.

(5) The determination of acceptability would require performance data to supplement technical requirements in the specification.

(b) VA Qualified Products Lists are lists of products qualified by the VA under VA specifications or purchase descriptions. Such lists may be established as authorized by the appropriate department or staff office.

(1) VA Qualified Products Lists will be supported by one or more of the justifications in 809.206(a) or the following:

(i) Where tests result in substantial or repetitive rejections, or

(ii) Where professional requirements of performance, balance, design, or construction cannot economically be developed into clear specifications, and professional judgment is required in determining the acceptability of items meeting VA requirements.

(2) In the event that the requirement for VA Qualified Products List is established for any given product, known suppliers of the type of item required will be notified and given an opportunity to submit samples for inspection, and test based upon guarantee that they will deliver the item to be inspected, provided the item is acceptable. A qualified products list shall not be used as a means of restricting competition to favored suppliers. All suppliers so desiring shall be given an opportunity to have their products tested for acceptability.

(3) Costs involved in the inspection and test will be borne by the VA. The supplier will be required to bear the cost of the sample and its transportation to the inspecting point. After inspection, the sample shall be returned to the supplier "as is" unless it is destroyed by inspection or disposed of or retained by the VA as authorized by the supplier.

(4) Items which have been accepted for the qualified products list will be subject to constant review for compliance with the applicable specification. Where there is a variance between the specification and item, the supplier shall be requested to furnish an item that conforms to the specification. Failure or inability on the part of the supplier to provide an item that conforms to the specification will be sufficient cause to consider the item unacceptable in response to subsequent invitations.

(5) The acceptance of an item for the qualified products list does not guarantee acceptance in any future purchase, nor does it constitute a waiver of the requirements of the specifications as to acceptance, inspection, testing or other provisions of any future contract involving such item.

(6) Bid invitations covering products which have been included in a qualified products list will include the clause set forth in FAR 52.209–1 or 52.209–2 as applicable.

809.270 Qualified products for convenience/labor saving foods.

(a) Each VA medical district's Dietetic Service representative is delegated authority to establish a common Qualified Products List for convenience/labor-saving foods for the use of medical centers within his/her respective district. The medical district Dietetic Service representative will notify the Director, Dietetic Service, VA Central Office, of the establishment of each Qualified Products List and amendments to each established list.

(b) Each medical center is authorized to use its district Qualified Products List. Each medical center may test food of its own choice, but will submit test results to the district Dietetic Service representative. The Dietetic Service representative will coordinate and consolidate the test results and recommendations of individual medical centers with other medical centers within the district in order to avoid unnecessary duplication.

(c) The approved medical district Qualified Products List will be furnished each Supply office within the district. The Supply Services will have access to complete and accurate records of established Qualified Products Lists and all test results. These records will be made available to the Office of Procurement and Supply, VA Central Office, upon request.

Subpart 809.4—Debarment, Suspension, and Ineligibility

809.400 Scope of subpart.

This subpart prescribes procedures for debarring or suspending contractors and the inclusion of those contractors on the consolidated list of debarred, suspended or ineligible bidders.

809.403 Definitions.

"Fact-finding" as used in this subpart shall mean a gathering of facts which is accomplished through informal meetings with the contractor, submission of information, either verbally or in writing, by the contractor, and any other method deemed appropriate by the debarring official.

809.404 Consolidated list of debarred, suspended, and ineligible contractors.

(a) The Office of Procurement and Supply (93) shall be responsible for the action described in FAR 9.404(c) (1), (2), (4) and (6).

(b) The Office of Procurement and Supply (91) shall be responsible for the actions described by FAR 9.404(c) (3) and (5).

809.405 Effect of listing.

The Director, Office of Procurement and Supply shall make the determinations required by FAR 9.405(a) and 9.405–2 to solicit from, award contracts to, or consent to subcontracts with contractors whose names are

included on the consolidated list of debarred, suspended or ineligible contractors.

809.406 Debarment.

809.406–1 General.

(a) The Director, Office of Procurement and Supply is the debarring official for the Veterans Administration.

(b) Any Veterans Administration employee may submit a recommendation to the Director, Office of Procurement and Supply that a firm or individual be debarred by the Veterans Administration.

(c) Such recommendations must be supported by documentary evidence of a cause listed in FAR 9.406–2.

809.406–3 Procedures.

(a) The Director, Office of Procurement and Supply shall, upon a receipt of recommendations for debarment, appoint a designee to conduct an investigation, initiate debarment and present the facts to the debarring official for consideration and action.

(b) The appointed designee shall issue the proposed debarment notice as required by FAR 9.406–3(c).

(1) If no reply is received from the firm or individual to the notice of proposed debarment, the case will be referred to the debarring official for decision on the basis of information available.

(2) When a reply is received, the information provided will be considered by the appointed designee prior to making a recommendation to the debarring official. If the contractor's submission in opposition to the debarment raises a genuine dispute over facts material to the proposed debarment, the designee appointed by the Director, Office of Procurement and Supply will conduct a fact-finding as prescribed by FAR 9.406–3(b)(2).

(3) Upon completion of the fact-finding with respect to disputed facts, a written finding of facts will be provided to the debarring official.

(4) The debarring official shall make a decision on the basis of all information available including findings of facts, and/or arguments submitted by the contractor.

809.406–4 Period of debarment.

The period of debarment will be based upon the circumstances involved but will not, except in unusual circumstances, exceed a period of 3 years. The Director, Office of Procurement and Supply may for those firms or individuals debarred by the Veterans Administration decide to remove the debarment, reduce the period of debarment, or amend the scope of the debarment, if indicated, after review of documentary evidence submitted by or in behalf of the contractor setting forth the appropriate grounds for granting of such relief. Such grounds may be, but are not limited to, newly discovered material evidence, reversal of a conviction, bona fide change of ownership or management or the elimination of the cause for which debarment was imposed.

809.407 Suspension.

809.407–1 General.

The Director, Office of Procurement and Supply is the suspending official for the Veterans Administration.

809.407–3 Procedures.

(a) Suspension may be recommended by any Veterans Administration employee. These recommendations will be submitted to the Director, Office of Procurement and Supply and must be supported by documentary evidence of a cause listed in FAR 9.407–2.

(b) The Director, Office of Procurement and Supply shall designate an official to initiate suspension, conduct an investigation and present the facts to the suspending official for consideration and appropriate action.

(c) The designee shall issue the proposed suspension notice as required by FAR 9.407–3(c).

(1) If no reply is received from the contractor to the notice of proposed suspension, the case will be referred to the suspending official for decision on the basis of information available.

(2) When a reply is received, the information provided will be considered by the official conducting the suspension proceedings prior to referring the case with recommendations to the suspending official. If the contractor's submission in opposition to the suspension raises a genuine dispute over facts material to the proposed suspension, the designee of the Director, Office of Procurement and Supply will conduct a fact-finding as prescribed by FAR 9.407–3(b)(2).

(3) Upon completion of the informal hearing with respect to the disputed facts, a written findings of facts will be prepared and presented to the suspending official.

(4) The suspending official shall make a decision on the basis of all information available including findings of facts, and/or arguments submitted by the contractor.

Subpart 809.5—Organizational Conflicts of Interest

809.504 Contracting officer's responsibilities.

(a) Contracting officers will be responsible for determining the existence of actual and/or potential organizational conflicts of interest which would result from the award of the contract. The contracting officer will be guided by information submitted by offerors and by his/her own judgment. The contracting officer may obtain the advice of legal counsel and the assistance of technical specialists in evaluating potential organizational conflicts.

(b) If it is determined that organizational conflicts of interest will be created by the award of the contract, the contracting officer may find an offeror nonresponsible.

(c) Notwithstanding the existence of organizational conflicts of interest, it may be determined that the award of the contract would be in the best interest of the Government. In that case, the contracting officer may set terms and conditions which will reduce the organizational conflicts of interest to the greatest extent possible, with the approval of the head of the contracting activity.

(d) The contracting officer will, in addition to any certifications required by this subpart, require in all solicitations for consulting services that the offeror submit as part of an offer a statement which discloses all relevant facts relating to existing or potential organizational conflicts of interest surrounding the contract and/or the proposed use of subcontractors during the contract.

809.505 General rules.

The determination that organizational conflicts of interest exist can only be made when facts surrounding individual contracting situations are known. Therefore, it is up to the contracting officer to exercise common sense, good judgment and sound discretion in making such a determination and to take steps to mitigate to the greatest extent possible organizational conflicts of interest. The contracting officer will be guided by at least two underlying principles. These are that organizational conflicts of interest may result from (a) conflicting roles and interests of the contractor, in which case he/she would be unable to give unbiased and objective advice or may otherwise produce a biased work product; or (b) unfair competitive advantage which

exceeds a normal flow of benefits from the award of the contract.

809.508-2 Contract clause.

The representation in 852.209-70, Organizational Conflicts of Interest, will be made a part of all solicitation for consulting services.

Subpart 809.7—Defense Production Pools and Research and Development Pools

809.702 Contracting with pools.

Veterans Administration contracting officers will be advised of, consider bids from, and make awards to, Small Business and Defense Production Pools. The Chief Medical Director, or designee, will notify the appropriate departments and staff offices when such pools are approved.

PART 810—SPECIFICATIONS, STANDARDS AND PURCHASE ORDER DESCRIPTIONS

Sec.

810.005 Management of purchase descriptions.
810.006 Using specifications and standards.
810.007 Deviations.
810.011 Solicitation provisions and contract clauses.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

810.005 Management of purchase descriptions.

(a) *General requirements.* When a purchase description is used to describe required items of mechanical equipment, the invitation for bids or request for proposals will include the service data manual clause (852.210-70) and guarantee clause (852.210-71).

(b) *Invitation for bids, "brand name or equal" descriptions.* The invitation for bids or request for proposals on mechanical equipment using "brand name or equal" purchase descriptions will contain the service data manual clause (852.210-70) and guarantee clause (852.210-71).

810.006 Using specifications and standards.

(a) *Exceptions to mandatory use of Federal specifications.* The exception to the mandatory use of Federal specifications, with respect to purchases not exceeding $10,000 authorized by FAR 10.006(a)(ii) does not apply to items (1) purchased from GSA stock, (2) available from a Federal supply schedule contract, or (3) identified by a VA X-Series Specification.

(b) *Optional use of interim Federal specifications.* (1) Interim Federal specifications, developed by VA, as indicated in the preamble, are mandatory under the same conditions and with the same exceptions as provided for Federal specifications.

(2) Suggested changes to interim Federal specifications used on an optional basis will be handled as in 810.007.

(c) *Military and departmental specifications.* (1) The monetary exemption to the use of Federal specifications contained in FAR 10.006(a)(ii) is equally applicable to Veterans Administration, military and departmental specifications. Contracting officers may, when they deem it to be advantageous to the Veterans Administration, utilize these specifications when procuring supplies and equipment costing less than $10,000. However, when purchasing items of perishable subsistence, contracting officers shall observe only those exemptions set forth in paragraphs (c)(5) and (6) of this section.

(2) When circumstances will not permit a field station to use a Veterans Administration specification without deviation, the contracting officer shall, prior to taking any procurement action, submit to the Director, Office of Procurement and Supply, or Director, VA Marketing Center, Hines, Ill., whichever is appropriate, a request for authority to deviate from the specification. The request will specifically detail the reasons why the deviation is essential to the station's operation. The approving authority will coordinate the request with the using service in Central Office. The contracting officer will be advised as to the approval or disapproval of the request. If approved the letter of approval will be filed in the appropriate purchase or contract file.

(3) The Veterans Administration has adopted for use in the procurement of packinghouse products, the purchase descriptions and specifications set forth in the Institutional Meat Purchase Specifications (IMPS), and the IMPS General Requirements, which have been developed by the U.S. Department of Agriculture. Purchase descriptions and specifications for dairy products, poultry, eggs, fresh and frozen fruits and vegetables, as well as certain packinghouse products selected from the IMPS especially for Veterans Administration use, are contained in the Federal Hospital Subsistence Guide. A copy of this guide and the IMPS may be obtained from any Veterans Administration contracting officer.

(4) Contract terms and conditions governing the procurement of subsistence items listed in the Federal Hospital Subsistence Guide and IMPS are set forth in VA Form 10-1365. This form shall be attached to and made a part of each solicitation for such items when applicable.

(5) The military specifications for meat and meat products contained in Federal Hospital Subsistence Guide shall be used by the Veterans Administration only when purchasing such items of subsistence from the Defense Logistics Agency (DLA). Military specifications for poultry, eggs, and egg products contained in Federal Hospital Subsistence Guide may be used when purchasing either from DLA or from local dealers.

(6) Except as authorized in Part 846 of this chapter, contracting officers shall not deviate from the specifications contained in Federal Hospital Subsistence Guide, and the IMPS without prior approval of the Director, Office of Procurement and Supply.

(7) Items of meat, cured pork and poultry, not listed in either the Federal Hospital Subsistence Guide or the IMPS, will not be purchased without prior approval of the Director, Office of Procurement and Supply.

(8) In the absence of mandatory documents, specifications or purchase descriptions of other agencies may be used by the various Marketing Divisions when appropriate. These specifications or purchase descriptions may be modified to meet the needs of the Veterans Administration. If repeated use of a modified specification or purchase description is required, the Director, VA Marketing Center shall consider converting it to a Veterans Administration specification.

(9) A field station may use a specification or purchase description of another agency without prior approval when the specification or description will, without modification, satisfy its needs. If, however, the specification or description must be modified to meet the station's needs, the procedure set forth in paragraph (c)(2) of this section will be followed.

(10) The Director, Publications Service, is responsible for developing, publishing, and distributing Veterans Administration specifications covering printing and binding.

(11) Veterans Administration specifications, as they are revised, are placed in stock in the VA Forms and Publications Depot. Station requirements of these specifications will be requisitioned from that source.

(d) *Government paper specification standards.* Invitations for bids, requests for proposals, purchase orders, or other procurement instruments covering the purchase of paper stocks to be used in duplicating or printing, or which specify

the paper stocks to be used in buying printing, binding, or duplicating will require that such paper stocks be in accordance with the government Paper Specification Standards issued by the Joint Committee on Printing of Congress.

(e) *Veterans Administration binding specifications.* (1) All binding or rebinding of books, magazines, pamphlets, newspapers, slip cases and boxes will be procured in accordance with Government Printing Office (GPO) specifications and will be procured from the servicing GPO Regional Printing Procurement Office for procurements exceeding $500 or, when appropriate, from commercial sources, Subpart 808.75.

(2) There are three types of binding/rebinding: (i) Class A (hard cover); (ii) Perfect (glued); and (iii) Lumbinding (sewn). The most suitable type of binding will be procured to satisfy the requirements, based upon the intended use of the bound material.

(f) *Mandatory use and applications of Federal standards.* (1) Requests for exceptions to Federal Standards not authorized by FAR 10.006(a)(ii) will be submitted with adequate justification to the Director, Office of Procurement and Supply (91A) for submission to General Services Administration.

(2) Federal standards do not preclude the use of existing Government stocks or acceptance of excess property not in full conformity with the standard items.

810.007 Deviations.

(a) *Deviations from Federal specifications.*—(1) *Field station.* When a deviation from a Federal specification is deemed necessary because of a specific requirement, the contracting officer will request such authority from the Director, Office of Procurement and Supply, prior to procurement. The request will specify exactly how the station proposes to deviate from the current specification and why the particular deviation is essential to the station's operations. The contracting officer will be advised as to approval or disapproval of the request. If approved, the Director, Office of Procurement and Supply, will, when necessary, forward the notice required by FAR 10.007(a)(4) to the General Services Administration.

(2) *Marketing center.* When the essential needs of the Veterans Administration are not adequately covered by an existing Federal specification, the Chief of the Marketing Division concerned will:

(i) When the required deviation affects only the packing, packaging, marking or labeling, and the item is being purchased for depot stock, coordinate the deviation with the Director, VA Supply Depot, Hines, Ill., through the Director, VA Marketing Center. If, in the opinion of the Director, VA Supply Depot, the proposed deviation will not affect storage, handling or transportation, the Director, VA Marketing Center, will be advised of his/her concurrence. The Director, VA Marketing Center, will then approve the deviation.

(ii) When the deviation specified in paragraph (a)(2)(i) of this section is for an item that is not being purchased for depot stock, document the reasons why the deviation is essential, and obtain the approval of the Director, VA Marketing Center, who will report the approval to the Director, Office of Procurement and Supply.

(iii) When the required deviation affects other than packing, packaging, marking, or labeling, coordinate the required deviation with the using service in Central Office. If approved by the using service, a request for authority to deviate will be submitted to the Director, Office of Procurement and Supply, through the Director, VA Marketing Center, Hines, Ill. It will specify in detail why the specific deviation is essential to the Veterans Administration's operations and be accompanied by a copy of the using service's comments. The appropriate marketing division chief will be advised as to the approval or disapproval of the request. If approved, the Director, Office of Procurement and Supply, will when necessary forward the notice required by FAR 10.007(a)(4) to the General Services Administration.

810.011 Solicitation provisions and contract clauses.

(a) *Specifications.* When product specifications are cited in an invitation for bids or requests for proposals, the citation shall include: (1) Desired options, (2) deviations authorized in accordance with 810.007, listed in numerical sequence, and (3) shall conform to the following:

Shall be type ———, grade ———, in accordance with (type of specification) No. ———, dated ——— and amendment ——— dated ———, except paragraphs ——— and ——— which are amended as follows:

PART 812—CONTRACT DELIVERY OR PERFORMANCE

Subpart 812.1—Delivery or Performance Schedules

Sec.
812.104 Contract clauses.

Subpart 812.2—Liquidated Damages

812.202 Policy.
812.204 Contract clauses.

Subpart 812.3—Priorities, Allocations, and Allotments

812.302 General.

Subpart 812.5—Suspension on Work, Stop-Work Orders, and Government Delay of Work

812.503 Stop-work orders.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 812.1—Delivery or Performance Schedules

812.104 Contract clauses.

When delivery is required by or on a particular date, the time of delivery clause set forth in FAR 52.212–1 as it relates to f.o.b. destination contracts will state that the delivery date specified is the date by which the shipment is to be delivered, not the shipping date. In f.o.b. origin contracts, the clause will state that the date specified is the date shipment is to be accepted by the carrier.

Subpart 812.2—Liquidated Damages

812.202 Policy.

Liquidated damages provisions will not be routinely included in supply or construction contracts, regardless of dollar amount. The decision to include liquidated damages provisions will conform to the criteria in FAR 12.202. In making this decision, consideration will be given to whether the necessity for timely delivery or performance as required in the contract schedule is so critical that a probable increase in contract price is justified. Liquidated damages provisions will not be included as insurance against selection of a non-responsible bidder, as a substitute for efficient contract administration, or as a penalty for failure to perform on time.

812.204 Contract clauses.

When the liquidated damages clause prescribed in FAR 52.212–4 and 52.212–5 is to be used and where partial performance may be utilized to the advantage of the Government, the clause in 852.212–70 will be included in the contract.

Subpart 812.3—Priorities, Allocations, and Allotments

812.302 General.

(a) Priorities, allocations, and allotments of critical materials are controlled by the Department of Commerce. Essentially such priorities, etc., are restricted to projects having a direct connection with supporting current defense needs. The Veterans Administration is not authorized to assign a priority rating to its purchase

orders or contracts involving the acquisition or use of critical materials.

(b) In those instances where it has been technically established that it is not feasible to use a substitute material, the Department of Commerce has agreed to assist us in obtaining critical materials for maintenance and repair projects. They will also, where possible, render assistance in connection with the purchase of new items, which may be in short supply because of their use in connection with the defense effort.

(c) Contracting officers having problems in acquiring critical materials will ascertain all the facts necessary to enable the Department of Commerce to render assistance to the Veterans Administration in acquiring these materials. The contracting officer will submit a request for assistance containing the following information to the Director, Office of Procurement and Supply (90):

(1) A description of the maintenance and repair project or the new item, whichever is applicable.

(2) The critical material and the amount required.

(3) The contractor's sources of supply including any addresses. If the source is other than the manufacturer or producer, also list the name and address of the manufacturer or producer.

(4) The Veterans Administration contract or purchase order number.

(5) The contractor's purchase order number, if known, and the delivery time requirement as stated in the solicitation or offer.

(6) The additional time the contractor claims will be necessary to effect delivery if priority assistance is not provided.

(7) The nature and extent of the emergency that will be generated at the station, e.g., (i) damage to the physical plant, (ii) impairment of the patient care program, (iii) creation of safety hazards, and (iv) any other pertinent condition that will result because of failure to secure assistance in obtaining the critical materials.

(8) If applicable, a statement that the item required is for use in a construction contract which was authorized by the Director, Office of Construction (08), to be awarded and administered by the station contracting officer.

Subpart 812.5—Suspension of Work, Stop-Work Orders, and Government Delay of Work

812.503 Stop-work orders.

When the contracting officer has determined that it is advisable to suspend work, pending a decision by the Government, and a supplemental agreement providing for the suspension is not feasible, he/she will request approval to issue a stop-work order to the appropriate contracting officer designated in 809.602.

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

PART 813—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 813.5—Purchase Orders

Sec.
813.505–2 Agency forms in lieu of Optional Forms 347 and 348.
813.506–70 Oral purchase orders.
813.507 Clauses.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 813.5—Purchase Orders

813.505–2 Agency forms in lieu of Optional Forms 347 and 348.

(a) VA Form 90–2138, Order for Supplies or Services, and VA Form 90–2139, Order for Supplies or Services (Continuation), provide in one interleaved set of forms a purchase or delivery order, vendor's invoice, and receiving report. They will be used in lieu of and in the same manner as Optional Form 347, Order for Supplies or Services and Optional Form 348, Order for Supplies or Services Schedule—Continuation.

(b) The following order forms are for use when ordering the indicated medical, dental and ancillary services up to $10,000 per authorization when such services are not available under existing contracts.

(1) VA Form 10–7078, Authorization and Invoice for Medical and Hospital Services.

(2) VA Form 10–7079, Request for Outpatient Medical Services.

(3) VA Form 10–2570d, Dental Record, Authorization and Invoice for Outpatient Services.

(c) In authorizing patient travel as set forth in VA Manual MP–1, Part II, Chapter 3, VA Form 10–2511, Authority and Invoice for Travel by Ambulance or Other Hired Vehicle, will be used as provided by that manual.

(d) Standard Form 182, Request, Authorization, Agreement, and Certification of Training, will be utilized for the procurement of training in the manner prescribed in 870.104.

(e) VA Form 10–2421, Prosthetics Authorization and Invoice, will be used as prescribed in 801.670–15 for indicated services not in excess of $300.

813.506–70 Oral purchase orders.

Oral purchase orders, when considered advantageous to the Veterans Administration, may be used for transactions not in excess of $2,500. The transaction will be assigned a purchase order number and receipt documentation will be obtained on the copies of the purchase request utilized as a property voucher and receiving report. Documentation as to competition will be in accordance with FAR 13.106c.

813.507 Clauses.

When using VA Form 90–2138 for maintenance contracts involving services performed on Government property and which have the potential for property damage and liability claims, the Contractor's Responsibilities clause found in 852.237–70 will be attached. Applicable maintenance contracts include but are not limited to window washing, pest control and elevator maintenance.

PART 814—FORMAL ADVERTISING

Subpart 814.1—Use of Formal Advertising

Sec.
814.103 Policy.
814.106–1 General.
814.104 Types of contracts.
814.104–70 Fixed-price contracts with escalation.

Subpart 814.2—Solicitation of Bids

814.201 Preparation of invitations for bids.
814.202 General rules for solicitation of bids.
814.202–4 Bid samples.
814.203 Methods of soliciting bids.
814.203–1 Mailing or delivery to prospective bidders.
814.206–2 Dissemination of information concerning invitations for bids.
814.204 Records of invitations for bids and records of bids.
814.205 Solicitation mailing lists.
814.205–1 Establishment of lists.
814.205–2 Removal of names from solicitation mailing lists.
814.205–5 Release of solicitation mailing lists.
814.208 Amendment of invitation for bids (construction).

Subpart 814.3—Submission of Bids

814.301 Responsiveness of bids.
814.302 Bid submission.
814.304 Late bids, late modifications of bids, or late withdrawal of bids.
814.304–2 Notification to late bidders.
814.304–4 Records.

Subpart 814.4—Opening of Bids and Award of Contract

814.402 Opening of bids.
814.406 Recording of bids.
814.404 Rejection of bids.
814.404–1 Cancellation of invitations after opening.
814.404–2 Rejection of individual bids.
814.404–70 Questions involving the responsiveness of a bid.
814.406 Mistakes in bids.
814.406–3 Other mistakes disclosed before award.

814.406–4 Mistakes after award.
814.407 Award.
814.407–1 General.
814.407–8 Protests against award.
814.407–70 Award when only one bid is received.
814.407–71 Recommendation for award (construction).
814.408 Information to bidders.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 814.1—Use of Formal Advertising

814.103 Policy.

814.103–1 General.

Contracts in excess of the small purchase limitation or in excess of $1,000 for contracts made for repairs to property acquired by the Veterans Administration under chapter 37, Title 38, United States Code, will be made by formal advertising when all of the following elements necessary to formal advertising are present.

(a) A complete, adequate and realistic specification or purchase description is available or can be written.

(b) There are two or more suppliers who are willing and able to compete effectively for the contract.

(c) There is sufficient time to prepare the invitation completely setting forth the needs of the VA, the terms and conditions upon which it will do business and to complete the administrative determinations, including evaluation, essential to this type of procurement.

(d) The award can be made on the basis of price alone to a reasonable and responsive bidder.

814.104 Types of contracts.

814.104–70 Fixed-price contracts with escalation.

When contracts of this nature are authorized pursuant to 816.102(b), contracting officers will be guided by the provisions of FAR 16.203.

Subpart 814.2—Solicitation of Bids

814.201 Preparation of invitations for bids.

(a) Invitations for bids for supplies, equipment and services will be serially numbered at the time of issue. The number will consist of the station or marketing division number, the serial number of the invitation, and the fiscal year in which issued, e.g., 101–24–84. A series beginning with the number 1 will be started each fiscal year. Invitations for bids for supplies, equipment and services which are issued, accepted and become contracts in the same fiscal year but, because of procurement leadtime, will not be performed until the ensuing fiscal year will be numbered in the series of the year in which they are issued. However, invitations issued in one fiscal year that will result in a contract that will become effective and performed only in the ensuing fiscal year will be numbered in the ensuing fiscal year series.

(b) Invitations for construction contracts will bear the applicable specification number and project number, if assigned. When no specification or project number is assigned, the invitation will be assigned a number in the current fiscal year series as provided in paragraph (a) of this section.

(c) In order to preclude adverse criticism of the Veterans Administration by prospective bidders relative to the disclosure of bid prices prior to bid opening, the provision entitled "Caution to Bidders Bid-Envelopes," as set forth in 852.214–70, will be prominently placed in all invitations for bids.

(d) To realize the greatest possible price advantage for the Government, items that may be processed by a contractor to effect a reduction in cost factors such as production, inspection and delivery, may be listed for award on both individual item and summary item bases. Items will be listed individually and, in addition, a summary price will be solicited for those items the contracting officer determines to be of a related character and normally handled by a majority of prospective bidders.

(1) When different products are to be combined for a summary price, the quantity, unit and unit price columns opposite the summary item will be crossed out, e.g.:

(Item No.) Summary bid for furnishing items ——— to ——— inclusive on an all or none basis:

Quantity	Unit	Unit price	Amount
XX.....	XX.....	XX.....	XX.

(Bidder will enter amount.)

(2) When a single unit price is solicited for a single product for delivery to various destinations, or for multiple deliveries, the total quantity required will be listed opposite the summary item, e.g.:

(Item No.) Summary bid for furnishing items ——— to ——— inclusive on all or none basis:

Quantity	Unit	Unit price	Amount
XX.....	XX.....	XX.....	XX.

(Bidder will enter unit price and amount.)

(3) Invitations containing a summary bid request will contain the following statement:

The award will be made on either an individual item basis or summary bid basis, whichever results in the lowest cost to the Government. Therefore, to assure proper evaluation of all bids, a bidder quoting a summary bid price must also quote a price on each individual item included in the summary bid price.

(e) Bid invitations for supplies, equipment, or services (other than construction) must define the extent to which alternate bids will be authorized and considered. Alternates specified on construction projects will be considered for acceptance only as a part of the basic item.

(1) When an alternate item will be considered only if no bids or insufficient bids are received on the item desired, the clause set forth in 852.214–71(a) will be included in the invitation.

(2) When an alternate item will be considered on or equal basis with the item specified, the clause set forth in 852.214–71(b) will be included in the invitation.

(3) In addition to the clauses referenced in paragraph (e) (1) or (2) of this section, the clause set forth in 852.214–71(c) will be included in the invitation when bids will be allowed on different packaging, unit designation, etc.

(f) When a contracting officer determines that it will be advantageous to the Government to make the award by group or groups of items, a provision for such award will be included in the invitation for bids.

(1) This may apply when:

(i) The items in the group or groups are readily available from the sources to be solicited; and

(ii) It is desirable to make a minimum number of contracts; or

(iii) Furniture or fixtures are required for a single project and uniformity of design is desirable; or

(iv) The articles required will be assembled and used as a unit.

(2) Solicitations for supplies and services, other than construction, will contain the "Aggregate Award" clause set forth in 852.214–72.

(3) Solicitations for construction contracts which solicit prices on an item and alternate item basis (when it is intended that a single aggregate award will be made for all items in the solicitation within certain fiscal limitations) will contain a statement as to the order of priority in which the alternate items will be awarded. This priority will be based on the relative importance of an item, the Veterans Administration's estimate, and the amount of funds available. Such

schedules will be substantially as follows:

Item No. 1—Furnish all labor, material, equipment, etc., to paint buildings No. 1, 2, and 3, $———.
Alternate items in order of priority. Furnish all labor, material, equipment etc. to paint:
Item No. 2—Building No. 1 only $———.
Item No. 3—Building No. 2 only $———.
Item No. 4—Building No. 3 only $———.

A single award will be made on Item No. 1, but in the event the offer exceeds the funds available, a single award will be made on Item No. 2, or a combination of Items Nos. 2 and 3. Offerors should quote a price on each item listed.

814.202 General rules for solicitation of bids.

814.202-4 Bid samples.

When it has been determined that samples are necessary to the proper awarding of a contract, the clause set forth in 852.214-73 will be added to the provision in FAR 52.214-20.

814.203 Methods of soliciting bids.

814.203-1 Mailing or delivery to prospective bidders.

(a) The contracting officer will include either a bid envelope, or Optional Form 17, Sealed Bid Label, with each invitation for bids furnished to prospective bidders.

(b) Standard Form 1442, Solicitation, Offer, and Award, may be distributed 10 to 14 days prior to the issue of drawings and specifications.

814.203-2 Dissemination of information concerning invitations for bids.

Except as provided in 805.205 and 38 CFR 2.3 and 2.4, paid advertising for procurement of supplies, equipment, and services will be used only upon written approval of the Administrator. Each request for approval will set forth the circumstances which preclude procurement being accomplished satisfactorily by normal advertising methods. The request will be submitted through channels and routed through the Director, Office of Procurement and Supply (93), for preparation of recommendations to the Administrator.

814.204 Records of invitations for bids and records of bids.

(a) A single register will be established and maintained by the issuing office on a fiscal year basis for all solicitations by invitations for bid or requests for proposal number, date of issue, date of opening, commodity or service involved and disposition, i.e., contract number or purchase order number or, when applicable, no award.

(b) Maintenance of the contract file prescribed by Part 804 and retention of canceled Invitation for Bid files will fulfill the requirements set forth in FAR 14.204.

814.205 Solicitation mailing lists.

814.205-1 Establishment of lists.

From the bidders mailing list applications received, each contracting activity will compile and keep current a Bidders Mailing List file. The lists will be maintained according to the commodity classification or group of items normally listed on the same invitation for bids.

814.205-2 Removal of names from solicitation mailing lists.

Except as provided for in FAR 14.205-2, no Veterans Administration contracting officer, or other employee, shall remove from the bidders mailing list the name of any prospective bidder.

814.205-5 Release of solicitation mailing lists.

When invitations for bids for supply and service contracts have been issued, contracting officers may furnish, upon request of an individual or institution having a bona fide interest in such information, a list of the prospective bidders to whom invitations for bids were submitted. The provisions of FAR 14.205-5 will be observed with respect to invitations for bids for construction contracts.

814.208 Amendment of invitation for bids (construction).

Amendments will be sent to holders of drawings and specifications by certified mail, return receipt requested. (Amendments may be made by telegram, if time does not permit mailing.)

Subpart 814.3—Submission of Bids

814.301 Responsiveness of bids.

Where the timeliness of the submission of a bid, modification or withdrawal cannot be administratively determined in accordance with FAR 14.301, the matter will be submitted by the contracting officer directly to the Comptroller General for decision. The submission will include copies of all pertinent papers. A copy of each submission will be forwarded to the Director, Office of Procurement and Supply.

814.302 Bid submission.

A bid hand-carried by the bidder or his agent will be considered late unless delivered to the addresses designated in the bid invitation prior to the time set for opening.

814.304 Late bids, late modifications of bids, or late withdrawal of bids.

814.304-2 Notification to late bidders.

The notification to late bidders will specify the final date by which the evidence must be received to be considered. This date must be within the time allowed by the apparent low bidder for acceptance of his bid.

814.304-4 Records.

All bids received by mail (or telegram where authorized) will be time and date stamped immediately upon receipt at the VA installation mail room and in the office of the addressee designated in the invitation. This will firmly establish the time of receipt of bids, or when bids are received in the office of the addressee subsequent to the time of opening, and it will establish whether or not the delay was due to mishandling on the part of the VA.

Subpart 814.4—Opening of Bids and Award of Contract

814.402 Opening of bids.

(a) The contracting officer shall serve as, or designate, a bid opening officer, and shall also designate a recorder.

(b) The form and amount of bids security and name of surety will be read aloud and recorded.

814.403 Recording of bids.

The information required for bid evaluation shall be recorded on the appropriate Abstract of Offers form (SF 1409 or SF 1419). The evaluation data may be recorded on supplemental sheets or forms such as VA Form 10-2237b, Request for Dietetic Supplies, providing that such supplemental sheets or forms are covered by one of the forms authorized above for recording bid or price data. In addition to those instructions set forth in FAR 14-403, the bid opening officer shall certify on the abstract the date and hour at which the bids were opened. Where erasures, strikeovers, or changes in price are noted at the time of opening, a statement to that effect will also be included on, or attached to, the abstract or record of bids.

814.404 Rejection of bids.

814.404-1 Cancellation of invitations after opening.

A copy of each invitation for bids which is canceled as provided for in FAR 14.404-1, together with the abstract showing to whom such bids were sent, will be filed in a separate folder identified by the invitation number. Invitations for bids which result in no bids being received will be handled in

like manner. In each instance the abstract will be annotated to show why an award was not made. These folders will be retained for the current and two succeeding fiscal years.

814.404–2 Rejection of individual bids.

(a) When a bid that is being considered for an award is found to be incomplete, e.g., all pages of the invitation have not been returned by the bidder, the contracting officer will take whichever of the following actions that is appropriate:

(1) Make a determination that the bid as submitted is in such a form that acceptance would create a valid and binding contract, requiring the contractor to perform in accordance with all of the material terms and conditions of the invitation. Such a determination may be based on the fact that the bid as submitted includes evidence that the offeror intends to be bound by all the material terms and conditions of the invitation.

(2) Make a determination that the bid as submitted is in such form that acceptance would not create a valid and binding contract.

(b) When a single bid is received in response to a solicitation, the offer shall not be rejected simply because it specifies a bid acceptance time which is shorter than that contained in the solicitation, unless a compelling reason exists for rejecting such a bid. Insufficient time to properly evaluate an offer shall be considered a compelling reason for rejection; however, the contracting officer will first request the offeror to extend the acceptance date of the bid to allow for proper evaluation.

Note.—In those cases where more than one bid is received, an individual bid which is not in compliance with the Government's bid acceptance time shall be rejected as nonresponsive since consideration of such an offer would unfairly disadvantage other bidders.

814.404–70 Questions involving the responsiveness of a bid.

Questions involving the responsiveness of a bid which cannot be resolved by the contracting officer may be submitted to the Comptroller General through the Director, Office of Procurement and Supply (93B) or the Director, Office of Construction (08), as appropriate. Pertinent documentation must accompany the submission.

814.406 Mistakes in bids.

814.406–3 Other mistakes disclosed before award.

(a) In accordance with the provisions of the FAR 14.406–3(e), the authority of the Administrator to make the administrative determinations set forth in FAR 14.406–3 (a), (b), (c), and (d) is hereby delegated, without power of redelegation to the Director, Office of Procurement and Supply. This delegation in no way impairs the delegations contained in Comptroller General decision B–122003, dated November 22, 1954.

(b) When a bidder alleges a mistake in his or her bid prior to award, after complying with the provisions of FAR 14.406–3, the contracting officer will submit the complete file to the Director, Office of Procurement and Supply (93B) for an administrative determination. Based upon the evidence submitted, the Director, Office of Procurement and Supply, will determine the action to be taken by the contracting officer. Prior to its release to the contracting officer, this determination will be submitted to the General Counsel (025) for approval. Pending receipt of the determination, no award shall be made.

(c) Based on the evidence, when the Director, Office of Procurement and Supply, believes that the case should be submitted to the Comptroller General for decision, he/she will prepare the submission and forward it to the Comptroller General through the General Counsel (025). The decision of the Comptroller General will be furnished to the contracting officer by the Director, Office of Procurement and Supply (93B). A copy of each such decision will be furnished to the General Counsel (025).

814.406–4 Mistakes after award.

(a) When a contracting officer corrects a mistake in bid pursuant to FAR 14.406–4(a), a copy of the contract amendment or supplemental agreement together with a copy of the contracting officer's determination will be forwarded to the Director, Office of Procurement and Supply (93B).

(b) For mistakes in bid alleged after award, the contracting officer's proposed determination, prepared in accordance with FAR 14.406–4, will be forwarded to the General Counsel (025) through the Director, Office of Procurement and Supply (93B) for legal coordination. The results of this coordination will be transmitted to the contracting officer by the Director, Office of Procurement and Supply (93B). The final determination on the alleged mistake in bid after award will be made by the contracting officer.

(c) The Director, Office of Procurement and Supply (93B) will maintain the agency records of mistakes in bids after award required by FAR 14.406–4.

814.407 Award.

814.407–1 General.

(a) Prior to award of a contract for the purchase of a firm or indefinite quantity of supplies, equipment or services (excluding construction) at an actual or estimated cost of $200,000 or more, contracting officers will forward to the Chief, Supply Service for station-level contracts, to the Director, VA Marketing Center, for Market Center contracts, and the Director, Procurement Service (93) for Central Office contracts.

(1) By written notice:

(i) Name and address of proposed awardee.

(ii) Amount of contract.

(iii) Statement of clean bid (no exceptions, protests or mistakes, etc.)

(iv) Contracting officer's determination of bidder's responsibility (history of performance with the Veterans Administration).

(2) On other than routine awards:

(i) A copy of the appropriate specification.

(ii) A copy of each bid received including any correspondence accompanying a bid.

(iii) Copies of correspondence received in lieu of a bid.

(iv) A copy of the abstract.

(v) Contracting officer's determination of bidder's responsibility.

(vi) Statement as to proposed inspection and testing to assure compliance with specifications.

(vii) Contracting officer's analysis of bids received and his/her determination as to the award.

(b) The official designated in paragraph (a) of this section after completion of his/her review, will inform the contracting officer whether an award should or should not be made. In the event an award is not recommended, the specific reason for such a decision will be furnished the contracting officer.

(c) Multiple bids submitted by one individual on his/her own behalf or on behalf of two or more companies, or by two or more affiliated companies, may be considered in making an award, provided the bids were not submitted:

(1) For the purpose of circumventing a law such as the Davis-Bacon Act or the Walsh-Healy Public Contracts Act, or

(2) For any other purpose which would be prejudicial to the United States or to other bidders.

(d) To preclude any bidder from gaining an unfair advantage through the submission of multiple bids which are equal in all respects to other low bids received under the same invitation for bids, only one such bid shall be

considered in the award by lot. The selection of the bid (of the equal multiple bids received) to represent the person or firm, or affiliates thereof, shall be by lot.

814.407–6 Protests against award.

(a) *General.* When a protest against the award of a contract or a request from the GAO (General Accounting Office) for an agency report relative to a protest against an award lodged with that agency is received in Central Office, the protest or request will be immediately forwarded to the Director, Office of Procurement and Supply (93B). Protests or requests concerning Central Office architect-engineer or construction contracts will be forwarded to the Director, Office of Construction (08). The Director, Office of Construction or the Director, Office of Procurement and Supply (93B), whichever is appropriate, will immediately notify the contracting officer, furnish him/her a copy of the protest and request that he/she furnish the information required by FAR 14.407–8(a)(2). The contracting officer will notify all parties involved in or affected by the protest and secure from them their views as provided in FAR 14.407–8(a) (3) and (c). The documented file required by FAR 14.407–8(a)(1) will be prepared by the contracting activity and forwarded to either the Director, Office of Procurement and Supply (93B) or Director, Office of Construction (08) and must be received within 10 workdays after notification of a protest lodged with the General Accounting Office. All reports to GAO specified in FAR 14.407–8 will be submitted through the General Counsel (025) for legal review.

(b) *Letter to protester.* When a protest has been lodged with the contracting officer and has been subsequently denied by the contracting officer, the letter to the protestor detailing the contracting officer's reasons for denying the protest will conclude with the following statement, naming the appropriate VA official:

> Should you disagree with this decision, you may file an appeal with either the (Director, Office of Procurement and Supply (93B), or the Director, Office of Construction) VA Central Office, 810 Vermont Avenue, N.W., Washington, D.C. 20420, or the Comptroller General, General Accounting Office, ATTN: Bid Protest Control Unit, Washington, D.C. 20548. Appeals must be received within 10 workdays after receipt of this letter. By filing an appeal with the (Director, Office of Procurement and Supply (93B), or the Director, Office of Construction) VA Central Office, you may waive your right of further appeal to the Comptroller General at a later date.

(c) *Protest before award.* When a written protest has been lodged with the contracting officer, and he/she considers it desirable to do so, he/she may obtain the views of the Comptroller General. The submission to the Comptroller General will be sent through the Director, Office of Procurement and Supply (93B) or the Director, Office of Construction, as appropriate, and will include the material indicated in FAR 14.407–8(a)(2). The contracting office will notify the protesting individual or firm promptly in writing of the decision of the Comptroller General.

(1) While a case involving a protest before award is pending with the Comptroller General, no award may be made except when, in the opinion of the contracting officer, the needs of his/her facility will not permit delay in awarding the contract. He/she will document the specific reasons why the award must be made and submit a request for approval to the Director, Office of Procurement and Supply (93B) or the Director, Office of Construction (08), whichever is appropriate.

(2) The Director, Office of Procurement and Supply (93B) and the Director, Office of Construction (08), whichever is appropriate, will notify the Comptroller General of the contracting officer's intent to award and request advice as to the status of the case. Upon receipt of this advice, the Director, Office of Procurement and Supply or the Director, Office of Construction will approve the request or advise the contracting officer as to the action to be taken.

(d) *Protest after award.* When a written protest is lodged with the contracting officer, he/she will review the basis for award.

(1) If the contracting officer determines that the award was proper, he/she will furnish the protester a written explanation of the basis for the award which is responsive to the allegations of the protest. The contracting officer will advise the protester that he/she may appeal the determination to the Director, Office of Procurement and Supply (93B) or the Director, Office of Construction in the case of a Central Office architect-engineer or construction contract, or the Comptroller General.

(2) If the contracting officer determines that the award is questionable, he/she will advise the contractor of the protest and invite him/her to submit his/her views and relevant information. At the same time, the contracting officer will seek to obtain a mutual agreement with the contractor to suspend performance on a no-cost basis. Whether or not the contractor agrees, the case will be submitted promptly to the Director, Office of Procurement and Supply (93B) or the Director, Office of Construction in the case of a Central Office architect-engineer or construction contract, who will either advise the contracting officer of the appropriate action to take, or submit the case to the Comptroller General for his/her decision.

814.407–70 Award when only one bid is received.

When only one bid is received in response to an invitation for bids, such bid may be considered and accepted if (a) the specifications used in the invitation were not restrictive, (b) adequate competition was solicited, (c) the price is reasonable, and (d) the bid is otherwise in accordance with the invitation for bids. Such determination will be made in writing, and included on or attached to the abstract of bids.

814.407–71 Recommendation for award (construction).

(a) For Central Office contracts, the Director, Office of Construction, after analyzing all bids received, will submit a memorandum to the Administrator (00) recommending award or other disposition of the project. A copy of each of the following will accompany the memorandum:

(1) The invitation.

(2) Each bid received.

(3) The abstract.

(4) Any other pertinent data.

(b) On station level contracts, the Chief, Engineering Service, will analyze all bids received and submit to the contracting officer a memorandum recommending award or other disposition of the project. However, the final decision to accept or reject the lowest responsive bid and the determination as to the responsibility of a prospective contractor shall be made by the contracting officer alone.

814.408 Information to bidders.

(a) Prior to award, no information as to probable acceptance or rejection of any offer shall be given to any bidder or other person outside the Veterans Administration.

(b) Except as provided in paragraphs (c) and (d) of this section, information as to performance under contract or an accepted bid is not public information and will be released to persons outside the VA only upon the authority of the immediate supervisor of the contracting officer.

(c) Except as provided in paragraph (d) of this section, the contracting officer may furnish information as to performance under a contract to those having a legitimate interest, such as

banks, other financial companies and Government departments and agencies.

(d) When litigation is involved, all information will be furnished through the General Counsel (025).

PART 815—CONTRACTING BY NEGOTIATION

Subpart 815.1—General Requirements for Negotiations

Sec.
815.103 Use of negotiation.
815.104 Authorization and approval.

Subpart 815.2—Negotiation Authorities

815.200 Scope of subpart.
815.203 Purchases under the small purchase limitation.
815.204 Personal or professional services.
815.204–70 Medical schools and related institutions.
815.207 Medicines or medical supplies.
815.209 Subsistence supplies.
815.210 Impractical to secure competition by formal advertising.
815.211 Experimental, developmental, or research work.
815.215 Otherwise authorized by law.

Subpart 815.8—Price Negotiation

815.800 Scope of subpart.
815.804–2 Requiring certified cost or pricing data.
815.804–70 Preproduction and start-up and other nonrecurring costs.
815.805–4 Technical analysis.
815.805–5 Field pricing support.

Subpart 815.9—Profit

815.901 General.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 815.1—General Requirements for Negotiations

815.103 Use of negotiation.

Contracts in excess of the small purchase limitation specified in FAR Part 13 (or $1,000 for repairs to properties acquired under Chapter 37, Title 38, United States Code), will be entered into by negotiation only in the absence of any one or more of the elements essential to formal advertising set forth in 814.103, or when:

(a) It is determined that the procurement should be effected from small business in accordance with FAR Part 19.

(b) It is determined that the procurement should be effected from labor surplus area concerns in accordance with FAR Part 20.

(c) Items to be purchased are for authorized resale.

815.104 Authorization and approval.

Proposed contracts for the purchase of a firm quantity of supplies or equipment, at a cost in excess of $200,000, are subject to the procedure set forth in 814.407–1.

Subpart 815.2—Negotiation Authorities

815.200 Scope of subpart.

(a) Subject to the requirements and limitations prescribed in FAR Subparts 15.1, 15.2, and 15.3, and Subparts 815.1, 815.2, and 815.3, Veterans Administration contracting officers, acting within the scope of their authority, may negotiate contracts for the acquisition of supplies, equipment and services. Each solicitation and contract will cite the negotiation authority selected.

(b) In those instances where a purchase in excess of the small purchase limitation specified in FAR Part 13 may be negotiated under more than one authority, the contracting officer will select the authority he/she deems most appropriate to accomplish the purchase and will include in the contract file complete justification for his/her selection in a determination and findings conforming to FAR Subpart 15.3.

(c) In addition to the controls specified in this Subpart, the Administrator's approval of certain proposed contracts is required as prescribed in Subpart 837.2.

815.203 Purchases under the small purchase limitation.

(a) Procurement of medical services and resources authorized by sections 4117 and 5053 of Title 38, United States Code, costing less than the small purchase limitation specified in FAR Part 13 may be procured by negotiation under authority of FAR 15.203 except as prescribed in 815.204–70. Each such contract and revision thereof is, however, subject to the same approval as those costing in excess of the small purchase limitation.

(b) Except as provided in this paragraph, purchases authorized to be negotiated under the special procurement authorities contained in Title 38, United States Code, will be negotiated under the authority of FAR 15.203 when the amount of purchase is not in excess of the small purchase limitation (FAR Part 13). An exception exists in the case of services or supplies purchased in support of property acquired under the Loan Guaranty program. For such purchases, 38 U.S.C. 1820(b) requires formal advertising if the amount will exceed $1,000.

(c) Procurements of consulting, management, administrative and professional services costing less than the small purchase limitation and made under the authority of 38 U.S.C. 213 are subject to the controls set forth in Subpart 837.2.

815.204 Personal or professional services.

(a) Various sections of Title 38, United States Code, authorize the Administrator to enter into contracts for the purpose of acquiring personal or professional services. These authorizations do not, however, stipulate the manner in which such contracts are to be entered into, i.e., negotiation or formal advertising. Civilian agencies are, under the authority of FAR 15.204, authorized to procure such services by negotiation. Therefore, when the services listed in this section are to be acquired by the Veterans Administration, at a cost in excess of the small purchase limitation (FAR Part 13), a contract will be negotiated by the contracting officer. These contracts will cite in addition to the authority to negotiate (except for those negotated under 38 U.S.C. 4117 or 38 U.S.C. 5053), FAR 15.204, the appropriate section of Title 38 which authorizes the contract.

(b) Architect-engineer services when required in conjunction with construction (see Subpart 836.6 of this chapter) will cite as the authority for such negotiations FAR 15.204 and 38 U.S.C. 5002.

(c) Contracts with medical schools, clinics, and any other group or individual capable of furnishing such services to provide scarce medical specialist services at Veterans Administration facilities (including but not limited to services of physicians, dentists, podiatrists, optometrists, nurses, physicians' assistants, expanded function dental auxiliaries, technicians, and other medical support personnel) will be negotiated under authority of 38 U.S.C. 4117. Such contracts must provide that services are rendered at Veterans Administration facilities.

(d) Contracts with hospitals (or medical installations having hospital facilities or organ banks, blood banks, or similar institutions) or medical schools, or clinics in the medical community for:

(1) The mutual use, or exchange of use, of specialized medical resources when such a contract will obviate the need for a similar resource to be provided in a Veterans Administration facility; or

(2) The mutual use, or exchange of use, of specialized medical resources in a Veterans Administration facility, which have been justified on the basis of veterans' care, but which are not utilized to their maximum effective

capacity will be negotiated under authority of 38 U.S.C. 5053.

(e) Proposed contracts for the services and resources specified in paragraphs (c) and (d) of this section may be entered into for one year only. When deemed essential to the mission of the stations, proposed renewal contracts will be negotiated for the subsequent year. Except as provided in paragraph (f) of this section, such proposed contracts will be submitted for approval to the Deputy Associate Deputy Chief Medical Director for Operations (10BA), when authority is 38 U.S.C. 5053, or Director, Office of Procurement and Supply (90), when authority is 38 U.S.C. 4117, so as to reach Central Office 60 days prior to effective date of the contract.

(1) Complete justification for all contracts will be submitted, as approval depends on the adequacy of the justification.

(2) Proposed contracts under authority of 38 U.S.C. 4117 will be submitted in five copies, and contracts under authority of 38 U.S.C. 5053 will be submitted in six copies.

(3) The transmittal letter and each supporting document will be submitted in the same number of copies as the contract. As an incomplete submission delays processing of the proposed contract in Central Office, care should be exercised to assure that the proper number of copies are submitted, and that submissions are complete (e.g., complete name and address of the other party or parties to the contract are included).

(4) Proposed contracts of the type specified in paragraph (d) (1) and (2) of this section will be accompanied by a recommendation of the station director as to the geographical limits to be applied to the medical community.

(5) A copy of all executed sharing contracts, both new and renewal, will be forwarded to the Deputy Associate Deputy Chief Medical Director for Operations (10BA) for review and for purposes of making the annual report to Congress as required by 38 U.S.C. 5057.

(f) Proposed renewal sharing contracts under the authority of 38 U.S.C. 5053 and proposed renewal scarce medical specialist services contracts under the authority of 38 U.S.C. 4117 may be approved by the appropriate Medical District Director when such contract proposals meet the following conditions:

(1) No new services are being added to the sharing contract. (Services may be deleted from the contract without Central Office approval, but only if such deletions do not effectively result in an individual item or total cost increase in excess of 10 percent over the cost in the previous contract.) No individual cost item that is being acquired from the contractor (non-Veteran Administration facility identified in the contract) will increase in cost more than 10 percent over the cost for that same item in the previous contract and there will be no increases in full-time equivalent employee requirements for scarce medical specialist service contracts.

(2) The total cost of a scarce medical specialist services contract will not increase more than 10 percent over the total cost of the previous contract.

(3) The sharing proposal has been reviewed for legal sufficiency by the District Counsel responsible for servicing the Veterans Administration facility involved. The District Counsel shall be sent, along with the sharing proposal, a copy of the previous sharing agreement for the same services so that a comparison can be made of the two documents.

(4) All contract clauses required by Chapters 1 and 8, Title 48, Code of Federal Regulations, are included in the proposal.

(5) Equal Employment Opportunity clearance has been obtained, when required (see Part 822).

(6) Certified cost or pricing data was obtained from the contractor when required by FAR 15.804. Cost or pricing data was submitted by the contractor on Standard Form 1411, Contract Pricing Proposal Cover Sheet, in accordance with FAR 15.804–6.

(7) When cost or pricing data was required, an audit was obtained in accordance with FAR 15.805–5 and 815.805–5.

(8) When cost or pricing data was required, a technical analysis has been performed on the contractor's proposal in accordance with FAR 15.805–4 and 815.805–4.

(g) Contracts for professional or technical services with private or public agencies not specifically authorized in any other section of Title 38, United States Code, may be acquired under 38 U.S.C. 213 and negotiated under FAR 15.204 when the cost of such services will exceed the small purchase limitation (See FAR Part 13). (See Subpart 837.2 regarding controls over the procurement of consulting, management, administrative and professional services).

(h) See 837.104 regarding personal service contracts having an employer-employee relationship.

815.204–70 Medical schools and related institutions.

Contracts of the type specified in 815.204, paragraphs (c) and (d), and 815.203(a) may be negotiated with medical schools and related institutions without competition (see Comptroller General Decision B–195559.2). Such contracts shall be negotiated under the authority of this 815.204–70 and 38 U.S.C. 4117 and 38 U.S.C. 5053, as appropriate. The requirements of 815.204, paragraphs (e) and (f), shall be applicable to all such procurement actions.

815.207 Medicines or medical supplies.

(a) Except as provided in this 815.207 or when specific prior approval has been granted by the Director, Office of Procurement and Supply, to a field station contracting officer, no Veterans Administration contracting officer shall enter into a contract by negotiation under authority of FAR 15.207, when the estimated cost of the item(s) required, singly or collectively, is in excess of the small purchase limitation (see FAR Part 13) for a single transaction.

(b) When an individual is designated to act in the capacity of one of the positions specified in this 815.207, that individual is authorized to consummate contracts in excess of the small purchase limitation (FAR Part 13) in the same manner as the incumbent of the position. The contracting officer's title will be indicated on the contract documents and official correspondence with the contractor. This will verify to the contractor that the contracting officer possesses the necessary contracting authority. Additionally, the contracting officer's title will appear on the applicable determinations and findings.

(c) The following contracting officers are authorized to award negotiated contracts in excess of the small purchase limitation (FAR Part 13) for medicines or medical items:

(1) Director, Office of Procurement and Supply.

(2) Director, Procurement Service.

(3) Director, Veterans Administration Marketing Center.

(4) Chief of each of the following Marketing Divisions:

(i) Medical Supplies;

(ii) Medical Equipment;

(iii) Federal Supply Schedules;

(iv) Pharmaceutical Products;

(5) Four contracting officers for each Marketing Division when so designated by the Marketing Division Chief.

815.209 Subsistence supplies.

(a) Except as provided in this 815.209 or when specific prior approval has been granted by the Director, Office of Procurement and Supply, to a field station contracting officer, no Veterans

Administration contracting officer shall enter into a contract by negotiation under authority of FAR 15.209 when the estimated cost of the item(s) required, singly or collectively, is in excess of the small purchase limitation (FAR Part 13) for a single transaction.

(b) When an individual is designated to act in the capacity of one of the positions specified in this 815.209, that individual is authorized to consummate contracts in excess of the small purchase limitation (FAR Part 13) in the same manner as the incumbent of the position.

(c) The following contracting officers are authorized to negotiate contracts in excess of the small purchase limitation (FAR Part 13) for the purchase of subsistence supplies:

(1) Director, Office of Procurement and Supply.

(2) Director, Procurement Service.

(3) Director, Veterans Administration Marketing Center.

(4) Chief, Marketing Division for Subsistence.

(5) Three senior contracting officers, Marketing Division for Subsistence, when so designated by the Marketing Division Chief.

815.210 Impractical to secure competition by formal advertising.

(a) Contracts for paid advertising for community placement homes and for recruitment purposes may be negotiated under the authority of this 815.210, after the request for the procurement of such advertising has been approved by one of the officials designated in 38 CFR 2.3 and 2.4

(b) Contracts for the procurement of paid advertising in the purchase or sale of supplies, equipment or services, may be negotiated under authority of this 815.210, only after the request for such procurement has been approved by the Administrator. (See FAR Subpart 5.5 regarding procedures for contracting for paid advertising).

815.211 Experimental, developmental, or research work.

Research authorized to be conducted by the Veterans Administration, in accordance with the provisions of Title 38, United States Code, will be negotiated under the authority of FAR 15.211 (except prosthetics research authorized by 38 U.S.C. 5023 will be negotiated under the authority of FAR 15.215).

815.215 Otherwise authorized by law.

Various sections of Title 38, United States Code, authorize the Administrator to enter into certain contracts, and certain types of contracts, without regard to any other provision of law. Veterans Administration contracting officers entering into contracts by negotiation for any of the following items or services, estimated to cost in excess of the small purchase limitation (See FAR Part 13), will cite, in addition to FAR 15.215 and 815.215, the appropriate section of Title 38, United States Code, as their authority to do so:

(a) Contracts for orthopedic and prosthetic appliances and related services including research. FAR 15.215 and 38 U.S.C. 5023. Contracts for items and services negotiated under this authority require a technical review under the provisions set forth in 801.602–70, even though the dollar amounts may not meet the levels specified in the section.

(b) Contracts to purchase or sell merchandise, equipment, fixtures, supplies and services for the operations of the Veterans Canteen Service. FAR 15.215 and 38 U.S.C. 4202.

(c) Contracts or leases for the operation of parking facilities established under authority of 38 U.S.C. 5009(b)(2), provided that (1) the establishment, operation and maintenance of such facilities have been authorized by the Administrator or designee; and (2) the station director determines in writing that operation by contract or lease is both desirable and warranted. FAR 15.215 and 38 U.S.C. 5009(b)(2).

(d) Contracts for laundry and other common services such as the purchase of steam, may be negotiated with non-profit, tax-exempt, educational, medical, or community institutions, when specifically approved by the Administrator or designee and when such services are not reasonably available from private commercial sources, FAR 15.215 and 38 U.S.C. 5022(c). Requests to enter into such contracts will be submitted to the Associate Deputy Chief Medical Director (10B), for approval by the Administrator or designee.

(e) Contracts or agreements with public or private agencies for the services of translators. FAR 15.215 and 38 U.S.C. 213.

Subpart 815.8—Price Negotiation

815.800 Scope of subpart.

The principles set forth in FAR Subpart 15.8, as well as those in this subpart, on the basic policy, pricing techniques, requirements for cost or pricing data, and the evaluation and audit of cost and pricing data apply to all negotiated cost-reimbursement, time-and-material, labor hour, firm fixed-price contracts and contract modifications. These principles also apply to annual revisions of prices under cost-reimbursement contracts as well as to the negotiation of initial prices.

815.804–2 Requiring certified cost or pricing data.

Under the circumstances prescribed in FAR 15.804–2(a), the contracting officer will require the prospective contractor to submit and to have any prospective subcontractor submit to the prime contractor, cost or pricing data and to certify to its accuracy and completeness. This data will be submitted by the contractor on SF 1411, Contract Pricing Proposal Cover Sheet, and will be used by the contracting officer in the evaluation of the offer and in the negotiation of the contract price or contract modification. The cost or pricing data is required to determine the reasonableness of the proposed price where such price is based on the cost of the proposed work. It is not required when the contracting officer determines that prices are based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public or prices set by law or regulation. To receive an exemption from the requirement for submission or certification of cost or pricing data when prices are based on established catalog or market prices or prices set by law or regulations, the contractor must ordinarily claim it on Standard Form 1412, Claim for Exemption from Submission of Certified Cost or Pricing Data, when required by FAR Subpart 15.804–3(e).

815.804–70 Preproduction and start-up and other nonrecurring costs.

In evaluating start-up and other nonrecurring costs, the extent to which these costs are included in the proposed price and the intent to absorb or recover any such costs in any future noncompetitive procurement or other pricing action will be determined. The contracting officer will ascertain, with the assistance of the Assistant Inspector General, Office of Audit (52), as required or considered necessary, that payment of such costs is not duplicated. For example, cost of equipment paid for by the Government through a setup or connection agreement will not be included in depreciation costs of a subsequently negotiated agreement.

815.805–4 Technical analysis.

(a) Contracting officers are responsible for the technical and administrative sufficiency of the contracts they enter into and ensuring

that all legal and technical reviews are accomplished. To this end, initial and revised pricing of all negotiated prime contracts (including subcontract pricing under them) and contract modifications will be subject to technical analyses to the degree the contracting officer deems necessary (see 801.602–70 for required legal reviews). Technical analyses of the proposals will be requested by the contracting officer from the appropriate technical personnel to address, as a minimum, the items set forth in FAR Subpart 15.805–4. Contracting officers shall not begin negotiation of or award any negotiated contracts or contract modifications before receipt, analysis and consideration of documented technical evaluations for every procurement action requiring such analysis under the conditions prescribed in FAR 15.805–4. The results of such analyses will be documented in the contract file and will also be made available to the auditor performing the preaward audit required by 815.805–5.

(b) When, in the opinion of the contracting officer, the complexity of the proposed contract warrants, he/she will submit the proposed contract to the Director, Office of Procurement and Supply (93), for review and comment. When deemed advisable, the Director, Office of Procurement and Supply (93), will request the General Counsel to accomplish a legal review. This review is in addition to the legal review specified in 801.602–70.

815.805–5 Field pricing support.

(a) When cost or pricing data are required in accordance with FAR 15.804, the contracting officer will request an audit before negotiating any proposed contracts or contract modifications resulting from a proposal in excess of $500,000. When initiating the audit, contracting officers in the Office of Procurement and Supply and Office of Construction who are located in the VA Central Office have the option to request audits directly from the cognizant audit agencies or requesting audits through the Assistant Inspector General for Policy, Planning and Resources (53C). All other contracting officers located in the VA Central Office and the Office of the General Counsel will send requests for audit to the Assistant Inspector General for Policy, Planning and Resources (53C). Contracting officers located at the VA Medical Centers, marketing centers and supply depots are required to arrange for audits through the Director, Office of Procurement and Supply or the Director, Office of Construction.

(b) When cost or pricing data are required for proposal less than $500,000 and an audit is not required, the contracting officer will make a cost and price analysis to evaluate the reasonableness of individual cost elements and to ensure that the overall price offered is fair and reasonable. The price and cost analysis techniques are set forth in FAR 15.805–2 and 15.805–3. The contracting officer located in Central Office may request an audit or request the Assistant Inspector General for Policy, Planning and Resources (53C) to render such accounting assistance or technical advice deemed desirable. A field station contracting officer may request such assistance and advice from the Assistant Inspector General for Policy, Planning and Resources (53C).

(c) When cost or pricing data are required in accordance with FAR 15.804 and the proposal is in excess of $500,000, an audit may not be requested under the following conditions:

(1) Information available to the contracting officer is considered adequate to determine the reasonableness of the proposed cost or price.

(2) Prices for a contract modification to a formally advertised fixed-price contract have been established and written in the basic fixed-price contract.

(3) Negotiated fixed-price or cost-reimbursement utility connection or site facility agreements, developed by the Office of Construction, representing contracts for the construction of service facilities or site clearance where cost data submitted (construction cost estimates) will be evaluated by design and cost engineering staffs of the Office of Construction.

(d) When using the exclusions in paragraph (c) of this section as a basis for not submitting cost and pricing data for preaward audit, contracting officers will fully justify the reasons for so doing and document such justification in the contract file.

Subpart 815.9—Profit

815.901 General.

If a profit or fee is involved, it must be established as a dollar amount and not as a percentage of the cost estimate, in order to avoid the cost-plus-a-percentage-of-cost system of contracting which is not legal (see FAR Part 16). Once established, the profit or fee cannot be escalated during the period of the contract. However, when a change order materially affects the scope of the work, an additional profit or fee or an appropriate reduction may be negotiated.

PART 816—TYPES OF CONTRACTS

Subpart 816.1—Selecting Contract Types

Sec.
816.102 Policies.

Subpart 816.3—Cost-Reimbursement Contracts

816.306 Cost-plus-fixed-fee contracts.

Subpart 816.6—Time-and-Materials, Labor-Hour, and Letter Contracts

816.603 Letter contracts.

Subpart 816.70—Unauthorized Agreements

816.7001 Letters of availability.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 816.1—Selecting Contract Types

816.102 Policies.

(a) Contracts for supplies or nonpersonal services awarded (except for small purchases under Part 813 and FAR Part 13) are to be of the following types:

(1) Firm fixed price for a period of one year or less.

(2) Firm fixed price for one year with options for succeeding years. (See 817.202 and FAR 17.2).

(3) Fixed price with economic price adjustment. (See FAR 16.203).

(b) Contracts of the type specified in paragragh (a)(3) of this section which include an economic price adjustment provision other than the clause for service contracts (FAR 22.1006(c)) require the prior approval of the Director, Office of Procurement and Supply (90). The request for approval is to clearly set forth the need for the provision.

(c) Contracts of the type specified in paragraphs (a) (2) and (3) of this section are to be entered into only when such contracts are clearly shown to be advantageous to the Veterans Administration. The contracting officer is to document the contract file to show the specific and compelling reasons for selection of the particular type contract.

(d) Any contract involving direct obligation of appropriations and which extends beyond the appropriation of the year in which the contract period begins or which is for more than one fiscal year, is to contain provisions to the effect that:

(1) It is made for the period covered by the contract, subject to the availability of appropriations in the ensuing year(s), and

(2) No service is to be performed by the contractor after September 30 of each fiscal year unless and until specifically authorized by the contracting officer or representative.

(e) Architect-engineer contracts, construction contracts, or professional engineer contracts, financed by "no year appropriations" are not subject to the requirements of paragraph (d) of this section.

Subpart 816.3—Cost-Reimbursement Contracts

816.306 Cost-plus-fixed-fee contracts.

(a) Contracts of this type may be entered into only after the contracting officer has made the determination required by FAR 16.301–3(c). The determination is to be made a part of the contract file.

(b) The amount of the fee to be paid or allowed to a prime contractor or subcontractor under this type of contract shall be negotiated by the contracting officer within the statutory limitations. (See FAR 15.903(d)).

Subpart 816.6—Time-and-Materials, Labor-Hour, and Letter Contracts

816.603 Letter contracts.

Prior to execution of a letter contract, the department or staff office head concerned shall approve the contracting officer's written determination that no other type contract is suitable (See FAR 16.603–3). The determination is to establish the limit of the effectiveness of the letter contract; i.e., the date by which the definitive contract is to be executed, within the limits established in FAR 16.603–2 (c) and (d).

Subpart 816.70—Unauthorized Agreements

816.7001 Letters of availability.

(a) *Description.* A letter of availability (sometimes inappropriately called a letter of intent) is a letter to a supplier primarily for the purpose of obtaining a place on the supplier's production or delivery schedule for long lead time items. Such a letter typically indicates that products or services are being considered for procurement, but that the statement of intent is not to be construed as a commitment. Such letters of availability are sometimes solicited by prospective contractors, or they may be originated by Government personnel. A letter of availability is distinguished from a letter contract which is specifically authorized in FAR 16.603.

(b) *Policy.*

(1) Unless specifically authorized by the Director, Office of Procurement and Supply, letters of availability are not to be utilized for the following reasons:

(i) While such letters of availability may disclaim Government liability, they may induce potential contractors to initiate costly preparations in anticipation of contract award.

(ii) Procurements announced in such letters do not always materialize. The result may be costly to the Government, the prospective contractor, or both. If the author of the letter of availability is an authorized contracting officer of the agency, the Government may be bound by action, even though the action is contrary to sound procurement practices and/or fiscal regulations. If the author of the letter of availability lacks procurement authority, the prospective contractor may incur substantial expenditures which may not be recovered from the Government, but for which the prospective contractor may seek to hold the unauthorized author personally liable.

(iii) The issuance of a letter of availability may violate the "Anti-Deficiency Act" (31 U.S.C. 1341).

(2) It is recognized that potential contractors have a need to obtain procurement information at the earliest possible moment in order to make timely preparations. To this end, procurement personnel are expected to act as efficiently and expeditiously as possible on all procurement actions.

PART 817—SPECIAL CONTRACTING METHODS

Subpart 817.1—Multi-Year Contracting

Sec.
817.102 Policy.
817.102–1 Uses.

Subpart 817.2—Options

817.202 Use of options.

Subpart 817.4—Leader Company Contracting

817.402 Limitations.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 817.1—Multi-Year Contracting

817.102 Policy.

817.102–1 Uses.

The Veterans Administration does not currently have statutory multi-year contracting authority. It is the policy of the VA not to exercise, at this time, multi-year contracting procedures for no year funds.

Subpart 817.2—Options

817.202 Use of options.

(a) All solicitations developed pursuant to Office of Management and Budget Circular A–76 (Revised) cost comparisons will provide for one year renewal options as prescribed in FAR Subpart 17.2. Requests to use less or more than the prescribed contract period for Circular A–76 (Revised) cost comparisons will be forwarded to the Director, Office of Procurement and Supply (90).

(b) Each contract awarded with renewal options and which is subject to the Service Contract Act of 1965 will use the clause prescribed in FAR 22.1006(c).

Subpart 817.4—Leader Company Contracting

817.402 Limitations.

(a) Except as provided in 817.402(b), no leader company contracts shall be initiated or consummated.

(b) The Director, Office of Procurement and Supply (90) may designate a contracting officer to enter into a leader company contract when considered beneficial to the agency and the Government. When a contracting officer is designated the authority to enter into a leader company contract, the designation will be by name for a specific contract. The proposed contract with a determination and finding will be submitted for legal review in accordance with 801.602–71.

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

PART 819—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

819.000 Scope of part.

Subpart 819.2—Policies

819.201 General policy.
819.202–5 Data collection and reporting requirements.
819.202–70 Additional responsibilities.

Subpart 819.5—Set-Asides for Small Business

819.502–2 Total set-asides.
819.502–3 Partial set-asides.

Subpart 819.8—Contracting With the Small Business Administration (THE 8(a) PROGRAM)

819.801 General.
819.807–70 Commitments of the Office of Construction's funded projects for the 8(a) program.
819.809–70 Procurement of supplies, services, and research and development.
819.809–71 Procurement of construction.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

819.000 Scope of part.

This subpart sets forth the Veterans Administration small business program including section 8(a) contracts with SBA (Small Business Administration) and unilateral set-asides. It establishes responsibility for making such determinations, reviewing

determinations and evaluation of the program.

Subpart 819.2—Policies

819.201 General policy.

(a) The Associate Deputy Administrator for Logistics (005) is designated the Director, Office of Small and Disadvantaged Business Utilization (OSDBU). The Deputy Director, OSDBU (005C), will report directly to the Director and will supervise and direct the OSDBU staff. The OSDBU will be responsible for the overall supervision of the Veterans Administration Small and Disadvantaged Business Utilization program and will assist departments and staff offices in developing their respective small business programs.

(b) The Director, Office of Construction will develop and coordinate the agency small business program, as it affects construction projects, with the OSDBU.

(c) The Director, Veterans Canteen Service (VCS), will designate an employee of his/her organization to serve as liaison between the VCS and the Office of Small and Disadvantaged Business Utilization on small business problems affecting the VCS.

(d) The Chief Memorial Affairs Director, Chief Benefits Director, Director, Office of Construction, Director, Office of Administration, Director, VA Marketing Center and Directors of Veterans Administration field stations with Supply activities will designate an employee of their respective organizations to serve as a small and disadvantaged business specialist. This employee will be a full-time employee of the respective contracting activity, will be familiar with the supplies and services purchased at the activity, and will be fully cognizant of the regulations implementing the Small Business Act. The principal duties will include assisting the Small Business Administration Procurement Center Representative (if assigned) in activities and functions relating to sections 8 and 15 of the Small Business Act. The name, telephone number, and mailing symbol of each designee and any successor will be forwarded to the Director, Office of Small and Disadvantaged Business Utilization, through the Director, Office of Procurement and Supply.

819.202-5 Data collection and reporting requirements.

Department heads, staff office directors and heads of contracting activities will, in addition to the responsibilities designated in FAR 19.202-5, cooperate with the Office of Small and Disadvantaged Business Utilization in formulating specific socio-economic procurement goals and providing other data necessary for goal assessment.

819.202-70 Additional responsibilities.

In addition to the duties designated in FAR 19.202, VA contracting officers will perform the following functions in furtherance of the small business and Labor Surplus Area (LSA) programs:

(a) Develop a plan of operation to increase the share of contracts and purchase orders awarded to small business and LSA concerns.

(b) Promote the disadvantaged business program through the SBA 8(a) procedures set forth in Subpart 819.8.

(c) Review the types and classes of items and services to be purchased to determine the applicability of individual small business set-asides and LSA set-asides. Class set-asides, established in accordance with criteria in FAR 19.503, shall be reviewed at least annually to determine whether items or services procured under a unilateral or joint set-aside should be modified or withdrawn. Updated lists of acquisitions reserved for small business on a class basis shall be maintained by heads of contracting activities.

(d) Make maximum utilization of the SBA small business source list (i.e., Procurement Automated Source System) when considering the disposition of all procurement requirements. Small business source lists are available through the SBA Regional Offices.

(e) Assure that small business firms are identified on bid abstracts.

(f) Assure that specifications are not unduly restrictive, thereby enabling small business participation to the maximum extent feasible.

(g) Assist and counsel small business firms with individual problems.

(h) Provide for counseling nonresponsive or nonresponsible small business bidders to help qualify them for future awards.

(i) Attend conferences and meetings publicizing the small business program.

(j) Promote the award of research contracts to small business and LSA firms.

(k) Promote goals for small business, small business set-asides, small business subcontracting, 8(a) procurements, labor surplus area set-asides, and purchases from women-owned businesses.

(l) Review all urgent and sole source procurements to determine that they are sparingly made, thoroughly documented and approved by the head of the contracting activity.

(m) If the contracting officer is assigned an SBA Resident Procurement Center Representative, assure that the representative is provided an opportunity and reasonable time to review any solicitation which meets the dollar threshold for which small business and small disadvantaged business subcontracting plans are required. Additionally, prior to the execution of any negotiated contractual document requiring a subcontracting plan, the total procurement package including the proposed subcontracting plan will be made available to the Resident Procurement Center Representative with a reasonable time allowed for review. The Procurement Center Representative may submit recommendations, which will be advisory in nature, to the contracting officer. The Procurement Center Representative will also be provided a copy of the subcontracting plan finally negotiated by the contracting officer. A copy of any subcontracting plan submitted pursuant to a formally advertised procurement will also be provided the Resident Procurement Center Representative upon execution of the contractual document.

(n) Assure that the small and disadvantaged business specialist notifies the SBA of the award of contracts, amendments, or modifications that contain subcontracting plans. The notification will contain the contractor's name and address, place of performance, dollar amount, performance period, description of contract item or items, and name and address of the contracting officer. A copy of the award document is sufficient for these purposes. The notification will be sent to the Assistant Regional Administrator for Office of Procurement and Technical Assistance in the SBA region where contract performance is to take place.

(o) Assure that plans are forwarded as specified in FAR 19.705-6(b).

Subpart 819.5—Set-Asides for Small Business

819.502-2 Total set-asides.

(a) When in accordance with FAR 19.502-2, the entire amount an individual or class of acquisitions is set-aside for exclusive small business participation, the face page of the solicitation shall include the appropriate product or service classification and related small business size standard in conjunction with one of the following notices:

(1) Notice of total small business set-aside, page , applies to all items in this solicitation.

(2) Notice of total small business set-aside, page , applies to items through in this solicitation.

(b) When a total small business-LSA set-aside is made, one of the following statements, as applicable, will be placed on the face of the solicitation:

(1) Notice of total set-aside for small business concerns agreeing to perform as LSA concerns, page , applies to all items in this solicitation.

(2) Notice of total set-aside for small business concerns agreeing to perform as LSA concerns, page , applies to items through in this solicitation.

(3) Notice of total set-aside for small business concerns agreeing to perform as LSA concerns, page , applies to items in this solicitation.

(4) Notice of total set-asides for small business concerns agreeing to perform as LSA concerns, page , applies to items through in this section.

(c) Contracting officers must ensure that appropriate product or service classification and the related size standard are included in each solicitation.

(d) All proposed procurement for construction anticipated to cost between $2,000 and $1 million and all proposed procurements for architect-engineer services for minor construction projects ($2 million and less) will be considered as though SBA had initiated a set-aside request. Determinations of the need to deviate from this policy made by the head of a contracting activity will require review by the Director, Office of Small and Disadvantaged Business Utilization, as prescribed in 819.502.71.

819.502-3 Partial set-asides.

When, in accordance with the provisions of FAR 19.502-3, it is determined that a particular procurement will be partially set aside for exclusive small business participation, the solicitation for bids will have appropriate product or service classification, appropriate size standard and whichever of the following statements is applicable, placed on the face page:

(a) Notice of partial small business set-aside, page , applies to Item through Item in this solicitation.

(b) Notice of partial small business set-aside, page , applies to all items in this solicitation.

Subpart 819.8—Contracting With the Small Business Administration (the 8(a) Program)

819.801 General.

(a) No contract will be entered into with SBA under section 8(a) of the Small Business Act (15 U.S.C. 637(a)) unless a certification is made by the Administrator of that agency, or designee, that SBA is competent to perform the contract.

(b) When it is determined that the requirements of the Veterans Administration are appropriate for inclusion in this program, the contracting officer will make this fact known to the proper officials of the SBA regional office servicing his/her area. If the certification required by paragraph (a) of this section is received, the Veterans Administration contracting officer will secure from SBA the name(s) and location(s) of their subcontractor(s) and the unit price(s) to be paid. Should these prices be within a range acceptable to the Veterans Administration, the contracting officer will notify SBA of acceptance.

(c) The contract will be made between the Veterans Administration and SBA and will be administered by the Veterans Administration.

(d) In addition to meeting the requirements of 801.602-70, contracting officers will secure cost and pricing data prescribed in FAR 15.804-2 when negotiating contracts under the SBA 8(a) program. Contracts with an anticipated value of $500,000 or more shall be processed for audit in accordance with 815.805-5.

819.807-70 Commitments of the Office of Construction's funded projects for the 8(a) program.

Major and minor projects funded by the Office of Construction (including those delegated to the Department of Medicine and Surgery) which have been committed to the 8(a) program will not be withdrawn from that program without the consent of the Office of Small and Disadvantaged Business Utilization (005C). Requests for consent from 005C will normally be in writing and will clearly set forth the circumstances necessitating 8(a) withdrawal. If the contracting officer determines that time does not permit a written request, an oral request will be made. Such an oral request will be confirmed in writing.

819.809-70 Procurement of supplies, services, and research and development.

(a) Contracts for supplies, equipment and services other than construction will be prepared as any other prime contract and in accordance with FAR Subpart 19.8.

(b) The Veterans Administration contracting officer will forward the prime contract to SBA in sufficient numbers to furnish two copies to SBA and one copy to each subcontractor. SBA will return the signed original to the Veterans Administration contracting officer.

819.809-71 Procurement of construction.

Construction projects which have been selected for inclusion in this program will be contracted for as provided in this section and FAR Subpart 19.8.

(a) The contracting officer will submit, for each project so identified, the complete project listing including technical specifications, drawings and wage rates to the proper official of the appropriate SBA regional office. Should SBA select a competent subcontractor capable of performing the work, they will so certify to the Veterans Administration contracting officer. They will furnish him/her the name and complete address of the subcontractor(s), the project involved and the price(s) quoted. If the price quoted is within the range acceptable to the Veterans Administration, the contracting officer will indicate acceptance to SBA.

(b) When the contracting officer receives Standard Form 1442, Solicitation, Offer and Award (Construction, Alteration, or Repair), signed by SBA and the subcontractor, and the performance and payment bonds, the contracting officer will forward a notice to proceed to the subcontractor.

PART 820—LABOR SURPLUS AREA CONCERNS

Subpart 820.1—General

820.104 Specific policies.

Pursuant to FAR Part 20, LSA (labor surplus area) set-aside consideration will only apply to procurements above the small purchase limitation.

(38 U.S.C. 210 and 40 U.S.C. 486(c))

PART 822—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 822.3—Contract Work Hours and Safety Standards Act

Sec.

822.304 Variations, tolerances, and exemptions.

Subpart 822.4—Labor Standards for Contracts Involving Construction

822.471 Procedure for requesting determinations.

822.478 Contract terminations.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 822.3—Contract Work Hours and Safety Standards Act

822.304 Variations, tolerances, and exemptions.

When a contract is entered into for nursing home care, the clause prescribed by FAR 22.305 will be modified to reflect the variation contained in 29 CFR 5.15(d)(3) as set forth in 852.222–70.

Subpart 822.4—Labor Standards for Contracts Involving Construction

822.471 Procedure for requesting determinations.

Requests for project area or individual wage determinations will be submitted by the office or installation that will award the contract. In accordance with Department of Labor instructions, such wage determinations will be returned directly to the requesting office.

822.478 Contract terminations.

(a) Prior to terminating any contract because of violations of the labor standards provisions of the contract, contracting officers, other than those in the Office of Construction will, through the Director, Office of Procurement and Supply, present the facts in detail to the General Counsel for review. The contracting officer will be advised by the Director, Office of Procurement and Supply, as to the recommended action to be taken.

(b) Prior to terminating a contract managed by the Office of Construction for labor standards violation, the contracting officer will, through the Director, Office of Construction, present the facts in detail to the General Counsel for review. The contracting officer will be advised by the Director, Office of Construction as to the recommended action.

(c) If the contract is to be terminated, the Director, Office of Procurement and Supply or the Director, Office of Construction, will submit the reports required by 29 CFR 5.7(d).

PART 823—ENVIRONMENTAL, CONSERVATION AND OCCUPATIONAL SAFETY

Subpart 823.3—Hazardous Material Identification and Material Safety Data

823.300 Hazardous material identification and material safety data.

Contracting officers should be governed by the provisions of FAR Subpart 23.3 and MP–2, Subchapter E, Subpart 108–25.53 (Potentially Hazardous Products) in acquisitions of items that involve hazardous material.

(38 U.S.C. 210 and 40 U.S.C. 486(c))

PART 824—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 824.1—Protection of Individual Privacy

Sec.
824.102 General.

Subpart 824.2—Freedom of Information Act

824.202 Policy.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 824.1—Protection of Individual Privacy

824.102 General.

(a) The pertinent agency rules regarding the implementation of the Privacy Act of 1974 consist of 38 CFR 1.575 through 1.584.

Subpart 824.2—Freedom of Information Act

824.202 Policy.

Agency rules implementing the Freedom of Information Act are contained in 38 CFR 1.550 through 1.559.

PART 825—FOREIGN ACQUISITION

Subpart 825.1—Buy American Act—Supplies

Sec.
825.102 Policy.
825.102–70 Nonavailability in the United States.
825.105 Evaluating offers.
825.106 Excepted articles, materials and supplies.

Subpart 825.2—Buy American Act—Construction Materials

825.202 Policy.
825.202–70 Nonavailability in the United States.
825.203 Evaluating offers.

Subpart 825.3—Balance of Payments Program

825.302 Policy.
825.302–70 Deviations from the Balance of Payments Program.
825.304 Excess and near-excess foreign currencies.
825.304–70 Determination of feasibility to use excess or near-excess foreign currencies.

Subpart 825.6—Customs and Duties

825.603 Procedures.
825.603–70 Technical assistance.

Subpart 825.7—Restrictions on Certain Foreign Purchases

825.701 Policy.
825.703 Exceptions.

Subpart 825.8—International Agreements and Coordination

825.870 Technical assistance.

Subpart 825.9—Omission of the Examination of Records Clause

825.902 Policy.
825.904 Determination and findings.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 825.1—Buy American Act—Supplies

825.102 Policy.

825.102.70 Nonavailability in the United States.

(a) If articles, materials, and supplies required for a particular procurement are not excepted in FAR 25.108, or when only foreign bids or offers are received, the determination concerning nonavailability required by FAR 25.108(b) will be prepared by the contracting officer for foreign construction materials costing less than $1 million. Each determination will be factually supported in writing and included in the contract file.

(b) Nonavailability determinations for foreign construction materials costing over $1 million must be requested by field station contracting officers from the Director, Office of Procurement and Supply (93). Each request for a determination must be fully justified with all pertinent facts.

(c) A copy of all determinations made in accordance with paragraph (a) of this section shall be forwarded to the Director, Office of Procurement and Supply (93) concurrently with the submissions required by FAR 25.108 (b) and (c).

825.105 Evaluating offers.

When a determination is required under FAR 25.105, the contracting officer will submit the proposed award to the Director, Office of Procurement and Supply (93) for approval by the Administrator. The submission will contain all the facts, including a comparison of all the bids or offers received, and any other pertinent information upon which a determination may be made. If approved, a report of

the transaction will be prepared and submitted by the Director, Office of Procurement and Supply, in accordance with Executive Order 10582, dated December 17, 1954, as amended.

825.108 Excepted articles, materials and supplies.

The following items are added to the list of exceptions contained in FAR 25.108(d):

Lead Glass
Wire Glass

Subpart 825.2—Buy American Act—Construction Materials

825.202 Policy.

825.202-70 Nonavailability in the United States.

(a) If articles, materials, and supplies required for a particular procurement are not excepted in FAR 25.108, or when only foreign bids or offers are received, the determination concerning nonavailability required by FAR 25.202(a)(3) will be made by the contracting officer for foreign construction material costing $100,000 or less. Each determination will be factually supported in writing and included in the contract file.

(b) Field station contracting officers must request approval of nonavailability determinations from the Director, Office of Procurement and Supply (93).

(c) A copy of all determinations made in accordance with paragraph (a) above shall be forwarded to the Director, Office of Construction (08), through the Director, Office of Procurement and Supply (93).

825.203 Evaluating offers.

When a contracting officer believes that the requirement of the "Buy American Act" is impracticable as provided in FAR 25.202(a)(2), or that it would be advantageous to the VA to deviate from the provisions of the Act as authorized by FAR 25.203, authority to consummate the contract will be requested. The request containing all the facts, including a comparison of all the bids or offers received and any other pertinent information upon which a determination may be made, will be submitted through the Director, Office of Procurement and Supply (93), for approval by the Administrator. If approved, a report of the transaction will be prepared and transmitted by the Director, Office of Construction in accordance with Executive Order 10582, dated December 17, 1954, as amended.

Subpart 825.3—Balance of Payments Program

825.302 Policy.

825.302-70 Deviations from the Balance of Payments Program.

When a contracting officer believes that the requirement of the "Balance of Payments Program" is not practicable as set forth in FAR 25.302 (b)(2) or (b)(3), he/she will request authority to consummate the contract through the Director, Office of Procurement and Supply (93) for approval. Each request must be fully justified, containing all pertinent facts.

825.304 Excess and near-excess foreign currencies.

825.304-70 Determination of feasibility to use excess or near-excess foreign currency.

In accordance with FAR 25.304(c), contracting officers will submit requests for determination to utilize excess or near-excess foreign currencies to the Director, Office of Procurement and Supply (93).

Subpart 825.6—Customs and Duties

825.603 Procedures.

825.603-70 Technical assistance.

Should the regulations contained in FAR 25.6 be inadequate to meet particular needs of a contracting officer in clearing items through customs and/or obtaining Duty Free Entry of goods, the nearest Regional Office of the United States Customs Service should be contacted for technical assistance. These offices are located as follows:

Regional Commissioner, U.S. Customs Service, 100 Summer St., Boston, Massachusetts 02110
Regional Commissioner, U.S. Customs Service, 99 S.E. 5th St., Miami, Florida 33131
Regional Commissioner, U.S. Customs Service, 585 Felipe St., Houston, Texas 77057
Regional Commissioner, U.S. Customs Service, 6 World Trade Center, New York, New York 10048
Regional Commissioner, U.S. Customs Service, 423 Canal St., New Orleans, Louisiana 70130
Regional Commissioner, U.S. Customs Service, 300 N. Los Angeles St., Los Angeles, California 90053
Regional Commissioner, U.S. Customs Service, 55 E. Monroe St., Chicago, Illinois 60603

Subpart 825.7—Restrictions on Certain Foreign Purchases

825.701 Policy.

825.703 Exceptions.

When felt to be in the best interest of the Government, the contracting officer may request exceptions to the requirements of FAR 25.7 for purchases in excess of $10,000 from the Administrator through the Director, Office of Procurement and Supply (93). Each such request must be fully justified, containing all pertinent facts.

Subpart 825.8—International Agreements and Coordination

825.870 Technical assistance

Contracting officers may obtain technical information or guidance on international agreements and treaties for procurements outside the United States by contacting the Director, VA Marketing Center.

Subpart 825.9—Omission of the Examination of Records Clause

825.902 Policy.

If the contracting officer determines that the "Examination of Records Clause" should be omitted after all reasonable efforts to include the clause have failed, and providing that omission of the clause is authorized in the instances cited in FAR 25.903, he/she may request, with appropriate documentation, a determination from the Administrator, through the Director, Office of Procurement and Supply (93). The Administrator, should he/she concur in the contracting officer's determination that the clause should be omitted, will then forward an agency request for omission of the clause to the Comptroller general for a final determination as required by FAR 25-903(a)(1), or submit the report required by FAR 25.903(b).

825.904 Determination and findings.

All determinations to omit the "Examination of Records Clause" will be supported by a determination and findings prepared by the contracting officer containing the information set forth in FAR 25.904. The completed determinations and findings will be made a part of the contract file. One copy of the determinations and findings will be forwarded to the Director, Office of Procurement and Supply (93).

PART 828—BONDS AND INSURANCE

Subpart 828.1—Bonds

Sec.
828.101 Bid guarantees.

828.101–3 Contract clause.
828.101–70 Safekeeping and return of bid guarantee.

Subpart 828.2—Sureties

828.203 Options in lieu of sureties.
828.203–1 United States bonds or notes.
828.203–2 Certified or cashier's checks, bank drafts, money orders, or currency.

Subpart 828.3—Insurance

828.306 Insurance under fixed-price contracts.

Subpart 828.70—Performance and Payment Bonds

828.7000 Bond premium adjustment.

Subpart 828.71—Indemnification of Contractors, Medical Research or Development Contracts

828.7100 Scope of subpart.
828.7101 General.
828.7102 Extent of indemnification.
828.7103 Financial protection.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 828.1—Bonds

828.101 Bid guarantees.

828.101–3 Contract clause.

Where a bid bond is required for supplies or services, the phrase "any cost of acquiring the work" in paragraph (e) of the BID GUARANTEE clause in FAR 52.228–1 may be modified to refer to the cost of "supplies," "services," etc.

828.101–70 Safekeeping and return of bid guarantee.

(a) Certified checks or other negotiable security furnished as bid security with the three lowest acceptable bids will be retained in a safe. These will be returned by certified mail or in person upon presentation of proper receipt after contract and bonds have been signed and approved.

(b) Certified checks or other negotiable security furnished in support of other than the three lowest acceptable bids should be returned promptly to the respective bidders by certified mail, or in person upon presentation of proper receipt.

(c) Commercial bid bonds are not returned unless specifically requested by the bidders, and, even if requested by any of the three low bidders, are not returned until contract and bonds have been executed by the successful bidder, or all bids have been rejected.

Subpart 828.2—Sureties

828.203 Options in lieu of sureties.

828.203–1 United States bonds or notes.

Contracting officers, with the exception of those located in the District of Columbia, receiving United States bonds or notes in lieu of corporate or individual sureties will forward such bonds and notes to the agent cashier for safekeeping. Contracting officers in the District of Columbia will deposit such bonds and notes with the Treasurer of the United States.

828.203–2 Certified or cashier's checks, bank drafts, money orders, or currency.

Contracting officers receiving a certified or cashier's check, bank draft, post office money order or currency in lieu of corporate or individual sureties will deposit them with the agent cashier.

Subpart 828.3—Insurance

828.306 Insurance under fixed-price contracts.

(a) Term contracts, or contracts of a continuing nature, for ambulance, automobile and aircraft service, will contain the provision in 852.237–71.

(b) *Exceptions.* The provisions of this 828.306 do not apply to emergency or sporadic ambulance service authorized by VA Manual MP–1, part II, chapter 3; or other emergency or sporadic vehicle or aircraft services. *Provided,* That such service is not used solely for the purpose of avoiding entering into a continuing contract. *Provided further,* That such services will be obtained from firms known to carry insurance coverage in accordance with State or local requirements.

Subpart 828.70—Performance and Payment Bonds

828.7000 Bond premium adjustment.

When performance and payment bonds are required, the contract will contain the clause prescribed in 852.228–70.

Subpart 828.71—Indemnification of Contractors, Medical Research or Development Contracts

828.7100 Scope of subpart.

(a) This subpart sets forth the policies and procedures concerning indemnification of contractors performing contracts which involve a risk of an unusually hazardous nature, covering medical research or development as authorized by 38 U.S.C. 4101.

(b) The authority to indemnify the contractor under this subpart does not create any rights to third parties which would not otherwise exist by law.

(c) As used in this subpart the term "contractor" includes subcontractors of any tier under a contract containing an indemnification provision pursuant to 38 U.S.C. 4101(c)(3)(A).

828.7101 General.

(a) The approval for the indemnification of contractors will be made by the Administrator of Veterans Affairs.

(b) Contracting Officers shall submit requests for approval, together with all available information, to the Director, Office of Procurement and Supply (93) for transmittal to the Administrator.

828.7102 Extent of indemnification.

(a) Any contract for medical research or development authorized by 38 U.S.C. 4101, the performance of which involves a risk of an unusually hazardous nature, may provide that the Government will indemnify the contractor against either or both of the following, but only to the extent that they arise out of the direct performance of the contract and to the extent not covered by the financial protection required under 828.7103.

(1) Liability (including reasonable expenses of litigation or settlement) to third persons, except liability under State or Federal Workmen's Compensation Acts to employees of the contractor employed at the site of and in connection with the contract for which indemnification is granted, for death, bodily injury, or loss of or damage to property, from a risk that the contract defines as unusually hazardous.

(2) Loss of or damage to property of the contractor from a risk that the contract defines as unusually hazardous.

(b) A contract that provides for indemnification in accordance with this subpart will also provide for:

(1) Notice to the contracting officer of any claim or suit against the contractor for death, bodily injury, or loss of or damage to property; and

(2) Control of or assistance in the defense by the Government, at its election, of such suit or claim for which indemnification is provided in the contract.

828.7103 Financial protection.

(a) The financial protection to cover liability to third persons and loss of or damage to the contractor's property which the contractor is required to have and maintain shall be the maximum amount of insurance available from private sources; however, the Administrator may establish a lesser amount after taking into consideration the cost and terms of private insurance.

(b) The financial protection may include private insurance, private contractual indemnities, self-insurance, other proof of financial responsibility, or a combination of such forms to provide the maximum amount required. When the contractor elects to utilize self

insurance, proof of such financial responsibility up to the maximum amount required will be furnished the contracting officer prior to award.

PART 829—TAXES

Sec.
829.000 Scope of part.

Subpart 829.1—General

829.101 Resolving tax problems.

Subpart 829.2—Federal Excise Taxes

829.202 General exemptions.
829.202–70 Tax exemptions for alcohol products.
829.270 Tax exempt tobacco products for State institutions.
829.270–1 Institution responsibilities and procedures.
829.270–2 Processing of order by Veterans Administration.

Subpart 829.3—State and Local Taxes

829.302 Application of State and local taxes to the Government.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

829.000 Scope of part.

This part prescribes policies and procedures for exemptions from Federal excise taxes imposed on tobacco and alcohol products for such items purchased for use in the Veterans Administration medical care program and specifies refund procedures for State and local taxes.

Subpart 829.1—General

829.101 Resolving tax problems.

Contracting officers will submit requests for legal advice through channels to the General Counsel.

Subpart 829.2—Federal Excise Taxes

829.202 General exemptions.

829.202–70 Tax exemptions for alcohol products.

(a) General.

(1) The procurement of spirits free of tax for nonbeverage purposes is permitted to Government agencies by regulations of the Bureau of Alcohol, Tobacco, and Firearms (ATF) (see 27 CFR 211.231–237, 213.141–146 and 240.720–722). The use of tax-free alcohol, whiskey, beer, wine and denatured spirits for nonbeverage purposes shall include but not be limited to medicinal and scientific purposes and in the treatment of patients.

(2) Authority is hereby delegated to the Chief, Marketing Center, Hines, Illinois, and to the Chief, Supply Service, Veterans Administration medical facilities to sign application permits on Bureau of Alcohol, Tobacco, and Firearms (ATF) prescribed forms. This authority is not to be redelegated.

(b) Whiskey, alcohol, and denatured alcohol.

(1) Application forms for tax-free purchases are to be obtained from and submitted to the Director, Bureau of Alcohol, Tobacco, and Firearms, Washington, D.C. 20226.

(2) ATF Form 1486, Specially Denatured Spirits for Use of United States, is the application/permit required for denatured spirits, and ATF Form 1444, Tax-Free Spirits for Use of United States, is required for distilled spirits (whiskey and alcohol). These are continuing permits to procure items tax free. Copies must be made available to the supplier in support of each procurement.

(3) Purchases for excise tax-free whiskey and alcohol, not available through the depot can only be made from a distillery or a bonded premises. In accordance with 27 CFR 213.144, the vendor will also support each shipment with ATF 1473, Shipment and Receipt Specifically Denatured Tax-Free, or Recovered Spirits. The ATF 1473 will be completed by the accountable officer and the original copy will be forwarded to the Regional Regulatory Administrator whose address is shown in item 12 of the form. A copy of ATF 1473 will be retained in the purchase order file.

(c) *Wine.* No tax exemption form or ATF permit is required for the tax-free procurement of wine. An extra copy of a properly executed purchase order or requisition document may be furnished to the supplier (retailer, wholesaler or winery) to facilitate record keeping.

(d) *Beer.* Tax-free beer may be procured only from licensed breweries and only when such product is prescribed for therapeutic use of patients. The application for an ATF permit is to be submitted in letter form to the Director, Bureau of Alcohol, Tobacco, and Firearms, Washington, D.C. 20226. The following information is required.

(1) Name and address of facility;

(2) Specific purpose for which beer will be used;

(3) Quantity proposed to buy each month, year, etc.;

(4) Name and address of brewery; and

(5) Copy of document authorizing contracting officer to sign request.

A new permit is needed only when beer is to be purchased from a different brewery than the one for which the original permit was requested.

829.270 Tax exempt tobacco products for State institutions.

(a) Bureau of Alcohol, Tobacco, and Firearms regulations permit the withdrawal of tax-free tobacco products by facilities and institutions owned or controlled by State Governments, territories, and the District of Columbia for gratuitous distribution to present and former members of the Armed Forces of the United States who are patients in such institutions (27 CFR 295.31–37). These arrangements will be effective only with institutions where the official-in-charge abides by the procedures and controls prescribed by the Veterans Administration. The unauthorized or illegal use of these products may result in the withdrawal of this privilege by the Veterans Administration.

(b) No tax exemption form or certificate is required for the tax-free purchase of tobacco products. An extra copy of the purchase order will be provided the manufacturer to facilitate record keeping required by the Bureau of Alcohol, Tobacco, and Firearms.

829.270–1 Institution responsibilities and procedures.

(a) The official-in-charge of the institution will act as a representative of the Veterans Administration in the purchase, storage, and distribution of these products and in ensuring the product is distributed on a gratuitous and equitable basis to all eligible recipients. Under no circumstances will these items be offered for sale.

(b) The Veterans Administration will neither accept nor handle donations or funds for institutions.

(c) Payment or nonpayment of State taxes on tobacco products is a matter between the concerned State and the ordering institution.

(d) Orders will be on the institution's regular order form made out to the manufacturer of the desired product. The original and two copies of the order, each signed, will be forwarded to the nearest Veterans Administration medical center. Orders shall also be issued to cover receipt of unsolicited shipments of these products intended for use of veteran-patients. All copies of these orders will be marked CONFIRMATION—DO NOT RESHIP. All orders shall bear a certificate as follows:

> Tobacco products for free distribution to present and former members of the Armed Forces of the United States who are hospitalized or domiciled in this institution.

(e) Copies of all orders and other pertinent documents will be retained and be available to the Veterans Administration and the Bureau of

Alcohol, Tobacco, and Firearms for inspection purposes.

829.270–2 Processing of order by Veterans Administration.

(a) Full cooperation will be given institution representatives in implementing these procedures.

(b) The station head or designee will approve the institution order by signing the original and one copy in ink over his/her printed name and title. The approved orginal and copy shall be forwarded to the vendor as noted in 829.270. The additional copy shall be retained in the medical center's files.

Subpart 829.3—State and Local Taxes

829.302 Application of State and local taxes to the Government.

(a) Standard Form 1094, U.S. Tax Exemption Certificate, will be used as a basis for billing taxing authorities for a refund of taxes paid, if a vendor refuses to sell at a price exclusive of the State and local tax.

(b) SF 1094 will not be furnished to a vendor or used to claim reimbursement from the taxing authority, where the total amount of State and local tax on any one purchase is $10 or less.

PART 831—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 831.70—Contract Cost Principles and Procedures

Sec.

831.7000 Scope of subpart.
831.7001 Allowable costs under cost reimbursement vocational rehabilitation and education contracts or agreements.
831.7001–1 Tuition.
831.7001–2 Special services or courses.
831.7001–3 Books, supplies and equipment required to be personally owned.
831.7001–4 Medical services and hospital care.
831.7001–5 Administrator's Decision No. 557.
831.7001–6 Consumable instructional supplies.
831.7001–7 Reimbursement for other supplies and services.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 831.70—Contract Cost Principles and Procedures

831.7000 Scope of subpart.

This subpart contains general cost principles and procedures for the determination and allowance of costs in connection with the negotiation and administration of cost reimbursement type contracts pertaining to the furnishing of vocational rehabilitation, education, and training to eligible veterans under chapter 31 of Title 38, United States Code.

831.7001 Allowable costs under cost reimbursement vocational rehabilitation and education contracts or agreements.

831.7001–1 Tuition.

(a) Except as provided in this section, when the contractor has a customary cost of tuition the charge to the Veterans Administration may not exceed that charged to similarly circumstanced nonveteran students; provided that where the contractor has more than one standard charge for the same service, the charge to the Veterans Administration will be the lowest price for the entire course, semester, quarter, or term which is offered or published.

(b) The VA will not normally pay tuition or incidental fees to institutions or establishments furnishing apprentice or other training on-the-job. The VA may pay:

(1) For such charges customarily made by nonprofit workshop or similar establishment for providing work adjustment training to similarly circumstanced nonveterans even though an incentive wage is paid the trainee as part of the training; or

(2) For certain training expenses incurred by an employer providing on-the-job training following rehabilitation to the point of employability when such additional training is determined to be necessary by the VA.

(c) When the total cost of instruction is paid from Federal funds or a portion of the cost is covered by grants from the Federal Government, i.e., Smith-Hughes or other laws, excluding Federal Land Grant Funds, such subsidy will be taken into consideration in determining the charge to the Veterans Administration. The term, Federal Land Grant Funds, refers to those received under the Morrill-Nelson Act (Morrill Acts of 1862 and 1890 and the Nelson amendment of 1907) and section 22 of the Bankhead-Jones Act of 1935.

(d) Payments on behalf of a veteran who receives a fellowship, scholarship, grant-in-aid, assistantship, or similar award in complete or partial payment of tuition or fees or both will be made in accordance with the following:

(1) The award will reduce, to the extent of the award, the amount of tuition or fee or both that is payable by the Veterans Administation.

(2) Awards which are not paid in cash, except those which are made specifically for the purpose of defraying the cost of room and board in dormitories which will be disregarded, will reduce to the extent of the award the charges for which the Veterans Administration is responsible.

(3) Cash awards may be retained by the veterans and will not be deducted from charges ordinarily paid by the Veterans Administration.

(4) Waivers of tuition and fees provided under law by States or other Government authority will be utilized to reduce the charges payable by Veterans Administration in accordance with such waivers.

(e) Enrollment fees in an amount sufficient to cover the cost of registration may be paid, provided the institution or training establishment usually makes such a charge, and it does not exceed that charge made to other students or trainees.

831.7001–2 Special services or courses.

Special services or courses are those services requested by the Veterans Administration which are over and above those customarily required by the institution for similarly circumstanced nonveterans and are considered by the contracting officer to be necessary for the rehabilitation of the trainee. The costs of such special services or courses will be negotiated prior to being requested by the Veterans Administration.

831.7001–3 Books, supplies and equipment required to be personally owned.

(a) Reimbursement for books, supplies, or equipment and referred to as supplies, will be made as provided in this section.

(1) Reimbursement will be made for those supplies customarily required to be owned personally by all students taking the same course or courses except that reimbursement may be made for items which are not specifically required by the school for pursuit of the course, but are determined to be needed by the VA because of the demands of the course, general possession by other students, and the disadvantage imposed on the veterans by not having the item. In no instance will the supplies be in a greater variety, quality, or amount than required of nonveteran students. In this instance required is in contradistinction to requested or desirable to have or necessary for a future profession or job but not required by the institution of all students in the course.

(2) When supplies are available in several prices, grades, or qualities, reimbursement may be made only for such quality or grade that will meet the requirements.

(3) Partial payment agreements in which the Veterans Administration shares payment with the veterans is not allowable.

(4) The costs incurred by the institution in connection with the

veteran's thesis such as typing, printing, microfilming, or otherwise reproducing the required number of copies; research expenses when certified by the veterans committee chairman, major professor, department head, or appropriate dean that such expenses are required in order to complete the course requiring the preparation of a thesis are considered as supplies and are authorized for reimbursement.

(5) When the institution operates a bookstore or supply store for all students the reimbursement for supplies issued to trainees will be no greater than charges made to nonveteran students.

(6) Where the institution, training establishment, or employer arranges for issuance of supplies to all students by stores or establishments not institutionally owned and to pay such store or establishment for supplies issued to trainees, reimbursement is allowable provided the charges are no greater than those paid by nonveterans or to the institutions whichever is the lesser.

(7) Supplies purchased by the institution specifically for trainees will be reimbursed at the net cost to the institution.

(8) Where the institution does not provide or arrange for issuance of generally required books, tools and supplies for students attending the facility, the institution, in cooperation with the VA, may designate certain stores and establishments to provide generally required books, tools and supplies for veterans pursuing a vocational rehabilitation program. The vendor will be reimbursed in the same manner as for supplies provided or arranged for by the institutions.

(9) Where it is customary in a survey subject to permit each student to obtain the aggregate of books for the subject on a rental basis (commonly referred to as a rental set) and the ownership or permanent possession by the student is not required, reimbursement is authorized for the rental charge provided it does not exceed the charge made to nonveteran students.

(10) Educational and training institutions furnishing supplies to trainees which are required to be owned personally or on a rental basis by all students pursuing the same or similar course may be compensated for such services in an amount not exceeding 10 percent of the allowable charge for the supplies furnished or rented except:

(i) Where the tuition covers the charges for supplies or rentals or a stipulated fee is assessed all students, handling charges are not allowable.

(ii) The handling charge is not allowable for Government-owned books procured by the institution from the Library of Congress.

(iii) In cases where an item of equipment will exceed $50 in cost, effort will be made to secure a lower handling charge than for those costing a lesser amount. The agreed percent for such handling charges will be included in the contract or added as an addendum.

§31.7001-4 Medical services and hospital care.

(a) The VA may pay the customary student health fee when payment of the fee is required for similarly circumstanced nonveterans. If payment of the fee is not required for similarly circumstanced nonveterans payment, payment may be made if it is determined by the Department of Medicine and Surgery that such payment is in the best interest of the veteran and the government.

(b) Where medical services or hospital care not covered by the customary students health fee are available in the school operated facilities or arrangements have been made by the institution with doctors and hospitals in the immediate area, reimbursement by the Department of Veterans Benefits for such services may be made in a contract for such services provided that the Director, VA Medical Center, determines:

(1) That such arrangements are necessary to provide timely medical care for veterans attending the facility under provisions of chapter 31; and

(2) The general rates established for such services do not exceed the rates established by the Chief Medical Director.

(c) The VA may reimburse a rehabilitation facility for incidental medical services provided during a veteran's program at the facility.

§31.7001-5 Administrator's Decision No. 557.

(a) Fees and expenses authorized under Administrator's Decision No. 557 may be authorized for payment when the educational institution or training establishment makes such payments on behalf of the veteran.

(b) Payment for fees and expenses not made by the educational institution or training establishment will be made in accordance with Part 813 of this chapter or FAR 15-210(a)(1).

§31.7001-6 Consumable instructional supplies.

(a) Reimbursement for consumable instructional supplies which institutions require for the instruction of all students, veteran or nonveteran pursuing the same or comparable course or courses will be made when:

(1) The supplies are entirely consumed in the fabrication of a required project.

(2) The supplies are not consumed but are of such a nature that they cannot be salvaged from the end product for reuse for further instructions by disassembling or dismantling the end product.

(b) Reimbursement for consumable instructional supplies is not allowable when:

(1) The supplies can be salvaged for reuse.

(2) The supplies used in a project which has been elected by the student as an alternate class project in order to produce an end product of greater value than that which is normally required to learn the skills of the occupation and which will become his property upon completion.

(3) The supplies used in a project which has been selected by the institution to provide the student with a more elaborate end product than is required to provide adequate instruction as an inducement to the veteran to elect a particular course of study.

(4) The salable value of the end product is equal to or greater than the cost of the supplies used in its fabrication or assembly and a reasonable use has not been made of such supplies so that they are not readily salvaged from the end product to be reused for instructional purposes.

(5) The end product is of premanent value and retained by the institution.

(6) A third party provides the articles or equipment for repair or improvement and for which he or she would otherwise pay a commercial price.

(7) The number of projects resulting in end products in excess of the numbers normally required to teach the recognized job operations and processes of the occupation stipulated in the approved course of study.

(8) The cost of supplies are included in the charge for tuition or as a fee designated for such purpose.

§31.7001-7 Reimbursement for other supplies and services.

Reimbursement shall be made for other services and assistance which may be authorized under provisions of applicable chapter 31 regulations including but not limited to employment and self-employment, initial and extended evaluation, and independent living services.

PART 832—CONTRACT FINANCING

Subpart 832.4—Advance Payments

Sec.

832.402 General.
832.404 Exclusions.

Subpart 832.5—Progress Payments Based on Costs

832.502 Preaward matters.
832.502–2 Contract finance office clearance.

Subpart 832.8—Assignment of Claims

832.805 Procedure.
832.805–70 Distribution/notification of assignment of claims.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 832.4—Advance Payments

832.402 General.

The determination required by FAR 32.402(c)(1)(iii) will be made by the Director, Office of Procurement and Supply. Prior to award, contracting officers will submit, through channels, the information required by FAR 32.409–1 for such determinations.

832.404 Exclusions.

(a) Under the provisions of 31 U.S.C. 3324(d)(2), as amended, advance payment is authorized for subscriptions or other charges for newspapers, magazines, periodicals and other publications for official use of any office under the Government from appropriations available therefore, notwithstanding the provisions of 31 U.S.C. 3324(a). The term "other publications" includes any publication printed, microfilmed, photocopied or magnetically or otherwise recorded for auditory or visual usage.

(b) Under the provisions of 31 U.S.C. 1535, advance payment may be made for services and supplies obtained from another Government agency. This includes items such as coupons from the Government Printing Office and Operator Permits, Civilian Defense Radio System, and from the Federal Communications Commission.

(c) Under the provisions of 5 U.S.C. 4109, advance payment may be made for all or any part of the necessary expenses for training Government employees in Government or non-Government facilities. This includes the purchase or rental of books, materials and supplies or services directly related to the training of a Government employee.

Subpart 832.5—Progress Payments Based on Costs

832.502 Preaward matters.

832.502–2 Contract finance office clearance.

Prior approval of actions listed in FAR 32.502–2 will be obtained from the Director, Office of Procurement and Supply (93). Requests for approval shall be accompanied by full justification together with the recommendations of the contracting officer.

Subpart 832.8—Assignment of Claims

832.805 Procedure.

832.805–70 Distribution/notification of assignment of claims.

(a) The Contracting officer will file the retained copy of the notice of assignment and the certified copy of the original instrument of assignment with the General Accounting Office copy of the contract.

(b) Contracting officers will notify field stations of any recognized assignment of payments under contracts executed in Central Office or by the Marketing Divisions in all cases where payment for articles and services under such contracts are certified and approved for payment in the field.

PART 833—DISPUTES AND APPEALS

Sec.
833.009 Suspected fraudulent claims.
833.011 Contracting officer's decision.
833.012 Contracting officer's duties upon appeal.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

833.009 Suspected fraudulent claims.

Matters relating to suspected fraudulent claims will be referred to the Assistant Inspector General, Office of Investigations (51) for investigation and referral to the Department of Justice. No collection, recovery or other settlement action will be initiated while the matter is in the hands of the Department of Justice without first obtaining the concurrence of the U.S. Attorney concerned, through the Inspector General.

833.011 Contracting officer's decision.

(a) When a dispute cannot be settled by agreement and a final decision under the Disputes clause of the contract is necessary, the contracting officer shall furnish the contractor his/her final decision in the matter.

(b) The decision must be identified as a final decision, be in writing, and include a statement of facts in sufficient detail to enable the contractor to fully understand the decision and the basis on which it was made. It will normally be in the form of a statement of the claim or other description of the dispute with necessary references to the pertinent contract provisions. It will set forth those facts relevant to the dispute, with which the contractor and the contracting officer are in agreement, and as clearly as possible, the area of disagreement.

(c) Except as provided in paragraph (d), the decision shall, in addition to the material required by FAR 33.011(a)(4), contain the following:

The Veterans Administration Board of Contract Appeals (VABCA) is the authorized representative of the Administrator for hearing and determining such disputes. The rules of the VABCA are published in § 1.783, of Title 38, Code of Federal Regulations.

(d) If the decision involves a contract entered into prior to the effective date of the Contracts Disputes Act of 1978, i.e. March 1, 1979, and the decision is on a claim which was pending before the contracting officer, or initiated thereafter, the decision shall contain the following:

The Veterans Administration Contract Appeals Board (VACAB) is the authorized representative for hearing such disputes. The rules of the VACAB are published in § 1.774, of Title 38, Code of Federal Regulations.

The appeal must be filed within 30 days of receipt of the final decision. Any request for an extension of the 30-day appeal period will be denied by the contracting officer. In the alternative, the contractor may elect to proceed under the Contract Disputes Act of 1978, 41 U.S.C. 601–613, in which case, you must within 90 days from the date you receive this decision, mail or otherwise furnish written notice to the Board of Contract Appeals and provide a copy to the contracting officer from whose decision the appeal is taken. The notice shall indicate that an appeal is intended, reference this decision, and identify the contract by number. Instead of appealing to the Board of Contract Appeals, you may bring an action directly in the U.S. Claims Court (except as provided in the Contract Disputes Act of 1978, 41 U.S.C. 603, regarding Maritime Contracts) within 12 months of the date you receive this decision. If you appeal to the Board of Contract Appeals, you may, solely at your election, proceed under the Board's small claims procedure for claims of $10,000 or less or its accelerated procedure for claims of $50,000 or less.

(e) The contracting officer's final decision will be forwarded to the contractor by certified mail, return receipt requested.

833.012 Contracting officer's duties upon appeal.

(a) When a notice of appeal in any form has been received by the contracting officer, that officer will endorse thereon the date of mailing (or date of receipt, if otherwise conveyed) and within 10 days, will forward said original notice of appeal and a copy of the contracting officer's final decision letter to the Veterans Administration Board of Contract Appeals (VABCA). Copies of the notice of appeal and the final decision letter will be transmitted

concurrently to the Director, Office of Procurement and Supply (93) and the Assistant General Counsel (025). (In cases of construction contracts administered by the Office of Construction, copies of appeal and final decision letter need not be transmitted to the Director, Office of Procurement and Supply (93).)

(b) Within 20 days of receipt of an appeal, or advice that an appeal has been filed, the contracting officer will assemble and transmit to the VABCA, through the Office of General Counsel (025), an appeal file consisting of all documents pertinent to the appeal, including:

(1) The decision and findings of fact from which the appeal is taken;

(2) The contract, including specifications and pertinent amendments, plans and drawings;

(3) All correspondence between the parties pertinent to the appeal, including the letter or letters of claim in response to which the decision was issued;

(4) Transcripts of any testimony taken during the course of proceedings and affidavits or statements of any witnesses on the matter in dispute made prior to the filing of the notice of appeal with the VABCA; and

(5) Any additional information considered pertinent.

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

PART 834—MAJOR SYSTEMS ACQUISITION

834.002 Policy.

VA policy regarding major system acquisition is contained in Central Office Operating Instructions OI–1, Part VI, Chapter 11, "Major System Acquisitions." Normally, VA major system acquisitions involve a minimum of $50 million one time costs or $150 million life cycle costs. Persons wishing to review these procedures may obtain copies by writing the Associate Deputy Administrator for Information Resources Management (004), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

(38 U.S.C. 210 and 40 U.S.C. 486(c))

PART 836—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 836.2—Special Aspects of Contracting for Construction

Sec.
836.202 Specifications.
836.206 Liquidated damages.
836.208 Concurrent performance of firm fixed-price and other types of construction contracts.
836.209 Construction contracts with architect-engineer firms.
836.211 Distribution of advance notices and solicitations.

Subpart 836.3—Special Aspects of Formal Advertising in Construction Contracting

836.302 Presolicitation notices.
836.371 Notice to proceed.

Subpart 836.6—Architect-Engineer Services

836.601 Policy.
836.602 Selection of firms for achitect-engineer contracts.
836.602–1 Selection criteria.
836.602–2 Evaluation boards.
836.602–3 Evaluation board functions.
836.602–4 Selection authority.
836.602–5 Procedure for procurements estimated not to exceed $10,000.
836.606–70 General.
836.606–71 Architect-engineer's proposal.
836.606–72 Contract price.
836.606–73 Application of 6-percent architect-engineer fee limitation.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 836.2—Special Aspects of Contracting for Construction

836.202 Specifications [Reserved].

836.206 Liquidated damages.

Liquidated damage provisions may be included in construction contracts when the criteria of 812.202 is met. If partial performance may be accepted and utilized to the advantage of the Government, the clause substantially as set forth in 852.212–70 will be included in addition to the clause set forth in FAR 52.212–5.

836.208 Concurrent performance of firm fixed-price and other types of construction contracts.

When concurrent contracts of the type specified in FAR 36.208 are considered necessary or advantageous, prior approval will be requested of the Chief Medical Director for contracts involving M&R (Maintenance and Repair) funds or of the Director, Office of Construction for contracts involving construction (major and minor) funds. Complete justification will be furnished in the request.

836.209 Construction contracts with architect-engineer firms.

When it is considered necessary or advantageous to award a contract for construction of a project to a firm or person that designed the project, prior approval will be requested of the Chief Medical Director for contracts involving M&R funds or of the Director, Office of Construction for contracts involving construction funds. Complete justification will be furnished in the request.

836.211 Distribution of advance notices and solicitations.

(a) On the issue date shown on SF 1442, Solicitation, Offer and Award, specifications, drawings, and all other material necessary to prepare a bid will be issued to each eligible prospective bidder and other agencies who request them in writing and who meet the qualifications stated in the solicitation.

(b) On the issue date, two copies of the drawings and specifications for station level projects funded from construction appropriations will be furnished to the Director, Office of Construction.

(c) Distribution of specifications and drawings on Central Office projects will be in accordance with that established by the Project Director.

(d) Advance (presolicitation) notices should also be sent to Chambers of Commerce, Builders Exchanges, various trade journals, and other organizations which make a practice of publishing such information for the benefit of the construction industry. Drawings and specifications should be sent to Chambers of Commerce and Builders Exchanges when requested. These organizations frequently make drawings and specifications available for review and inspection to suppliers and subcontractors who cannot receive drawings and specifications from the Government.

Subpart 836.3—Special Aspects of Formal Advertising in Construction Contracting

836.302 Pre-solicitation notices.

An SF 1417, Pre-Solicitation Notice (Construction Contract), shall be used as a pre-solicitation notice on proposed contracts expected to equal or exceed $100,000. When so used, it will be submitted to prospective bidders at least 15 days prior to the date on which the drawings and specifications will be issued. When pre-solicitation notices are not used, see 836.211.

836.371 Notice of proceed.

(a) Construction contractors will be given a written "Notice to Proceed" with the work. SF 1442 serves that purpose of contracts not in excess of $25,000 when completed by the contracting officer and returned to the contractor. For contracts exceeding $25,000, a letter will be used. A letter notice to proceed will normally be sent only after performance and payment bonds and the completed contract forms, where applicable, have been returned by the contractor and are accepted by the contracting officer. If the urgency of the work or other proper

reason requires the contractor to begin work immediately, the award letter may include the "Notice to Proceed" with the reservation that payments are contingent upon receipt and approval of the required bonds.

(b) If the contract provides for liquidated damages, the notice to proceed will be sent by certified mail, return receipt requested. It will advise the contractor that the work will be completed within —— (insert contract time for completion) calendar days from the date of receipt shown on the certified mail receipt card returned by the post office.

(c) If the contract does not provide for liquidated damages, certified mail is not required. Notices to proceed for these contracts will establish a date for completion taking into consideration the time required for the notice to arrive by regular mail.

(d) At the time the notice to proceed is sent to the contractor, a copy will be furnished to the resident engineer or the Chief, Engineering Service. A copy of the notice to proceed will be filed with copy A of the contract. When certified mail is used, the certified mail receipt card returned by the post office will be attached to the copy of the notice to proceed. Copies of the notice to proceed will be filed with copies C and D of the contract after the date of receipt has been established and indicated thereon.

Subpart 836.6—Architect-Engineer Services

836.601 Policy.

The provisions of this subpart pertain to the general policies and procedures for the procurement of professional architect-engineer services as set forth in FAR subpart 36.6 and are not applicable to contracts entered into pursuant to the authority of 38 U.S.C. 1820. The provisions of the Small Business Act are applicable to the procurement of architect-engineering services. Consequently, consideration of procurement set-asides for small business concerns will be made in accordance with FAR subpart 19.5.

836.602 Selection of firms for architect-engineer contracts.

836.602–1 Selection criteria.

In addition to the evaluation criteria set forth in FAR 36.602–1, the board will consider the factors set forth in this section as they apply to the project or purpose of the selection. Values will be assigned to each factor in determining the relative qualifications of the firms identified as qualified through the preselection process. The values may be confirmed or adjustments may be made as a result of the discussions.

(a) Reputation and standing of the firm and its principal officials with respect to professional performance, general management, and cooperativeness.

(b) Record of significant claims against the client because of improper or incomplete architectural and engineering services.

(c) Geographic location and facilities of the working office which would provide the professional services.

(d) Specific experience and qualifications of personnel proposed for assignment to the project, and record of working together as a team.

836.602–2 Evaluation boards.

Central Office architect-engineer contractors will be selected by the board appointed by the Director, Office of Construction. Field station architect-engineer contractors will be selected by the board appointed by the station director.

(a) The evaluation board will be chaired by either the Chairman or Vice Chairman of the Architect-Engineer Evaluation Board, or the Project Director (or Deputy Project Director) will be designated to act when necessary. The board's members, as appointed by the Director, Office of Construction, will include the appropriate Project Director or designated Project Supervisor and as many qualified professional architects or engineers from the Office of Construction technical services as may be considered for appropriate for the particular project. Additional members from the Office of Construction or from the other VA departments and staff offices will be designated for special type projects when appropriate.

(b) The evaluation board for a Veterans Administration field station will consist of no less than two members, one of whom will be the senior contracting officer, and the other the Engineer Officer. Where a station has two or more engineers on its staff, an additional engineer will be appointed to the board. The chairman of the board will be the senior engineer.

836.602–3 Evaluation board functions.

(a) The evaluation board will review the data submitted by the firms and from that file will preselect the firms which possess the basic qualifications for performing the services needed. The factors stated in the announcement publicizing the proposed procurement (see FAR 5.207) will be used in determining whether a firm is qualified for inclusion in the preselection list.

(b) In the evaluation of the qualifications of the firms on the preselection list, the board will perform the functions as outlined in FAR 36.602–3, applying the evaluation criteria set forth in FAR 36.602–1 and that established in 836.602–1. The board will recommend at least three firms for interviews to the Director, Office of Construction in the case of Central Office contracts, and to the field station director in the case of station contracts.

(c) After approval of the list of selected firms recommended for interviews by the Director, Office of Construction or by the station director, the board will arrange discussions with each firm to obtain information, supplementing that which is already available. The board will select in order of preference, at least three firms considered the most highly qualified. This recommended listing will be submitted to the Director, Office of Construction or to the station director, as appropriate, for consideration and approval before the contracting officer enters into negotiations with the top-rated firm.

836.602–4 Selection authority.

The Director, Office of Construction (for Central Office contracts) and the station director (for field station contracts), or persons acting in those capacities, are designated as the approving officials for the recommendations of the evaluation boards.

836.602–5 Procedure for procurements estimated not to exceed $10,000.

Either of the procedures provided in FAR 36.602–5 may be used when authorized by the Director, Office of Construction or the station director.

836.606–70 General.

Negotiations shall be conducted in accordance with FAR Part 15 and VAAR Part 815, beginning with the most preferred firm in the final selection. Application of the 6-percent fee limitation cited in FAR 15.903(d)(1)(ii) is set forth in 836.606–73. The policy set forth in that section and the provisions of FAR Part 15 provide all the available latitude in the negotiation of the contract price. The VAAR policy does not, however, relieve the contracting officer of the responsibility to determine that the fee negotiated is consistent with the services to be performed and the nature of the project. The contract ordinarily will cover all services to be rendered by the firm. To assure that the fee limitation is not violated, the contracting officer will maintain suitable

records to be able to isolate the amount in the total fee to which the 6-percent limitation applies.

836.606-71 Architect-engineer's proposal.

The use of VA Form 08-6298, Architect-Engineer Fee Proposal, is mandatory for obtaining the proposal and supporting cost or pricing data from the contractor and subcontractor in the negotiation of all architect-engineer contracts for design services when the contract price is estimated to be $50,000 or over. The use of VA Form 08-6298 for design contracts less than $50,000 is at the discretion of the contracting officer. In obtaining architect-engineer services for research study, seismic study, master planning study, construction management and other related services contracts, VA Form 08-6298 shall also be used but supplemented or modified as needed for the particular project type. The contracting officer shall require the contractor or prospective contractor to submit (and to have any subcontractor or prospective subcontractor submit to the prime contractor or appropriate subcontractor tier) certified cost or pricing data when required by FAR Subpart 15.804.

836.606-72 Contract price.

Where negotiations with the top-rated firm are unsuccessful, the contracting officer will terminate the negotiations and undertake negotiations with the firm next in order of preference after authorization by the Director, Office of Construction or by the station director to do so. Recommendation for award of the contract at the negotiated fee, with a copy of the negotiation memorandum prepared in accordance with FAR 15.808 and, will be submitted whenever a field pricing report has been received (see MP-1, Part II, Chapter 23), to the Director, Office of Construction or the station director, as appropriate.

836.606-73 Application of 6-percent architect-engineer fee limitation.

(a) The 6-percent fee limitation on architect or engineer services set forth in section 304(b) of the Federal Property and Administrative Services Act of 1949, as amended, and referred to in FAR 15.903(d)(1)(ii), applies to those services generally required in preparing working drawings and specifications which form the basis for bidding and for the award of construction contract. The fixed fee limitation does not apply to the following architect or engineer services:

(1) Investigative services including but not limited to:

(i) Determination of program requirements including schematic or preliminary plans and estimates.

(ii) Determination of feasibility of proposed project.

(iii) Preparation of measured drawings of existing facility.

(iv) Subsurface investigation.

(v) Structural, electrical, and mechanical investigation of existing facility.

(vi) Surveys: Topographic, boundary, utilities, etc.

(2) Special consultant services not normally available in organizations of architects or engineers not specifically applied to the actual preparation of working drawings or specifications of the project for which the services are required.

(3) Other:

(i) Reproduction of approved designs through models, color renderings, photographs, or other presentation media.

(ii) Travel and per diem allowances other than those required for the development and review of working drawings and specifications.

(iii) Supervision or inspection of construction, review of shop drawings or samples and other services performed during the construction phase.

(iv) All other services that are not integrally a part of the production and delivery of plans, designs, and specifications.

(4) The cost of reproducing drawings and specifications for bidding and their distribution to prospective bidders and plan file rooms.

(b) The total cost of the architect or engineer services contracted for may not exceed 6 percent of the estimated cost of the construction project plus the estimated cost of related services and activities such as those shown in paragraph (a) of this section. To support project submissions, VA Form 10-1193, Application for Health Care Facility Project, and VA Form 10-6238, EMIS Construction Program-Estimate Worksheet, will be used and the proposed technical services shown where necessary and applicable.

PART 837—SERVICE CONTRACTING

Subpart 837.1—Service Contracting—General

Sec.
837.103 Contracting officer responsibility.
837.104 Personal services contracts.

Subpart 837.2—Consulting Services

837.200 Scope of subpart.
837.203 Types of consulting services.
837.204 Policy.
837.205 Management controls.
837.270 Special controls for letters of agreement.
837.271 Management and professional services.
837.271-1 Scope.
837.271-2 Definition.
837.271-3 Guidelines for use of contracts for management and professional services.
837.271-4 Approval for use of contractual services.
837.271-5 Contract administration.
Appendix A Information to be Included in Requests for Contractual Services.
Appendix B Management and Professional Services and Special Studies and Analyses.

Subpart 837.3—Dismantling, Demolition, or Removal of Improvements

837.300 Scope of subpart.

Subpart 837.70—Mortuary Services

837.7001 General.
837.7002 List of qualified funeral directors.
837.7003 Funeral authorization.
837.7004 Administrative necessity.
837.7005 Unclaimed remains—all other cases.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 837.1—Service Contracts—General

837.103 Contracting officer responsibility.

When the contracting officer determines that legal assistance is necessary in determining whether a proposed service contract is for personal or nonpersonal services, he/she shall gather all the pertinent facts and request the opinion of District Counsel responsible for servicing the VA facility involved.

837.104 Personal services contracts.

(a) Personal service contracts having an employer-employee relationship, except to the extent indicated in 815.204 and Subpart 837.2, shall not be awarded but will be consummated in accordance with MP-5, Parts I and II.

(b) In addition to the elements used in assessing whether or not a contract is personal in nature identified in FAR 37.104(d), the following circumstances may also indicate a possible personal service contract.

(1) The contract does not call for an end product which is adequately described in the contract.

(2) The contract price or fee is based on the time actually worked rather than the results to be accomplished.

(3) Office space, equipment and supplies for contract performance are to be furnished by the Veterans Administration.

(4) Contractor personnel are to be used interchangeably with Veterans Administration personnel to perform the same function.

(5) The Veterans Administration retains the right to control and direct the

means and methods by which contractor personnel accomplish the work.

Subpart 837.2—Consulting Services

837.200 Scope of subpart.

This subpart implements FAR Subpart 37.2 and supplements it with the agency control procedures established pursuant to OMB guidance. This subpart also applies to the procurement of management and professional services, special studies and analysis, and the management and support services for research and development activities as indicated in 837.271.

837.203 Types of consulting services.

For the purpose of this subpart the definition of consulting services shall, in addition to examples listed in FAR 37.203, include peer review of research proposals.

837.204 Policy.

In addition to policy considerations listed in FAR 37.204, contracting officers will be guided by the following additional policy.

(a) Consulting services will normally be obtained only on an intermittent or temporary basis; repeated or extended arrangements are not to be entered into except under extraordinary circumstances.

(b) Grants and cooperative agreements will not be used as legal instruments for consulting service arrangements.

(c) A competitive solicitation is the preferred method of obtaining consulting services and should be used to the maximum extent practicable to insure that costs are reasonable. To that end, requests for approval of the use of consulting services must be made in sufficient time to enable the appropriate procurement action to be taken. A FFP (firm fixed-price) contract is the preferred contract type and will be used to the maximum extent possible. The contracting officer will determine the feasibility of using an FFP contract and may solicit further detail from the requesting official in order to make that determination.

(d) Sponsoring offices will avoid any contact or discussion with prospective contractors that may impinge on the integrity of the procurement process. Final selection of contractors and negotiation of terms, conditions and prices are matters lying solely within the province of the contracting officer.

(e) Requesting official submitting requirements for consulting services will submit work statements which are specific, complete, and which specify fixed periods of service. End products must be specific and unambiguous, and defined in terms which directly relate to the problem at hand.

(f) Sole-source contracts for consulting services resulting from unsolicited proposals are generally not appropriate. Therefore, when a using activity receives an unsolicited proposal for consulting services, and determines it has a need for such services, a contracting officer shall synopsize the requirement for publication in the Commerce Business Daily to determine if there are other qualified contractors interested in submitting a proposal. Qualified contractors shall be solicited.

(g) If program or contracting officials become aware of serious deficiencies in the performance of duties and responsibilities outlined in this subpart, they will report such deficiencies to their respective department head or staff office director for corrective action. These reports, including corrective actions taken, will be forwarded to the Agency Procurement Executive.

837.205 Management controls.

(a) *Contracting officer responsibilities.* (1) The contracting officer is responsible for making the determination that the requirements submitted by the requesting official are in fact consulting services. The contracting officer will be guided by definitions in FAR 37.201. Upon an affirmative determination that consulting services are being requested, the contracting officer will insure that all justifications for approval required by 837.205(c) are prepared and submitted properly.

(2) The contracting officer will require as a condition of the contract that the contractor will submit all reports with covers which display the following information:

(i) Name and business address of the contractor.

(ii) Contract number.

(iii) Dollar amount of award (including modifications).

(iv) Type of award, i.e., competitive or noncompetitive.

(v) Identification of the official who requested the consulting services, including the name of the organization and telephone number.

(vi) The following notation will be included:

> Note.—Pub. L. 97–101, section 412, requires that upon the transfer of the contents of this report, or any other Government document, the new document shall appropriately identify the contract and contractor involved in the development of this report.

(3) The contracting officer is responsible for assessing actual and potential organizational conflicts of interest. These determinations will be governed by 809.5. The contracting officer should pay particular attention to proposed contract requirements which call for advice on future agency decisions to contract, particularly when the development of specifications and work statements is involved.

(b) *Technical support.* (1) Contracting officers will designate a representative of the sponsoring officer as the COTR (Contracting Officer's Technical Representative).

(2) The designated COTR will monitor contract performance in accordance with the plan required by Appendix A of this subpart and submit to the contracting officer all resulting documentation for inclusion in the contract file.

(3) No consulting contract file will be closed out until the sponsoring official has provided for the file a written evaluation of the performance of each consulting contractor as well as a statement of the extent to which the contractor's report (or other end product) has been used or is expected to be used. Also, the contracting officer should, in conjunction with the responsible program official, compare the original contract cost with the final cost and determine the nature of any other deviations from the original contract specifications. Any irregularities should be reported to the Inspector General. Final evaluations should also specify reasons for rejecting any of the contractor's recommendations.

(4) Copies of all final evaluations should be sent to the Director, Procurement and Supply (93).

(c) *Approval procedures.* (1) Contracts for consulting services will be approved by the Administrator regardless of amount, except as provided for in 837.205–70. The methodology for obtaining the approvals required by this paragraph are set forth in paragraph (c)(3) of this section. However, no request for approval of procurement shall be initiated by a contracting officer without the requirement for consulting services first having received the review required in paragraph (c)(2) of this section.

(2) Prior to the submission of an approval request to a contracting officer as required by paragraph (c)(3) of this section, the activity requesting the consulting services will have such requirements reviewed and approved at one level above the activity and, if occurring during the fourth quarter, two levels above. At field facilities this initial review need not exceed the facility head. In Central Office this

review need not exceed department heads, Associate Deputy Administrators, or staff office directors for requirements emanating within their respective jurisdictions. The purpose of this initial review will be to notify management in the chain of command of all consulting services requirements, and to insure that departmental policy pertaining to such services has been adhered to, including any budget restrictions imposed by the Office of Management and Budget.

(3) The approval of the Administrator will be requested by means of a notification of intent prepared by the contracting officer in the form of a letter or memorandum and submitted through channels to the Director, Office of Procurement and Supply. The Director, Office of Procurement and Supply will review the submission for consistency of application of agency policy, and will be responsible for maintaining a consolidated record of requests submitted to the Administrator and the results of those submissions. Subsequent to that review, the notices will be forwarded for the approval of the department heads, Associate Deputy Administrators or staff office directors having jurisdiction over the requesting activity. The General Counsel and the Director, Office of Budget and Finance will also review and concur in the requests.

(4) The notification of intent will cite the pertinent authority warranting negotiation and, in addition to any required determination and findings, will contain the information indicated in Appendix A to this subpart as applicable to the proposed procurement. Where a specific individual or concern is proposed, the notification of intent will also include a statement as to any previous or current contracts with that individual or concern, and as to the consideration given to organizational conflicts of interest.

(5) The approval of the Administrator is in addition to and does not replace technical and legal reviews of contract documents prior to award prescribed elsewhere in these regulations.

(d) *Contract data reporting.* (1) The contracting officer will take care to report correctly a contract award for consulting services in the Federal Procurement Data System.

(2) A separate log (in addition to any station contract register) for all consulting services contracts, regardless of dollar value, will be maintained at the procuring activity for management control purposes. Log entries will be made on separate sheets of paper for each contract award and in the following format:

(i) Contract/obligation number.
(ii) Date of award.
(iii) Requesting service.
(iv) Type of award, i.e., competitive or noncompetitive.
(v) Name and address of awardee.
(vi) Contract price.
(vii) A short narrative description of the work to be performed.

(3) The contracting officer will forward a copy of each log entry on standard size plain white bond paper to the Director, Office of Procurement and Supply (93) on a quarterly basis. Log entries should be received in Central Office no later than 15 days after the end of each quarter. Upon receipt of log entries, the Office of Procurement and Supply (93) will immediately enter all submissions into the consolidated listing. Negative responses, if applicable, are required on an annual basis and should be received in Central Office no later than 15 days after the end of the fiscal year. Reports Control Symbol 91–4 has been assigned to this report.

(4) Upon a change in status of a consultant contract, i.e., termination, modification, extension or completion, the contracting officer wil annotate the log entry and resubmit a copy of the entry to the Director, Office of Procurement and Supply (93).

837.270 Special controls for letters of agreement.

(a) Letters of agreement may be used to procure consulting services and advisory board memberships only by those individuals designated in 801.670–14(a) and individuals delegated authority under the conditions specified in paragraph (b) of that section, and will be limited to a value of $500 per letter and to an accumulated annual total of $2,500 to any individual or firm. Letters of agreement should only be used where normal procurement channels are not feasible and only for obtaining the following services:

(1) Consultant services including peer review of research proposals and advisory board memberships.

(2) Management and professional services (837.271)

(3) Instructors and training obtained pursuant to section 4122 of Title 38, United States Code.

(b) The delegated official will perform or have performed for each letter of agreement all those duties and requirements prescribed-in this subpart, as modified by paragraphs (c) and (d) of this section. That official will also insure that all reporting requirements are completed for each action.

(c) The department head or staff office director will be the highest level approving official for each procurement action which does not exceed $500 in consulting fees (excluding travel, per diem and other travel-related costs) and which does not award more than an accumulated total of $2,500 per year in consulting fees to any individual or firm. (Consulting services anticipated to exceed these dollar limitations will not be obtained through letters of agreement.)

(d) In lieu of the requirements outlined in Appendix A of subpart 837.2, justifications for letters of agreement will provide a statement of need and will certify that such services do not unnecessarily duplicate any previously performed work or services. The justification will also certify that the procurement action will not violate post-employment restrictions prescribed in the Ethics in Government Act and 803.101–3.

(e) All procurements for consulting services accomplished through letters of agreement will be entered into the agency consolidated listing of consultant contracts in the format prescribed by 837.205(d). All such log entries applicable to Central Office activities shall be forwarded to the Director, Office of Procurement and Supply (93). The office shall also be responsible for entering such information pertaining to Central Office letters of agreement into the Federal Procurement Data System.

837.271 Management and professional services.

837.271–1 Scope.

(a) The controls in this section are applicable to management and professional services, special studies and analyses and management and support services for research and development. Specific types of services to be controlled are listed in Appendix B of this subpart. Management and support services for research and development are the same services listed in Appendix B when procured with Research and Development funds. However, the controls do not apply to the conduct of research and development.

(b) Services in other than the categories listed in Appendix B are also controlled if covered by the definition in 837.271–2 and either represent unusual, nonroutine requirements or requirements having significant impact on agency operations. Contracting officers will be responsible for making such determinations.

(c) This section does not apply to contracts for the medical, dental and ancillary care of beneficiaries or to contracts for the provision of other

services directly to beneficiaries, such as educational services.

837.271-2 Definition.

The term "management and professional services" means those services related to the performance of operating functions of an agency, involving knowledge of an advanced type, and requiring the use of discretion and judgment. Management and professional services differ from consulting services in that the latter term refers to services of a purely advisory nature. Both categories of services involve selection of the contractor on the basis of qualifications, rather than price alone, and are therefore normally procured by negotiation.

837.271-3 Guidelines for use of contracts for management and professional services.

(a) Contracts are appropriate when:

(1) Unusual or peak workloads occur that cannot be accomplished by Government personnel.

(2) Work involved is of of an intermittent, occasional, or one-time nature for which the hiring of Government personnel is not feasible.

(3) They result in a more economical method of performing the work (see OMB Circular No. A-76, revised.)

(b) Contracts are inappropriate (improper or illegal) when:

(1) The service involves exercising a Governmental judgment; i.e., managing programs requiring value judgments; selection of priorities; direction of Federal employees; and all regulatory responsibilities.

(2) An employer-employee relationship would be established or involved.

(3) They circumvent personnel salary or ceiling limitations.

837.271-4 Approval for use of contractual services.

(a) All contracts controlled by this section require the approval of the Administrator except as provided in paragraph (b) of this section. The procedure to be used in obtaining approval is the same as that required for consulting service as prescribed in 837.205(c). The format and content of the supporting justification will be the same as that in Appendix A.

(b) Contracts not exceeding $500 may be approved by the heads of facilities, without higher level review, for requirements emanating at the local level. In Central Office, contracts not exceeding $500 may be approved at one level above the requesting activity, without higher level review. Supporting justifications will be the same as required in paragraph (a) of this section.

(c) The approvals of officials designated in paragraphs (a) and (b) of this section are in addition to and do not replace the technical and legal reviews of contract documents prior to award prescribed elsewhere in these regulations.

837.271-5 Contract administration.

(a) All the basic policy considerations contained in 837.204 are applicable to services controlled herein, including the development of work statements which are specific, complete and which specify fixed periods of service and the solicitation of other qualified sources for proposed sole-source awards emanating from unsolicited proposals.

(b) All responsibilities of contracting officers and their technical representatives as prescribed in 837.205, Contracting requirements, will apply to services controlled by this section, including the monitoring of contractor performance and the final evaluation of end products.

(c) All reporting requirements contained in 837.205(d) are applicable to services controlled by this section.

Appendix A—Information to be Included in Requests for Contractual Services

Requests for approval to procure contractual services, whether with individuals or firms, must contain statements on the following items where applicable. Items other than those listed may be added to clarify or justify the request.

Problem or Project

1. Description of the problem or project.
2. Length of time this problem or condition has existed.
3. Effect on the mission should the problem continue to exist.
4. Specific examples of losses or excessive costs caused by the problem.
5. Whether the proposed study or project is a small segment of a much greater project. If so, elaborate on the complete study or project and state what action will be taken concerning the overall project when this segment is completed.
6. Alternative approaches available to perform this work, and reasons for eliminating each approach.
7. Previous attempts to solve the problem or perform the work and their results, with an explanation why they were unsuccessful if that was the case.
8. Results or end products sought. End products can be as simple as a report containing recommendations, or as lengthy and detailed as a completely installed system for management.
9. Efforts made to determine if similar studies or other sources of information already exist, and whether this proposed effort duplicates other efforts known to have taken place or which are ongoing.
10. Whether a lack of equipment has a bearing on this problem. If so, what attempts were made to remedy the situation?
11. Type of skills required to solve problem or accomplish the project.

Personnel

12. Whether a shortage of qualified personnel has a bearing on the problem. If so, what attempts were made to remedy the situation?
13. Number of in-service personnel by descriptive title to be made available to work with the contractor.
14. If the services of a specific individual are requested, specific reasons why this individual or another equally competent individual cannot be temporarily employed as authorized by personnel regulations.
15. If a request is for a specific individual, reasons for selecting that person over other suitable persons. List of other suitable persons, or explanation if there are none.

Firms

16. If a specific firm is recommended, reasons for selecting it over other suitable firms, or explanation if there are none.

Cost of Contract and Funds

17. Estimated cost of contract.
18. Identification of funds to be used to pay for contract.

Attachments

19. Copies of staff studies and papers bearing on the problem.
20. Copy of proposed contract work statement.

Automated Data Processing

21. If the request includes a requirement for services related to ADP, a copy of any reports or requests submitted to GSA pursuant to FPMR Subpart 101-36.47.

Evaluation

22. The methodology by which contractor performance will be monitored including how departures from the original contract specifications will be documented and approved.
23. The methodology by which the final product will be evaluated and by whom.

Advance Procurement Planning

24. Does the requirement fall within the activity's advance procurement plan, and if not, why?

Subpart 837.3—Dismantling, Demolition, or Removal of Improvements

837.300 Scope of subpart.

Contracting officers should be cognizant of the requirements contained in VA Manual MP–3, Part II, Chapter 6, for approval necessary prior to entering into a contract for disposal of VA real property. Such approval(s) shall be included in the contract file.

Subpart 837.70—Mortuary Services

837.7001 General.

This subpart establishes the policies and procedures governing the procurement of funeral and burial services for deceased beneficiaries of the Veterans Administration, as provided in 38 U.S.C. 903.

837.7002 List of qualified funeral directors.

Contracting officers will establish, in coordination with cognizant Medical Administration Service personnel, a list of funeral directors capable of performing the burial services specified in 837.7003. The contracting officer will attempt to establish a commitment to perform these services within the statutory limitation of $300. Each funeral director must be fully licensed in the jurisdiction in which the business operates. If there has been no prior experience with the funeral director which would ensure the adequacy of the funeral director's services and casket, arrangements will be made prior to contract negotiation to inspect the premises and the casket to be provided, and to check with the local business bureau and/or Chamber of Commerce. Certification of the funeral director's adequacy will be added to the list prescribed in this section.

837.7003 Funeral authorization.

(a) When a veteran dies while receiving care in a Veterans Administration health care facility or in a non-Veterans Administration institution at Veterans Administration expense, and the decedent's remains are unclaimed, the Chief, Medical Administration Service, will forward to the Chief, Supply Service, a properly executed VA Form 10–2065, Funeral Arrangements, requesting that funeral and burial services for the deceased be procured. Burial will be made in the nearest National Cemetery having available grave space.

(b) The contracting officer will enter into negotiations with local funeral directors to procure a complete funeral and burial service within the statutory allowance of $300. This service will consist of and will be specified on the purchase order, VA Form 90–2138, Order for Supplies or Services, as follows:

(1) Preparation of the body, embalming.

(2) Clothing.

(3) Casket. (The casket, as a minimum, will be constructed from thick, strong particle board and must be of sufficient strength to support the weight of an adult human body. Cardboard or press paper or similar materials are not acceptable).

(4) Securing all necessary permits.

(5) Ensuring that a United States Flag (provided the funeral director in accordance with M–1, Part I, paragraph 14.40) accompanies the casket to place of burial.

(c) An additional allowance for transportation of the body to the place of burial is provided in 38 U.S.C. 903(a)(2). This allowance will cover the transportation cost of shipment of the body by common carrier or by hearse from the VA facility to the funeral home and to the place of burial, any charges for an outside (shipment) box, and the charges for securing all necessary permits for removal or shipment of the body. These costs are not chargeable against the $300 allowance.

(d) In accordance with M–1, Part I, paragraph 14.37, the contracting officer will designate the Chief, Medical Administration Service, or representative, to be responsible for the medical inspection of the mortuary services performed and inspection of the merchandise furnished. This designee will also be responsible for certifying receipt on the receiving report.

(e) The Chief, Supply Services will assist the Chief, Medical Administration Service in developing the local procedures specified in M–1, Part I, paragraph 14.37c.

837.7004 Administrative necessity.

(a) When persons die under Veterans Administration care who are not legally entitled to such care at Veterans Administration expense, and no relatives or friends will claim the remains, and the municipal, county or State officials refuse to provide for final disposition, arrangements will be made and expenses assumed for burial locally under separate contractual agreement.

(b) When a full and complete funeral and burial service as prescribed in 837.7003 cannot be obtained by the contracting officer within the statutory allowance, he/she will, prior to taking any further action, secure from the head of the station a written determination that the disposition of the remains must be accomplished by the Veterans Administration as an administrative necessity. The head of the station will also authorize in writing the expenditure of such additional funds as may be necessary for this purpose. The amount of these additional funds will be held to the minimum, keeping in mind, however, that the deceased must be given a proper and fitting interment.

(c) The determination and authorization by the head of the station will be made a part of the contract file.

837.7005 Unclaimed remains—all other cases.

Requests for information on the disposition of the unclaimed remains of a veteran whose death occurs while not under the direct care of treatment of the Veterans Administration will be referred to the Veterans Services Officer for processing in accordance with Manual M27–1, Part II. This manual is available at any Veterans Administration regional office, medical center or VA office.

SUBCHAPTER G—CONTRACT MANAGEMENT

PART 842—CONTRACT ADMINISTRATION

Sec.

842.000 Scope of part.
842.070 Definition.

Subpart 842.1—Interagency Contract Administration and Audit Services

842.101 Policy.
842.102 Procedures.

Subpart 842.2—Assignment of Contract Administration

842.202 Assignment of contract administration.

Subpart 842.7—Indirect Cost Rates

842.705 Final indirect cost rates.

Subpart 842.8—Disallowance of Costs

842.801–70 Audit assistance prior to disallowing costs.
842.803 Disallowing cost after incurrence.

Subpart 842.12—Novation and Change-of-Name Agreements

842.1203 Processing agreements.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

842.000 Scope of part.

This part applies to all contracts, whether formally advertised or negotiated. (See paragraph 801.602–70 for requirements for legal review of certain contract administration actions.)

842.070 Definition.

Contract Administration is the coordination of actions required for the performance of a contract including the guidance and supervision necessary to assure that all contractural obligations are fulfilled.

Subpart 842.1—Interagency Contract Administration and Audit Services

842.101 Policy.

(a) Pursuant to FAR policy encouraging interagency cross-servicing in field contract support services, contracting officers of the Veterans Administration will utilize the support services of other agencies to the extent feasible. Examples of such services are: preaward surveys; quality assurance and technical inspection of contract items; and review of contractors' procurement systems. Requirements for support services available from any other Government department or agency will be obtained on the basis of an approved negotiated interagency support agreement.

(b) An interagency support agreement is a written instrument of understanding executed between the parties to the agreement. The agreement should state clearly the accord which has been reached between the two parties involved, especially the obligations assumed by the rights granted each. The agreement will be specific with respect to resources to be provided by both the supplying and receiving activities. It will also provide for funding and reimbursement arrangements, and clauses permitting revisions, modifications thereto, or cancellation thereof, will be included.

842.102 Procedures.

(a) The Department of Defense Directory of Contract Administration Services Components and the Directory of Federal Contract Audit Offices are available through the Veterans Administration Forms and Publications Depot.

(b) Proposed interagency support agreements with any other Government department or agency involving the expenditures of Veterans Administration funds of $5,000 of more will be forwarded by the facility head (or Central Office official) to the Director, Office of Procurement and Supply (91), who will transmit with recommendation to the General Counsel for legal review and approval, as required by 801.602–72(a)(3).

(1) Proposed agreements, both new and renewal, will be submitted in an original and four copies so as to reach Central Office 60 days prior to the effective date of the agreement.

(2) Complete justification for all proposed agreements will be submitted, as approval depends on the adequacy of the justification.

Subpart 842.2—Assignment of Contract Administration

842.202 Assignment of contract administration.

Proposed assignments of contract administration responsibility outside of the procuring activity will be forwarded by the facility head to the Director, Office of Procurement and Supply (91), who will transmit the proposal to the General Counsel for legal review and approval, as required by 801.602–70(a)(5) and 801.602–71. Complete justification will be provided, specifically addressing the need for and benefits to be provided by assignment of contract administration. (See 801.603–70 for policy on designating representatives of contracting officers, and FAR 30–401 for contracts involving Cost Accounting Standards.)

Subpart 842.7—Indirect Cost Rates

842.705 Final indirect cost rates.

(a) Contracting officers will request audits on proposed final indirect cost rates and billing rates for use in cost reimbursement, fixed price incentive and fixed price redeterminable contracts as described in FAR Subpart 42.7 unless the quick-closeout procedures described in FAR 42.708 are used. In this case, the contracting officers will perform a review and validation of the contractor's data submitted for accuracy and reasonableness of the proposed rates for negotiating the settlement of indirect costs for a specific contract.

(b) Contracting officers in the Office of Procurement and Supply and Office of Construction who are located in the VA Central Office have the option to request audits directly from the cognizant audit agencies or requesting audits through the Assistant Inspector General for Policy, Planning and Resources (53C). All other contracting officers located in the VA Central Office and the Office of the General Counsel will send requests for audit to the Assistant Inspector General for Policy, Planning and Resources (53C). Contracting officers located at field stations, Marketing Center and supply depots are required to arrange for the audits through the Director, Office of Procurement and Supply or the Director, Office of Construction. The Assistant Inspector General for Policy, Planning and Resources (53C) will provide such accounting assistance or technical advice as is deemed desirable by the contracting officers.

Subpart 842.8—Disallowance of Costs

842.801–70 Audit assistance prior to disallowing costs.

When a contracting officer determines during the performance of a cost reimbursement, fixed price incentive or fixed price redetermination contract exceeding the thresholds specified in FAR 15.804–2, that costs should be disallowed, audit assistance will be requested. Such requests submitted by field facility contracting officers will be directed to the Director, Office of Procurement and Supply (93) for review and forwarding to the Assistant Inspector General for Auditing (52), or other recognized audit agency, e.g., the Defense Contract Audit Agency.

842.803 Disallowing cost after incurrence.

Contracting officers may approve contractors' vouchers for payment and process them to the servicing fiscal office. Such approval must be within the limitations of the contracting officer and the contract for which the voucher is submitted must be within the contracting officers delegation of contracting authority. (Note 842.801–70 regarding disallowing costs).

Subpart 842.12—Novation and Change-of-Name Agreements

842.1203 Processing agreements.

Prior to execution of novation and change-of-name agreements by a Veterans Administration contracting officer, he/she will forward the agreement and related documents to the Office of General Counsel for review as to legal sufficiency. The documents will be submitted through the same channels as those prescribed for legal review of contracts in 801.602–72.

PART 846—QUALITY ASSURANCE

Subpart 846.3—Contract Clauses

Sec.

846.302 Fixed price supply contracts.

846.302–70 Inspection.

Subpart 846.4—Government Contract Quality Assurance

846.403 Inspection at destination.
846.406–70 Inspection of subsistence.
846.406–71 Waiver of USDA inspection and specifications.
846.406–72 Supply Depot selection of samples for test.
846.470 Use of commercial organizations for inspections and grading services.
846.471 Determination authority.
846.472 Inspection of repairs for properties under the Loan Guaranty and Direct Loan Programs.
846.472–1 Repairs of $1,000 or less.
846.472–2 Repairs in excess of $1,000.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 846.3—Contract Clauses

846.302 Fixed price supply contracts.

846.302–70 Inspection.

Contracts for property will include the clause 852.210–72(a), "Rejected Goods," except that contracts for packinghouse, dairy products, bread and bakery products, and fresh and frozen fruits and vegetables will include the clause prescribed in 852.210–72(b), "Rejected Goods."

Subpart 846.4—Government Contract Quality Assurance

846.403 Inspection at destination.

(a) When inspection upon delivery indicates the items received are not in compliance with contract requirements, a report will be made to the contracting officer.

(b) VA supply depots will report all instances of noncompliance to the contracting officer on VA Form 10–2055, Sample Transmittal Sheet and Inspection Report. The supply depots are authorized to correct packaging, packing, or marketing not in accordance with contract requirements when the cost of correcting a partial receipt or projected cost of correcting total receipt does not exceed $100. When projected costs exceed $100, authorization will be obtained from the contracting officer prior to taking corrective action. The corrections made and the actual amount to be charged to the vendor will be shown on the reverse of VA Form 10–2055.

846.406–70 Inspection of subsistence.

(a) The contracting officer will determine at the time of issuance of the solicitation whether inspection for specification compliance will be made: (1) Prior to shipment by representatives of the Department of Agriculture or the Department of Commerce, or (2) at the time of delivery by personnel of the purchasing activity. The place of inspection will be indicated in the solicitation.

(b) When either the Department of Agriculture or the Department of Commerce is indicated as the inspection activity, the solicitation will also provide that the contractor is responsible for:

(1) Arranging and paying for inspection services.

(2) Obtaining from the inspection activity a certificate indicating the product complies with specifications. Such certificate, or copy, should accompany the shipment or be furnished to the receiving installation prior to shipment. The contractor shall notify the installation when the certificate is not immediately available.

(3) Seeing that acceptable products are covered by an inspection agency checkloading certificate or stamped by the inspector as prescribed by the contracting officer. Products not so identified shall be rejected.

(4) Furnishing samples for inspection at his/her expense.

(5) Indicating the address where inspection will be made.

(c) The contracting officer will furnish a copy of the purchase document to the inspecting activity.

846.406–71 Waiver of USDA inspection and specifications.

(a) Contracting officers may purchase butter; cheese (except cottage cheese); sausage; meat food products;[1] bacon, smoked; and bacon, Canadian style, without reference to the specifications in VAAR Program Guide G–1, and the U.S. Department of Agriculture (USDA) inspection requirements, when the amount of an item to be purchased will not exceed 500 pounds per delivery. When these items are procured together with items that are not exempt, the solicitation shall include the following:

Items * * * are not required to be in accordance with the specifications contained in VAAR Program Guide G–1, and the special USDA inspection is not required. Inspection for quality and condition will be made by VA upon delivery at destination. These items are, however, subject to the quality controls stated herein.

(b) As appropriate, the following statements shall be included in each invitation for bid, request for proposal or purchase order:

(1) Butter. This product must be graded by the USDA and labeled "Grade A" or the grade specified herein.

(2) Sausage and meat food products:

(i) This product must be a high commercial product and shall have been prepared in a federally inspected plant and bear the USDA establishment number stamp which evidences that it is sound, healthful, wholesome and fit for human consumption; and

(ii) This product must bear a label complying with the Federal Food, Drug and Cosmetic Act which requires that all ingredients be listed according to the order of their predominance.

(3) Bacon, smoked; and bacon, Canadian style. This product must be a high commercial product and shall have been prepared in a federally inspected plant and bear the USDA establishment number stamp which evidences that it is sound, healthful, wholesome, and fit for human consumption.

(c) When using a "brand name or equal" purchase description every brand name item that is known to be acceptable and available in the area will be listed.

846.406–72 Supply depot selection of samples for test.

(a) The number of samples to be selected will be as stated in the item specifications or as specified by the contracting officer for items without lot numbers.

(b) On items bearing lot numbers, one unit will be selected from each lot to be tested, unless otherwise specified. Contracts will require that the contractor's shipping document or packing list indicate the lot numbers of items shipped to each depot on the contract. To reduce handling and transportation costs, samples of lots received at more than one location will be submitted as follows:

(1) The VA Supply Depot, Hines, Illinois, will submit samples from all lots received.

(2) The VA Supply Depot, Somerville, New Jersey, will submit samples from lots not received at Hines.

(3) The VA Supply Depot, Bell, California, will submit samples from lot not received at Hines or Somerville.

(c) On drug items, when there is only one unit in the lot to be tested or when five or more lots on the same order require sampling, the contracting officer will be notified and requested to furnish instructions. Such notification will be transmitted by teletype.

(d) To facilitate handling and packing, samples may be consolidated into one package. However, under no circumstances will shipment of samples be held more than 48 hours from time of receipt.

[1] Meat food products shall mean processed foods containing meat in substantial proportion and other listed ingredients including seasoning, e.g., frankfurters, coldcuts. Whole or prefabricated meats, e.g., pork chops, hamburger, are considered meats, not meat food products.

846.470 Use of commercial organizations for inspections and grading services.

Commercial organizations may be used for inspection and grading services when it is determined that the results of a technical inspection or grading are dependent upon the application of scientific principles or specialized techniques, and it is further determined that:

(a) The Veterans Administration is unable to employ the personnel qualified to properly perform the services and is unable to locate another Federal Agency capable of providing the service.

(b) The inspection or grading results issued by a private organization are essential to verify the acceptance or rejection of a special commodity.

(c) The services may be performed without direct Government supervision.

846–471 Determination authority.

The determinations required in 846.470 will be made by:

(a) The Director, Office of Construction, for those items and services for which purchase authority has been assigned to him/her.

(b) The Director, Veterans Canteen Service, DM&S, for those items and services purchased, or contracted for, by the Veterans Canteen Service (except those items purchased from Veterans Administration supply sources).

(c) The Director, Office of Procurement and Supply for all other supplies, equipment and services.

846–472 Inspection of repairs for properties under the Loan Guaranty and Direct Loan Programs.

Final inspection will be made of all repair programs upon completion. In addition such intermediate or progress inspections will be made on extensive or technical jobs as specified in the contract.

846.472–1 Repairs of $1,000 or less.

(a) Generally, inspections required will be made by the management broker. If the property has not been assigned to a management broker or if it has been determined that the nature of the repairs requires supervision by a technician, the inspection will be made by a qualified fee or staff inspector.

(b) There is no form prescribed for this inspection but VA Form 26–1839, Compliance Inspection Report, may be used if desired. Regardless of the form in which the report is submitted, it will be in sufficient detail to identify the contractor, property, and the repair program and to enable the contracting officer to make a determination that the work is being performed satisfactorily or completed in accordance with the terms of the contract.

846.472–2 Repairs in excess of $1,000.

(a) The final inspection and any intermediate or progress inspections on repairs exceeding $1,000 will be made by a qualified fee or staff inspector. If a management broker is qualified to supervise major repairs, he/she may be authorized to conduct the inspections.

(b) Report of inspections will be made on VA Form 26–1839, Compliance Inspection Report. The form will be completed to identify the property, contractor, and repair program and will also include such detailed information to enable the contracting officer to make a determination that the work is being performed satisfactorily or that it has been completed in accordance with the terms of the contract. Any deficiencies noted will be itemized and explained in detail.

PART 847—TRANSPORTATION

Subpart 847.3—Transportation in Supply Contracts

847.303–1 F.o.b. origin.
847.303–70 F.o.b. origin, freight prepaid, transportation charges to be included on the invoice.
847.304 Determination of delivery terms.
847.304–1 General.
847.305–70 Potential destinations known but quantities unknown.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 847.3—Transportation in Supply Contracts

847.303–1 F.o.b. origin.

(a) Normally shipments falling within this category will be shipped on a Government bill of lading, except for those shipments covered by 41 CFR 101–41.304–2.

(b) Shipment of flat bronze markers by the vendor, as directed by the Director, Monument Service, or his/her designee, will be made by parcel post. VA Form 40–4951, Order for Flat Bronze Marker, will be used for this purpose.

847.303–70 F.o.b. origin, freight prepaid, transportation charges to be included on the invoice.

(a) The delivery terms will be stated as "f.o.b. origin, transportation prepaid, with transportation charges to be included on the invoice," under each of the following circumstances:

(1) when it has been carefully determined that an f.o.b. origin purchase or delivery order will have transportation charges not in excess of $100 and the occasional exception does not exceed that amount by an unreasonable amount;

(2) single parcel shipments via express, courier, small package, or similar carriers, *regardless of shipping cost,* if the parcel shipped weighs 70 pounds or less and does not exceed 106 inches in length and girth combined;

(3) multi-parcel shipments via express, courier small package, or similar carriers for which transportation charges do not exceed $250 per shipment.

(b) Orders issued on VA Form 90–2138, Orders for Supplies or Services, will direct the vendor's attention to shipping instructions on the reverse of the form. When VA Form 90–2138 is not used, the vendor will be instructed as follows:

(1) Consistent with the terms of the contract, pack, mark and prepare shipment in conformance with carrier requirements to protect the personal property and assure assessment of the lowest applicable transportation charge.

(2) Add transportation charges as a separate item on your invoice. The invoice must bear the following certification: "The invoiced transportation charges have been paid and evidence of such payment will be furnished upon the Government's request."

(3) Do not include charges for insurance or valuation on the invoice unless the order specifically requires that the shipment be insured or the value be declared.

(4) Do not prepay transportation charges on this order if such charges are expected to exceed $100. Ship collect and annotate the commercial bill of lading, "To be converted to Government Bill of Lading."

(c) Each contracting officer is responsible for:

(1) Making a diligent effort to obtain the most accurate estimate possible of transportation charges; and

(2) Utilizing the authority in paragraph (a) of this section only when consistent with the circumstances in that paragraph.

(d) When in accordance with FAR Subpart 28.3 and FAR 47.102 it is determined that a shipment is to be insured or the value declared, the vendor will be specifically instructed to do so on the order, when a written order is used. If the order is an oral order, all copies of the purchase request will be annotated to show that insurance/declared value was specifically requested.

847-304 Determination of delivery terms.

847-304-1 General.

When alternative delivery terms are appropriate but the contracting officer elects to use only one in the invitation for bids, or request for proposals, he shall document the contract file to show his reasons for so doing.

847.305-70 Potential destinations known but quantities unknown.

When the VA Marketing Center contracts for decentralized procured items by all Veterans Administration installations, the evaluation of bids must follow specific procedures. To place each bid on an equal basis, even though specific quantities required by each hospital cannot be predetermined, an anticipated demand factor will be used in proportion to the number of hospital beds or patient workload. The clause prescribed in 852.247-70 shall be used in these instances.

PART 849—TERMINATION OF CONTRACTS

Subpart 849.1—General Principles

Sec.
849.106 Fraud and other criminal conduct.
849.107 Audit of prime contract settlement proposals and subcontract settlements.
849.111 Review and approval of proposed settlements.
849.111-70 Settlement review boards.
849.111-71 Required review and approval.
849.111-72 Submissions of information.

Subpart 849.4—Termination for Default

849.402 Termination of fixed-price contracts for default.
849.402-6 Repurchase against contractor's account.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 849.1—General Principles

849.106 Fraud or other criminal conduct.

When the circumstances set forth in FAR 49.106 are encountered, the contracting officer will immediately discontinue all negotiations. The contracting officer will submit all of the pertinent facts necessary to support his/her reasoning to the Director, Office of Procurement and Supply (93), (or the Director, Office of Construction (08) in the case of contracting officers from the Office of Construction). The Director, Office of Procurement and Supply (93), or the Office of Construction will review the submission and fully develop the facts. If the evidence indicates fraud or other criminal conduct, the Director, Office of Procurement and Supply, will forward the submission with his/her recommendations, through channels (to include the General Counsel, if appropriate), to the Inspector General (51) for referral to the Department of Justice. The contracting officer will be advised by the Director, Office of Procurement and Supply or the Office of Construction as to any further action to be taken. Pending receipt of this advice, the matter will not be discussed with the contractor. No collection, recovery or other settlement action will be initiated while the matter is in the hands of the Department of Justice without first obtaining the concurrence of the U.S. Attorney concerned, through the Inspector General. If inquiry is made by the contractor, he/she will be advised only that the proposal has been forwarded to higher authority.

849.107 Audit of prime contract settlement proposals and subcontract settlements.

Contracting officers will submit settlement proposals for review and audit prior to taking any further action, in accordance with the provisions and claim limitations applicable to prime and subcontractors as set forth in FAR 49.107. Contracting officers in the Office of Procurement and Supply and Office of Construction who are located in the VA Central Office have the option to request audits directly from the cognizant audit agencies or to request audits through the Assistant Inspector General for Policy, Planning and Resources (53C). All other contracting officers located in the VA Central Office and the Office of General Counsel will send requests for audit to the Assistant Inspector General for Policy, Planning and Resources (53C). Contracting officers located at field stations, the Marketing Center and the supply depots are required to arrange for audits through the Director, Office of Procurement and Supply or the Director, Office of Construction.

849.111 Review and approval of proposed settlements.

849.111-70 Settlement review boards.

The Director, Office of Procurement and Supply, and the Director, Office of Construction, will each establish within his/her own organization a settlement review board. The board may be established on a permanent or temporary basis. More than one such board may be established if settlements are to be made at different locations, if personnel with different qualifications are needed for different contracts, or if for other reasons, the establishment of more than one board is considered desirable. Each settlement review board should be composed of at least three qualified and disinterested employees. The membership of each board should include at least one lawyer and one accountant.

849.111-71 Required review and approval.

Prior to executing a settlement agreement, or issuing a determination of the amount due under the termination clause of a contract, or approving or ratifying a subcontract settlement, the contracting officer shall submit each such settlement or determination for review and approval by a settlement review board if:

(a) The amount of settlement, by agreement or determination, involves $50,000 or more; or

(b) The settlement or determination is limited to adjustment of the fee of a cost-reimbursement contract or subcontract, and:

(1) In the case of a complete termination, the fee, as adjusted, is $50,000 or more; or

(2) In the case of a partial termination, the fee, as adjusted, with respect to the terminated portion of the contract or subcontract is $50,000 or more; or

(c) The head of the contracting activity concerned determines that a review of a specific case or class of cases is desirable; or

(d) The contracting officer, in his/her discretion, desires review by the settlement review board.

849.111-72 Submission of information.

(a) The contracting officer shall submit to the appropriate settlement review board a statement of the proposed settlement agreement or determination, supported by such detailed information as is required for an adequate review. This information should normally include copies of:

(1) The contractor's or subcontractor's settlement proposal,

(2) The audit report,

(3) The property disposal report and any required approvals in connection therewith,

(4) The contracting officer's memorandum explaining the settlement, and

(5) Any other relevant material that will assist the board in arriving at a decision to approve or disapprove the proposal. The board may, in its discretion, require the submission of additional information.

(b) When a review of a proposed settlement is required and the contract covers supplies, equipment or services, other than construction chargeable to Construction Appropriations, the contracting officer will submit the proposed settlement or determination to the settlement review board through the

Director, Office of Procurement and Supply.

(c) When the contract covers construction chargeable to Construction Appropriations and review is required, the proposed settlement or determination will be submitted by the contracting officer to the settlement review board through the Director, Office of Construction.

Subpart 849.4—Termination for Default

849.402 Termination of fixed-price contracts for default.

849.402–6 Repurchase against contractor's account.

(a) VA Form 90–2237, Request, Turn-in, and Receipt for Property or Services, or the file copy of the purchase order covering the purchase of supplies, equipment or services against a defaulting contractor shall be annotated to show the name of the defaulted contractor, the contract number, the contract price, the name of the contractor from whom procurement is made, the price paid, the competition secured and the difference in cost, if any, to the Veterans Administration. When reprocurement results in the payment of excess costs and the purchase is made through the Supply Fund, the excess costs, when collected, shall be deposited to the credit of the Supply Fund. In all other instances, the excess costs, when collected, shall be deposited to General Fund Receipts.

(b) Contracting officers, when purchasing against a defaulted contractor, shall procure the items in a manner that will protect the interests of the contractor as well those of the Government.

SUBCHAPTER H—CLAUSES AND FORMS

PART 852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 852.1—Instructions for Using Provisions and Clauses

Sec.

852.101 Using Part 852.

Subpart 852.2—Texts of Provisions and Clauses

852.203–70 Ethics in Government Act.
852.208–70 Changes in rates for public utilities.
852.209–70 Organizational conflicts of interest.
852.210–70 Requirements for operating and maintenance manuals.
852.210–71 Guarantee clause.
852.210–72 Inspection.
852.210–73 Frozen processed foods.
852.210–74 Telecommunications equipment.
852.210–75 Technical industry standards.
852.210–76 Noncompliance with packaging, packing and/or marking requirements.
852.212–70 Liquidated damages.
852.214–70 Caution to bidders—bid envelopes.
852.214–71 Alternate items.
852.214–72 Aggregate award.
852.214–73 Bid samples.
852.216–70 Estimated quantities for requirements contracts.
852.222–70 Contract Work Hours and Safety Standards Act—nursing home care contract supplement.
852.228–70 Bond premium adjustment.
852.229–70 Purchases from patient's funds.
852.229–71 Purchases for patients using Government funds and/or personal funds of patients.
852.236–70 Clauses for fixed-priced construction contracts.
852.236–71 Specifications and drawings for construction.
852.236–72 Performance of work by the contractor.
852.236–73 Bonds.
852.236–74 Inspection of construction.
852.236–75 Guaranty.
852.236–76 Correspondence.
852.236–77 Reference to "standards".
852.236–78 Government supervision.
852.236–79 Daily report of workers and materials.
852.236–80 Subcontracts and work coordination.
852.236–81 Work coordination (alternate provision).
852.236–82 Payments under fixed-price construction contracts (without NAS).
852.236–83 Payments under fixed-price construction contracts (including NAS).
852.236–84 Schedule of work progress.
852.236–85 Supplementary labor standards provisions.
852.236–86 Workman's compensation.
852.236–87 Safety requirements.
852.236–88 Contract changes.
852.237–70 Contractor responsibilities.
852.237–71 Indemnification and insurance (vehicle and aircraft service contracts).
852.247–70 Transportation clause for bid evaluation.
852.270–1 Representatives of contracting officers.
852.270–2 Bread and bakery products.
852.270–3 Purchase of shell fish.
852.270–4 Commercial advertising.
852.271–70 Services provided eligible beneficiaries.
852.271–71 Visits to Veterans Administration guidance centers.
852.271–72 Time spent by counselee in counseling process.
852.271–73 Use and publication of counseling results.
852.271–74 Inspection.
852.271–75 Extension of contract period.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 852.1—Instructions for Using Provisions and Clauses

852.101 Using Part 852.

Part 852 prescribes supplemental provisions and clauses to the FAR. Clause numbering is as prescribed in FAR 52.101 (i.e., supplementary Architect-Engineer and construction clauses are numbered 852.236–70, 852.236–71, etc.).

Subpart 852.2—Texts of Provisions and Clauses

852.203–70 Ethics in Government Act.

As prescribed by 803.101–3 the following certification will be made a part of all solicitations and requests for proposals anticipated to result in contracts exceeding the small purchase limitation:

Certification for the Ethics in Government Act

The offeror certifies that in developing a proposal in response to the solicitation of this contract, he/she did not utilize the services of any former Veterans Administration employee acting in violation of Title V of the Ethics in Government Act, 18 U.S.C. 207. That law provides that:

(a) A former Veterans Administration employee who, as such an employee, personally and substantially participated in a particular procurement process, is prohibited from appearing before the agency on behalf of an offeror responding to a solicitation resulting from that process and from making any contact with the agency on behalf of the offeror with intent of influencing action related to the solicitation;

(b) A former Veterans Administration employee who, during the last year as such an employee, was officially responsible for a particular procurement process, is prohibited, for two years after leaving the Veterans Administration, from appearing before the agency on behalf of an offeror responding to a solicitation resulting from that process and from making any contact with the agency on behalf of the offeror with the intent of influencing action related to the solicitation;

(c) Any former top-level Veterans Administration employee (i.e., executive-level employee; employee paid at the rate of GS–17 or above if designated pursuant to 5 CFR 737.25(b); and Senior Executive Service employee if designated pursuant to 5 CFR 737.25(b)) who, as such an employee, personally and substantially participated in a particular procurement process, is prohibited, for a period of two years, from representing, aiding, consulting, or assisting an offeror by presence before the Government at any formal or informal appearance related to that procurement process;

(d) For a period of one year, any former top-level employee of the Veterans Administration (as described in the preceding paragraph) is prohibited from appearing before the Veterans Administration on behalf of any offeror responding to a contract solicitation and is prohibited from making any oral or written communications with the Veterans Administration on behalf of such an offeror, with the intent of influencing action related to a contract.

(End of Clause)

852.208-70 Change in rates for public utilities.

When a contract covers services to be rendered by a public service corporation, and the rates charged for such services are regulated by a Federal, State, or municipal commission, the following clause will be included:

Change in Rates

The rates specified herein are not in excess of those charged the general public for similar service and will be increased or decreased when such action is approved by the governing regulatory commission.

(End of Clause)

852.209-70 Organizational conflicts of interest.

The following representation will be used as prescribed in 809.508-2:

Organizational Conflicts of Interest

(a) The offeror represents to the best of his/her knowledge and belief that the award of the contract would not involve organizational conflicts of interest as defined in this representation. The term organizational conflicts of interests shall mean that a relationship exists whereby an offeror or a contractor (including his/her chief executive, directors, proposed consultants and subcontractors) has interests which may: (1) Diminish his/her capacity to give impartial, technically sound, objective assistance and advice or may otherwise result in a biased work product; or (2) result in an unfair competitive advantage. It does not include the "normal flow of benefits" from the performance of a contract.

(b) Based on this representation and any other information solicited by the contracting officer, it may be determined organizational conflicts of interest exist which would warrant disqualifying the contractor for award of the contract unless the organizational conflicts of interest can be mitigated to the contracting officer's satisfaction by negotiating terms and conditions of the contract to that effect. In the case of a formally advertised solicitation, the apparent successful offeror may enter into a supplemental agreement which mitigates the organizational conflicts of interest.

(c) Nondisclosure or misrepresentations of organizational conflicts of interest at the time of the offer, or arising as a result of a modification to the contract, may result in the termination of the contract at no expense to the Government.

(End of Clause)

852.210-70 Requirements for operating and maintenance manuals.

(a) Solicitations and requests for proposals for technical medical equipment and devices issued by a field station will normally require the contractor to provide operating and maintenance manuals. Unless the station Chief, Engineering Service, indicates that such service manuals are not needed, each invitation for bid or request for proposal for technical medical equipment will include VA Specification No. X-1711, Documentation, Technical Service, for Technical Medical Equipment and Devices as a requirement. The number of such manuals required will be specified in both the solicitation and the resulting purchase order.

(b) Solicitations and requests for proposals for mechanical equipment (other than technical medical equipment and devices) issued by a field station will include the following clause:

Service Data Manual

The contractor agrees to furnish two copies of a manual, handbook or brochure containing operating, installation, and maintenance instructions (including pictures or illustrations, schematics, and complete repair/test guides as necessary). Where applicable, it will include electrical data and connection diagrams for all utilities. The instructions shall also contain a complete list of all replaceable parts showing part number, name, and quantity required.

(End of Clause)

(c) When the bid or proposal will result in the initial purchase (including each make and model) of a centrally procured item, the following clause will be used:

Service Data Manual

The contractor agrees, when requested by the contracting officer, to furnish not more than three copies of the technical documentation required by VA Specification X-1711 to the Service and Reclamation Division, VA Supply Depot, Hines, Ill. In addition, the contractor agrees to furnish two copies of the technical documentation required by VA Specification X-1711 with each piece of equipment sold as a result of the invitation for bid or request for proposal.

(End of Clause)

852.210-71 Guarantee clause.

(a) When the bid or proposal will result in any purchase, the following clause will be used:

Guarantee

The contractor guarantees the equipment against defective material, workmanship and performance for a period of ———,[1] said guarantee to run from date of acceptance of the equipment by the Government. The contractor agrees to furnish, without cost to the Government, replacement of all parts and material which are found to be defective during the guarantee period. Replacement of material and parts will be furnished to the Government at the point of installation, if installation is within the continental United States, or f.o.b. the continental U.S. port to be designated by the contracting officer if installation is outside of the continental United States. Cost of installation of replacement material and parts shall be borne by the contractor.[2]

(End of Clause)

(b) Where it is industry policy to furnish, but not install, replacement material and parts at the contractor's expense, the last sentence will be changed to indicate that cost of installation shall be borne by the Government. Where it is industry policy to: (1) Guarantee components for the life of the equipment (i.e., crystals in transmitters and receivers in radio communications systems); or (2) require that highly technical equipment be returned to the factory (at contractor's or Government's expense) for replacement of defective materials or parts, the clause used will be compatible with such policy.

852.210-72 Inspection.

(a) Contracts for property, other than packing house and dairy products and fresh and frozen fruits and vegetables will contain the following clause:

Rejected Goods

Rejected goods will be held subject to contractor's order for not more than 15 days, after which the rejected merchandise will be returned to the contractor's address at his/her risk and expense. Expenses incident to the examination and testing of materials or supplies which have been rejected will be charged to the contractor's account.

(End of Clause)

(b) Contracts for packinghouse and dairy products, bread and bakery products and for fresh and frozen fruits and vegetables will contain the following clause:

Rejected Goods

The contractor shall remove rejected supplies within 48 hours after notice of rejection. Supplies determined to be unfit for human consumption will not be removed without permission of the local health authorities. Supplies not removed within the allowed time may be destroyed. The Veterans Administration will not be responsible for nor pay for products rejected. The contractor will be liable for costs incident to examination of rejected products.

(End of Clause)

852.210-73 Frozen processed foods.

The following clause will be included in all solicitations for the purchase of frozen processed foods, issued by a field station:

Frozen Processed Foods

The products delivered under this contract shall be in excellent condition, shall not show evidence of defrosting, refreezing, or freezer

[1] Normally, insert one year. If industry policy covers a shorter or longer period, i.e., 90 days or for the life of the equipment, insert such period.

[2] The above clause will be modified to conform to standards of the industry involved.

burn and shall be transported and delivered to the consignee at a temperature of 10 degrees Fahrenheit or lower.

(End of Clause)

852.210–74 Telecommunications equipment.

(a) When a detailed purchase description of formal specification is the basis for solicitations for telecommunications equipment as defined in VA Manual MP–6, Part VIII, (available at any Veterans Administration station), solicitations, including those for construction, will include the following clause:

Special Notice

Descriptive literature. The submission of descriptive literature with offers is not required and voluntarily submitted descriptive literature which qualifies the offer will require rejection of the offer.

However, within 5 days after award of contract, the contractor will submit to the contracting officer literature describing the equipment he/she intends to furnish and indicating strict compliance with the specification requirements.

The contracting officer will, by written notice to the contractor within 20 calendar days after receipt of the literature, approve, conditionally approve, or disapprove the equipment proposed to be furnished. The notice of approval or conditional approval will not relieve the contractor from complying with all requirements of the specifications and all other terms and conditions of this contract. A notice of conditional approval will state any further action required of the contractor. A notice of disapproval will cite reasons therefor.

If the equipment is disapproved by the Government, the contractor will be subject to action under the Default provision of this contract. However, prior to default action the contractor will be permitted a period (at least 10 days) under that clause to submit additional descriptive literature on equipment originally offered or descriptive literature on other equipment.

The Government reserves the right to require an equitable adjustment of the contract price for any extension of the delivery schedule necessitated by additional descriptive literature evaluations.

(End of Clause)

(b) The descriptive literature to be furnished by the contractor after award in accordance with paragraph (a) of this section is subject to the controls established in 870.112(b).

(c) The time of delivery or performance to be specified in the solicitation will include the time required for submission, receipt, the evaluation and approval required by 870.112(b) of this chapter, and return to the contractor of the descriptive literature.

852.210–75 Technical industry standards.

When items are required to conform to technical industry standards, such as those adopted by Underwriter's Laboratories, Incorporated; Factory Mutual Laboratories; American Gas Association; American Society Mechanical Engineers; National Electrical Manufacturers' Association; American Society Heating, Refrigeration and Air Conditioning Engineers; or similar organizations where such standards are generally recognized and accepted in the industry involved, the invitation for bids, request for proposals or request for quotations will so state. In no instance, where there is a multiple choice of laboratories, shall the invitation for bid, request for proposal or request for quotation indicate that the label or certificate of only one such laboratory is acceptable. The following clause will be used unless comparable provisions are contained in the item specification:

Technical Industry Standards

The supplies or equipment required by this invitation for bid or request for proposal must conform to the standards of the ———[3] and ———[3] as to ———.[4] The successful bidder or offeror will be required to submit proof that the item(s) he furnishes conforms to this requirement. This proof may be in the form of a label or seal affixed to the equipment or supplies, warranting that they have been tested in accordance with and conform to the specified standards. The seal or label of any nationally recognized laboratory such as those listed by the National Fire Protection Association, Boston, Massachusetts, in the current edition of their publication "Research on Fire," is acceptable. Proof may also be furnished in the form of a certificate from one of these laboratories certifying that the item(s) furnished have been tested in accordance with and conform to the specified standards.

(End of Clause)

852.210–76 Noncompliance with packaging, packing, and/or marking requirements.

The following clause will be included in contracts for supplies for delivery to supply distribution warehouses or depots for storage and subsequent issue to a using activity. It may also be included when appropriate when delivery is direct to a using activity.

Noncompliance with Packaging, Packing and/or Marking Requirements

Failure to comply with the packaging, packing, and marking requirements indicated herein, or incorporated herein by reference, may result in rejection of the merchandise and request for replacement, or repackaging, repacking, and/or marking. The Government reserves the right without obtaining authority from the contractor to perform the required repackaging, repacking, and/or marking services and charge the contractor therefor at a rate of $16 per manhour for the first or fractional hour and $10 for any succeeding or fractional hour, or have the required repackaging, repacking, and/or marking services performed commercially under Government orders and charge the contractor therefor at the above rates. In connection with any discount offered, time will be computed from the date of completion of such repackaging, repacking, and/or marking services.

(End of Clause)

[3] Insert name(s) of organization(s), the standards of which are pertinent to the Government's needs.

[4] Insert pertinent standards, i.e. fire and casualty, safety and fire protection, etc.

852.212–70 Liquidated damages.

As prescribed in 812.204 and 836.206, the contracting officer may insert the following clause when appropriate:

Partial Performance and Acceptance

If any unit of the work contracted for is accepted in advance of the whole, the rate of liquidated damages assessed will be in the ratio that the value of the unaccepted work bears to the total amount of the contract. If a separate price for unaccepted work has not been stated in the contractor's bid, determination of the value thereof will be made from schedules of costs furnished by the contractor and approved by the contracting officer, as specified elsewhere in the contract.

(End of Clause)

852.214–70 Caution to bidders—bid envelopes.

As provided in 814.201, the following provision will be prominently placed on all IFB's:

Caution to Bidders—Bid Envelopes

It is the responsibility of each bidder to take all necessary precautions, including the use of a proper mailing cover, to insure that the bid price cannot be ascertained by anyone prior to bid opening. If a bid envelope is furnished with this invitation, the bidder is requested to use this envelope in submitting the bid. The bidder may, however, when it suits a purpose, use any suitable envelope, identified by the invitation number and bid opening time and date. If a bid envelope is not furnished, the bidder will complete and affix the enclosed Optional Form 17, Sealed Bid Label, to the lower left-hand corner of the envelope used in submitting the bid.

(End of Provision)

852.214–71 Alternate items.

As prescribed in 814.201, consideration of alternate items may be appropriate. The following clauses may be used under the specified conditions:

(a) When an alternate item is to be considered only if no bids or insufficient bids are received on the item desired, the following will be included in the invitation:

Alternate Item(s)

Bids on ——— [6] will be considered only if acceptable bids on ——— [6] are not received or do not satisfy the total requirement.

(End of Clause)

(b) When an alternate item will be considered on an equal basis with the item specified, the following will be included in the invitation:

Alternate Item(s)

Bids ——— [6] will be given equal consideration along with the ——— [6] and any such bids received may be accepted if to the advantage of the Government. Tie bids will be decided in favor of:[7]

(End of Clause)

(c) In addition to the clause in paragraph (a) or (b) of this section, the following clause will be included in the invitation when bids will be allowed on different packaging, unit designation, etc.

Alternate Packaging and Packing

The bidder's offer must clearly indicate the quantity, package size, unit, or other different feature upon which the quote is made. Evaluation of the alternate or multiple alternates will be made on a common denominator such as per ounce, per pound, etc., basis.

(End of Clause)

852.214–72 Aggregate award.

As provided in 814.201(f), the following clause is to be used:

Aggregate Award

The Veterans Administration reserves the right to make an award to the responsible bidder quoting the lowest aggregate price for all items, for any group of items, or on an item basis, whichever is more advantageous to the Government. Bids will be evaluated on the basis of additional cost to the Government that might result from making multiple awards. For this purpose, the cost of awarding and administering each additional contract is estimated to be $———.[7]

(End of Clause)

852.214–73 Bid samples.

As provided by and under the circumstances of 814.202–4, the following clause will be inserted in the IFB.

Bid Samples

All samples furnished must be plainly marked with the complete lettering and numbering of the item or subitems to which it relates, the name of the commodity, the Invitation for Bids number, and the name of the bidder. Cases or packages containing samples must be plainly marked "Samples" and all charges incident to the preparation and transportation of samples must be prepaid by the bidder. Bids must not be enclosed with samples.

(End of Clause)

852.216–70 Estimated quantities for requirements contracts.

(a) When definite quantities cannot be determined, solicitations for station-level requirements contracts will contain the applicable clause as set forth below. Solicitations issued by the Marketing Center will contain provisions developed by that Center for particular application to its operations, subject to legal review as prescribed in 801.602–70(c)(1).

(b) The following clause will be used for general equipment, supplies and services:

Estimated Quantities

As it is impossible to determine the exact quantities that will be required during the contract term, each bidder whose bid is accepted wholly or in part will be required to deliver all articles or services that may be ordered during the contract term, except as he/she otherwise indicates in his/her bid and except as otherwise provided herein. Bids will be considered if made with the proviso that the total quantities delivered shall not exceed a certain specified quantity. Bids offering less than 75 percent of the estimated requirement or which provide that the Government shall guarantee any definite quantity, will not be considered. The fact that quantities are estimated shall not relieve the contractor from filling all orders placed under this contract to the extent of his/her obligation. Also, the Veterans Administration shall not be relieved of its obligation to order from the contractor all articles or services that may, in the judgment of the ordering officer, be needed except that in the public exigency procurement may be made without regard to this contract.

(End of Clause)

(c) The following clause will be used in local coal-hauling contracts.

Estimated Quantity

The estimated requirements shown in this invitation for bids cover the requirements for the entire contract period. It is understood and agreed that during the period of this contract the Government may order and the contractor will haul such coal as may, in the opinion of the Government, be required, except that in the public exigency procurement may be made without regard to this contract.

(End of Clause)

(d) The following clause will be used for orthopedic, prosthetic, and optical supplies.

Quantities

The supplies and/or services listed in the attached schedule will be furnished at such time and in such quantities as they are required.

(End of Clause)

852.222–70 Contract Work Hours and Safety Standards Act—nursing home care contract supplement.

As prescribed in 822.304, nursing home care contracts will include the following clause.

Contract Workhours and Safety Standard Act—Nursing Home Care Contract Supplement

In the performance of any contract entered into pursuant to the provisions of 38 U.S.C. 620 to provide nursing home care of veterans, no contractor or subcontractor under such contract shall be deemed in violation of Section 102 of the Contract Work Hours and Safety Standards Act by virtue of failure to pay the overtime wages required by such section for work in excess of 8 hours in any calendar day or 40 hours in the workweek to any individual employed by establishment which is an institution primarily engaged in the care of the sick, the aged, or the mentally ill or defective who reside on the premises if, pursuant to an agreement or understanding arrived at between the employer and the employee before performance of the work, a work period of 14 consecutive days is accepted in lieu of the workweek of 7 consecutive days for the purpose of overtime compensation and if such individual receives compensation for employment in excess of 8 hours in any workday and in excess of 80 hours in such 14-day period at a rate not less than 1½ times the regular rate at which the individual is employed, computed in accordance with the requirements of the Fair Labor Standards Act of 1938, as amended.

(End of Clause)

852.228–70 Bond premium adjustment.

The following clause will be utilized as prescribed by 828.7000.

Bond Premium Adjustment

When net changes in original contract price affect the premium of a Corporate Surety Bond by $5 or more, the Government in determining basis for final settlement, will provide for bond premium adjustment computed at the rate shown in the bond.

(End of Clause)

852.229–70 Purchases from patient's funds.

When contracts are for items to be purchased solely from personal funds of patients, the following tax clause will be used in lieu of the Federal, State and local tax clause in FAR 52.229–1.

Sales or Use Taxes

The articles listed in this bid invitation will be purchased from personal funds of patients and prices bid herein include any sales or use tax heretofore imposed by any State, or by any duly constituted taxing authority therein,

---

[6] Contracting officer will insert an alternate item that is considered acceptable.

[6] Contracting officer will insert the required item and item number.

[7] Insert a dollar amount between $100 and $500, the exact amount to be determined by the contracting officer based upon the anticipated workload that would result from administering an additional contract.

having jurisdiction to levy such a tax, applicable to the material in this bid.
(End of clause)

852.229–71 Purchases for patients using Government funds and/or personal funds of patients.

When contracts are for items to be purchased from both Government funds and personal funds of patients, the following clause will be included as a part of the Federal, State, and local tax clause in FAR 52.229–1:

Sales or Use Taxes

Any article purchased from this contract, payable from personal funds of patients, will be subject to any applicable sales or use tax levied thereon by any State, or by duly constituted taxing authority therein having jurisdiction to levy such a tax; the total amount of the tax applicable to such purchase payable from personal funds of patients will be computed on the total amount of the order and will be shown as a separate item on the purchase order and invoice. The bidder shall identify the applicable taxes and rates in his/her bid.
(End of Clause)

852.236–70 Clauses for fixed-price construction contracts.

(a) The clauses prescribed in this section are set forth for use in fixed-price construction contracts in addition to those in FAR Subpart 52.2.

(b) Additional clauses not inconsistent with those in FAR 36.5 and 52.2 and those prescribed in this subpart are authorized when determined necessary or desirable by the contracting officer, and when approved as provided in Subpart 801.4.

(c) Clauses inconsistent with those contained in FAR Subpart 36.5 and 52.2 and this subpart, but considered essential to the procurement of Veterans Administration requirements, shall not be used unless the deviation procedure set forth in Subpart 801.4 has been complied with.

852.236–71 Specifications and drawings for construction.

The clause entitled "Specifications and Drawings for Construction," in FAR 52.236–21 is supplemented as follows:

Specifications and Drawings for Construction

(a) The contracting officer's interpretation of the drawings and specifications will be final, subject to the disputes clause.

(b) Large scale drawings supersede small scale drawings.

(c) Dimensions govern in all cases. Scaling of drawings may be done only for general location and general size of items.

(d) Dimensions shown of existing work and all dimensions required for work that is to connect with existing work, shall be verified by the contractor by actual measurement of the existing work. Any work at variance with that specified or shown in the drawings shall not be performed by the contractor until approved in writing by the contracting officer.
(End of Clause)

852.236–72 Performance of work by the contractor.

The clause entitled "Performance of Work by the Contractor," in FAR 52.236–1, is supplemented as follows:

Performance of Work by the Contractor

(a) Contract work accomplished on the site by laborers, mechanics, and foremen/forewomen on the contractor's payroll and under his/her direct supervision shall be included in establishing the percent of work to be performed by the contractor. Cost of material and equipment installed by such labor may be included. The work by contractor's executive, supervisory and clerical forces shall be excluded in establishing compliance with the requirements of the clause.

(b) The contractor shall submit, simultaneously with schedule of costs required by Payments under Fixed-Price Construction Contract provision of the General Conditions of these specifications, a statement designating the branch or branches of contract work to be performed with his/her forces. The approved schedule of costs will be used in determining value of a branch or branches, or portions therof, of the work for the purpose of this article.

(c) If, during the progress of work hereunder, the contractor requests a change in the branch or branches of the work to be performed by his/her forces and the contracting officer determines it to be in the best interests of the Government, the contracting officer may, at his/her discretion, authorize a change in such branch or branches of said work. Nothing contained herein shall permit a reduction in the percentage of work to be performed by the contractor with his/her forces, it being expressly understood that this is a contract requirement without right or privilege of reduction.

(d) In the event the contractor fails or refuses to meet the requirement of paragraph (a) of this section, it is expressly agreed that the contract price will be reduced by 15 percent of the value of that portion of the percentage requirement which is accomplished by others. For the purposes of this provision it is agreed that 15 percent is an acceptable estimate of the contractor's overhead and profit, or mark-up, on that portion of the work which the contractor fails or refuses to perform, with his/her own forces, in accordance with paragraph (a) of this section.
(End of Clause)

852.236–73 Bonds.

Bonds

For contracts in excess of $25,000, the contractor must furnish a Performance Bond (Standard Form 25) for 100 percent of the amount of the contract, and a Payment Bond (Standard Form 25–A) in the penal sums set forth below:

Amount of contract	Penal sum of bond
$25,000 to $1,000,000	Fifty (50) percent of the amount of the contract.
$1,000,000 to $5,000,000	Forty (40) percent of the amount of the contract.
$5,000,000 and over	$2,500,000.

When net changes in original contract price affect the premium of a Corporate Surety Bond by $5 or more, the Government in determining basis for final settlement, will provide for bond premium adjustment computed at the rate shown in the bond.
(End of Clause)

852.236–74 Inspection of construction.

The clause entitled, "Inspection of Construction," in FAR 52.246–12, is supplemented as follows:

Inspection of Construction

(a) Inspection of materials and articles furnished under this contract will be made at the site by the resident engineer, unless otherwise provided for in the specifications.

(b) Final inspection will not be made until the contract work is ready for beneficial use or occupancy. The contractor shall notify the contracting officer, through the resident engineer, fifteen (15) days prior to the date on which the work will be ready for final inspection.
(End of Clause)

852.236–75 Guaranty.

Guaranty

(a) Unless otherwise specifically provided for in the contract or specifications, the contractor, notwithstanding any final inspection, acceptance or payment, guarantees that all work performed and materials and equipment furnished under this contract are in accordance with the contract requirements. The contractor also guarantees that when installed all materials and equipment will be free from defects and will remain so for a period of at least one year from the date of acceptance by the Government.

(b) If defects of any kind should develop during the period such guarantees are in force, the contracting officer shall immediately notify the contractor in writing of such defects. The Government thereupon shall have the right, by a written notice to that effect, to require the contractor to repair or replace all inferior or defective work, material, or equipment or permit it to remain in place and assess the contractor the costs he/she (the contractor) would have incurred had he/she been required to effect repair or replacement.

(c) Any correction or replacement of parts, materials, equipment, supplies or construction made pursuant to the provisions of this clause shall also be subject to the provisions of this clause to the same extent as parts, materials, equipment, supplies or construction originally installed. The warranty with respect to such new or corrected parts, materials, equipment, supplies or construction shall be equal in duration as that set forth in (a) above and

shall run from the date that such parts, materials, equipment, supplies or construction are replaced or corrected and accepted by the Government.

(d) The contractor guarantees to reimburse the Government for, or to repair or replace, any damages to the site, buildings, or contents thereof that are caused by inferior or defective workmanship, or the use of inferior or defective materials or equipment in the performance of this contract. The contracting officer shall immediately notify the contractor in writing when such damage occurs. The Government shall have the right to require the contractor to repair or replace such damaged areas or equipment, or elect to permit such damage to remain as is and assess the contractor the costs he/she would have incurred had he/she been required to effect repair or replacement.

(e) Should the contractor fail to proceed promptly, after notification by the contracting officer, to repair or replace any inferior or defective work, material, or equipment, or damage to the site, buildings, or contents, thereof, caused by inferior or defective work, or the use of inferior or defective materials, or equipment, the Government may have such work, material, equipment or damage repaired or replaced and charge all costs incident thereto to the contractor.

(f) Any special guaranties that may be required under the contract, shall be subject to the elections set forth above unless otherwise provided in such special guaranties.

(g) The decision of the contracting officer as to liability of the contractor under this clause is subject to the appeal procedures provided for in the disputes clause of this contract.

(End of Clause)

852.236-76 Correspondence.

Correspondence

All correspondence relative to this contract shall bear Specification Number, Project Number, Veterans' Administration Contract Number, title of project and name of station.

(End of Clause)

852.236-77 Reference to "standards."

Standards

(a) Any materials, equipment, or workmanship specified by references to number, symbol, or title of any specific Federal, Industry or Government Agency Standard Specification shall comply with all applicable provisions of such standard specifications, except as limited to type, class or grade, or modified in contract specifications. Reference to "Standards" referred to in the contract specifications, except as modified, shall have full force and effect as though printed in detail in specifications.

(b) Federal Specification numbers refer to specifications issued by General Services Administration. Such specifications may be seen at the Office of Construction, Veterans Administration, Washington, D.C. or at the office of the resident engineer for this project.

(End of Clause

852.236-78 Government supervision.

Government Supervision

(a) The work will be under the direction of the Veterans Administration contracting officer, who may designate another VA employee to act as resident engineer at the construction site.

(b) Except as provided below, the resident engineer's directions will not conflict with or change contract requirements.

(c) Within the limits of any specific authority delegated by the contracting officer, the resident engineer may by written direction make changes in the work. The contractor shall be advised of the extent of such authority prior to execution of any work under the contract.

(End of Clause)

852.236-79 Daily report of workers and materials.

Daily Report of Workers and Material

The contractor shall furnish to the resident engineer each day a consolidated report for the preceding work day in which is shown the number of laborers, mechanics, foremen/forewomen and pieces of heavy equipment used or employed by the contractor and subcontractors. The report shall bear the name of the firm, the branch of work which they perform such as concrete, plastering, masonry, plumbing, sheet metal work, etc. The report shall give a breakdown of employees by crafts, location where employed, and work performed. The report shall also list materials delivered to the site on the date covered by the report.

(End of Clause)

852.236-80 Subcontracts and work coordination.

The following clause is for use except as provided in 852.236-81:

Subcontracts and Work Coordination

(a) Nothing contained in this contract shall be construed as creating any contractual relationship between any subcontractor and the Government. Divisions or sections of specifications are not intended to control the contractor in dividing work among subcontractors, or to limit work performed by any trade.

(b) The contractor shall be responsible to the Government for acts and omissions of his/her own employees, and of the subcontractors and their employees. The contractor shall also be responsible for coordination of the work of the trades, subcontractors, and material suppliers.

(c) The Government or its representatives will not undertake to settle any differences between the contractor and subcontractors or between subcontractors.

(d) The Government reserves the right to refuse to permit employment on the work or require dismissal from the work of any subcontractor who, by reason of previous unsatisfactory work on Veterans Administration projects or for any other reason, is considered by the contracting officer to be incompetent or otherwise objectionable.

(End of Clause)

852.236-81 Work coordination (alternate provision).

For new construction work with complex mechanical-electrical work, the following provision relating to work coordination may be substituted for paragraph (b) of the clause set forth in 852.236-80:

Work Coordination

The contractor shall be responsible to the Government for acts and omissions of his/her own employees, and subcontractors and their employees. The contractor shall also be responsible for coordination of the work of the trades, subcontractors, and material suppliers. The contractor shall, in advance of the work, prepare coordination drawings showing the location of openings through slabs, the pipe sleeves and hanger inserts, as well as the location and elevation of utility lines, including, but not limited to, conveyor systems, pneumatic tubes, ducts, and conduits and pipes 2 inches and larger in diameter. These drawings, including plans, elevations, and sections as appropriate shall clearly show the manner in which the utilities fit into the available space and relate to each other and to existing building elements. Drawings shall be of appropriate scale to satisfy the previously stated purposes, but not smaller than ⅜-inch scale. Drawings may be composite (with distinctive colors for the various trades) or may be separate but fully coordinated drawings (such as sepias or photographic paper reproducibles) of the same scale. Separate drawings shall depict identical building areas or sections and shall be capable of being overlaid in any combination. The submitted drawings for a given area of the project shall show the work of all trades which will be involved in that particular area. Six complete composite drawings or six complete sets of separate reproducible drawings shall be received by the Government not less than 20 days prior to the scheduled start of the work in the area illustrated by the drawings, for the purpose of showing the contractor's planned methods of installation. The objectives of such drawings are to promote carefully planned work sequence and proper trade coordination, in order to assure the expeditious solutions of problems and the installation of lines and equipment as contemplated by the contract documents while avoiding or minimizing additional costs to the contractor and to the Government. In the event the contractor, in coordinating the various installations and in planning the method of installation, finds a conflict in location or elevation of any of the utilities with themselves, with structural items or with other construction items, he/she shall bring this conflict to the attention of the contracting officer immediately. In doing so, the contractor shall explain the proposed method of solving the problem or shall request instructions as to how to proceed if adjustments beyond those of usual trades coordination are necessary. Utilities installation work will not proceed in any area prior to the submission and completion of the Government review of the coordinated drawings for that area, nor in any area in which conflicts are disclosed by the

coordination drawings until the conflicts have been corrected to the satisfaction of the contracting officer. It is the responsibility of the contractor to submit the required drawings in a timely manner consistent with the requirements to complete the work covered by this contract within the prescribed contract time.

(End of Clause)

852.236–82 Payments under fixed-price construction contracts (without NAS).

For contracts that do not contain a section entitled "Network Analysis System (NAS)," the clause entitled "Payments under Fixed-Price Construction Contracts" in FAR 52.232–5 will be supplemented as follows:

Payments Under Fixed-Price Construction Contracts

Clause entitled "Payments Under Fixed-Price Construction Contracts" in FAR 52.232–5 is implemented as follows:

(a) Retainage:

(1) In accordance with the clause entitled "Payments to Contractor," the contracting officer may retain funds:

(i) Where performance under the contract has been determined to be deficient or the contractor has performed in an unsatisfactory manner in the past; or

(ii) As the contract nears completion, to ensure that deficiencies will be corrected and that completion is timely.

Examples of deficient performance justifying a retention of funds include, but are not restricted to, the following:

(i) Unsatisfactory progress as determined by the contracting officer;

(ii) Failure to meet schedule in Schedule of Work Progress;

(iii) Failure to present submittals in a timely manner; or

(iv) Failure to comply in good faith with approved subcontracting plans, certifications or contract requirements.

(2) Any level of retention shall not exceed 10 percent either where there is determined to be unsatisfactory performance, or when the retainage is to ensure satisfactory completion. Retained amounts shall be paid promptly upon completion of all contract requirements, but nothing contained in this subparagraph shall be construed as limiting the contracting officer's right to withhold funds under other provisions of the contract or in accordance with the general law and regulations regarding the administration of Government contracts.

(b) The contractor shall submit a schedule of cost to the contracting officer for approval. Such schedule will be signed and submitted in triplicate. The approved cost schedule will be one of the bases for determining progress payments to the contractor for work completed. This schedule shall show cost by the branches of work for each building or unit of the contract, as instructed by the resident engineer.

(1) The branches shall be subdivided into as many subbranches as are necessary to cover all component parts of the contract work.

(2) Costs as shown on this schedule must be true costs and, should the resident engineer so desire he/she may require the contractor to submit the original estimate sheets or other information to substantiate detailed makeup of schedule.

(3) The sum of subbranches, as applied to each branch, shall equal the total cost of such branch. The total costs of all branches shall equal the contract price.

(4) Insurance and similar items shall be prorated and included in the cost of each branch of the work.

(5) The cost schedule shall include separate cost information for the systems listed below. The percentages listed below are proportions of the cost listed in contractor's cost schedule and identify, for payment purposes, the value of the work to adjust, correct and test systems after the material has been installed. Payment of the listed percentages will be made only after the contractor has demonstrated that each of the systems is substantially complete and operates as required by the contract.

Value of adjusting, correcting, and testing system

System:	Percent
Pneumatic tube system	10
Incinerators (medical waste and trash)	5
Sewage treatment plant equipment	5
Water treatment plant equipment	5
Washers (dish, cage, glass, etc.)	5
Sterilizing equipment	5
Water distilling equipment	5
Prefab temperature rooms (cold, constant temperature)	5
Entire air-conditioning system (Specified under 600 Sections)	5
Entire boiler plant system (Specified under 700 Sections)	5
General supply conveyors	10
Food service conveyors	10
Pneumatic soiled linen and trash system	10
Elevators and dumbwaiters	10
Materials transport system	10
Engine-generator system	5
Primary switchgear	5
Secondary switchgear	5
Fire alarm system	5
Nurse call system	5
Intercom system	5
Radio system	5
TV (entertainment) system	5

(c) In addition to this cost schedule, the contractor shall submit such unit costs as may be specifically requested. The unit costs shall be those used by the contractor in preparing his/her bid and will not be binding as pertaining to any contract changes.

(d) The contracting officer will consider for monthly progress payments material and/or equipment procured by the contractor and stored on the construction site as space is available, or at a local approved location off the site, under such terms and conditions as such officer approves, including but not limited to the following:

(1) The material or equipment is in accordance with the contract requirements and/or approved samples and shop drawings.

(2) Only those materials and/or equipment as are approved by the resident engineer for storage will be included.

(3) Such materials and/or equipment will be stored separately and will be readily available for inspection and inventory by the resident engineer.

(4) Such materials and/or equipment will be protected against weather, theft and other hazards and will not be subjected to deterioration.

(5) All of the other terms, provisions, conditions and covenants contained in the contract shall be and remain in full force and effect as therein provided.

(6) A supplemental agreement will be executed between the Government and the contractor with the consent of the contractor's surety for off-site storage.

(e) The contractor, prior to receiving a progress or final payment under this contract, shall submit to the contracting officer a certification that the contractor has made payment from proceeds of prior payments, or that timely payment will be made from the proceeds of the progress or final payment then due, to subcontractors and suppliers in accordance with the contractual arrangements with them.

(f) The Government reserves the right to withhold payment until samples, shop drawings, engineer's certificates, additional bonds, payrolls, weekly statements of compliance, nondiscrimination compliance reports, or any other things required by this contract, have been submitted to the satisfaction of the contracting officer.

(End of Clause)

852.236.83 Payments under fixed-price construction contracts (including NAS).

For contracts that contain a section entitled "Network Analysis System (NAS)," the clause entitled "Payments under Fixed-Price Construction Contracts" in FAR 52.232–5 is supplemented as follows:

Payments Under Fixed-Price Construction Contracts

Clause entitled "Payments under Fixed-Price Construction Contracts in FAR 52.232–5 is implemented as follows:

(a) Retainage:

(1) In accordance with the clause entitled "Payments to Contractor," the contracting officer may retain funds:

(i) Where performance under the contract has been determined to be deficient or the contractor has performed in an unsatisfactory manner in the past; or

(ii) As the contract nears completion, to ensure that deficiencies will be corrected and that completion is timely.

Examples of deficient performance justifying a retention of funds include, but are not restricted to, the following:

(i) Unsatisfactory progress as determined by the contracting officer;

(ii) Failure either to meet schedules in Section NAS (Network Analysis System), or to process the Interim Arrow Diagram/ Complete Project Arrow Diagram;

(iii) Failure to present submittals in a timely manner; or

(iv) Failure to comply in good faith with approved subcontracting plans, certifications or contract requirements.

(2) Any level of retention shall not exceed 10 percent either where there is determined to be unsatisfactory performance, or when the retainage is to ensure satisfactory completion. Retained amounts shall be paid promptly upon completion of all contract requirements, but nothing contained in this subparagraph shall be construed as limiting the contracting officer's right to withhold funds under other provisions of the contract or in accordance with the general law and regulations regarding the administration of Government contracts.

(b) The contractor shall submit a schedule of costs in accordance with the requirements of Section NAS (Network Analysis System) to the contracting officer for approval. The approved cost schedule will be one of the bases for determining progress payments to the contractor for work completed.

(1) Costs as shown on this schedule must be true costs and, should the resident engineer so desire, he/she may require the contractor to submit his/her original estimate sheets or other information to substantiate the detailed makeup of the cost schedule.

(2) The total costs of all activities shall equal the contract price.

(3) Bonds, insurance and similar items shall be prorated and included in each activity cost of the critical path method (CPM) network.

(4) The CPM network shall include a separate cost loaded activity for adjusting and testing of the systems listed below. The percentages listed below will be used to determine the cost of adjust and test activities and identify, for payment purposes, the value of the work to adjust, correct and test systems after the material has been installed.

(5) Payment for adjust and test activities will be made only after the contractor has demonstrated that each of the systems is substantially complete and operates as required by the contract.

Values of adjusting correcting, and testing system

System:	Percent
Pneumatic tube system	10
Incinerators (medical waste and trash	5
Sewage treatment plant equipment	5
Water treatment plant equipment	5
Washers (dish, cage, glass, etc.)	5
Sterilizing equipment	5
Prefab temperature rooms (cold, constant temperature)	5

Values of adjusting correcting, and testing system—Continued

	Percent
Entire air-conditioning system (Specified under 700 Sections)	5
General supply conveyors	5
Food service conveyors	10
Pneumatic soiled linen and trash system	10
Elevators and dumbwaiters	10
Materials transport system	10
Enginer-generator system	5
Primary switchgear	5
Secondary switchgear	5
Secondary switchgear	5
Fire alarm system	5
Nurse call system	5
Intercom system	5
Redio system	5
TV (entertainment) system	5

(c) In addition to this cost schedule, the contractor shall submit such unit costs as may be specifically requested. The unit costs shall be those used by the contractor in preparing his/her bid and will not be binding as pertaining to any contract changes.

(d) The contracting officer will consider for monthly progress payments material and/or equipment procured by the contractor and stored on the construction site as space is available, or at a local approved location off the site, under such terms and conditions as such officer approves, including but not limited to the following:

(1) The material or equipment is in accordance with the contract requirements and/or approved samples and shop drawings.

(2) Only those materials and/or equipment as are approved by the resident engineer for storage will be included.

(3) Such materials and/or equipment will be stored separately and will be readily available for inspection and inventory by the resident engineer.

(4) Such materials and/or equipment will be protected against weather, theft and other hazards and will not be subjected to deterioration.

(5) All of the other terms, provisions, conditions and covenants contained in the contract shall be and remain in full force and effect as therein provided.

(6) A supplemental agreement will be executed between the Government and the contractor with the consent of the contractor's surety for off-site storage.

(e) The contractor, prior to receiving a progress or final payment under this contract, shall submit to the contracting officer a certification that the contractor has made payment from proceeds of prior payments, or that timely payment will be made from the proceeds of the progress or final payment then due, to subcontractors and suppliers in accordance with the contractual arrangements with them.

(f) The Government reserves the right to withhold payment until samples, shop drawings, engineer's certificates, additional bonds, payrolls, weekly statements of compliance, nondiscrimination compliance reports, or any other things required by this contract, have been submitted to the satisfaction of the contracting officer.

(End of Clause)

852.236-84 Schedule of work progress.

Schedule of work progress

(a) The contractor shall submit with the schedule of costs, as required by supplemental "Payments under Fixed-Price Construction Contracts" clause a progress curve indicating anticipated work progression against lapsed contract time, for approval of the contracting officer. Submission shall be in quadruplicate on VA Form 08-6159, Construction Progress Chart, furnished by the Veterans Administration, and shall be signed by the contractor. The curve shall start on the date the contractor receives the "Notice to Proceed" and terminate on the original contract completion date. Both dates shall be indicated on the Construction Progress Chart.

(b) The scheduled percent completion will be compared to the actual percent completion to determine if the contract work is on schedule. Monthly progress reports will be prepared by the Veterans Administration on a Contract Progress Report form (VA Form 08-6001 or 08-6001a, as appropriate). This report will indicate both scheduled percent completion and actual percent completion. The scheduled percent completion will be taken from the approved progress curve. The actual percent completion will be based on the value of work in place divided by current contract amount.

(c) The progress curve will be revised when additional time is granted for any reason. The curve will be revised only for individual or cumulative time extensions of 15 days or more. Either of the following methods of revising the curve will be used, depending on circumstances.

(1) Where there is additional time granted for reasons which do not immediately affect the job progress, such as changed work, use the following method: The curve is replotted between two points, starting with the point on the original or current curve established by the date when the change was ordered. The second point is the extended contract completion date resulting from the change.

(2) Where there is additional time granted for reasons which immediately affect the job progress, use the following method: The curve is replotted by means of horizontal displacement to the original or current curve. The point on the original or current curve established by the date when the change was ordered or when job progress was affected is determined. The number of days granted is plotted horizontally from this point to establish the displacement. The remainder of the curve is replotted to the extended contract completion date.

(d) The revised curve will be used for reporting future scheduled percent completion.

(End of Clause)

852.236-85 Supplementary labor standards provisions.

Supplementary Labor Standards Provisions

(a) The wage determination decision of the Secretary of Labor is set forth in section GR, General Requirements, of this contract. It is the result of a study of wage conditions in the locality and establishes the minimum hourly rates of wages and fringe benefits for the described classes of labor in accordance with applicable law. No increase in the contract price will be allowed or authorized because of payment of wage rates in excess of those listed.

(b) The contractor shall submit the required copies of payrolls to the contracting officer through the resident engineer or engineer officer, when acting in that capacity. Department of Labor Form WH-347, Payroll, available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, may be used for this purpose. If, however, the contractor or subcontractor elects to use an individually composed payroll form, it shall contain the same information shown on Form WH-347, and in addition be accompanied by Department of Labor Form WH-348, Statement of Compliance, or any other form containing the exact wording of this form.

(End of clause)

852.236-86 Workmen's compensation.

Workmen's Compensation

The Act of June 25, 1936, 49 Stat. 1938 (40 U.S.C. 290) authorizes the constituted authority of the several states to apply their workmen's compensation laws to all lands and premises owned or held by the United States.

(End of Clause)

852.236-87 Safety requirements.

The following clause is included to designate the VA Safety Officer and his/her responsibilities:

Accident Prevention

(a) The resident engineer on all assigned construction projects is designated as the VA Safety Officer, and as such is responsible for enforcing all safety regulations as they apply to the safety of Veterans Administration employees, visitors, and patients. Regular safety inspections are conducted by the resident engineer weekly, and all noted violations of safety and health regulations will be brought to the attention of the contractor who will take immediate action to correct such violations. If corrective action is not taken promptly, a copy of the resident engineer's report will be forwarded to the Department of Labor.

(b) "Safety and Health Regulations for Construction," may be obtained from any regional office of the Occupational Safety and Health Administration, Department of Labor.

(End of Clause)

852.236-88 Contract changes.

The Clauses, entitled "Changes" in FAR 52.236-2 and "Differing Site Conditions" in FAR 52.236-2 will be supplemented with the following two clauses. The clause in paragraph (a) will apply to negotiated changes exceeding $500,000 and does not provide ceiling rates for indirect expenses. Such expenses will be included as part of the submission of certified cost and pricing data, will be negotiated by the contracting officer and will be audited in accordance with 815.805-5. When the negotiated change will be less than $500,000 the clause specified in paragraph (b) will apply. If cost and pricing data is required it will be certified and will include indirect expenses, notwithstanding the ceilings specified in the clause. It must be emphasized that these indirect cost rates are ceiling rates only, and the contracting officer will negotiate the indirect expense rates within the ceiling limitations. The contractor, therefore, will not propose ceiling rates in lieu of his/her actual indirect expense rates.

(a) Applicable to changes costing $500,000 or more:

Changes—Supplement (for Changes Costing $500,000 or More)

Clauses entitled "Changes" in FAR 52.243-4 and "Differing Site Conditions" in FAR 52.236-2 are supplemented as follows:

(a) When requested by the contracting officer, the contractor shall submit proposals for changes in work to the resident engineer. Proposals, to be submitted within 30 calendar days after receipt of request, shall be in legible form, original and two copies, with an itemized breakdown that will include material, quantities, unit prices, labor costs (separated into trades), construction equipment, etc. (Labor costs are to be identified with specific material placed or operation performed.) The contractor must obtain and furnish with a proposal an itemized breakdown as described above, signed by each subcontractor participating in the change regardless of tier. When certified cost or pricing data are required under FAR Subpart 15.804, the cost of pricing data shall be submitted on Standard Form 1411 (SF 1411), Contract Pricing Proposal Cover Sheet, in accordance with FAR 15.804-6. No itemized breakdown will be required for proposals amounting to less than $1,000.

(b) When the necessity to proceed with a change does not allow sufficient time to check a proposal or because of failure to reach an agreement, the contracting officer may order the contractor to proceed (proceed order) on the basis of a tentative price based on the best estimate available at the time, with the firm price to be determined later. Furthermore, if a proceed order is issued the contractor shall submit a proposal for changes in work within 30 calendar days.

(c) If the contractor's proposal required by paragraphs (a) and (b) of this clause is not received within 30 calendar days, or if agreement has not been reached, the contracting officer will consider issuing a unilateral change order.

(End of Clause)

(b) Applicable to changes costing less than $500,000:

Changes)—Supplement (for Changes Costing Less than $500,000)

Clauses entitled "Changes" in FAR 52.243-4 and "Differing Site Conditions" in FAR 52.236-2 are supplemented as follows:

(a) When requested by the contracting officer, the contractor shall submit proposals for changes in work to the resident engineer. Proposals, to be submitted within 30 calendar days after receipt of request, shall be in legible form, original and two copies, with an itemized breakdown that will include material, quantities, unit prices, labor costs (separated into trades), construction equipment, etc. (Labor costs are to be identified with specific material placed or operation performed.) The contractor must obtain and furnish with a proposal an itemized breakdown as described above, signed by each subcontractor participating in the change regardless of tier. No itemized breakdown will be required for proposals amounting to less than $1,000.

(b) When the necessity to proceed with a change does not allow sufficient time to check a proposal or because of failure to reach an agreement, the contracting officer may order the contractor to proceed (proceed order) on the basis of a tentative price based on the best estimate available at the time, with the firm price to be determined later. Furthermore, if a proceed order is issued the contractor shall submit a proposal for changes in work within 30 calendar days.

(c) If the contractor's proposal required by paragraphs (a) and (b) of this clause is not received within 30 calendar days, or if agreement has not been reached, the contracting officer will consider issuing a unilateral change order.

(d) Allowances not to exceed 10 percent each for overhead and profit for the party performing the work will be based on the value of labor, material, and use of construction equipment required to accomplish the change. As the value of the change increases, a declining scale will be used in negotiating the percentage of overhead and profit. Allowable percentages on changes will not exceed the following: 10 percent overhead and 10 percent profit on the first $20,000; 7½ percent overhead and 7½ percent profit on the next $30,000; 5 percent overhead and 5 percent profit on balance over $50,000. Profit shall be computed by multiplying the profit percentage by the sum of the direct costs and computed overhead costs.

(e) The prime contractor's or upper-tier subcontractor's fee on work performed by lower-tier subcontractors will be based on the net increased cost to the prime contractor or upper-tier subcontractor, as applicable. Allowable fee on changes will not exceed the following: 10 percent fee on the first $20,000; 7½ percent fee on the next $30,000; and 5 percent fee on balance over $50,000.

(f) Not more than four percentages, none of which exceed the percentages shown above, will be allowed regardless of the number of tiers of subcontractors.

(g) Where the contractor's or subcontractor's portion of a change involves credit items, such items must be deducted prior to adding overhead and profit for the party performing the work. The contractor's fee is limited to the net increase to contractor of subcontractor's portions cost computed in accordance herewith.

(h) Where a change involves credit items only, a proper measure of the amount of downward adjustment in the contract price is the reasonable cost to the contractor if he/she had performed the deleted work. A reasonable allowance for overhead and profit are properly includable as part of the downward adjustment for a deductive change. The amount of such allowance is subject to negotiation.

(i) Cost of Federal Old Age Benefit (Social Security) tax and of Workmen's Compensation and Public Liability insurance appertaining to changes are allowable. While no percentage will be allowed thereon for overhead or profit, prime contractor's fee will be allowed on such items in subcontractor's proposals.

(j) Overhead and contractor's fee percentages shall be considered to include insurance other than mentioned herein, field and office supervisors and assistants, watchmen, use of small tools, incidental job burdens, and general home office expenses and no separate allowance will be made therefor.

(End of Clause)

852.237-70 Contractor responsibilities.

(a) Fixed-Price negotiated or advertised service contracts, other than automobile, ambulance and aircraft services, will include the following clause:

Contractor Responsibilities

The contractor shall obtain all necessary licenses and/or permits required to perform this work. He/she shall take all reasonable precautions necessary to protect persons and property from injury or damage during the performance of this contract. He/she shall be responsible for any injury to himself/herself, his/her employees, as well as for any damage to personal or public property that occurs during the performance of this contract that is caused by his/her employee's fault or negligence, and shall maintain personal liability and property damage insurance having coverage for a limit as required by the laws of the State of ———. Further, it is agreed that any negligence of the Government, its officers, agents, servants and employees, shall not be the responsibility of the contractor hereunder with the regard to any claims, loss, damage, injury and liability resulting therefrom.

(End of Clause)

(b) Automobile, ambulance and aircraft service contracts will utilize the clause prescribed in 852.237-71.

852.237-71 Indemnification and insurance (vehicle and aircraft service contracts).

(a) Contracts for vehicle and aircraft services will utilize the following clause as provided in 828.306.

Indemnification and Insurance

(a) *Indemnification.* The contractor expressly agrees to indemnify and save the Government, its officers, agents, servants, and employees harmless from and against any and all claims, loss, damage, injury, and liability, however caused, resulting from, arising out of, or in any way connected with the performance of work under this agreement. Further, it is agreed that any negligence or alleged negligence of the Government, its offficers, agents, servants, and employees, shall not be a bar to a claim for indemnification unless the act or omission of the Government, its officers, agents, servants, and employees is the sole, competent, and producing cause of such claims, loss, damage, injury, and liability. At the option of the contractor, and subject to the approval by the contracting officer of the sources, insurance coverage may be employed as guaranty of indemnification.

(b) *Insurance.* Satisfactory insurance coverage is a condition precedent to award of a contract. In general, a successful bidder must present safisfactory evidence of full compliance with State and local requirements, or those below stipulated, whichever are the greater. More specifically, workman's compensation and employer's liability coverage will conform to applicable State law requirements for the service contemplated, whereas general liability and automobile liability of comprehensive type, shall in the absence of higher statutory minimums, be required in the amounts per vehicle used of not less than $200,000 per person and $500,000 per occurrence for bodily injury and $20,000 per occurrence for property damage. State approved sources of insurance coverage ordinarily will be deemed acceptable to the Veterans' Administration installation, subject to timely certifications by such sources of the types and limits of the coverages afforded by the sources to the bidder. (In those instances where airplane service is to be used, substitute the word "aircraft" for "automobile" and "vehicle" and modify coverage to require aircraft public and passenger liability insurance of at least $200,000 per passenger and $500,000 per occurrence for bodily injury, other than passenger liability, and $200,000 per occurrence for property damage. Coverage for passenger liability bodily injury shall be at least $200,000 multiplied by the number of seats or passengers, whichever is greater.)

(End of Clause)

(b) *Exceptions.* The provisions of this 852.237-71 do not apply to emergency or sporadic ambulance service authorized by VA Manual MP-1, Part II, Chapter 3: *Provided,* That such service is not used solely for the purpose of avoiding entering into a continuing contract. *Provided further,* That such services will be obtained from firms known to carry insurance coverage in accordance with State or local requirements.

852.247-70 Transportation clause for bid evaluation.

In circumstance enunciated in 847.305-70, the following clause will be inserted in the IFB:

Determining Transportation Costs for Bid Evaluation

For the purpose of evaluating bids and for not other purpose, the delivered price per unit will be determined by adding the nationwide average transportation charge to the f.o.b. origin bid prices. The nationwide average transportation charge will be determined by applying the following formula: Multiply the guaranteed shipping weight by the freight, parcel post, or express rate, whichever is proper, to each destination shown below and then multiply the resulting transportation charges by the anticipated demand factor shown for each destination. Total the resulting weighted transportation charges for all destinations and divide the total by 20 to give the nationwide average transportation charge.

Anticipated Demand

	Factor
Area destination:	
Oakland, California	3
Dallas, Texas	2
Omaha, Nebraska	3
Fort Wayne, Indiana	4
Atlanta, Georgia	3
New York, New York	5
Total of factors	20

(End of Clause)

852.270-1 Representatives of contracting officers.

Whenever it is considered necessary to designate a representative under 801.603-70, the following provisions will be made a part of the request for proposal or invitation to bid:

Representatives of Contracting Officers

The contracting officer reserves the right to designate representatives to act for him/her in furnishing technical guidance and advice or generally supervise the work to be performed under this contract. Such designation will be in writing and will define the scope and limitations of the designee's authority. A copy of the designation shall be furnished the contractor.

(End of Clause)

852.270-2 Bread and bakery products.

The following clause will be inserted in all contracts for bread and bakery products:

Quantities

The bidder agrees to furnish up to 25 percent more or 25 percent less than the quantities awarded when ordered by the Veterans Administration.

(End of Clause)

852.270-3 Purchase of shell fish.

Invitations for bids or requests for proposals covering oysters, clams or mussels, fresh or frozen, will contain the following clauses:

Shellfish

The bidder certifies that oysters, clams, and mussels will be furnished only from plants approved by and operated under the supervision of shell fish authorities of States whose certifications are endorsed currently by the U.S. Public Health Service, and the names and certificate numbers of those shell fish dealers must appear on current lists published by the U.S. Public Health Service. These items shall be packed and delivered in approved containers, sealed in such manner that tampering is easily discernible, and marked with packer's certificate number impressed or embossed on the side of such containers and preceded by the State abbreviation. Containers shall be tagged or labeled to show the name and address of the approved producer or shipper, the name of the State of origin, and the certificate number of the approved producer or shipper.

(End of Clause)

852.270-4 Commercial advertising.

All invitations for bids will include the following clause:

Commercial Advertising

The bidder agrees that if a contract is awarded to him/her, as a result of this solicitation, he/she will not advertise the award of the contract in his/her commercial advertising in such a manner as to state or imply that the Veterans Administration endorses a product, project or commercial line of endeavor.

(End of Clause)

852.271-70 Services provided eligible beneficiaries.

The following clause will be included in all contracts covering services provided to eligible beneficiaries:

Nondiscrimination in Services Provided Beneficiaries

The contractor agrees to provide all services specified in this contract for any person determined eligible by the Chief Medical Director, or designee, regardless of the race, color, religion, sex, or national origin of the person for whom such services are ordered. The contractor further warrants that he/she will not resort to subcontracting as a means of circumventing this provision.

(End of Clause)

852.271-71 Visits to Veterans Administration guidance centers.

The following clause will be included in contracts entered into for services relating to vocational counseling:

Inspection

Any duly authorized representative of the Veterans Administration shall at all reasonable times be permitted to inspect the counseling and testing operations being performed under this contract and the records of these operations.

(End of Clause)

852.271-72 Time spent by counselee in counseling process.

Insert the following clause in contracts entered into for services relating to vocational counseling:

Time Spent by Counselee in Counseling Process

The contractor agrees that no counselee referred under the provisions of this agreement will be required to give any extra time in connection with the counseling process to supply test results or other information for purposes other than those specified in this contract.

(End of Clause)

852.271-73 Use and publication of counseling results.

Insert the following clause in contracts entered into for services relating to vocational counseling:

Publishing Results

The contractor agrees that none of the information or data gathered in connection with the services specified in this contract or studies or materials based thereon or relating thereto will be publicized without the prior approval of the Chief Benefits Director or his/her designee.

(End of Clause)

852.271-74 Inspection.

Insert the following clause in contracts entered into with educational institutions and training establishments for education and rehabilitation:

Inspection

The contractor will permit the duly authorized representative of the Veterans Administration to visit the place of instruction as may be necessary and examine the training facilities and work of the veterans in training under this contract.

(End of Clause)

852.271-75 Extension of contract period.

The following clause will be included in contracts where appropriate pertaining to services for education and rehabilitation:

Extension of Contract Period

This contract may be extended from year to year if agreeable to both parties provided the agreement for extension is consummated 30 days prior to the expiration date, and further provided that there is no change in the provisions, terms, conditions, or rate of payment. Any extension made hereunder is subject to the availability of funds during the period covered by the extension.

(End of Clause)

PART 853—FORMS

Sec.

853.000 Scope of part.

Subpart 853.1—General

853.107 Obtaining forms.

Subpart 853.2—Prescription of Forms

853.201 Federal acquisition system.
853.201-1 Contracting authority and responsibilities (SF 1402).
853.213 Small purchase and other simplified purchase procedures (VA Forms 90-2138, 10-7078, 10-7079, 10-2570d, 10-2511, and 10-2421).
853.215 Contracting by negotiation (VA Form 10-1170).
853.236 Construction and architect-engineer contracts.
853.236-1 Construction (VA Form 08-6159).
853.236-2 Architect-engineer services (VA Form 08-6298).
853.271 Loan Guaranty, Education and Vocational Rehabilitation and Counseling Programs.
853.271-1 Loan Guaranty Program (VA Forms 26-6724 and 26-1839).
853.271-2 Vocational Rehabilitation and Counseling Programs (VA Forms 22-1903, 22-1905 and 22-1931).
853.271-3 Education Programs (VA Forms 22-1982, 22-1982e, 22-1982c, and 22-7398).

Subpart 853.3—Illustration of Forms

853.300 Scope of subpart.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

853.000 Scope of part.

This part prescribes Veterans, Adminsitration forms for use in the acquisition of goods and services. It only identifies forms which are used between the VA and its contractors or the general public. It does not identify forms for uses internal to the VA or between the VA and another federal agency.

Subpart 853.1—General

853.107 Obtaining forms.

VA forms may be obtaind from any VA contracting office of by requesting such forms from the Director, Office of Procurement and Supply (91), Veterans, Adminsitration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Subpart 853.2—Prescription of Forms

853.201 Federal acquisition system.

853.201-1 Contracting authority and responsibilities (SF 1402).

Current delegations of contracting authority appointed with VA Form 90-2267, Certificate of Designation (contracting officer), will remain in effect until replaced with an executed SF 1402, Certificate of Appointment, in accordance with 801.603-3.

853.213 Small purchase and other simplified purchase procedures (VA Forms 90-2138, 10-7078, 10-7079, 10-2570d, 10-2511, and 10-2421).

The following forms are prescribed as stated below and in the circumstances and within the limitations provided:

(a) VA Form 90-2138, Order for Supplies or Services shall be used as indicated in 831.505-2. It will be used in lieu of but similar to OF 347, Order for Supplies and Services.

(b) The following forms are for use for obtaining indicated medical and dental services within the limitations prescribed in 813.505-2:

(1) VA Form 10-7078, Authorization and Invoice for Medical and Hospital Services.

(2) VA Form 10-7079, Request for Outpatient Medical Services.

(3) VA Form 10-2570d, Dental Record, Authorization and Invoice for Outpatient Services.

(c) VA Form 10-2511, Authority and Invoice for Travel by Ambulance or Other Hired Vehicle, will be used as prescribed in 813.505-2(c).

(d) VA Form 10-2421, Prosthetics Authorization and Invoice, will be used from indicated procurements not to exceed $300 as prescribed in 813.505-2.

853.215 Contracting by negotiation (VA Form 10-1170).

VA Form 10-1170, Application for Furnishing Nursing Home Care to Beneficiaries of the Veterans Administration, will be utilized for establishing contract nursing home care for VA beneficiaries.

853.236 Construction and architect-engineer contracts.

853.236-1 Construction (VA Form 08-6159).

VA Form 08-6159, Construction Progress Chart, will be used as prescribed by 852.236-84.

853.236-2 Architect-engineer services (VA Form 08-6298).

VA Form 08-6298, Architect-Engineer Fee Proposal, will be used as prescribed in 836.606-71.

853.271 Loan Guaranty, Education, and Vocational Rehabilitation and Counseling Programs.

853.271-1 Loan Guaranty Program (VA Forms 26-6724 and 26-1839).

(a) VA Form 26-6724, Invitation, Bid, and/or Acceptance or Authorization, will be used in obtaining services specified in Subpart 871.1.

(b) VA Form 26-1839, Compliance Inspection Report, will be used for inspection of repairs for properties under the Loan Guaranty Program as specified in 846.472.

853.271-2 Vocational Rehabilitation and Counseling Programs (VA Forms 22-1903, 22-1905, and 22-1931).

The following forms will be used in acquiring education or rehabilitation services as prescribed in Subpart 871.2:

(a) VA Form 22-1903, Contract for Education and Training.

(b) VA Form 22-1905, Authorization and Certification of Entrance or Reentrance into Training and Certification of Trainee Status.

(c) VA Form 22-1931, Contract for Services Relating to Vocational Counseling.

853.271-3 Education Programs (VA Forms 22-1982, 22-1982e, 22-1982c, and 22-7398).

The following forms are prescribed for use in obtaining services for the Department of Veterans Benefits Education programs:

(a) VA Form 22-1982, State Approving Agency (SAA) Reimbursement Contract.

(b) VA Form 22-1982e, Schedule No. 1 to the SAA Reimbursement Contract; Accredited and Non-Accredited Courses Under Chapter 32, 34, and 35, or 36, of Title 38 United States Code, whichever is applicable.

(c) VA Form 1982c, Schedule No. 2 to the SAA Reimbursement Contract; Apprentice Or Other Training On-the-Job.

(d) VA Form 22-7398, Quarterly Report of State Approving Agency Activities Under Chapter 36, Title 38, United States Code.

Subpart 853.3—Illustration of Forms

853.300 Scope of subpart.

VA Forms will not be illustrated in this VAAR. Persons wishing to obtain copies of VA forms prescribed in the VAAR may do so in accordance with 853.107.

PART 870—SPECIAL PROCUREMENT CONTROLS

Subpart 870.1—Controls

Sec.

870.111 Subsistence.
870.111-5 Frozen processed food products.
870.112 Telecommunications equipment.
870.113 Paid use of conference facilities.
870.114 Asbestos.
870.114-1 General.
870.114-2 Background.
870.114-3 Approving authority.
870.114-4 Exempted products containing asbestos.
870.115 Food service equipment.

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

Subpart 870.1—Controls

870.111 Subsistence.

870.111-5 Frozen processed food products.

(a) All frozen, processed food products procured which contain meat, poultry or a significant proportion of eggs, will be processed or prepared in plants operated under the supervision of the USDA (U.S. Department of Agriculture). The product will be inspected and approved in accordance with the regulations of the USDA governing meat, poultry or egg inspection. A label or seal, affixed to the container, indicating compliance with these regulations will be accepted as evidence of compliance. The product must bear a label complying with the Federal Food, Drug and Cosmetic Act which requires that all ingredients be listed according to the order of their predominance.

(b) All frozen, processed food products procured which contain fish or fish products will be processed or prepared in plants operated under the supervision of the USDC (U.S. Department of Commerce). The products listed in USDC publication titled, "Approved List of Sanitarily Inspected Fish Establishments" are processed in plants under Federal inspection of the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce. The inspected products packed under various labels bearing the brand names are produced in accordance with current U.S. Grade Standards or official product specifications, packed under optimum hygienic conditions, and must meet Federal, State, and city sanitation and health regulations. Such brand label or USDC seal, affixed to a container, indicating compliance with USDC regulations will be accepted as evidence of compliance. In lieu thereof, the shipment may be lot inspected by the USDC and containers stamped to indicate acceptance or a Certification of Inspection issued to accompany the shipment. The product must bear a label complying with the Federal Food, Drug and Cosmetic Act which requires that all ingredients be listed according to the order of their predominance.

(c) Producers of frozen bakery products which are shipped in interstate commerce are required to comply with the Federal Food, Drug and Cosmetic Act. Therefore, it must be vertified that the product, in fact was shipped interstate or that the producer ships products to other purchasers interstate.

In addition, the product must bear a label complying with the Act which requires that all ingredients be listed according to the order of their predominance.

870.112 Telecommunications equipment.

(a) Solicitations, including those for construction, based on detailed purchase descriptions or formal specifications for telecommunications equipment, as defined in Manual MP–6, Part VIII,[8] will include the clause required by 852.270–4.

(b) The descriptive literature to be furnished by the contractor after award, required by the clause in 852.270–4, is to be reviewed and approved by the Office of Data Management and Telecommunications prior to delivery and/or installation by the contractor. Promptly upon receipt of the descriptive literature, contracting officers will forward it together with a copy of the contract, the formal specification, or the detailed purchase description to the Director, Office of Procurement and Supply (93).

(c) Solicitations, including those for construction, for telecommunications equipment based on "brand name or equal" purchase description are subject to the following:

(1) Prior to award, contracting officers will forward to the Director, Office of Procurement and Supply (93), the abstract of bids, one copy of each offer received, including descriptive literature and pertinent letters, and the comments and recommendations of the contracting officer.

(2) No commitments are to be made to contractors prior to receipt of Central Office reaction.

(3) Allowance of at least 30 days time for acceptance will be specified in the solicitation in order to allow sufficient time for the review required by this paragraph (c). (See FAR 52.214–16.)

870.113 Paid use of conference facilities.

(a) The rental of space for VA-sponsored symposia and training sessions may be unwarranted when other alternatives are available at no expense or reduced expense to the Government. After the geographical location for a VA conference has been selected, based on minimum overall travel costs for all Government participants and other relevant factors, a request for conference space will be forwarded to the servicing Supply activity. The request for conference space should afford the contracting officer every opportunity to secure rent-free facilities.

(b) The following criteria for the selection of an appropriate facility will apply:

(1) A thorough effort will be made to schedule conferences and training sessions so that the conference facilities of VA installations in the city where the conference is held may be used.

(2) Where no VA space is available, the General Services Administration will be contacted to determine if there is other Government agency space which may be used.

(3) Efforts will be made to schedule conferences, where Government space is not available, through hotels and motels which offer free conference facilities in exchange for a stipulated number of lodging reservations for participants. Surcharges per lodging or increased room rates, to offset the cost of the conference room, shall be considered payment for such space.

(4) In the event none of these is available on the desired dates, consideration will be given to rescheduling the conference to avail the VA of the use of facilities without payment of a fee.

(5) If none of the above is practical, rental conference space will be obtained. Complete documentation of efforts to secure free conference space, as outlined above, will be maintained in the purchase order file. The costs of coffee, refreshments, meals, lodging, tips and other supplies and services not directly related to the presentations within the conference space are not allowable.

(c) The conference coordinator of the requesting organization will continue to be responsible for individual room reservations, including any cancellations.

870.114 Asbestos.

870.114–1 General.

This section applies to the purchase and use of asbestos products and equipment or materials containing asbestos products in the Veterans Administration.

870.114–2 Background.

Exposure to asbestos is associated with chronic and debilitating lung disease and cancer. To reduce the health hazard related to the exposure to asbestos, the U.S. Environmental Protection Agency and the U.S. Department of Labor (Occupational Safety and Health Administration) have issued specific regulations on asbestos. Although these regulations do not call for a complete ban on the use of asbestos, they do impose strict requirements on its use, airborne contamination and disposal.

870.114–3 Approving authority.

Asbestos products and equipment or materials containing asbestos products shall not be specified nor purchased for use in the Veterans Administration if any suitable substitutes are available. If suitable substitutes are not available, specific authorization to purchase and use asbestos products and equipment or materials specifying asbestos products, must be granted by the Administrator or designee. Requests for authorization will be submitted through the Director, Engineering Service (10A4A5). The following information will be provided:

(a) The name of the product, source of supply, and physical form of asbestos as used in the product or equipment;

(b) A description of use, including purpose, urgency, methodology, qualities, and by whom; and

(c) Safeguards being employed, with particular emphasis on the identification of the asbestos products, and procedures to be taken to prevent airborne contamination and disposal.

870.114–4 Exempted products containing asbestos.

VA Central Office, Engineering Service (10A4A5), is responsible for maintaining a list of products containing asbestos which are exempted by the Administrator or designee from this policy.

870.115 Food service equipment.

(a) All new food service equipment purchased for Dietetic Service through other than the Defense General Supply Center (DGSC) sources must meet requirements set forth by the National Sanitation Foundation (NSF).

(b) The contracting officer will accept an affixed NSF label and/or documentation of the certification by NSF from the contractor as evidence that the subject equipment meets sanitation standards issued by the Foundation.

PART 871—LOAN GUARANTY AND VOCATIONAL REHABILITATION AND COUNSELING PROGRAMS

Subpart 871.1—Loan Guaranty Program

Sec.

871.100 Scope of subpart.
871.101 Policy.
871.102 Authorization for repairs to properties.

Subpart 871.2—Vocational Rehabilitation and Counseling Program

871.200 Scope of subpart.
871.201 General.
871.201–1 Requirements for use of contracts.
871.201–2 Requirements when contracts are not required.
871.201–3 Medical services.
871.201–4 Letter contracts.
871.202 Marking and release of supplies.
871.203 Renewals or supplements to contracts.
871.204 Guaranteed payment.
871.205 Proration of charges.
871.206 Other fees and charges.
871.207 Payment of tuition or fees.
871.208 Rehabilitation facilities.
871.209 Records and reports.
871.210 Correspondence courses.
871.211 Information concerning correspondence courses.

Subpart 871.3—Education Program [Reserved]

Authority: 38 U.S.C. 210, 40 U.S.C. 486(c), 38 CFR 36.4320, 38 U.S.C. Chs. 31, 32, 34, 35, and 37 and Pub. L. 98–77.

Subpart 871.1—Loan Guaranty Program

871.100 Scope of subpart.

This subpart sets forth policy and procedure with respect to the loan guaranty and direct loan programs as it pertains to property management, including the acquisition, management, and disposition of property, real, personal, or mixed, which were secured by loans guaranteed, insured, or made pursuant to Title 38, United States Code.

871.101 Policy.

It is the policy of the Veterans Administration that all procurement effected by formal advertising or negotiation pertaining to the expenditure of funds for the repair and maintenance of Veterans Administration property acquired under Chapter 37, Title 38, United States Code, be made in accordance with those regulations as set forth in FAR Parts 14, 15 and 16 as supplemented or implemented by Parts 814, 815 and 816 of this chapter and otherwise authorized by this Subpart 871.1 and specific subparts or sections as stated in this subpart.

871.102 Authorization for repairs to properties.

(a) Except as provided in this subpart, Directors, VA Regional Offices, are authorized to purchase supplies and services for the repair to any Veterans Administration property acquired under Chapter 37, Title 38, United States Code, where the cost does not exceed $5,000 on any single transaction.

(b) In those cases where the expenditure is known or estimated to exceed $5,000, the request, together with the loan guaranty folder, will be forwarded to the Chief Benefits Director for approval.

(c) During the period when the Veterans Administration has assumed custody of the property from a holder and prior to its conveyance to the Veterans Administration pursuant to 38 CFR 36.4320, repairs are authorized not in excess of $2,000 when appropriate to make the property ready for sale at an earlier date than would otherwise be possible if the repair program was delayed until such time as the Veterans Administration acquired absolute title.

(d) No repairs may be made to property by the holder when it has continued custody except for emergeny repairs not in excess of $200 unless adequate notice has been given the Director, VA Regional Office. Emergency repairs as applied in this paragraph will be deemed to mean those requiring immediate action to preserve the property from serious damage or to correct a situation imminently dangerous to life or limb, and includes the initial cleanup of the property in order to prevent the risk of damage by fire or vandalism.

(e) An approved management broker may be authorized, at the time a property is listed with him/her, to incur expenses for fuel and utilities or other recurring items which are required to be furnished by the Veterans Administration to its tenants or are required in the maintenance of the property. Advance blanket authorizations to management brokers will be limited to repairs not in excess of $200 in any transaction, (the management broker will either submit receipts with his/her invoice or maintain such receipts for inspection). Expenditures in excess of $200 require prior approval of the Director, Regional Office, having jurisdiction of the property. Repair jobs may not be split to circumvent this restriction.

871.103 Repair specifications.

(a) Repair specifications covering authorized repairs will be formulated in sufficient detail to permit competitive bids on an identical basis and as a mimimum will contain the following.

(1) Requirement that the contractor obtain all necessary permits.

(2) Requirement that inspection will be made at stated intervals if appropriate and that final inspection will be made in all cases.

(3) Any other requirement necessary to protect the interests of the Government.

(b) The minimum construction requirements may be used as a guide in the preparation of repair specifications. Specifications should not require conformance with minimum construction requirements in cases where scope of repairs are minor, the relatively small value of the property or its poor salability. The quality of repairs to be specified shall be consistent with the type and value of the property.

(c) In all cases, the specifications for repairs will be based on one of the following categories:

(1) Minimum specifications for rental purposes.

(2) Average specifications for sales purposes.

(3) Above average specifications for desirable properties.

871.104 Qualification of bidders.

(a) Qualification of bidders shall be established in accordance with procedures outlined in FAR Subpart 9.1 and Subpart 809.1 of this chapter.

(b) Management brokers are not considered acceptable bidders for repair contracts due to their close association on a fee basis with the Veterans Administration. This restriction would apply equally to any contracting firm in which the management broker has an interest and in which it could be presumed that such firm would have an advantage over the other bidders. This does not preclude the performance of work by management brokers of a routine recurring maintenance category or minor repairs by personnel employed directly on the payroll of the broker. In these cases, it must be established that any charges for such services are not in excess of the prevailing fees for like services in the area.

871.105 Debarred, suspended and ineligible bidders.

Firms or individuals will be debarred and suspended in accordance with FAR Subpart 9.4 and Subpart 809.4 of this chapter.

871.106 Lien waivers.

(a) Contracts in the amount of $2,500 or more will contain a requirement that the contractor will sign a formal release in full or a lien waiver before payment may be made. The release or waiver will accompany the contractor's invoice.

(b) Contractors will be required to notify the Director, Regional Office, of any subcontractors for services or materials in excess of $2,500. Such subcontractors or material men will be required to sign the release or waiver jointly with the prime contractor or to

execute release or waiver in his/her own name.

(c) Prior to any authorized partial payment the contractor will be required to execute a release or waiver.

(d) Due to the variations of local law, no standard release or waiver is prescribed. Each release or waiver will be prepared in accordance with local law and will be in form acceptable by the District Counsel.

871.107 Stipulations against liens.

(a) Where determined necessary by the Director, Regional Office, contracts in an amount less than $2,500 may contain the following:

The contractor expressly waives any and all rights to file or maintain any mechanics lien or claim against the aforesaid premises.

(b) Contracts in the amount of $2,500 or more where there is doubt as to the final responsibility of the contractor will provide maximum potection to the Government by including such requirements as are available under local law. Advice and approval of any contract stipulation or legal stipulations against liens will be obtained from the District Counsel.

Subpart 871.2—Vocational Rehabilitation and Counseling Program

871.200 Scope of subpart.

This subpart establishes policy and procedures for the vocational rehabilitation and counseling program as it pertains to contracts for training and rehabilitation services, approval of institutions (including rehabilitation facilities), training establishments, and employers under Chapter 31, Title 38, United States Code, and contracts for counseling services under Chapter 32, 34, and 35, Title 38, United States Code and Pub. L. 98–77, Emergency Veterans' Jobs Training Act of 1983.

871.201 General.

871.201–1 Requirements for the use of contracts.

Contracts will be negotiated for tuition, fees, books, supplies and other allowable expenses incurred by the institution, training establishment or employer for the training and rehabilitation of eligible veterans under Chapter 31, Title 38, United States Code, under the following conditions:

(a) With institutions offering courses of instruction by correspondence. Courses of instruction by correspondence is deemed to mean a course of education or training conducted by mail consisting of regular lessons or reading assignments, the preparation of required written work which involves the application or principles studied in each lesson, the correction of assigned work with such suggestions or recommendation as may be necessary to instruct the student, the keeping of student achievement records and issuance of a diploma, certificate, or other evidence to the student upon satisfactorily completing the requirements of the course.

(b) With institutions, training establishments, employers, or individuals approved to provide training and rehabilitation services under Chapter 31, Title 38, United States Code, for whom special services or special courses are furnished at the request of the Veterans Administration. The terms "special services" or "special courses" have the same meaning as under 831.7001–2.

871.201–2 Requirements when contracts are not required.

(a) When a contract is not required, a signed statement of charges will be obtained from the educational institution or training establishment for courses to be offered, including the rate of tuition, fees, and separate charges, if any, for books, supplies, and equipment handling charges, refund policy and such other provisions as are required to determine proper payment. The statement of charges may be in the form of a statement on VA Form 22–1905, Authorization and Certification of Entrance of Reentrance into Training, that charges will be in accordance with catalog or other published document (identify publication). The statement of charges may not exceed those charges paid by nonveterans or that is published in the school catalog or other published document.

(b) For the purpose of this section a contract will not be required when all tuition, fees, books, supplies, or services necessary to train, or educate an eligible veteran under Chapter 31, Title 38, United States Code, are published in the school catalog or other published document.

871.201–3 Medical services.

The medical services provided trainees under vocational rehabilitation and education contracts, agreements, or arrangements are separate and distinct from any other medical service under the jurisdiction of the Department of Medicine and Surgery to which the veteran may be entitled and no certificate of eligibility is required from that department.

871.201–4 Letter contracts.

Letter contracts are authorized for use in accordance with the provision of FAR 16.603 and in those cases in which it is not possible to complete a formal contract with an approved educational institution prior to the enrollment of eligible veterans for training.

871.202 Marking and release of supplies.

Supplies will not be marked to indicate ownership by the United States and will be deemed released to the trainee at the time they are furnished.

871.203 Renewals or supplements to contracts.

Except for contracts for educational and vocational counseling, contracts may be renewed from year to year, providing there is no change in the schedule or provisions as originally consummated by completion of a renewal agreement no later than 30 days prior to the expiration of the contract.

(a) Supplements may be negotiated at any time during the contract period upon the completion of the supplemental agreement.

(b) Contracts for educational and vocational counseling may provide for automatic extension from year to year.

871.204 Guarantee payment.

No contract or agreement may be entered into with any institution or training establishment whereby the Veterans Administration will be required to pay a minimum charge, or required to enroll a minimum number of participants per quarter, semester, term, course, or other period.

871.205 Proration of charges.

The contract will include the exact formula agreed on for the proration of charges in the event that the veteran's program is interrupted or discontinued prior to the end of the term, semester, quarter, or other period, or the program is completed in less time than stated in the contract.

871.206 Other fees and charges.

Fees and other charges which are not prescribed by law but are by nongovernmental organizations, such as initiation fees required to become a member of a labor union and the dues necessary to maintain membership incidental to training on the job or to obtaining employment during a period in which the veteran is a chapter 31 participant, may be paid provided there are no facilities feasibly available whereby the necessary training can be feasibly accomplished or employment obtained without paying such charges.

Payment for such fees will be made in accordance with Part 813.

871.207 Payment of tuition or fees.

(a) Contracts, agreements, or arrangements requiring the payment of tuition or fees will provide for the following:

(1) Payment for tuition or fees will be made in arrears and will be prorated in installments over the school year or the length of the course except that institutions may be paid in accordance with the provision of paragraph (a)(2) of this section, provided such institutions operate on a regular term, quarter, or semester basis and normally accept students only at the beginning of the term, quarter, or semester and provided for further such institutions are either:

(i) Institutions of higher learning that use a standard unit of credit recognized by accrediting associations (such institutions will include those which are members of recognized national or regional educational accrediting associations, and those which, although not members of such accrediting associations, grant standard units of credit acceptable at full value without examination by collegiate institutions which are members of national on regional accrediting associations).

(ii) Public tax supported institutions.

(iii) Institutions operated and controlled by State, county, or local boards of education.

(2) Institutions coming within the exceptions of paragraph (a)(1) of this section which have a refund policy providing for a graduated scale of charges for purposes of determining refunds may be paid part or all such tuitions or fees for a term, quarter, or other period of enrollment immediately following the date on which the refund expires.

(3) Proration of charges will not apply to a fee which is for noncontinuing service such as registration fee, etc.

(b) The period for which payment of charges may be made will be the period of actual enrollment and subject to the following:

(1) The effective date will be the date of the trainee's entrance into training status except that payment may be made for an entire-semester, quarter, or term in institutions operating on that basis if the training enters no later than the final date set by the institution for enrolling for full credit.

(2) In those cases where the institution has not set a final date for enrolling for full credit or will not set a date acceptable to the Veterans Administration, payment may be prorated on the basis of attendance regardless of the refund policy.

(3) If an institution customarily charges for the amount of credit or number of hours of attendance for which a trainee enrolls, payment may be made on that basis when a trainee enrolls after the final date permitted for carrying full credit for the semester or term.

(c) The terminal date to which payment will be made is the day following:

(1) The end of the semester, term or quarter during which the training is furnished.

(2) The date of interruption or discontinuance of training.

(3) The date of completion of the course.

871.208 Rehabilitation facilities.

The provisions for payment of charges to rehabilitation facilities for the rehabilitation services provided under Chapter 31 are paid in the same manner as charges for educational and vocational services through contract, agreement, or other arrangement.

871.209 Records and reports.

Contracts, agreements, or arrangements will provide for the number and frequency of reports, adequate financial records to support payment for each trainee and maintenance of attendance and progress records. Such records will be preserved for a period of three years.

871.210 Correspondence courses.

Contracts with institutions for correspondence courses will provide that:

(a) Major changes in courses or course material will not be binding on the Veterans Administration until such time as a supplemental agreement is negotiated to the contract.

(b) Minor changes in course or course material not affecting the length of the course or number of lessons and not lowering the educational value of the course or the quality of the course material such as revision of text, the substitution of a newer lesson for an older one, or the substitution of equipment of equal or greater value, are permitted without supplemental agreements. Such minor changes and revisions shall be placed on file with the contracting officer at the time of the change or revision.

(c) Trainees be provided with prompt and adequate lesson service and, unless otherwise specified in the contract, be furnished the same texts, lessons service, diplomas, and other services as are normally provided for regularly enrolled nonveteran students.

(d) All lessons be adequately serviced on an individual basis. Grouping of lessons into units or partial servicing does not meet this requirement.

(e) Each lesson must have a separate examination adequate in terms of lesson content.

(f) The training of persons under a Veterans Administration contract or the fact that the United States is utilizing the facilities of the institution for training veterans shall not be used in any way to advertise the institution. References in the advertising media or correspondence of the institution shall be limited to a list of courses under Chapter 31, Title 38, United States Code, and shall not be directed or pointed specifically to veterans.

(g) The rates, fees, and charges are not in excess of those charged nonveterans.

(h) That payment will be made on a lesson completed basis in areas for assignments sent in by trainees and serviced during a pay period as established by the contract.

(i) Payment will be made only once for each lesson even through it is necessary to service a lesson more than once.

871.211 Information concerning correspondence courses.

Specific questions on correspondence courses as to the content of courses, academic credit, and entrance requirements for courses included in Veterans Administration contracts may be directed to the institutions offering the courses.

Part IV

Federal Emergency Management Agency

48 CFR Ch. 44
Acquisition Regulations; Interim Rule

FEDERAL EMERGENCY MANAGEMENT AGENCY

48 CFR Ch. 44

FEMA Implementation of the Federal Acquisition Regulation (FAR); FEMA Acquisition Regulation (FEMAAR)

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Interim rule and invitation for comments.

SUMMARY: This document establishes an interim rule known as the Federal Emergency Management Agency Acquisition Regulation (FEMAAR). This rule is codified as Chapter 44 of Title 48 of the Code of Federal Regulations. The purpose of the FEMAAR is to prescribe acquisition regulations needed to implement specific requirements of the Federal Acquisition Regulation (FAR) as well as statutory requirements peculiar to FEMA.

The FAR is being promulgated as the uniform, simplifed acquisition regulation called for by Executive Order 12352, Federal Procurement Reforms. The FAR will supersede the Defense Acquisition Regulation (DAR), the Federal Procurement Regulation (FPR) and the National Aeronautics and Space Administration Procurement Regulation (NASAPR). Except for certain new requirements of the FAR, the regulatory material in the FEMAAR will supersede the current Federal Emergency Management Agency Procurement Regulations (FEMAPR).

DATES: *Effective Date:* April 1, 1984.

Comments: Due not later than May 31, 1984.

ADDRESS: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Room 835, 500 C Street SW., Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: Joseph A. Pegnato, Chief, Policy and Evaluation Division, Office of Acquisition Management, Federal Emergency Management Agency, 500 C Street SW., Washington, D.C. 20472, Telephone (202) 287–3826.

SUPPLEMENTARY INFORMATION:

Background

The policies and procedures of the Federal Government regarding the procurement of supplies and services have been developed in a largely independent fashion. Many statutes bearing on Federal contracting have been directed toward specific agencies. Federal agencies traditionally have developed their own contracting procedures with limited attention to uniformity among agencies. The result of this is the current system of procurement policies that vary from agency to agency and cause confusion within the contracting community. As long ago as 1972, the Commission on Government Procurement recommended that there be a standard Government-wide procurement regulatory system. The Office of Federal Procurement Policy, created in 1974, has worked with the agencies and the public to create a uniform procurement regulation to be known as the Federal Acquisition Regulation (FAR).

The FAR was published in the **Federal Register** on September 19, 1983 with a scheduled effective date of April 1, 1984. (See 48 FR 42102.) The FAR will be codified as Chapter 1 of Title 48 of the Code of Federal Regulations.

Because of differing statutory authorities among Federal agencies, the FAR authorizes the agencies to issue regulations to implement FAR policies and procedures within the agency, and to include additional policies and procedures, solicitation provisions or contract clauses to satisfy the specific needs of the agency. The regulations being published today represent the Agency's necessary implementation and supplementation of the FAR.

The content of the interim FEMAAR is, with but a few exceptions that will be noted, drawn from the FEMAPR of August 19, 1980. The changes that have been made in the material brought forward from the FEMAPR can be categorized correctly as editorial, made in the interest of clarity, brevity, and consistency. Signficant other portions of the FEMAPR have been made unnecessary by material written into the FAR.

Most new material has been incorporated in response to explicit or implied FAR requirements. As an example: FAR 3–204 requires that an agency have procedures for handling violations of the Gratuities clause. FEMAAR 4403.204 establishes a minimum procedural framework and assigns responsibilities.

These new FEMAAR segments are:

4401.405 Deviations pertaining to treaties and executive agreements
4403.101–2 Solicitation and acceptance of gratuities by Government personnel
4403.101–3 Agency regulations
4403.203 Reporting suspected violations of the gratuities clause
4403.204 Treatment of violations
4405.502 Authority
4407.307 Appeals
4408.802 Policy
4412.303 Procedures
4415.307 Signatory authority
4419.201 General policy
4424.202 Policy

FEMAAR 4415.413–2 also is new. It requires written approval of the Head of the Contracting Activity (HCA) to use Alternate II procedures governing disclosure and use of information before award.

Since the FAR is to be the uniform Government-wide acquisition regulation, reviewers of this rule must remember that lack of coverage of a particular toxic in the FEMAAR means that the Agency accepts the FAR coverage of the topic without need for further regulatory implementation.

Procedural Requirements

A. *Executive Order 12291.* David Stockman, Director of the Office of Management and Budget, has exempted procurement regulations from the requirements of a regulatory impact analysis and review required by Executive Order 12291 in a memorandum dated December 15, 1983 to Don Sowle, Administrator, Office of Procurement Policy, and Christopher DeMuth, Administrator, Information and Regulatory Affairs.

B. *Regulatory Flexibility Act.* This interim rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have a significant economic impact on a substantial number of small entities. FEMA certifies that this interim rule will not have a significant economic impact on a substantial number of small entities; and, therefore, no regulatory flexibility analysis has been prepared.

C. *National Environmental Policy Act.* FEMA has concluded that promulgation of this rule would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 et seq. 1976) and the regulations (40 CFR Parts 1500–1508), therefore, does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

D. *Administrative Procedure Act.* Section 553 of the Administrative Procedure Act exempts rules relating to public contracts from the prior notice and comment procedure normally required for informal rulemaking.

However, the Office of Federal Procurement Policy (OFPP), Office of Management and Budget, has established procedures to be used by all Federal agencies in the promulgation of procurement regulations. In OFPP Policy letter 83–2, OFPP states that an agency must provide an opportunity for public

comment before adopting procurement regulations if the regulations represent a "significant" change of existing regulations. "Significant" is defined generally as something which has an effect beyond the internal operating procedures of the agency or has a cost or administrative impact on contractors.

The Agency has determined that this rule does not represent a significant change. As described earlier in the preamble, changes made to FEMA's procurement regulations are principally in the areas of format and internal procedures. The internal procedural changes are necessary to implement new or modified material established by the FAR.

The Agency traditionally has provided for prior notice and comment even when not required by the Administrative Procedure Act (see 44 CFR 1.4). Although this is the general policy of the Agency, it has been determined in this instance, for the reasons already stated, that it would be impractical, unnecessary and contrary to all interests involved to provide for prior notice and comment in this rulemaking. In addition, the FAR has a scheduled effective date of April 1, 1984. It is imperative that FEMA's procurement regulations be effective at the same time as the FAR. For these reasons, the Agency is issuing the FEMA acquisition regulations as an interim rule. Because of the Agency's general policy to solicit comments to the extent practicable, comments are invited on these regulations through May 31, 1984. All comments received will be reviewed, considered and implemented if necessary prior to this regulation becoming final.

List of Subjects in 48 CFR Ch. 44

Government procurement, Federal Emergency Management Agency (FEMA) acquisition regulations.

For the reasons set forth in the preamble, Title 48 of the Code of Federal Regulations is amended by establishing Ch. 44 as set forth below.

CHAPTER 44—FEDERAL EMERGENCY MANAGEMENT AGENCY ACQUISITION REGULATION

SUBCHAPTER A—GENERAL

Part 4401—Federal Emergency Management Agency (FEMA) acquisition regulation system
Part 4402—Definition of words and terms
Part 4403—Improper business practices and personal conflicts of interests
Part 4405—Publicizing contract actions

SUBCHAPTER B—ACQUISITION PLANNING

Part 4407—Adquisition planning
Part 4408—Required sources of supplies and services
Part 4409—Contractor qualifications
Part 4412—Contract delivery or performance

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

Part 4414—Formal advertising
Part 4415—Contracting by negotiation
Part 4416—Types of contracts

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

Part 4419—Small business and small disadvantaged business concerns
Part 4420—Labor surplus area concerns
Part 4422—Application of labor laws to Government acquisitions
Part 4424—Protection of privacy and freedom of information

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

Part 4429—Taxes
Part 4432—Contract financing

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

Part 4435—Research and development contracting
Part 4436—Construction and architect-engineer contracts

SUBCHAPTER H—CLAUSES AND FORMS

Part 4452—Solicitation provisions and contract clauses

SUBCHAPTER A—GENERAL

PART 4401—FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) ACQUISITION REGULATION SYSTEM

Sec.
4401.000 Scope of part.

Subpart 4401.1—Purpose, Authority, Issuance

4401.101 Purpose.
4401.103 Applicability.
4401.104 Issuance.
4401.104–1 Publication and code arrangement.
4401.104–3 Copies

Subpart 4401.3—Agency Acquisition Regulations

4401.301 Policy.
4401.303 Codification and public participation.

Subpart 4401.4—Deviations from the FAR

4401.403 Individual deviations.
4401.404 Class deviations.
4401.405 Deviations pertaining to treaties and executive agreements.

Subpart 4401.6—Contracting Authority and Responsibilities

4401.600–70 Scope of subpart.
4401.601 General.
4401.603 Selection, appointment, and termination of appointment.
4401.603–2 Selection.
4401.603–3 Appointment.

Subpart 4401.70—Procurement Contracts Versus Assistance Instruments

4401.7000 Scope of subpart.
4401.7001 Procurement contracts.
4401.7001–1 Situations for use.
4401.7001–2 Examples.
4401.7002 Assistance.
4401.7002–1 Grants.
4401.7002–2 Cooperative agreements.
4401.7002–3 Examples of unsubstantial involvement.
4401.7002–4 Examples of substantial involvement.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

4401.000 Scope of part.

This part sets forth policies and procedures concerning the Federal Emergency Management Agency Acquisition Regulation (FEMAAR) System.

Subpart 4401.1—Purpose, Authority, Issuance

4401.101 Purpose.

FEMAAR is a supplement to the Federal Acqusition Regulation (FAR) and is established for the codification and publication of uniform policies and procedures for acquisitions by FEMA.

4401.103 Applicability.

This regulation applies to all acquisitions within FEMA, but not to placement or administration of cooperative agreements or grants.

4401.104 Issuance.

4401.104–1 Publication and code arrangement.

(a) The FEMAAR is published in (1) the daily issue of the **Federal Register** and (2) cumulated form in the Code of Federal Regulations (CFR).

(b) The FEMAAR is issued as Chapter 44 of Title 48, CFR.

4401.104–3 Copies.

Copies of the FEMAAR in **Federal Register** and CFR form may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Agency offices may request copies of the FEMAAR from the Policy and Evaluation Division, Office of Acquisition Management.

Subpart 4401.3—Agency Acquisition Regulations

4401.301 Policy.

Policies, procedures, and guidance of an internal nature may be issued through internal FEMA issuances such as manuals, standard operating procedures, or instructions.

4401.303 Codification and public participation.

If subject matter in FAR requires no implementation, the FEMAAR will not contain a corresponding part, subpart, section, or subsection number. FAR subject matter governs.

Subpart 4401.4—Deviations from the FAR

4401.403 Individual deviations.

The Director, Office of Acquisition Management, must authorize individual deviations in advance. Requests for authorization must:

(a) Cite the specific parts of the FAR or FEMAAR from which it is desired to deviate;

(b) Describe the deviation fully;

(c) Indicate the circumstances which require the deviation;

(d) Give reasons supporting the action requested; and

(e) Give reasons why the action is in the best interest of the Government.

4401.404 Class deviations.

The Director, Office of Acquisition Management, must authorize class deviations in advance.

4401.405 Deviations pertaining to treaties and executive agreements.

The Director, Office of Acquisition Management, is the central control point for all deviations including those pertaining to treaties and executive agreements.

Subpart 4401.6—Contracting Authority and Responsibilities

4401.600–70 Scope of subpart.

This subpart deals with the placement of contracting authority and responsibility within the agency, the selection and designation of contracting officers, and the authority of contracting offices.

4401.601 General.

The Director, Office of Acquisition Management, is designated the head of the contracting activity and FEMA's procurement executive. The Director, Office of Acquisition Management, shall establish policy throughout the agency; monitor the overall effectiveness and efficiency of the agency's contracting offices; establish controls to assure compliance with laws, regulations, and procedures; and delegate contracting officer authority.

4401.603 Selection, appointment, and termination of appointment.

4401.603–2 Selection.

In the areas of experience, training, and education, the following shall be required unless contracting authority is limited to simplified purchase procedures. Waiver of any of these criteria shall be in writing:

(a) An individual contracting officer or an individual appointed to a position having contracting officer authority shall have a minimum of two years experience performing contracting, procurement, or purchasing functions in a Government or commercial contracting office. Additionally, where a contracting officer will work in a specialized field, experience in the field shall be a criterion for the appointment.

(b) An individual contracting officer or an individual appointed to a position having contracting officer authority shall have the equivalent of a bachelor's degree from an accredited college or institution with major studies in business administration, law, accounting, or related fields. The appointing official may waive this requirement when a candidate is otherwise qualified by virtue of extensive contract-related experience and training, business acumen, judgment, character, reputation, and ethics.

(c) An individual contracting officer or an individual appointed to a position having contracting authority shall have successfully completed training courses in both Government basic procurement and Government contract administration, each of not less than 80 class hours. Incumbents not meeting the special training requirements shall be given 24 months to meet the minimum qualification standards.

4401.603–3 Appointment.

Except for disaster-related activities and unusual circumstances as determined by the head of the contracting activity, it is policy to delegate contracting officer authority to individuals rather than to positions. The head of the contracting activity is the appointing authority. Except where the delegation of authority specifically includes the authority for further redelegation, no other delegations or redelegations may be made. Delegations of contracting officer authority shall include a clear statement of such authority, its responsibilities and limitations.

Subpart 4401.70—Procurement Contracts Versus Assistance Instruments

4401.7000 Scope of subpart.

This subpart describes the situations appropriate for the use of procurement contracts, grants, or cooperative agreements and provides examples of each.

4401.7001 Procurement contracts.

4401.7001–1 Situations for use.

Procurement contracts are to be used whenever the principal purpose of the instrument is acquisition by purchase, lease, or barter of property or services for the direct benefit or use of the Federal Government.

4401.7001–2 Examples.

Procurement contracts normally will be used when the principal purpose of the relationship is:

(a) Evaluation (including research if an evaluative character) of the performance of Government program, projects, or grantee activity initiated by FEMA.

(b) Projects funded by administrative funds.

(c) Technical assistance rendered on behalf of the Government to any third party including those receiving grants or cooperative agreements.

(d) Surveys, studies, and research which provide specific information desired by the Government for its direct activities or for dissemination to the public.

(e) Consulting or professional services of all kinds if provided to the Government or, on behalf of the Government, to any third party.

(f) Planning for Government use.

(g) Conferences conducted in behalf of the Government.

(h) Production of publications or audiovisual materials required primarily for the conduct of the direct operations of the Government.

(i) Design or development of items for Government use or pursuant to agency definition or specifications.

(j) Generation of management information or other data for Government use.

4401.7002 Assistance.

Assistance may take the form of either grants or cooperative agreements and include:

(a) General financial assistance (stimulation or support) to eligible recipients under specific legislation authorizing such assistance.

(b) Financial assistance (stimulation or support) to a specific program activity eligible for such assistance under specific legislation authorizing such assistance.

4401.7002–1 Grants.

Grants are to be used whenever the principal purpose of the relationship is to transfer money, property, services, or

anything else of value to a recipient to accomplish a public purpose. The support of stimulation to be accomplished by this transfer must be authorized by Federal statute and substantial involvement is not anticipated.

4401.7001-2 Cooperative agreements.

Cooperative agreements are to be used whenever the principal purpose of the relationship is the transfer of money, property, service, or anything else of value to recipients to accomplish a public purpose. The support or stimulation to be accomplished by this transfer must be authorized by Federal statute and substantial involvement is anticipated.

4401.7002-3 Examples of unsubstantial involvement.

Involvement is not substantial and a grant is the proper instrument if the following types of involvement are planned:

(a) Approval of recipient plans prior to award.

(b) Normal Federal stewardship such as site visits, performance reporting, financial reporting, and audits to ensure that objectives, terms, and conditions of the grants are met.

(c) Unanticipated involvement to correct deficiencies in project or financial performance from the terms of the grants.

(d) General statutory requirements understood in advance of the award such as civil rights, environmental protection, and provision for the handicapped.

(e) Review of performance after completion.

(f) General administrative requirements, such as those included in OMB Circulars A-21, A-95, A-110, and A-102.

4401.7002-4 Examples of substantial involvement.

Involvement is substantial and a cooperative agreement is the proper instrument when the following types of involvement are planned.

(a) Agency review and approval of one stage before work can begin on a subsequent stage during the period covered by the cooperative agreement.

(b) Agency and recipient collaboration or joint participation in the performance of the assisted activities.

(c) Highly prescriptive agency requirements prior to award limiting recipient discretion with respect to scope of services offered, organizational structure, staffing, mode of operation and other management processes, coupled with close agency monitoring or operational involvement during performance over and above the normal exercise of Federal stewardship responsibilities to ensure compliance with these requirements.

(d) General administrative requirements beyond those included in OMB Circulars A-102 and A-110.

PART 4402—DEFINITION OF WORDS AND TERMS

Subpart 4402-1—Definitions

4402.100 Definitions.

"Agency" means the Federal Emergency Management Agency (FEMA).

"Director" means the Director of the Federal Emergency Management Agency.

"Interagency agreement" means an agreement between two or more agencies, bureaus, or departments of the Federal Government by which supplies, services, or property are provided to, or obtained from, one or more agencies, bureaus, or departments of the Federal Government. Funds are transferred between the parties as consideration for the supplies, services, or property.

"Memorandum of Understanding" means an agreement between two or more agencies, bureaus, or departments of the Federal Government. Funds are not transferred between parties.

"Program office" means any office which generates requests for procurement actions.

"Project officer" means the program office representative cognizant over the technical aspects of a given procurement action.

(Sec. 205(c), 63 Stat. 390; 49 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

PART 4403—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Subpart 4403.1—Safeguards

Sec.

4403.101-2 Solicitation and acceptance of gratuities by Government personnel.
4403.101-3 Agency regulations.
4403.103 Independent pricing.
4403.103-2 Evaluating the certification.

Subpart 4403.2—Contractor Gratuities to Government Personnel

4403.203 Reporting suspected violations of the Gratuities clause.
4403.204 Treatment of violations.

Subpart 4403.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

4403.602 Exceptions.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4403.1—Safeguards

4403.101-2 Solicitation and acceptance of gratuities by Government personnel.

Exceptions to the prohibition against soliciting or accepting gratuities are explained in 44 CFR 3, Subpart B.

4403.101-3 Agency regulations.

FEMA "Standards of Conduct" are published in 44 CFR 3. They include requirements for financial disclosure.

4403.103 Independent pricing.

4403.103-2 Evaluating the certification.

The Director, Office of Acquisition Management, is authorized to make the determination described in FAR 3.103-2(b)(2).

Subpart 4403.2—Contractor Gratuities to Government Personnel

4403.203 Reporting suspected violations of the Gratuities clause.

Suspected violations shall be reported to the FEMA Office of the Inspector General. A report shall include all facts and circumstances relevant to the case.

4403.204 Treatment of violations.

Following review and any necessary investigation, the Inspector General shall make recommendations to the Director or a designee. If action is to be taken against a contractor, the contractor shall be given the opportunity for a hearing in accordance with FAR 3.204(b).

Subpart 4403.6—Contracts with Government Employees or Organizations Owned or Controlled by Them

4403.602 Exceptions.

The Director, Office of Acquisition Management, may authorize an exception to the policy in FAR 3.601, based on facts and circumstances provided by the program office.

PART 4405—PUBLICIZING CONTRACT ACTIONS

Sec.

4405.001 Policy.

Subpart 4405.2—Synopsis of Proposed Contracts

4405.206 Synopsis of subcontract opportunities.

Subpart 4405.5—Paid Advertisements

4405.502 Authority.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

4405.001 Policy

The agency shall continually search for and develop information on sources (including small businesses owned and controlled by one or more socially or economically disadvantaged individuals) competent to provide supplies or services. Advance publicity, including use of the Commerce Business Daily to the fullest extent practicable, shall be used for this purpose. The search should include a review of data or brochures furnished by sources seeking to do business with the agency. It also should include program personnel, small business specialists, and contracting officers to obtain information and recommendations with respect to potential sources and to consider seeking other sources by publication of proposed procurements.

Subpart 4405.2—Synopsis of Proposed Contracts

4405.206 Synopsis of subcontract opportunities.

Unless it is not in the Government's interest, the contracting officer shall make the solicitation source list available to firms requesting it for subcontracting opportunities on contracts exceeding $10,000.

Subpart 4405.5—Paid Advertisements

4405.502 Authority.

In accordance with 44 CFR 2.67, authority to approve publication of paid advertisements in newspapers has been delegated to the Director, Office of Administrative Support.

SUBCHAPTER B—ACQUISITION PLANNING

PART 4407—ACQUISITION PLANNING

Subpart 4407.3—Contractor Versus Government Performance

4407.307 Appeals.

FEMA's A–76 appeals procedures are published in 44 CFR 11.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

PART 4408—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Subpart 4408.8—Acquisition of Printing and Related Supplies

4408.802 Policy.

Contracting officers shall obtain approval from the Director, Office of Administrative Support, FEMA's central printing authority, before contracting for printing.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978; 43 FR 41943)

PART 4409—CONTRACTOR QUALIFICATIONS

Subpart 4409.4—Debarment, Suspension, and Ineligibility

Sec.
4409.404 Consolidated list of debarred, suspended, and ineligible contractors.
4409.406 Debarment.
4409.406–1 General.
4409.406–3 Procedures.
4409.407 Suspension.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4409.4—Debarment, Suspension, and Ineligibility

4409.404 Consolidated list of debarred, suspended, and ineligible contractors.

The Director, Office of Acquisition Management, will notify GSA, maintain records, establish procedures, and direct inquiries as required by FAR 9.404(c).

4409.406 Debarment.

4409.406–1 General.

The Executive Administrator shall be the debarring official.

4409.406–3 Procedures.

(a) Determination to debar or take other action concerning a firm or individual for a cause listed in FAR 9.406–2 shall be made by the Executive Administrator. Whenever cause for debarment becomes known to any contracting officer, the matter shall be submitted, with recommendations of the Director, Office of Acquisition Management, to the Executive Administrator for appropriate action. The documented file of the case will be included in the submission.

(b) If the Executive Administrator concurs in the proposed debarment, a notice of proposal to debar shall be issued by the Executive Administrator or designee.

(c) The Executive Administrator or designee shall conduct any hearings requested in connection with debarment proceedings. The firm or individual shall have the opportunity to appear with witnesses and counsel to present facts or circumstances showing cause why such firm or individual should not be debarred. If the firm or individual elects not to appear, or if the firm or individual does not respond within 30 days from receipt of the written notice, the reviewing authority will make the decision based on the facts on record and such additional evidence as may be furnished by the parties involved. After consideration of the facts, the reviewing authority shall notify the firm or individual of the final decision.

(d) Appeals may be taken within 30 days after receipt by the firm or individual of a decision to debar. Appeals shall be filed with the Director, FEMA, who shall make a decision based on the record. The Director's decision shall be final.

4409.407 Suspension.

4409.407–1 General.

The Executive Administrator shall be the suspending official.

4409.407–3 Procedures.

(a) Any contracting officer may recommend suspension of bidders. These recommendations shall be accompanied by the documented file in the case and be submitted through the Director, Office of Acquisition Management, to the Executive Administrator. The Executive Administrator shall issue the notice of suspension.

(b) The Director, Office of Acquisition Management, shall develop and maintain suspension procedures.

PART 4412—CONTRACT DELIVERY OR PERFORMANCE

Subpart 4412.3—Priorities, Allocations, and Allotments

4412.303 Procedures.

Rejected rated orders or ACM orders shall be sent to the Department of Commerce through the head of the contracting activity.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

PART 4414—FORMAL ADVERTISING

Subpart 4414.2—Solicitation of Bids

Sec.
4414.202 General rules for solicitation of bids.
4414.202–1 Bidding time.
4414.202–2 Telegraphic bids.

Subpart 4414.4—Opening of Bids and Award of Contract

4414.401 Receipt and safeguarding of bids.
4414.402 Opening of bids.
4414.406 Mistakes in bids.
4414.406–3 Other mistakes disclosed before award.
4414.407 Award.
4414.407–8 Protests against award.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4414.2—Solicitation of Bids

4414.202 General rules for solicitation of bids.

4414.202-1 Bidding time.

(a) Procurement action which does not provide for at least 30 calendar days shall be justified by the contracting officer before releasing the invitation for bids. This justification shall be a finding of fact which establishes the basis for the exception.

(b) Thirty calendar days shall not be construed as the maximum bidding time. Each prospective procurement shall be examined on its own merits to determine the bidding time that will facilitate competition on reasonable and equal terms.

4414.202-2 Telegraphic bids.

Telegraphic bids will be authorized only by the contracting officer who shall document the file as to the need for telegraphic bids.

Subpart 4414.4—Opening of Bids and Award of Contract

4414.401 Receipt and safeguarding of bids.

(a) Envelopes or other outer coverings containing identified bids shall be stamped or otherwise marked to show the office of receipt, the time of day received, and the date. The individual receiving the bids shall then initial under the marking.

(b) A copy of the envelope or other covering bearing the documentation of a bid that was opened by mistake shall be retained in the file.

4414.402 Opening of bids.

The contracting officer, or duly authorized representative, shall be designated as the bid opening officer.

4414.406 Mistakes in bids.

4414.406-3 Other mistakes disclosed before award.

The Director, Office of Acquisition Management, is delegated the authority to make the determinations concerning mistakes in bid other than obvious clerical errors discovered prior to award. Each such determination shall be approved by the Office of General Counsel prior to notification of the bidder.

4414.407 Award.

4414.407-8 Protests against award.

(a) *General.* (1) The contracting officer shall pursue resolution of all protests. If the protest cannot be resolved, or if it has filed with GAO, the contracting officer shall send a report to the HCA. Report contents are as described in FAR 14.407-8(a)(2). The HCA shall recommend a course of action or send the report to the Office of General Counsel. All communication with GAO concerning a protest shall be coordinated through the HCA and the Office of General Counsel.

(2) The contracting officer shall give the protestor the final decision within 30 working days after receipt of the protest. A formal report shall be submitted to GAO within 25 working days after receipt of a request from GAO. To meet these dates, the contracting officer shall submit the report to the HCA within 10 working days after receipt of the protest or GAO's request for comment.

(b) *Protests before award.* If there is a protest, the contracting officer must have the approval of the HCA before awarding a contract. The contracting officer shall send a written determination with the request for approval. When the protest has been filed with GAO, the HCA shall notify the Office of General Counsel before authorizing award.

(c) *Protests after award.* The contracting officer's report also shall contain:

(1) Current status of the contract, indicating whether performance has commenced, shipment or delivery has been made, or a stop work order has been issued, and

(2) Copies of any agreement with the contractor, if applicable, to suspend performance.

(d) *Timeliness.* A protest filed with the contracting officer shall be filed to be received at the procuring office not later than five working days after the basis for protest is known or reasonably should have been known, whichever is earlier.

(3) *Records.* The HCA shall maintain records relating to all protests received. The records shall show the number and nature of formal protests received (whether filed directly with FEMA or with GAO), their disposition, and the time for resolutions. These records will be reviewed annually to update protest procedures.

PART 4415—CONTRACTING BY NEGOTIATION

Subpart 4415.1—General Requirements for Negotiation

Sec.
4415.105 Competition.
4415.105-70 Noncompetitive acquisitions.
4415.105-71 Preference for local contractors.

Subpart 4415.3—Determinations and Findings To Justify Negotiation

4415.307 Signatory authority.

Subpart 4415.4—Solicitation and Receipt of Proposals and Quotations

4415.406-5 Part IV—Representations and instructions.
4415.413 Disclosure and use of information before award.
4415.413-2 Alternate II.
4415.413-70 Policy.
4415.413-71 Release of information during the solicitation phase.
4415.413-72 Disposition of unsuccessful proposals.

Subpart 4415.5—Unsolicited Proposals

4415.500 Scope of subpart.
4415.502 Policy.
4415.502-70 Cost sharing.
4415.506 Agency procedures.

Subpart 4415.6—Source Selection

4415.612 Formal source selection.

Subpart 4415.8—Price Negotiation

4415.803 General.

Subpart 4415.10—Preaward and Postaward Notifications, Protests, and Mistakes

4415.1002 Debriefing of unsuccessful offerors.
4415.1003 Negotiated procurement protests.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4415.1—General Requirements for Negotiation

4415.105 Competition.

4415.105-70 Noncompetitive acquisitions.

Program offices shall give the contracting office a detailed recital of the circumstances justifying noncompetitive acquisition. If the acquisition is expected to exceed $1,000 but not the small purchase limit, the contracting officer can approve it. For all other acquisitions, both the justification and the contract file shall be submitted to the appropriate approval authority before issuing a solicitation:

(a) Acquisitions over the small purchase limit but not over $100,000—level above the contracting officer.

(b) Acquisitions over $100,000 but not over $500,000—the head of the contracting activity.

(c) Acquisitions over $500,000—the Executive Administrator.

4415.105-71 Preference for local contractors.

(a) This subsection establishes policies relating to local contractor preference to receive contract awards resulting from competitively negotiated solicitations under a Presidentially

declared major disaster or emergency operation.

(b) The geographic areas to which local contractor preference shall apply are those affected by the Presidentially declared disaster and designated in the Federal Register by the Assistant Associate Director, Office of Disaster Assistance Programs. Geographical areas shall be identified by county or other political subdivision.

(c) Pursuant to the provisions of Pub. L. 93–288(k), the provision set forth in 4452.215–70 shall be included in each competitively negotiated solicitation for disaster relief response.

(d) If the contracting officer determines it to be in the best interest of the Government, the provision set forth in 4452.215–70 need not be included in solicitations. Such determination shall be documented in the contract file with a findings and determination signed by the contracting officer and approved by the head of the contracting activity.

(e) If the contracting officer makes the determination of paragraph (d) above, local participation may be encouraged by:

(1) Setting the procurement aside for labor surplus area if the disaster area has been established as a labor surplus area;

(2) Advertising only in the local disaster area; and/or

(3) Dividing large requirements into several smaller requirements.

Subpart 4415.3—Determinations and Findings To Justify Negotiation

4415.307 Signatory authority.

The head of the contracting activity shall sign all class D&Fs not reserved to the agency head in FAR Table 15–1.

Subpart 4415.4—Solicitation and Receipt of Proposals and Quotations

4415.406–5 Part IV—Representations and instructions.

Each competitive solicitation shall contain the significant selection criteria, including the numerical weighting of each.

4415.413 Disclosure and use of information before award.

4415.413–2 Alternate II.

These alternate FAR procedures may be used if approved in writing by the head of the contracting activity.

4415.413–70 Policy.

It is FEMA policy to use information contained in proposals only for evaluation purposes unless information (a) is generally available to the public, (b) is already the property of the Government, (c) is already available to the Government with unrestricted use rights, or (d) is or has been made available to the Government without restriction.

4415.413–71 Release of information during the solicitation phase.

No information shall be released during the solicitation phase, except as follows:

Each solicitation for a negotiated acquisition shall name an individual in the contracting office to respond to inquiries concerning the solicitation and evaluation of proposals resulting from the solicitation. All questions whether of a procedural or substantive nature shall be directed to that individual. No one else shall exchange comments with offerors or potential offerors. Questions requiring clarification of substantive portions of the solicitation shall be answered by amendment of the solicitation. A copy of the amendment shall be sent to each recipient of the solicitation.

4415.413–72 Disposition of unsuccessful proposals.

Unsuccessful proposals shall be disposed of as follows:

(a) All but one copy of each unsuccessful proposal shall be destroyed upon contract award. The one remaining copy of each shall be retained in the official contract file. At the end of six months it may be destroyed.

(b) Unsuccessful proposals shall not be used for purposes other than internal reference unless (1) written permission has been obtained from the offeror or (2) the proposal expressly states that unrestricted use is given to the Government regardless of its success in the competition.

Subpart 4415.5—Unsolicited Proposals

4415.500 Scope of subpart.

This subpart sets forth procedures for controlling the receipt, evaluation, and timely disposition of unsolicited proposals.

4415.502 Policy.

4415.502–70 Cost sharing.

FEMA's Appropriation Act requires the contractor to cost share if a research contract results from an unsolicited proposal. This requirement may be waived only when it would not be equitable for the Government to require cost sharing. To waive, (a) the offeror must certify in writing to the contracting officer that it has no commercial, production, educational, or service activities on which to use the results of the research and that it has no means of recovering any cost on such projects; and (b) the contracting officer must make a written determination that there is no measurable gain to the performing organization and no mutuality of interest. This determination shall be placed in the contract file.

4415.506 Agency procedures.

(a) The Office of Acquisition Management is the point of contact for the receipt, acknowledgment, and handling of unsolicited proposals. Unsolicited proposals and requests for additional information regarding their preparation shall be submitted to:

Federal Emergency Management Agency, Office of Acquisition Management, Policy & Evaluation Division, 500 C Street SW., Room 728, Washington, DC 20472.

(b) Unsolicited proposals received by other FEMA offices shall be sent immediately to the Office of Acquisition Management, Policy & Evaluation Division.

(c) Unsolicited proposals shall be submitted in an original and five copies at least six months in advance of the date the offeror desires to begin work so that there will be enough time to evaluate the proposal and negotiate a contract.

4415.506–1 Receipt and initial review.

The Office of Acquisition Management shall acknowledge an unsolicited proposal. Simultaneously, copies of the proposal shall be sent to the appropriate program offices for evaluation.

Subpart 4415.6—Source Selection

4415.612 Formal source selection.

(a) All competitive acquisitions in excess of the small purchase limit shall be subject to a formal source selection procedure.

(b) The source selection organization consists of an evaluation board and a selection official. The contracting officer is the source selection official for acquisitions under $500,000. The head of the cognizant program office is the source selection official for acquisitions of $500,000 or more.

(c) The contracting officer shall establish the competitive range on all acquisitions. The range determination on acquisitions in excess of $500,000 will be approved by the source selection official.

(d) The contracting officer shall enter into final negotiations to reach agreement on terms and conditions with the firm or firms selected.

Subpart 4415.8—Price Negotiation

4415.803 General.

When all efforts to get a contractor to agree to a reasonable price or fee have failed, the contracting officer shall refer the matter to the head of the contracting activity.

Subpart 4415.10—Preaward and Postaward Notifications, Protests, and Mistakes

4415.1002 Debriefing of unsuccessful offerors.

Any unsuccessful offeror may write for a debriefing within two months after contract award. The contracting officer shall provide the debriefing.

4415.1003 Negotiated procurement protests.

Protests against award of negotiated contracts shall be processed in accordance with 4414.407–8 and FAR 14.407–8.

Part 4416—Types of Contracts

Subpart 4416.3—Cost-Reimbursement Contracts

Sec.
4416.303 Cost-sharing contracts.

Subpart 4416.6—Time-and-Materials, Labor-Hour, and Letter Contracts

4416.603 Letter contracts.
4416.603–3 Limitations.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4416.3—Cost-Reimbursement Contracts

4416.303 Cost-sharing contracts.

(a) This subsection sets forth basic guidelines governing cost-sharing contracts.

(b)(1) Cost sharing with non-Federal organizations shall be encouraged in contracts for basic or applied research in which both parties have considerable interest.

(2) Contracting officers shall assure themselves of the following in determining contract type:

(i) The research effort has more than minor relevance to the non-Federal activities of the performing organization and is not primarily a service to the Government.

(ii) The performing organization has adequate non-Federal sources of funds from which to make a cash contribution.

(iii) The performing organization is engaged primarily in production or other service activities, as opposed to research and development, and is in a favorable position to make a cost contribution.

(iv) The principal purpose of the contract is research.

(v) Payment of the full cost of the project is not necessary in order to obtain the services of the particular organization.

(3) FEMA's Appropriation Act requires cost sharing by the contractor under research contracts resulting from unsolicited proposals. See 4415.502–70.

(c) Guidelines for determining the amount of cost sharing.

(1) For educational institutions and other not-for-profit or non-profit organizations, cost sharing may vary from 1 to 50 percent of the costs of the project. In some cases it may be appropriate for educational institutions to provide a higher degree of cost sharing, such as when the cost of the research consists primarily of the academic-year salary of faculty members, or when the equipment acquired by the institution for the project will be of significant value to the institution in its educational activities.

(2) The amount of cost participation by commercial or industrial organizations may vary from 1 percent or less to more than 50 percent of total project cost, depending upon the extent to which the research effort is likely to enhance the performing organization's capability, expertise, or competitive position, and the value of such enhancement to the performing organization. Recognize, however, that organizations predominately engaged in research and development with little other activity may not be able to derive a monetary benefit from the research under Federal agreements.

(3) A fee will usually not be paid to the performing organization if the organization is to contribute to the cost of the research effort, but the amount of cost sharing may be reduced to reflect the fact that the organization is foregoing normal fee on the research. However, if the research is expected to be of major value to the performing organization and if cost sharing is not required by statue, it may be appropriate for the performer to make a contribution in the form of a reduced fee rather than sharing the costs of the project.

(4) Each cost-sharing contract negotiated shall contain the clause in 4452.216–70.

Subpart 4416.6—Time-and-Materials, Labor-Hours, and Letter Contracts

4416.603 Letter contracts.

4416.603–3 Limitations.

A letter contract may be used only if the head of the contracting activity executes a determination and finding that not other contract type is suitable.

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

PART 4419—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 4419.2—Policies

4419.201 General policy.

(a) The Director, Office of Equal Opportunity, is also the Director, Office of Small and Disadvantaged Business Utilization.

(b) The Chief, Policy and Evaluation Division, Office of Acquisition Management, is the small business technical advisor.

(c) Each contracting officer is a small and disadvantaged business utilization specialist.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

PART 4424—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 4424.2—Freedom of Information Act

4424.202 Policy.

FEMA's Freedom of Information Act policy is codified at 44 CFR 5.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978; 43 FR 41943)

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 4429—TAXES

Subpart 4429.1—General

4429.101 Resolving tax problems.

(a) The Office of General Counsel is responsible, within FEMA, for handling all tax problems. It also is responsible for asking the Department of Justice for representation or intervention in proceedings concerning taxes.

(b) The contracting officer shall request, in writing, the assistance of the Office of General Counsel in resolving a tax problem. The request shall detail the problem and include supporting information. The Office of General Counsel shall inform the contracting officer of the disposition of the tax problem and the contracting officer will tell the contractor.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

PART 4432—CONTRACT FINANCING

Subpart 4432.4—Advance Payments

4432.402 General.

The head of the contracting activity has responsibility and authority to make findings and determinations and to approve or disapprove contract terms.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

PART 4435—RESEARCH AND DEVELOPMENT CONTRACTING

4435.003 Policy.

Cost-sharing policy for research and development contracts is stated in 4415.502–70.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943)

PART 4436—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 4436.6—Architect-Engineer Services

Sec.
4436.602–2 Evaluation boards.
4436.602–4 Selection authority.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4436.6—Architect-Engineer Services

4436.602–2 Evaluation boards.

(a) Each architect-engineer evaluation board, permanent or ad hoc, shall have at least five voting members and one alternate. These will be Federal employees. A majority of the voting members will be from the program office.

(b) During the selection process, a board member or advisor may have, or appear to have, a conflict of interest regarding a firm in the competition. Immediately upon becoming aware of a potential conflict or an appearance of a conflict, the member or advisor shall notify the board chairperson who shall, in turn, inform the Office of General Counsel. The Office of General Counsel shall make a final determination on the conflict issue.

(c) The evaluation board is to be insulated from outside pressures. Information concerning board deliberations shall be divulged only to persons having a need-to-know.

(a) Heads of program offices which may require architect-engineer services are designated as selection authorities for acquisitions of architect-engineer services.

(b) A determination shall be sent to the contracting officer listing the selected firms in order of preference.

SUBCHAPTER H—CLAUSES AND FORMS

PART 4452—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 4452.2—Texts of Provisions and Clauses

Sec.
4452.215–70 Preference for local contractors in Presidentially declared major disasters or emergencies.
4452.227–70 Reproduction of reports.
4452.227–71 Coordination of Federal reporting requirements.
4452.227–72 Publication.
4452.239–70 Rights in technical data and computer software.
4452.239–71 Rights in technical data—specific acquisition.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

Subpart 4452—Clauses and Forms

4452.215–70 Preference for local contractors in Presidentially declared major disasters or emergencies.

Pursuant to the provisions of Pub. L. 93–288 and 4415.105–71, the following provisions shall be included in each competitively negotiated solicitation for on-site disaster relief response:

Preference for Local Contractors

In awarding any contract pursuant to this solicitation, the Government shall give preference to local organizations, firms, and individuals residing or doing business primarily in the geographic area identified as the disaster area.

The contracting officer reserves the right to request offerors to furnish documentation to demonstrate eligibility for local contractor preference. To be eligible, the offeror shall have been residing (in the case of individuals) or doing the major portion of its business (in the case of business entities) in the disaster area.

An offeror for which eligibility is established (local offeror) shall be permitted to meet the lowest price received from an otherwise eligible non-local offeror, provided that the proposed price from the local offeror does not exceed 130 percent of the price of the non-local offeror. The lowest priced local offeror within 130 percent of the lowest non-local price shall have the first chance to meet the non-local price. If the local offeror meets the lowest non-local price and is determined to be responsible, award shall be made. If the non-local offer is not met, the next lowest local offeror within 130 percent shall have the chance to meet the lowest non-local price. This process shall continue until award is made to a local offeror within the 130 percent requirement or the supply of such local offerors is exhausted and award made to the lowest non-local offerors.

(End of clause)

4452.227–70 Reproduction of reports.

Include the following clause when the product of the contract is a report, data, or other written material.

Reproduction of Reports

Reproduction of reports, data, or other written material, if required herein, is authorized provided that the material produced does not exceed 5,000 production units of any page and that items consisting of multiple pages do not exceed 25,000 production units in aggregate. The aggregate number of production units is to be determined by multiplying pages times copies. A production unit is one sheet, size 8½ by 11 inches or less, printed on one side only, and in one color. All copy preparation to produce camera-ready copy for reproduction must be set by methods other than hot metal typesetting. The reports should be produced by methods employing stencils, masters, and plates which are to be used on single-unit duplicating equipment no larger than 11 by 17 inches with a maximum image of 10¾ by 14¼ inches and are prepared by methods or devices that do not utilize reusable contact negatives and/or positives prepared with a camera requiring a darkroom. All reproducibles (camera-ready copies for reproduction by photo offset methods) shall become the property of the Government and shall be delivered to the Government with the report, data, or other written material.

(End of clause)

4452.227–71 Coordination of Federal reporting requirements.

The following clause shall be included in contracts when appropriate:

Coordination of Federal Reporting Services

In the event that it is a contractual requirement to collect information from 10 or more public respondents, the provisions of 44 U.S.C., Chapter 35 (Coordination of Federal Reporting Requirements), shall apply to this contract. The contractor shall obtain through the project officer the required Office of Management and Budget clearance before making public contacts for the collection of data or expending any funds for such collection. The authority to proceed with the collection of data from public respondents and the expenditure of funds therefore shall be in writing signed by the contracting officer.

(End of clause)

4452.227–72 Publication.

The following clause shall be used in all contracts under which it is anticipated that a report will be a product:

Publication

(a) *Definition.* For the purpose of this clause, "publication" includes (1) any document containing information intended

for public consumption or (2) the act of, or any act which may result in, disclosing information to the public.

(b) *General.* The results of the research and development and studies conducted under this contract are to be made available to the public through dedication, assignment to the Government, or such other means as the Director of the Federal Emergency Management Agency shall determine.

(c) *Reports furnished the Government.* All intermediate and final reports of the research and development and studies conducted hereunder shall indicate on the cover or other initial page that the research and development and studies forming the basis for the report were conducted pursuant to a contract with the Federal Emergency Management Agency. Such reports are official Government property and may not be published or reproduced (in toto, in verbatim excerpt, or in a form approximating either of these) as an unofficial paper or article. The contractor or technical personnel (each employee or consultant working under the administrative direction of the contractor or any subcontractor hereunder) may publish such reports in whole or in part in a non-Government publication only in accordance with this paragraph (c) and paragraph (e)(1) of this clause.

(d) *Publication by Government.* The Government shall have full right to publish all information, data, and findings developed as a result of the research and development and studies conducted hereunder.

(e) *Publication by contractor or technical personnel.*—(1) *Publication in whole or in part of contractor's reports furnished the Government.* Unless such reports have been placed in the public domain by Government publication, the contractor or technical personnel (each employee or consultant working under the administrative direction of the contractor or any subcontractor hereunder) may publish a report furnished the Government, in toto or in verbatim excerpt, but consistent with paragraph (c) of this clause may not secure copyright therein, subject to the following conditions, and the conditions in paragraph (e)(4) and paragraph (f):

(i) During the first six months after submission of the full final report, if written permission to publish is obtained from the contracting officer.

(ii) After six months following submission of the full report, and if paragraph (e)(3) is inapplicable, if a foreword or footnote in the non-Government publication indicates the source of the verbatim material.

(2) *Publication, except verbatim excerpts, concerning or based in whole or in part on results of research and development and studies hereunder.* The contractor or technical personnel may issue a publication concerning, or based in whole or in part on the results of, the research and development and studies conducted under this contract and may secure copyright therein, but in so publishing is not authorized thereby to inhibit the unrestricted right of the Director of the Federal Emergency Management Agency to disclose or publish, in such manner as he may deem to be in the public interest, the results of such research and development and studies, subject to the following conditions and the requirement in paragraph (e)(4):

(i) During the first six months after submission of the full final report, and if paragraph (e)(3) is inapplicable, if written waiver of the waiting period is obtained from the contracting officer.

(ii) After six months following submission of the full final report, and if paragraph (e)(3) is inapplicable, subject to Government exercise of an option that the publication contain a foreword or initial footnote substantially as follows:

The (research) (development) (studies) forming (part of) the basis for this publication were conducted pursuant to a contract with the Federal Emergency Management Agency. The substance of such (research) (development) (studies) is dedicated to the public. The author and publisher are solely responsible for the accuracy of statements or interpretations contained herein.

(3) *General condition if FEMA determines that contractor's final report contains patentable subject matter developed in contract performance.* If the contracting officer determines that the contractor's full final report contains patentable subject matter developed in the performance of this contract and so notifies the contractor in writing prior to six months from date of submission of such report, no publication of verbatim excerpts from contractor's reports or publication concerning or based in whole or in part on the results of the research and development and studies hereunder shall be made without the written consent of the contracting officer.

(4) *Copies of contractor and technical personnel publications to be furnished the Government.* The contractor or technical personnel will furnish the contracting officer six copies of any publications which are based in whole or in part on the research and development and studies conducted under this contract.

(f) *Administratively confidential information.* The contractor shall not publish or otherwise disclose, except to the Government and except matters of public record, any information or data obtained hereunder from private individuals, organizations, or public agencies, in a publication whereby the information or data furnished by any particular person or establishment can be identified, except with the consent of such person or establishment.

(g) *Inclusion of provisions in contractor's agreements.* The contractor shall include provisions appropriate to effectuate the purposes of this clause in all contracts of employment with persons who perform any part of the research or development or study under this contract and in any consultant's agreements or subcontracts involving research or development or study hereunder.

(End of clause)

4452.239–70 Rights in technical data and computer software.

Rights in Data

(a) *Definitions.* (1) Technical data means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental, or engineering work; or be usable or used to define a design or process or to procure, produce, support, maintain, or operate materiel. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design type documents, or computer printouts. Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications standards, process sheets, manuals, technical reports, catalog item identifications and related information, and computer software documentation. Technical data does not include computer software or financial, administrative, cost or pricing, and management data or other information incidental to contract administration.

(2) Computer means a data processing device capable of accepting data, performing prescribed operations on the data, and supplying the results of these operations; for example, a device that operates on discrete data by performing arithmetic and logic processes on these data, or a device that operates on analog data by performing physical processes on the data.

(3) Computer software means computer programs and computer data bases.

(4) Computer program means a series of instructions or statements in a form acceptable to a computer, designed to cause the computer to execute an operation or operations. Computer programs include operating systems, assemblers, compilers, interpreters, data management systems, utility programs, sort-merge programs and ADPE maintenance/diagnostic programs, as well as applications programs such as payroll, inventory control, and engineering analysis programs. Computer programs may be either machine-dependent or machine-independent, and may be general-purpose in nature or designed to satisfy the requirements of a particular user.

(5) Computer data base means a collection of data in a form capable of being processed and operated on by a computer.

(6) Computer software documentation means technical data, including computer listings and printouts, in human-readable form which (i) documents the design or details of computer software, (ii) explains the capabilities of the software, or (iii) provides operating instructions for using the software to obtain desired results from a computer.

(7) Unlimited rights means rights to use, duplicate, or disclose technical data or computer software in whole or in part, in any manner and for any purpose whatsoever, and to have or permit others to do so.

(8) Limited rights means rights to use, duplicate, or disclose technical data, in whole or in part, by or for the Government, with the express limitation that such technical data shall not, without the written permission of the party furnishing such technical data be (a) released or disclosed in whole or in part outside the Government; (b) used in whole or in part by the Government for manufacture, or in the case of computer software documentation, for preparing the same or similar computer software; or (c) used by a party other than the Government, except for:

(i) Emergency repair or overhaul work only, by or for the Government, where the item or process concerned is not otherwise reasonably available to enable timely performance of the work, provided that the release or disclosure thereof outside the Government shall be made subject to a prohibition against further use, release of disclosure; or

(ii) Release to a foreign government, as the interest of the United States may require, only for information or evaluation within such government or for emergency repair or overhaul work by or for such government under the conditions of (i) above.

(9) Restricted rights apply only to computer software, and include, as a minimum, the right to:

(i) Use computer software with the computer for which or with which it was acquired, including use at any Government installation to which the computer may be transferred by the Government;

(ii) Use computer software with a backup computer if the computer for which or with which it was acquired is inoperative;

(iii) Copy computer programs for safekeeping (archives) or backup purposes;

(iv) Modify computer software, or combine it with other software, subject to the provision that those portions of the derivative software incorporating restricted rights software are subject to the same restricted rights; and

(v) Treat computer software bearing a copyright notice as a published copyrighted work; and in addition, any other specific rights not inconsistent therewith listed or described in this contract or described in a license or agreement made a part of this contract.

(b) *Government right.*—(1) *Unlimited rights.* The Government shall have unlimited rights in:

(i) Technical data and computer software resulting directly from performance of experimental, developmental, or research work which was specified as an element of performance in this or any other Government contract or subcontract;

(ii) Computer software required to be originated or developed under a Government contract, or generated as a necessary part of performing a contract;

(iii) Computer data bases, prepared under Government contract, consisting of information supplied by the Government, information in which the Government has unlimited rights, or information which is in the public domain;

(iv) Technical data necessary to enable manufacture of end items, components, and modifications, or to enable the performance of processes, when the items, components, modifications or processes have been, or are being, developed under this or any other Government contract or subcontract in which experimental, developmental, or research work is, or was specified as an element of contract performance, except technical data pertaining to items, components, processes, or computer software developed at private expense (but see (2)(ii) below);

(v) Technical data or computer software prepared or required to be delivered under this or any other Government contract or subcontract and constituting corrections or changes to Government-furnished data or computer software;

(vi) Technical data pertaining to end items, components, or processes, prepared or required to be delivered under this or any other Government contract or subcontract, for the purpose of identifying sources, size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements ("form, fit, and function" data; e.g., specification control drawings, catalog sheets, envelope drawings, etc.);

(vii) Manuals or instructional materials prepared or required to be delivered under this contract or any subcontract hereunder for installation, operation, maintenance, or training purposes;

(viii) Technical data or computer software which is in the public domain, or has been or is normally furnished without restriction by the contractor or subcontractor; and

(ix) Technical data or computer software listed or described in an agreement incorporated into the schedule of this contract which the parties have predetermined, on the basis or subparagraphs (i) through (viii) above, and agreed will be furnished with unlimited rights.

(2) *Limited rights.* The Government shall have limited rights in:

(i) Technical data listed or described in an agreement incorporated into the Schedule of this contract which the parties have agreed will be furnished with limited rights; and

(ii) Technical data pertaining to items, components, or processes developed at private expense, and computer software documentation related to computer software that is acquired with restricted rights, other than such data as may be included in the data referred to in (b)(1)(i), (v), (viii), and (ix); provided that only the portion or portions of each piece of data to which limited rights are to be asserted pursuant to (2)(i) and (ii) above are identified (for example, by circling, underscoring, or a note), that the piece of data is marked with the legend below in which is inserted:

A. The number of the contract under which the technical data is to be delivered.

B. The name of the contractor and any subcontractor by whom the technical data was generated, and

C. An explanation of the method used to identify limited rights data.

Limited Rights Legend

Contract No. _____
Contractor: _____

Explanation of Limited Rights

Identification Method Used

_____

_____

Those portions of this technical data indicated as limited rights data shall not, without the written permission of the above contractor, be either (a) used, released, or disclosed in whole or in part outside the Government; (b) used in whole or in part by the Government for manufacture or, in the case of computer software documentation, for preparing the same or similar computer software; or (c) used by a party other than the Government, except for: (i) emergency repair or overhaul work only, by or for the Government, where the item or process concerned is not otherwise reasonably available to enable timely performance of the work, provided that the release or disclosure hereof outside the Government shall be made subject to a prohibition against further use, release, or disclosure; or (ii) release to a foreign government, as the interest of the United States may require, only for information or evaluation within such government or for emergency repair or overhaul work by or for such government under the conditions of (i) above. This legend, together with the indications of the portions of this data which are subject to such limitations shall be included on any reproduction hereof which includes any part of the portions subject to such limitations.

(3) *Restricted rights.* The Government shall have restricted rights in computer software, listed or described in a license or agreement made a part of this contract, which parties have agreed will be furnished with restricted rights, provided however notwithstanding any contrary provision in any such license or agreement, the Government shall have the rights in (a)(9)(i) through (v). Such restricted rights are of no effect unless the computer software is marked by the contractor with the following legend: Restricted Rights Legend

Use, duplication, or disclosure is subject to restrictions stated in Contract No.————— with————(name of contractor)————, and the related computer software documentation includes a prominent statement of the restrictions applicable to the computer software. The contractor may not place any legend on computer software indicating restrictions on the Government's rights in such software unless the restrictions are set forth in a license or agreement made a part of this contract prior to the delivery date of the software. Failure of the contractor to apply a restricted rights legend to such computer software shall relieve the Government of liability with respect to such unmarked software.

(4) No legend shall be marked on, nor shall any limitation or restriction on rights of use be asserted as to, any data or computer software which the contractor has previously delivered to the Government without restriction. The limited or restricted rights provided for by this paragraph shall not impair the right of the Government to use similar or identical data or computer software acquired from other sources.

(c) *Material covered by copyright.* (1) In addition to the rights granted under the provisions of (b) above, the contractor agrees to and does hereby grant to the Government a royalty-free nonexclusive and irrevocable license throughout the world for Government purposes to publish, translate, reproduce, deliver, perform, dispose of, and to authorize others so to do, all technical data, except computer software documentation bearing a copyright notice and furnished in support of restricted rights computer software, and unlimited rights computer software prepared or required to be delivered under the contract, now or hereafter covered by copyright.

(2) Copyrighted matter shall not be included in technical data furnished hereunder without the written permission of the copyright owner for the Government to use such copyright matter in the manner described in (c)(1) above, unless the written approval of the contracting officer is obtained.

(3) The contractor shall report to the Government (or higher-tier contractor) promptly and in reasonable written detail each notice or claim of copyright infringement received by the contractor with respect to any technical data or computer software delivered hereunder.

(d) *Removal of unauthorized markings.* Notwithstanding any provision of this contract concerning inspection and acceptance, the Government may correct, cancel, or ignore any marking not authorized by the terms of this contract on any technical data or computer software furnished hereunder if:

(1) The contractor fails to respond within 60 days to a written inquiry by the Government concerning the propriety of the markings; or

(2) The contractor's response fails to substantiate, within 60 days after written notice, the propriety of limited rights markings by clear and convincing evidence, or of restricted rights markings by identification of the restrictions set forth in the contract.

In either case, the Government shall give written notice to the contractor of the action taken.

(e) *Relation to patents.* Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(f) *Limitation on charges for data and computer software.* The contractor recognizes that the Government or a foreign government with funds derived through the Military Assistance Program, or otherwise through the United States Government, may contract for property or services with respect to which the vendor may be liable to the contractor for charges for the use of technical data or computer software on account of such a contract. The contractor further recognizes that it is the policy of the Government not to pay in connection with its contracts, or to allow to be paid in connection with contracts made with funds derived through the Military Assistance Program or otherwise through the United States Government, charges for data or computer software which the Government has a right to use and disclose to others, which is in the public domain, or which the Government has been given without restrictions upon its use and disclosure to others. This policy does not apply to reasonable reproduction, handling, mailing, and similar administrative costs incident to the furnishing of such data or computer software. In recognition of this policy, the contractor agrees to participate in and make appropriate arrangements for the exclusion of such charges from such contracts, or for the refund of amounts received by the contractor with respect to any such charges not so excluded.

(g) *Acquisition of data and computer software from subcontractors.* (1) Whenever any technical data or computer software is to be obtained from a subcontractor under this contract, the contractor shall use this same clause in the subcontract, without alteration, and no other clause shall be used to enlarge or diminish the Government's or the contractor's rights in that subcontractor data or computer software which is required for the Government.

(2) Technical data required to be delivered by a subcontractor shall normally be delivered to the next higher-tier contractor. However, when there is a requirement in the prime contract for data which may be submitted with limited rights pursuant to (b)(2) above, a subcontractor may fulfill such requirement by submitting such data directly to the Government rather than through the prime contractor.

(3) The contractor and higher-tier subcontractors will not use their power to award subcontracts as economic leverage to acquire rights in technical data or computer software from their subcontractors for themselves.

(End of clause)

4452.239-71 Rights in technical data—specific acquisition.

Rights in Data—Specific Acquisition

(a) *Definition.* Technical data means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental, or engineering work; or be usable or used to define a design or process or to procure, produce, support, maintain, or operate materiel. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design type documents, or computer printouts. Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identifications and related information, and documentation related to computer software. Technical data does not include computer software or financial, administrative, cost or pricing, and management data, or other information incidental to contract administration.

(b) *Government rights.* The Government may duplicate, use, and disclose in any manner and for any purpose whatsoever, and have others so do, all or any part of the technical data delivered by the contractor to the Government under this contract.

(c) *Material covered by copyright.*

(1) In addition to the rights granted under the provisions of (b) above, the contractor agrees to and does hereby grant to the Government a royalty-free, nonexclusive, and irrevocable license throughout the world for Government purposes to publish, translate, reproduce, deliver, perform, dispose of, and to authorize others so to do, all technical data required to be delivered under the contract now or hereafter covered by copyright.

(2) Copyrighted matter shall not be included in technical data furnished hereunder without the written permission of the copyright owner for the Government to use such copyrighted matter in the manner described in (c)(1) above, unless the written approval of the contracting officer is obtained.

(3) The contractor shall report to the Government (or higher-tier contractor) promptly, and in reasonable written detail, each notice or claim of copyright infringement received by the contractor with respect to any technical data delivered hereunder.

(d) *Relation to patents.* Nothing contained in this clause shall imply a license to the Government under any patent, or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(e) *Limitation on charges for data.* The contractor recognizes that the Government, or a foreign government with funds derived through the Military Assistance Program or otherwise through the United States Government, may contract for property or services with respect to which the vendor may be liable to the contractor for charges for the use of technical data on account of such a contract. The contractor further recognizes that it is the policy of the Government not to pay in connection with its contracts, or to allow to be paid in connection with contracts made with funds derived through the Military Assistance Program or otherwise through the United States Government, charges for data which the Government has a right to use and disclose to others which is in the public domain, which the Government has been given without restrictions upon its use and disclosure to others. This policy does not apply to reasonable reproduction, handling, mailing, and similar administrative costs incident to the furnishing of such data. In recognition of this policy, the contractor agrees to participate in and make appropriate arrangements for the exclusion of such charges from such contracts, or for the refund of amounts received by the contractor with respect to any such charges not so excluded.

33 CFR Parts 320, 323, 325, and 330

Regulations for Controlling Certain Activities in Waters of the United States; Proposed Rule

DEPARTMENT OF DEFENSE

Department of the Army

33 CFR Parts 320, 323, 325, and 330

Proposal To Amend Permit Regulations for Controlling Certain Activities in Waters of the United States

AGENCY: Army Corps of Engineers, DOD.

ACTION: Proposed rule.

SUMMARY: The Department of the Army is proposing to amend the Corps of Engineers permit regulations for controlling certain activities in the waters of the United States. These amendments are being proposed in accordance with a settlement agreement reached in *National Wildlife Federation v. Marsh*, No. 83–3632 (D.D.C. December 22, 1982). We are proposing several policy and procedural changes and modifications to certain nationwide permits. These modifications would become effective after public comment and opportunity to request a public hearing and determination that these modifications are in the public interest.

DATE: Written comments must be received by May 29, 1984.

ADDRESS: Office of the Chief of Engineers, ATTN: DAEN–CWO–N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Sam Collinson or Mr. Bernie Goode, Regulatory Branch (202) 272–0199.

SUPPLEMENTARY INFORMATION:

Why Revisions to the Regulations Are Being Proposed

In December of 1982, 16 environmental organizations filed suit against the Army and the U.S. Environmental Protection Agency (*NWF v. Marsh*) over several provisions of the Corps of Engineers interim final regulation published in the July 22, 1982, **Federal Register** (47 FR 31794). On February 10, 1984, the court approved a settlement agreement between the plaintiffs and defendants whereby the Army agreed to publish regulations proposing several policy and procedural changes and modifications to certain nationwide permits. This settlement agreement has been endorsed by the Army, EPA, the Department of Justice and by the 16 environmental organizations. The Army believes the settlement agreement strikes a reasonable balance between environmental protection and an effective and responsive regulatory program. The settlement agreement does not commit the Army to promulgate any particular final regulations. The Army will consider the comments received on these proposed regulations in promulgating its final regulations. Final regulations will be issued following evaluation of comments received on these proposes rules. The settlement agreement requires that we publish final regulations by September 8, 1984.

The Proposed Changes

Part 320—General Regulatory Policies

Section 320.4(a)(1): This section would be changed to clarify that 404 discharges must comply with the 404(b)(1) guidelines. This section would also be revised to state that, subject to applicable legal requirements, a Corps permit will be granted unless the district engineer determines that it will be contrary to the public interest.

Section 320.4(b)(4): The last two sentences of this section would be changed to state that the district engineer shall apply the 404(b)(1) guidelines (40 CFR 230.10(a) (1), (2), (3)) in evaluating whether a particular discharge affecting wetlands should be permitted.

Section 320.4(c): The last sentence of this section would be replaced with a sentence that states that district engineers will give "full consideration" to the views of federal and state fish and wildlife agencies in permit decisions.

Section 320.4(g)(1): This section would be reworded to recognize the rights of property owners to reasonable prove use of their property, and that these rights are subject to national interests and the rights of the general public in waters of the United States. If this subparagraph is adopted, existing subparagraphs (1) through (4) would be renumbered (2) through (5) respectively.

Section 320.4(j)(2): This section would be changed by adding "preservation of special aquatic areas, including wetlands, with significant interstate importance" to the list of significant issues of overriding national importance.

Part 323—Permits for Discharges of Dredged or Fill Materials Into Waters of the United States

Section 323.4(a)(3): This section would be revised to clarify the types of appurtenant structures to irrigation facilities for which associated discharges are exempt from the provisions of these regulations, except as specified in paragraph (b) and (c) of this section.

Section 323.6(a): This section would be revised to state that district engineers will deny permits for discharges which fail to comply with the 404(b)(1) guidelines, unless the economic impact on navigation and anchorage necessitate permit issuance pursuant to Section 404(b)(2).

Part 325—Permit Processing

Section 325.3: A new paragraph (b) would be added to clarify public notice procedures for any new general permit, or for modification or reissuance of existing general permits. This paragraph would provide that the public notice state the availability of information which indicates that the proposed activities comply with general permit requirements. If this paragraph is adopted, the existing paragraphs (b) and (c) would be redesignated as paragraphs (c) and (d), respectively.

Section 325.4: This section would be revised to clarify the district engineers' authority to condition permits and to identify circumstances in which he shall deny permits if conditions which are necessary to protect the public interest cannot be reasonably implemented or enforced, or cannot otherwise be required. This section would also provide that under certain conditions off-site mitigation may be required.

Part 330—Nationwide Permits

Section 330.4: This section would be replaced with a new section discussing public notice requirements for nationwide permits including making available to the public information which demonstrates compliance with general permit criteria. The nationwide permits now found in § 330.4 will be consolidated, revised, and placed at § 330.5(a)(26). See discussion below.

Section 330.5(a) (7), (17), (21): These nationwide permits would be modified to include a reference to new § 330.7.

Section 330.5(a)(23): This nationwide permit would be modified to require that the Chief of Engineers would solicit comments through a **Federal Register** notice on another Federal agency's categorical exclusions prior to determining whether those categorical exclusions qualify for authorization under this nationwide permit.

Section 330.5(a)(26): This nationwide permit is a modification of the headwaters and isolated waters nationwide permits found at § 330.4(a) (1) and (2) in the interim final regulations. We are proposing to exclude from nationwide permit (26) any discharge which would cause the loss or substantial adverse modification of 10 or more acres of water of the United States including wetlands. This nationwide permit would be further modified to require a pre-discharge notification to the district engineer for any discharge

which would cause the loss or substantial adverse modification of from 1 to 10 acres.

Section 330.7: This new section establishes procedures which would be followed by district and division engineers upon receipt of pre-discharge notifications required for certain of the nationwide permits. These procedures provide for coordination with Federal and State resource agencies in certain situations and that each notification be reviewed for compliance with the terms and conditions of the appropriate nationwide permit and with the definition of a general permit. Any discharge which does not so comply will require an individual permit. Section 330.7 of the interim final regulations would be revised and moved to § 330.8 as discussed below.

Section 330.8: This section would also be changed to recognize that the general permittee's right to proceed under the nationwide permits may be modified, suspended or revoked only in accordance with procedures similar to those for individual permittees. Section 330.8 in the interim final regulations would become § 330.9.

State Certification of Nationwide Permits

In our proposed regulation changes of May 12, 1983 (48 FR 21466), we stated that we were allowing all States to reconsider certification of nationwide permits pursuant to Section 401 of the Clean Water Act. Also, coastal States with approved coastal zone management plans were allowed to reconsider consistency determinations under the Coastal Zone Management Act. The Office of the Chief of Engineers is now sending a letter to those States which expressed 401 certification and CZM consistency concerns to ask for a final position. All of the changes to the nationwide permit program being proposed today should reduce the earlier concerns expressed by the States.

Public Hearing Requests

Any person may request a public hearing on proposed modifications to the nationwide permits. If the Corps determines that a public hearing or hearings would assist in making a decision on the proposed modifications, a 30-day advance notice will be published in the **Federal Register** advising interested parties of the date(s) and location(s) for the hearing(s).

Nationwide Permits Documentation

The Corps will update the statement of finding and environmental documentation before modifying any of the nationwide permits. The documentation will include that required by the EPA guidelines adopted under Section 404(b)(1) of the CWA. The Corps will modify these permits only if they are found to be in the public interest and in compliance with the 404(b)(1) guidelines.

Note 1.—The Department of the Army has determined that the proposed regulation revisions do not contain a major proposal requiring the preparation of a regulatory analysis under E. O. 12291.

Note 2.—The term "he" and its derivatives used in these regulations is generic and should be considered as applying to both male and female.

List of Subjects

33 CFR Part 320

Environmental protection, Intergovernmental relations, Navigation, Water pollution control, Waterways.

33 CFR Part 323

Navigation, Water pollution control, Waterways.

33 CFR Part 325

Administrative practice and procedure, Intergovernmental relations, Environmental protection, Navigation, Water pollution control, Waterways.

33 CFR Part 330

Navigation, Water pollution control, Waterways.

Dated: March 22, 1984.

Approved:

Robert K. Dawson,

Deputy Assistant Secretary of the Army (Civil Works).

Accordingly, the Department of the Army proposes to amend 33 CFR Parts 320, 323, 325, and 330 as set forth below:

Authority: 33 U.S.C. 401 et seq., 33 U.S.C. 1344, 33 U.S.C. 1413.

PART 320—GENERAL REGULATORY POLICIES

1. Section 320.4 is amended by revising paragraphs (a)(1), (b)(4), (c), (g)(1), and (j)(2) to read:

§ 320.4 General policies for evaluating permit applications.

* * * * *

(a) *Public interest review.* (1) The decision whether to issue a permit will be based on an evaluation of the probable impacts, including cumulative impacts, of the proposed activity and its intended use on the public interest. Evaluation of the probable impacts which the proposed activity may have on the public interest requires a careful weighing of all those factors which become relevant in each particular case. The benefits which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments. The decision whether to authorize a proposal, and if so the conditions under which it will be allowed to occur, are therefore determined by the outcome of the general balancing process. That decision should reflect the national concern for both protection and utilization of important resources. All factors which may be relevant to the proposal must be considered including the cumulative effects thereof: among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership, and, in general, the needs and welfare of the people. For acivities involving 404 discharges, a permit will be denied if the discharge that would be authorized by such permit would not comply with the Environmental Protection Agency's 404(b)(1) guidelines. Subject to the proceding sentence and any other applicable guidelines or criteria (see §§ 320.2 and 320.3), a permit will be granted unless the district engineer determines that it would be contrary to the public interest.

* * * * *

(b) *Effect on wetlands.* * * *

(4) No permit will be granted which involves the alternation of wetlands identified as important by paragraph (b)(2) of this section or because of provisions of paragraph (b)(3) of this section, unless the district engineer concludes, on the basis of the analysis required in paragraph (a) of this section, that the benefits of the proposed alteration outweigh the damage to the wetlands resource. In evaluating whether a particular discharge activity should be permitted, the district engineer shall apply the Section 404(b)(1) guidelines (40 CFR 230.10(a)(1), (2), (3)).

* * * * *

(c) *Fish and wildlife.* In accordance with the Fish and Wildlife Coordination Act (see paragraph 320.3(e) of this Part), district engineers will consult with the Regional Director, U.S. Fish and Wildlife Service, the Regional Director, National Marine Fisheries Service, and the head of the agency responsible for fish and wildlife for the state in which work is to be performed, with a view to the

conservation of wildlife resources by prevention of their direct and indirect loss and damage due to the activity proposed in a permit application. The Army will give full consideration to the views of those agencies on fish and wildlife considerations in deciding on the issuance, denial, or conditioning of individual or general permits.

* * * * *

(g) *Consideration of property ownership.* Authorization of work or structures by the Department of the Army does not convey a property right, nor authorize any injury to property or invasion of other rights.

(1) An inherent aspect of property ownership is a right to reasonable private use. However, this right is subject to the rights and interests of the public in the navigable and other waters of the United States, including the federal navigation servitude and federal regulations for environmental protection.

* * * * *

(j) *Other Federal, state or local requirements.* * * *

(2) The primary responsibility for determining zoning and land use matters rests with state, local and tribal governments. The district engineer will normally accept decisions by such governments on those matters unless there are significant issues of overriding national importance. Such issues would include but are not necessarily limited to nationa security; navigation; national economic development; water quality; preservation of special aquatic areas, including wetlands, with significant interstate importance; and national energy needs. Whether a factor has overriding importance will depend on the degree of impact in an individual case.

* * * * *

PART 323—PERMITS FOR DISCHARGES OF DREDGED OR FILL MATERIAL INTO WATERS OF THE UNITED STATES

2. Section 323.4 is amended by revising paragraph (a)(3) to read:

§ 323.4 Discharges not requiring permits.

(a) *General.* * * *

(3) Construction or maintenance of farm or stock ponds or irrigation ditches, or the maintenance (but not construction) of drainage ditches. Discharges associated with siphons, pumps, headgates, wingwalls, weirs, diversion structures, and such other facilities as are appurtenant and functionally related to irrigation ditches are included in this exemption.

* * * * *

3. Section 323.6 is amended by revising paragraph (a) to read:

§ 323.6 Special policies and procedures.

(a) The Secretary of the Army has delegated to the Chief of Engineers the authority to issue or deny Section 404 permits. The district engineer will review applications for permits for the discharge of dredged or fill material into waters of the United States in accordance with guidelines promulgated by the Administrator, EPA, under authority of Section 404(b)(1) of the Clean Water Act (see 40 CFR Part 230). Subject to consideration of any economic impact on navigation and anchorage pursuant to Section 404(b)(2), a permit will be denied if the discharge that would be authorized by such permit would not comply with the EPA 404(b)(1) guidelines. If the district engineer determines that the proposed discharge would comply with the 404(b)(1) guidelines, he will grant the permit unless issuance would be contrary to the public interest.

* * * * *

PART 325—PROCESSING OF DEPARTMENT OF THE ARMY PERMITS

4. Section 325.3 is amended by adding a new paragraph (b) and redesignating paragraphs (b) and (c) as (c) and (d) respectively as follows:

§ 325.3 Public notice.

* * * * *

(b) *Public notice for general permits.* District engineers will publish a public notice for all proposed regional permits and for significant modifications to, or reissuance of, existing regional permits within their area of jurisdiction. Public notices for statewide regional permits may be issued jointly by the affected Corps districts. The notice will include all applicable information necessary to provide a clear understanding of the proposal. In addition, the notice will state the availability of information at the district office which reveals the Corps' provisional determination that the proposed activities comply with the requirements for issuance of general permits. District engineers will publish a public notice for nationwide permits in accordance with 33 CFR 330.4.

(c) *Evaluation factors.* * * *

(d) *Distribution of public notices.*

* * *

* * * * *

5. Section 325.4 is revised to read:

§ 325.4 Conditioning of permits.

(a) District engineers will add special conditions to Department of the Army permits when such conditions are necessary to satisfy legal requirements or to otherwise satisfy the public interest requirement. Permit conditions will be directly related to the impacts of the proposal, appropriate to the scope and degree of those impacts, and reasonably enforceable.

(1) Legal requirements which may be satisfied by means of Corps permit conditions include compliance with the 404(b)(1) guidelines, the EPA ocean dumping criteria, the Endangered Species Act, and requirements imposed by conditions on state Section 401 water quality certifications.

(2) Where appropriate, the district engineer may take into account the existence of controls imposed under other federal, state, or local programs which would achieve the objective of the desired condition, or the existence of an enforceable agreement between the applicant and another party concerned with the resource in question, in determining whether a proposal complies with the 404(b)(1) guidelines, ocean dumping criteria, and other applicable statutes, and is not contrary to the public interest. In such cases, the Department of the Army permit will be conditioned to state that material changes in, or a failure to implement and enforce such program or agreement, will be grounds for modifying, suspending, or revoking the permit.

(3) Such conditions may be acomplished on-site, or may be accomplished off-site for mitigation of significant losses which are specifically identifiable, reasonably likely to occur, and of importance to the human or aquatic environment.

(b) District engineers are authorized to add special conditions, exclusive of paragraph (a) of this section, at the applicant's request or to clarify the permit application.

(c) If the district engineer determines that special conditions are necessary to insure the proposal will not be contrary to the public interest, but those conditions would not be reasonably implementable or enforceable, he will deny the permit.

(d) *Bonds.* If the district engineer has reason to consider that the permittee might be prevented from completing work which is necessary to protect the public interest, he may require the permittee to post a bond of sufficient amount to indemnify the government against any loss as a result of corrective action it might take.

PART 330—NATIONWIDE PERMITS

6. Section 330.4 is revised to read as follows:

§ 330.4 Public notice.

(a) *Chief of Engineers.* Upon proposed issuance of new nationwide permits, modification to, or reissuance of, existing nationwide permits, the Chief of Engineers will publish a notice in the **Federal Register** seeking public comments and including the opportunity for a public hearing. This notice will state the availability of information at the Office of the Chief of Engineers and at all district offices which reveals the Corps' provisional determination that the proposed activities comply with the requirements for issuance under general permit authority. The Chief of Engineers will prepare this information which will be supplemented, if appropriate, by division engineers.

(b) *District engineers.* Concurrent with publication in the **Federal Register** of new or reissued nationwide permits by the Chief of Engineers, district engineers will so notify the interested public within the district by an appropriate notice. The notice will include regional conditions, if any, developed by the division engineer.

7. Section 330.5 is amended by revising the introductory text paragraph of (a), paragraphs (a)(7), (a)(17), (a)(21), and (a)(23) and adding (a)(26) as follows:

§ 330.5 Nationwide permits.

(a) *Authorized activities.* The following activities, including discharges of dredged or fill material, are hereby permitted provided the conditions listed in paragraph (b) of this section and the notification procedures, where required, of § 330.7 are met:

* * * * *

(7) Outfall structures and associated intake structures where the effluent from that outfall has been permitted under the National Pollutant Discharge Elimination System program (Section 402 of the Clean Water Act) (see 40 CFR Part 122) provided that the district or division engineer makes a determination that the individual and cumulative adverse environmental effects of the structure itself are minimal in accordance with § 330.7(c)(2) and (d). Intake structures per se are not included—only those directly associated with an outfall structure are covered by this nationwide permit.

* * * * *

(17) Fills associated with small hydropower projects at existing reservoirs where the project which includes the fill is licensed by the Department of Energy under the Federal Power Act of 1920, as amended; has a total generating capacity of not more than 1500 kw (2,000 horsepower); qualifies for the short-form licensing procedures of the Department of Energy (see 18 CFR 4.61); and the district or division engineer makes a determination that the individual and cumulative adverse effects on the environment are minimal in accordance with § 330.7(c)(2) and (d).

* * * * *

(21) Structures, work, and discharges associated with surface coal mining activities provided they are authorized by the Department of the Interior, Office of Surface Mining, or by states with approved programs under Title V of the Surface Mining Control and Reclamation Act of 1977; the appropriate district engineer is given the opportunity to review the Title V permit application and all relevant Office of Surface Mining or state (as the case may be) documentation prior to any decision on that application; and the district or division engineer makes a determination that the individual and cumulative adverse effects on the environment from such structures, work, or discharges are minimal in accordance with § 330.7(c)(2) and (3) and (d).

* * * * *

(23) Activities, work, and discharges undertaken, assisted, authorized, regulated, funded, or financed, in whole or in part, by another federal agency or department where that agency or department has determined, pursuant to the CEQ Regulation for Implementing the Procedural Provisions of the National Environmental Policy Act (40 CFR Part 1500 et seq.), that the activity, work, or discharge is categorically excluded from environmental documentation because it is included within a category of actions which neither individually nor cumulatively have a significant effect on the human environment, and the Office of the Chief of Engineers (ATTN: DAEN–CWO–N) has been furnished notice of the agency's or department's application for the categorical exclusion and concurs with that determination. Prior to approval for purposes of this nationwide permit of any agency's categorical exclusions, the Chief of Engineers will solicit comments through publication in the **Federal Register**.

* * * * *

(26) Discharges of dredged or fill material into the waters listed in subparagraph (i) and (ii) of this paragraph which do not cause the loss or substantial adverse modification of 10 acres or more of waters of the United States, including wetlands. For discharges which cause the loss or substantial adverse modification of 1 to 10 acres of such waters, including wetlands, notification of the district engineer is required in accordance with § 330.7 of this part.

(i) Non-tidal rivers, streams, and their lakes and impoundments, including adjacent wetlands, that are located above the headwaters.

(ii) Other non-tidal waters of the United States, including adjacent wetlands, (see 33 CFR 323.2(a)(3)) that are not part of a surface tributary system to interstate waters or navigable waters of the United States (i.e., isolated waters).

8. Section 330.8 is redesignated as § 330.9.

9. Section 330.7 is redesignated 330.8 and new § 330.7 added to read as follows:

§ 330.7 Notification procedures.

(a) The general permittee shall not begin discharges requiring pre-discharge notification pursuant to the nationwide permit at § 330.5(a)(26):

(1) Until notified by the district engineer that the work may proceed under the nationwide permit with any special conditions imposed by the district or division engineer; or

(2) If notified by the district or division engineer that an individual permit may be required; or

(3) Unless 20 days have passed from receipt of the notification by the district engineer and no notice has been received from the district or division engineer.

(b) Notification pursuant to the nationwide permit at § 330.5(a)(26) must be in writing and include the information listed below. Notification is not an admission that the proposed work would result in more than minimal impacts to waters of the United States; it simply allows the district or division engineer to evaluate specific activities for compliance with general permit criteria.

(1) Name, address, and phone number of the general permittee;

(2) Location of the planned work;

(3) Brief description of the proposed work, its purpose, and the approximate size of the waters, including wetlands, which would be lost or substantially adversely modified as a result of the work; and

(4) Any specific information required by the nationwide permit and any other information that the permittee believes is appropriate.

(c) *District engineer review of notification.* Upon receipt of

notification, the district engineer will promptly review the general permittee's notification to determine which of the following procedures should be followed:

(1) If the nationwide permit at § 330.5(a)(26) is involved and the district engineer determines either, (i) the proposed activity falls within a class of discharges or will occur in a category of waters which has been previously identified by the Regional Administrator, Environmental Protection Agency; the Regional Director, Fish and Wildlife Service; the Regional Director, National Marine Fisheries Service; or the heads of the appropriate state natural resource agencies as being of particular interest to those agencies; or (ii) the particular discharge has not been previously identified but he believes it may be of importance to those agencies, he will promptly forward the notification to the division engineer and the head and appropriate staff officials of those agencies to afford those agencies an adequate opportunity before such discharge occurs to consider such notification and express their views, if any, to the district engineer concerning whether individual permits should be required.

(2) If the nationwide permits at § 330.5(a) (7), (17) or (21) are involved and the Environmental Protection Agency, the Fish and Wildlife Service, the National Marine Fisheries Service or the appropriate state natural resource or water quality agencies forward concerns to the district engineer, he will forward those concerns to the division engineer together with a statement of the factors pertinent to a determination of the environmental effects of the proposed discharges, including those set forth in the 404(b)(1) guidelines, and his views on the specific points raised by those agencies.

(3) If the nationwide permit at § 330.5(a)(21) is involved the district engineer will give notice to the Environmental Protection Agency and the appropriate state water quality agency. This notice will include as a minimum the information required by paragraph (b) of this section.

(d) *Division engineer review of notification.* The division engineer will review all notifications referred to him in accordance with paragraph (c)(1) or (c)(2) of this section. The division engineer will require an individual permit when he determines that an activity does not comply with the terms or conditions of a nationwide permit or does not meet the definition of a general permit (see 33 CFR 322.2(f) and 323.2(n)) including discharges under the nationwide permit at § 330.5(a)(26) which have more than minimal adverse environmental effects on the aquatic environment when viewed either cumulatively or separately. In reaching his decision, he will review factors pertinent to a determination of the environmental effects of the proposed discharge, including those set forth in the 404(b)(1) guidelines, and will give full consideration to the views, if any, of the federal and state natural resource agencies identified in paragraph (c) of this section. If the division engineer decides that an individual permit is not required, and a federal or appropriate state natural resource agency has indicated in writing that an activity may result in more than minimal adverse environmental impacts, he will prepare a written statement, available to the public on request, which sets forth his response to the specific points raised by the commenting agency. When the division engineer reaches his decision he will notify the district engineer, who will immediately notify the general permittee of the division engineer's decision.

10. The redesignated § 330.8 is amended by revising the beginning paragraph and adding a new paragraph (d) as follows:

§ 330.8 Discretionary authority.

Except as provided in paragraph (d) below, division engineers on their own initiative or upon recommendation of a district engineer are authorized to modify nationwide permits by adding regional conditions or to override nationwide permits by requiring individual permit applications on a case-by-case basis. Discretionary authority will be based on concerns for the aquatic environment as expressed in the guidelines published by EPA pursuant to Section 404(b)(1). (40 CFR Part 230)

* * * * *

(d) For the nationwide permit found at § 330.5(a)(26), after the applicable provisions of § 330.7(a) (1) and (3) have been satisfied, the permittee's right to proceed under the general permit may be modified, suspended, or revoked only in accordance with the procedure set forth in 33 CFR 325.7.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 49, No. 63
Friday, March 30, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 102

Federally Licensed Grain Warehouses; Warehouse Bonds

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: An interim final rule was published in the **Federal Register**, on November 25, 1983, which made it possible for grain warehousemen licensed under provisions of the United States Warehouse Act, as amended (7 U.S.C. 241, *et seq.*), to provide, and for the Department to recognize, protection for depositors other than the usual bond furnished by a corporate surety. Governmental units have enacted or are considering indemnification plans which will offer as much protection for depositors as is presently required under warehouse regulations. Federally licensed warehousement will have the choice of participating in such a program without the added cost of furnishing the usual form of surety. This action finalizes the interim final rule with one minor change which would delete reference to indemnity or insurance funds established by the Federal Government or a combination of the Federal Government with a State.

EFFECTIVE DATE: April 30, 1984.

FOR FURTHER INFORMATION CONTACT: Dr. Orval Kerchner, 202–447–3616.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and the Regulatory Flexibility Act Certification

This rule has been reviewed under the USDA procedure established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified "non-major" because the proposal does not meet the criteria contained therein for major regulatory actions.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities because (i) this action imposes no additional economic costs on small entities; (ii) licensed warehousemen are not required to participate in any indemnity or insurance fund and may choose to provide bond as presently authorized; and (iii) the use of the service is voluntary.

Paperwork Reduction Act

Reporting and recordkeeping requirements have received OMB clearance under OMB No. 0581–0027.

Background

Governmental units have enacted or are considering programs to indemnify grain warehouse depositors for losses caused by the breach of the warehouseman's obligations. A properly drafted indemnification plan could provide as much protection for depositors as the traditional corporate surety bond. The Department has determined that federally licensed warehousemen should have the choice of furnishing such evidence of protection without the added cost of furnishing the usual form of surety bond. Therefore the interim final action, 48 FR 53085, effective November 25, 1983, and this final action with one minor change, amend the regulations for grain warehouses. These amendments enable the Department to accept as a bond either a corporate surety bond or a certificate of participation in and coverage by an indemnity or insurance fund, as approved by the Secretary, established and maintained by a State. The fund must be backed by the full faith and credit of the applicable State and must guarantee depositors of the licensed warehouse full indemnification for the breach of any obligation of a licensed warehouseman.

The U.S. Warehouse Act was passed by Congress in 1916. The Act provides for the licensing of such warehousemen as may apply to the Secretary of Agriculture, and (1) meet departmental standards, (2) agree to abide by the law and the regulations thereunder, and (3) who are, in his discretion, proper warehousemen within the intent of the law for the storage of agricultural products.

The primary objectives of the U.S. Warehouse Act are to: (1) Protect producers and others who store their property in public warehouses; (2) assure the integrity of warehouse receipts as documents of title to be used as collateral for loans, and to facilitate trading, interstate commerce of agricultural commodities; and (3) set and maintain a standard for sound warehouse operations.

A warehouse receipt is acceptable only when it has integrity. Integrity means that the original depositor or a subsequent holder of a receipt must have reasonable assurance that the product covered by the warehouse receipt will be returned upon surrender of the receipt and a valid request for delivery. Failing to receive return of the product, the depositor or holder of the receipt must have the further assurance that the warehouseman is able to pay him for this breach of contract.

Historically, the responsibility of a licensed warehouseman to fulfill his obligations to depositors has been backed by a corporate surety bond. Such bonds have not been for full coverage and depositors could suffer a loss should losses occur which exceed the amount of the bond. Before the interim final rule became effective, the regulations required a licensed warehouseman to maintain allowable net assets amounting to 20 cents a bushel for the maximum number of bushels that can be stored, with a minimum of $25,000 and to provide a bond, the amount of which is computed at a rate of 20 cents per bushel for the first 1,000,000 bushels of licensed capacity; 15 cents per bushel for the next 1,000,000 bushels of licensed capacity; and 10 cents per bushel for all licensed capacity over 2,000,000 bushels: provided, that in any case the amount of bond shall not be less than $20,000 nor more than $500,000, except in case of a deficiency in net assets above the $25,000 minimum required there shall be added to the amount of bond an amount equal to such deficiency.

Most, if not all, licensed warehousemen also operate a grain marketing business buying grain from producers through the same facilities used for the storage of grain. As grain is

received over the scale, the optimum situation would be that it is either deposited for storage with a warehouse receipt demanded and issued or sold with payment demanded and made. However, often the grain's status is not declared by the owner as delivered; or it is deposited for storage with no receipt demanded or issued; or it is sold and payment not demanded or made. The sale or other disposition of grain deposited in a licensed warehouse leads to a full marketing relationship between the depositor and the warehouseman.

Usual marketing relationships have been complicated by another kind of transaction commonly known as price later or deferred pricing or delayed price grain. Such a transaction may be described as a sales contract that constitutes a bona fide sale and change of ownership from the seller to buyer, but which permits the seller to fix the price of the grain at a later date at a pre-agreed formula for determining such price. The seller may continue to have some control of the pricing of his grain but has no physical claim. Generally, no advance payment is made to the seller. The buyer has only a grain payable position with the seller. The seller has only a money receivable position, a common creditor status.

The business of storing and marketing often becomes inseparable and likewise the funds available to the total business often cannot be segregated. These situations create continuous, dual and at times uncertain obligations leading to a commingling of grain assets and liabilities.

Consequently, there are risks for producers who sell deposited grain as well as for producers who store such grain. To date, the Secretary has not asserted his jurisdiction pursuant to the U.S. Warehouse Act, in the area of grain merchandising at licensed elevators. A number of States have and have sought to protect producers in such dealings both at State and federally licensed facilities. Historically, this has been by additional bonds for this purpose, a preventative action. Lately, a few States have turned to remedial actions such as indemnification or insurance funds.

The State of Illinois in legislation known as Senate Bill 800, "The Illinois Grain Insurance Act," signed into law August 16, 1983, has established in the State a Grain Insurance Fund ("Fund") to pay producers of grain for all of their financial losses caused by a failure of a grain warehouseman and 85 percent to a maximum of $100,000, of their financial losses cause by the failure of a grain dealer. The Fund would be financed by an assessment on each licensed grain dealer and grain warehouseman for a period of three years and then as needed to maintain a fund balance of 3 million dollars. State appropriations would also be used to pay claims, if the money in the Fund were insufficient. The Act requires every Illinois-licensed grain dealer and grain warehouseman to participate in the Fund. Those Illinois-licensed grain dealers and grain warehousemen participating in the Fund are exempted from the initial bond requirements of Illinois law. The Act allows federally licensed warehousemen to participate in the fund on a voluntary basis.

The Illinois Act provides as much or more protection for the depositors as was afforded by the bonding provisions of federal regulations in force before the interim final rule became effective. For this reason some federally licensed warehousemen in Illinois requested permission to participate in the Fund.

These licensees also requested that participation in the Fund be accepted in lieu of the corporate surety bond required by the federal regulations in force before the interim final rule became effective. The warehousemen pointed out that if a federally licensed warehouseman, wishing to do so, were permitted to participate in the Fund, the warehouseman would have to pay the assessments required by the Illinois Act and, under the federal regulations in force at that time, would also have to purchase a corporate surety bond. This arrangement would put the federally licensed warehouseman at an economic disadvantage as compared to Illinois-licensed warehousemen and would discourage the federal licensee from participating in the Fund.

Based on the foregoing, the Secretary has determined that it would further the objectives of the U.S. Warehouse Act to permit federally licensed warehousemen to participate in a State indemnity or insurance fund, provided that such participation: (1) Affords as much or more monetary protection to depositors as do the corporate surety bonding requirements of the regulations; (2) does not lessen the responsibilities or privileges of the warehouseman; (3) does not dilute the rights of a depositor; and (4) does not diminish the exclusive jurisdiction and authority of the Secretary with respect to the licensees.

In order not to discourage participation in such an indemnity or insurance fund, the interim final rule amended §§ 102.6 and 102.13 to require a federally licensed warehouseman to file either a corporate surety bond or a certificate of participation in an indemnity or insurance fund which the Secretary had approved. In either situation the warehouse must have and maintain a minimum of $25,000 in allowable net assets. The interim final rule invited comments which were to be received on or before December 27, 1983.

Based on a careful review of the Illinois Grain Insurance Act and all other pertinent information available at this time, the Secretary determined that participation by federally licensed warehousemen in the Illinois Grain Insurance Fund would comply with the above requirements and was approved. Therefore, those federally licensed warehousemen who choose to do so may, if accepted by Illinois, participate in the Fund and may file a certificate of participation in the Fund in lieu of a corporate surety bond.

Four letters of comment were received; one letter did not address the issue, another asked a question as to whether the writer's State would qualify, and two letters commented directly on the regulations. One of these stressed "over the shoulder" monitoring of a warehouseman's financial condition by sureties; the other, while voicing no objection to approving the Illinois arrangement, also stressed this function of sureties and argued that to do away with the function might place an increased regulatory burden on State and Federal agencies and could encourage irresponsible business management if the protection of the warehouseman's monetary accountability to producers were not maintained.

The Department has considered these possibilities but has determined that adequate administrative control is ensured by the requirements that the indemnity or insurance fund must: (1) Be approved by the Secretary; (2) be established by a State; (3) be backed by the full faith and credit of that State; and (4) guarantee depositors full indemnification.

The interim final rule also provided for the acceptance of participation in indemnity or insurance funds established and maintained by the Federal Government or a combination of the Federal Government and a State. One comment objected to this provision on the ground that the clause might possibly be construed as encouraging the establishment of a Federal indemnity or insurance fund. Because there are no such funds and the Department does not anticipate that such a fund will be established in the near future, this final action deletes that provision in § 102.13(b). No other changes to the interim final rule have been made by this final action.

List of Subjects in 7 CFR Part 102

Administrative practice and procedure, Grain, Surety bonds, Warehouses.

PART 102—GRAIN WAREHOUSES

Accordingly, 7 CFR Part 102 is amended as follows:

1. Section 102.6 is amended by adding a paragraph (h).

§ 102.6 Financial requirements.

* * * * *

(h) In case a warehouseman files a bond in the form of a certification of participation in an indemnity or insurance fund as provided for in § 102.13(b), the licensed warehouseman shall have and maintain a minimum of $25,000 in allowable net assets and any deficiency in assets above the $25,000 minimum shall be covered by an acceptable and valid certificate.

2. Section 102.13 is revised to read:

Warehouse Bonds

§ 102.13 Bond required; time of filing.

Each warehouseman applying for a warehouse license under the Act shall, before such license is granted, file with the Secretary or his designated representative a bond either:

(a) In the form of a bond containing the following conditions and such other terms as the Secretary or his designated representative may prescribe in the approved bond forms, with such changes as may be necessary to adapt the forms to the type of legal entity involved:

Now, therefore, if the said license(s) or any amendments thereto be granted and said principal, and its successors and assigns operating said warehouse(s), shall:

Faithfully perform during the period of one year commencing ——, or until the termination of said licenses(s) in the event of termination prior to the end of the one year period, all obligations of a licensed warehouseman under the terms of the Act and regulations thereunder relating to the above-named products; and

Faithfully perform during said one year period and thereafter, whether or not said warehouse(s) remain(s) licensed under the Act, such delivery obligations and further obligations as a warehouseman as exist at the beginning of said one year period or are assumed during said period and prior to termination of said licenses(s) under contracts with the respective depositors of such products in the warehouse(s);

Then this obligation shall be null and void and of no effect, otherwise to remain in full force. For purposes of this bond, the aforesaid obligations under the Act and regulations and contracts include obligations under any and all modifications of the Act, the regulations, and the contracts that may hereafter be made, notice of which modifications to the surety being hereby waived.

The bond shall be subject to §§ 102.14 through 102.17; or:

(b) In the form of a certificate of participation in and coverage by an indemnity or insurance fund as approved by the Secretary, established and maintained by a State, backed by the full faith and credit of the applicable State, and which guarantees depositors of the licensed warehouse full indemnification for the breach of any obligation of the licensed warehouseman under the the terms of the Act and regulations. A certificate of participation and coverage in such fund shall be furnished to the Secretary annually. If administration or application of the fund shall change after being approved by the Secretary, the Secretary may revoke his approval. Such revocation shall not affect a depositor's rights which have arisen prior to such revocation. Upon such revocation the licensed warehouseman then must comply with paragraph (a). Such certificate of participation shall not be subject to §§ 102.14 and 102.15.

(Sec. 28, 39 Stat. 490, 7 U.S.C. 268)

Done at Washington, D.C., March 26, 1984.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

7 CFR Part 910

[Lemon Regs. 457 and 456, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 275,000 cartons during the period April 1–7, 1984, and increases the quantity of lemons that may be shipped to 295,000 cartons during the period March 25–31, 1984. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

DATES: The regulation becomes effective April 1, 1984, and the amendment is effective for the period March 25–31, 1984.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy currently in effect. The committee met publicly on March 27, 1984, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

1. Section 910.757 is added as follows:

§ 910.757 Lemon Regulation 457.

The quantity of lemons grown in California and Arizona which may be handled during the period April 1, 1984,

through April 7, 1984, is established at 275,000 cartons.

2. Section 910.758 Lemon Regulation 456 (49 FR 10921) is revised to read as follows:

§ 910.758 Lemon Regulation 456.

The quantity of lemons grown in California and Arizona which may be handled during the period March 25, 1984, through March 31, 1984, is established at 295,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 28, 1984.

Russell L. Hawes,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 84-8714 Filed 3-28-84; 8:45 am]

BILLING CODE 3410-02-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 703

Investments and Deposits

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: The NCUA Board adopts revised regulations concerning Federal credit union investments and deposits. The regulations authorize Federal credit unions to invest, under certain conditions, in bankers' acceptances, Eurodollars and Yankee Dollars. The regulations do not prohibit or restrict the use of brokers, as long as the transaction and underlying investment are legal. The regulations retain, but simplify and clarify, provisions of existing regulations prohibiting or restricting certain transactions because of their speculative nature. The regulations have been reorganized and rewritten in a manner that reduces their volume and makes them easier to understand and use.

EFFECTIVE DATE: May 21, 1984.

ADDRESS: National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert M. Fenner, Director, or Steven R. Bisker, Senior Attorney, Department of Legal Services at the above address. Telephone (202) 357–1030.

SUPPLEMENTARY INFORMATION:

Background

On September 22, 1983, the National Credit Union Administration Board (Board) proposed a revised rule on Investments and Deposits for public comment. 48 FR 43182 (1983). The Board proposed various changes from its existing rules including: expanded authority for investment by Federal credit unions in Eurodollar and Yankee Dollar deposits; removal of outdated and ineffective rules restricting Federal credit unions' use of third parties when investing in certificates of deposit issued by other financial institutions; and, clarification and simplification of existing rules that restrict certain investment transactions because of their speculative nature. The Board specifically requested comment in three areas: (1) The use of brokers or money finders for investments in certificates of deposit; (2) whether Eurodollar deposits, if authorized as permissible investments, should be considered risk assets for purposes of the reserve requirements imposed by section 116 of the Federal Credit Union Act (12 U.S.C. 1762); and (3) whether, and to what extent, it would be appropriate to permit investments in futures contracts. In addition to these areas, the Board asked for comments concerning the entire proposed rule. A total of 60 comments were received—41 from natural person Federal credit unions, 15 from Corporate credit unions, and 4 from parties outside the credit union movement.

Based on the comments and its further review and analysis, the Board has adopted final rules. The Board has reorganized and simplified the previous rules in a manner that reduces their volume and makes them easier to understand and use. Specifically, the new rules begin with a Scope (§ 703.1) which explains that the statutory investment authority of Federal credit unions is limited, with certain exceptions, to government securities, shares of and loans to other credit unions, and deposit-type investments in other financial institutions. The Scope section explains that the investment rules do not apply to loans to members, which are governed by separate statutory and regulatory provisions. The Scope section is followed by a Definitions section (703.2) which defines the key terms used in the rules. The remaining two sections, §§ 703.3 and 703.4, set forth authorized and prohibited investment activities, respectively. The comments on these latter sections, and the changes from the present rules, are described in detail below in the *Analysis* portion of this discussion.

Among the more significant substantive changes reflected in the final rule are: (1) Authorization for Federal credit unions to invest in Eurodollars, Yankee Dollars and bankers' acceptances, on the condition that, in each case, the issuing institution is one in which a Federal credit union may legally make a deposit; (2) a determination not to regulate Federal credit union use of brokers or other third parties when investing in certificates of deposit issued by other financial institutions; (3) elimination of existing regulations concerning investments in loans to other credit unions; (4) a determination not to authorize Federal credit unions to invest in futures contracts; and (5) adoption of a provision prohibiting Federal credit union officials, employees and their family members from receiving compensation in connection with the making of an investment or deposit by the credit union.

Analysis

This section first addresses the two specific areas that the board has determined will not be subject to regulation and then the remainder of the rule:

Money Finders and Deposit Brokers

In the proposal, the Board suggested elimination of the previous rule which required that a Federal credit union, when investing in a certificate of deposit (CD), make payment "itself" to the institution issuing the CD. The Board requested comments, however, "concerning the extent of Federal credit union utilization of third parties in investing in deposits of other financial institutions, the negative aspects of such third party involvement with Federal credit union operations, the contribution that brokers may provide to the efficiency of Federal credit union operations, and the extent, if any, to which the National Credit Union Administration should regulate Federal credit union involvement in such activity."

A substantial majority of the credit union commenters stated that they have used services provided by money brokers. Many indicated that they use brokers for the bulk of their investments in CD's. A uniform criticism of broker use was that it can lead to dependence on advice of brokers and on $100,000 deposit insurance as the major bases of investment policy. Most commenters did, however, recognize that analysis of the soundness of the financial institutions issuing the CD's should not be solely dependent upon that provided by the brokers. These commenters recognized the potential conflict of interest of brokers recommending investments in financial institutions where the fee paid to the brokers for their service comes from those same

financial institutions. Almost all commenters who addressed the issue of brokers' effect on the efficiency of Federal credit union operations stated that the time saved by having a broker survey the market for the best CD rates is substantial.

In response to the issue of the extent, if any, to which NCUA should regulate the use of brokers for investments in financial institutions, the overwhelming majority of the commenters expressed the opinion that NCUA should not regulate. (One commenter argued that the current rules are inconsistent in that brokers may be used for purchases of GNMA's and other types of legal investments but cannot be used for CD investments.) The commenters did, however, recommend that NCUA stress the need for proper financial analysis of the issuing institutions and the soundness and integrity of the brokers through which they make investments. Numerous commenters recommended that NCUA require Federal credit unions to have written investment policies that include, among other things, the names of financial institutions and brokers that the Federal credit unions board has approved for its investment activity. Some commenters suggested that Federal credit unions only use the services of those brokers and investment advisers registered with the SEC. Others believed that NCUA should make a special effort to educate Federal credit unions regarding their use of brokers and should publish guidelines on the proper use of brokers when purchasing CD's.

Having reviewed all the comments, the Board continues to believe that the so-called "itself" requirement of the previous rule is unnecessary and ineffective. As discussed in the preamble to the proposed rule, this requirement did not prevent Federal credit unions from accepting the advice of "money finders" or other third parties, or even making payment through a broker or other third party by characterizing that party as the Federal credit union's agent. Further, after reviewing the comments and thoroughly reconsidering this issue, the Board has determined that it is neither necessary nor advisable for NCUA to issue new regulations concerning Federal credit union use of brokers in making investments.

Both the comment letters received by NCUA and recent developments in the marketplace regarding brokered deposits have shown that credit unions recognize the risks in relying on the advice of, and placing deposits through, money finders and deposit brokers. In response, many credit unions have turned to local institutions whose financial condition they are thoroughly familiar with, such as their corporate credit union or local banks, to place deposits. Others have minimized risk by placing deposits, through brokers or otherwise, in separately insured $100,000 increments in several different institutions. While the Board is not unmindful of the concerns that this latter practice presents to the Federal Deposit Insurance Corporation and Federal Savings and Loan Insurance Corporation, the Board defers to those agencies to address the issue of increased risk to their insurance funds.

Also, the Board urges Federal credit unions not to rely on deposit insurance alone, as that practice can, in the event of failure of the issuing institution, lead to loss of interest income and temporary loss of control of funds. Further, the lack of financial analysis that results from reliance solely on deposit insurance is not conducive to sound investment habits.

While the Board has chosen not to regulate in this area, the Board recognizes and stresses the need for written policies and it will instruct its examiners to particularly scrutinize those Federal credit unions where written investment policies do not exist in order to determine whether they are operating in a safe and sound manner. It is noted that section 6121 of NCUA's *Accounting Manual for Federal Credit Unions* contains detailed guidance concerning the nature and recommended content of investment policies. Also, the Board agrees that educational efforts are a high priority. In this connection, credit union associations have stepped up their efforts, resulting, for example, in the development of an educational videotape on investment practices. The Board firmly encourages these efforts.

Finally, the Board notes that there have been isolated instances of brokers channelling funds into Federal credit unions in a manner that contributes to supervisory problems. NCUA has been successful in early detection of and swift reaction to these problems, and the Board intends to continue to address any such situations through strong supervisory action.

Loans to Nonmember Credit Unions

The Board proposed to eliminate § 703.2 of the previous rule, concerning loans to nonmember credit unions. This section reiterated the statutory limitation that aggregate loans to nonmember credit unions may not exceed 25% of the lending credit union's unimpaired capital and surplus, and imposed loan documentation and maturity requirements that the Board considered a matter of business judgment that should not be controlled by regulation. The commenters agreed. Accordingly, that section of the previous rule has been eliminated as proposed. The 25% lending limit of the Federal Credit Union Act is, in the interest of clarity and comprehensiveness, referenced at § 703.3(c) of the final rule concerning loans, shares and deposits of other financial institutions.

Definitions

The definitions (§ 703.2 in both the proposed and final rule) have been alphabetized in the final rule. Also a definition has been added, at § 703.2(n), for the term "Section 107(8) institution." This term refers to institutions in which Federal credit unions may legally make deposits pursuant to section 107(8) of the Federal Credit Union Act (12 U.S.C. 1757(8)), i.e., any institution that either is insured by the Federal Deposit Insurance Corporation or Federal Savings and Loan Insurance Corporation or is a State bank, trust company or mutual savings bank operating in accordance with the laws of a state in which the Federal credit union maintains a facility. The term (or its equivalent) appeared throughout the proposed rule but was not defined. The inclusion of the definition in the final rule eliminates the need to refer to a copy of the Federal Credit Union Act in order to understand the term.

Authorized Investments—§ 703.3 of the Rule

Cash Forward Agreements. A cash forward agreement is an agreement to purchase or sell a security at an agreed-upon price, but at a future date. As a carry-over from the previous rule, the proposal would allow cash forward agreements if delivery and acceptance are mandatory and take place within 120 days from the date of the agreement. One commenter expressed disapproval of the 120 day limitation. Although acknowledging the possibility of speculative use of cash forward agreements, the commenter believed that the 120 days limitation was somewhat arbitrary and did not serve a useful purpose.

Agency experience has not shown that the 120 day limitation has caused problems for Federal credit unions. Further, without a time limitation, cash forward agreements can be used for speculative futures trading, posing safety and soundness concerns. The Board has adopted the proposed rule (§ 703.3(b)) without amendment.

Loans, shares and deposits—other financial institutions. Section 703.3 of the proposed rule addressed the authority of Federal credit unions to make *deposits* in section 107(8) institutions. This section of the rule is necessary primarily to clarify that the authority is generally limited to institutions that are either federally insured or operating in accordance with the laws of a state where the credit union does business. As proposed, however, the section omitted reference to the authority of Federal credit unions to establish share accounts and similar accounts with other federally insured credit unions and with corporate credit unions pursuant to section 107(7) of the Act (12 U.S.C. 1757(7)). Section 703.3 of the final rule has been revised to include reference to this authority.

Repurchase transactions. A repurchase transaction is a transaction in which a bank, broker or other third party sells securities to an investor (in this case a Federal credit union) with an agreement to "repurchase" the securities at an established time and fixed price. The transaction is functionally similar to a short term loan by the credit union that is collateralized by the securities, with the difference between the sales price and the repurchase price representing interest on the loan.

Since Federal credit unions may, with limited exceptions, make loans only to members, it has been necessary for a repurchase transaction to have the legal characteristics of an investment in the underlying security in order for a Federal credit union to participate. Thus, the previous rule distinguished between loan and investment type repurchase transactions, with only the latter being authorized for Federal credit unions.

The proposed rule carried over this distinction. The final rule carries it over with one significant exception: Since Federal fund transactions, which are essentially short term unsecured lending, have been authorized for Federal credit unions pursuant to the authority to make deposits in other financial institutions, it makes little sense to restrict repurchase transactions (which are secured) with those same institutions. Accordingly, the final rule has been amended to authorize Federal credit unions to engage in repurchase transactions with other financial institutions without regard to the distinction between loan-type and investment-type transactions. Of course, since the authorization is pursuant to the deposit authority, the financial institution must be a section 107(8) institution. (*See*, §§ 703.2(1), 703.3(d).)

Reverse repurchase transactions. A reverse repurchase transaction is a transaction whereby a Federal credit union borrows Funds for a fixed period and pledges securities (typically GNMA's or Treasury securities) owned by it as collateral. The borrowed funds are usually reinvested in other securities or in loans to members. The final rule, in a carry over from the previous rule and the proposal, requires that either the securities in which the borrowed funds are reinvested or the securities used as collateral have a maturity date not later than the repayment date on the reverse repurchase transaction. (*See*, § 703.3(e).) The purpose of the limitation is to avoid maturity mismatches that in past experience have resulted in serious losses during periods of interest rate swings. The commenters generally supported a continuation of this limitation. Some misunderstood the limitation, however, and believed that the rule would require that both the securities pledged as collateral and the securities in which the borrowed funds are reinvested would be required to have a maturity not later than the repayment date. The final rule has been revised to clarify that this is not the case.

Federal Funds. A Federal funds transaction is an overnight or short term loan to another financial institution. These transactions have been authorized, pursuant to NCUA Interpretive Ruling 81–2 (46 FR 14887), by interpretation of the deposit authority of section 107(8) of the Act. The proposed rule incorporated the Interpretive Ruling into the regulation, at § 703.3(f), in the interest of clarity and comprehensiveness. The commenters agreed with this proposal. Several commenters noted, however, that with the incorporation of the Interpretive Ruling, investment in "Term Federal Funds" (Federal funds having a maturity of more than one day), which had been authorized, had become restricted. This was unintended, and § 703.3(f) has been revised to allow both overnight and term Federal funds. With the inclusion of Federal funds in the final rule, IRPS 81–2 is unnecessary and is therefore repealed.

The Board takes this opportunity to alert Federal credit unions to at least one inherent risk of Federal funds investments that may not have been previously considered. There may be instances where under state law (e.g. West Virginia, Iowa, Oregon) if a Federal credit union sells Federal funds to a state bank (authorized as depositories under section 107(8) of the Act) and that bank is placed into liquidation, unlike other "depositors" who are given a priority in the payout under the state law, the Federal credit union would be paid after depositors along with other creditors. Under these circumstances a Federal credit union's risk of loss is greater than if it had purchased a CD from the state bank (even where the CD was in excess of the $100,000 deposit insurance limit), because of the priority given to depositors over other creditors. Therefore, the common perception that Federal funds have no greater risk associated with them than uninsured CD's is not accurate in all instances.

Yankee Dollars. A Yankee Dollar deposit is a dollar denominated deposit in a United States branch or subsidiary of a foreign bank. If the branch or subsidiary is federally insured or operating in accordance with the laws of a state in which the Federal credit union does business, then a Federal credit union deposit in the branch or subsidiary is authorized pursuant to section 107(8) the Act. Section 703.3(g) of the proposal set forth this authority. It has been carried over to the final rule without substantive change.

Eurodollars. A Eurodollar deposit is a dollar denominated deposit in either a foreign branch or subsidiary of a United States bank or in a foreign bank located outside the United States. The Board proposed authorizing such deposits, but only in foreign branches of parent U.S. banks and only if the parent U.S. bank is one in which a Federal credit union may make a deposit pursuant to section 107(8) of the Act. The Board also requested comment on whether such deposits should be treated as risk assets for purposes of the statutory reserve transfer requirements of section 116 of the Federal Credit Union Act (12 U.S.C. 1762).

The vast majority of commenters agreed that Eurodollar deposits in foreign branches of U.S. banks should be a permissible investment for Federal credit unions. However, the commenters were split on the issue of whether Eurodollars should be considered risk assets. While the commenters generally agreed that Eurodollars do involve credit risk, liquidity risk, sovereign risk, and general risk associated with increased operational complexity, their approach to the problem varied.

Those not in favor of treating Eurodollars as risk assets believe that with strong internal controls investment losses can be prevented. Commenters in favor of treating Eurodollar deposits as risk assets argued that classification as risk assets would help credit unions more accurately recognize the credit risk inherent in these investments.

The Board has determined to authorize Eurodollar deposits as

proposed, but not to treat them as risk assets at this time. Deposits and government securities generally have not been treated as risk assets for purposes of statutory reserve transfer requirements. Treatment of Eurodollar deposits as risk assets is a matter which may be more appropriately considered in the context of an overall review of statutory reserve transfer requirements and the regulatory definition of risk assets (*See*, 12 CFR 700.1(j)). Also, deposits in overseas branches of U.S. banks are generally considered to be legal liabilities of the domestic parent bank. There may, however, be instances where the foreign host government takes some action to freeze, stop, or delay payment of the deposits of the branch bank, and the U.S. parent bank may be relieved of its liability for the deposits of its overseas branch. Under these circumstances, the relied-on protection of the parent domestic bank against loss of the deposit may be of no avail. Therefore, the Board is alerting all Federal credit unions that Eurodollar deposits are not free of risk and that extreme care must be exercised in engaging in such investment activity.

Bankers' Acceptances. A bankers' acceptance is a time draft drawn on a U.S. bank and represents an irrevocable obligation of the bank. Bankers' acceptances arise in a variety of ways, but generally are used initially by a corporate customer of the bank to "pay" for goods or services, and are subsequently discounted and traded as money market instruments. The proposed rule included bankers' acceptances in the category of prohibited investments. A majority of those commenting on this issue recommended that Federal credit unions be permitted to invest in bankers' acceptances. These commenters argued that it is inconsistent to classify bankers' acceptances as prohibited investments when Federal funds, certificates of deposit, and Eurodollar deposits are held to be permissible investments. All of these investments (including bankers' acceptances) appear on the issuing bank's balance sheet as direct liabilities of the bank. Some commenters suggested that bankers' acceptances, which are obligations of both the accepting bank and its corporate customer, are less risky than Federal funds, Eurodollar deposits, and uninsured CD's.

The Board agrees and finds that bankers' acceptances may be authorized pursuant to the same rationale applied to Federal funds and repurchase transactions with financial institutions; i.e., by considering the acceptance to be a type of deposit liability. Also, it seems clear that bankers' acceptances present no greater risk than these other investments. Accordingly, the Board has incorporated into the final rule a new § 703.3(i) authorizing investments in bankers' acceptances issued by section 107(8) institutions.

Prohibited Investments—Section 703.4

Comments were received on three prohibited activities: standby commitments § 703.4(a)), futures contracts § 703.4(b)), and kickbacks (§ 703.4(e)).

Standby Commitments. A standby commitment is a commitment to purchase (or sell) a security at a set price at a future date, wherein the seller of the commitment receives a fee in exchange for agreeing to "stand by" to purchase (or sell) the security at the option of the buyer of the commitment. Several commenters suggested that the definition, now § 703.2(r), of standby commitment be reworded. They stated that the proposed definition was unclear as to who is the buyer and who is the seller of the commitment, and fails to include an additional element of the transaction—the predetermined price. The Board agrees and has revised the definition accordingly. In conformance with the amended definition, the Board has amended § 703.4(a) to clarify that a Federal credit union may not purchase or sell a standby commitment.

Some commenters recommended that the prohibition on standby commitments be amended to permit Federal credit unions to purchase standby commitments. They noted that the substantial risk in the transaction is always on the seller of the commitment, and that the buyer's loss can be restricted to the amount advanced to purchase the commitment, since the buyer has the option to either exercise the sale or purchase or do nothing. They suggested that standby commitments can be used as a hedging tool in asset/liability management.

The Board does not consider standby commitments an essential tool to reduce the potential risks that Federal credit unions may have because of maturity mismatches between their assets and liabilities. Because of their complexity and their inherently speculative nature, reliance on standby commitments to offset mismatching can only lead to confusion, uncertainty, and ultimately to safety and soundness problems. As explained below in the discussion of futures contracts, there are already a range of other business strategies available to Federal credit unions to manage their assets and liabilities.

Futures contracts. A futures contract is a standardized agreement offered on one of the futures exchanges to buy or sell an underlying investment at an established future date and at a specified price. While the proposed rule carried over the previous rule's prohibition on futures contracts, the Board requested comment on whether investment in futures contracts should be authorized as an asset/liability management tool.

The comments were mixed. Commenters in support believed that with increased competition, greater interest rate sensitivity of member shareholders, and recent fluctuation in interest rates, it is important that Federal credit unions have the flexibility to hedge interest rate risk through the use of interest rate futures.

Commenters in opposition to authorizing futures contracts believed that they are too complex and too often result in sizable losses. Further, they felt that with the relatively short maturities of credit union loans and the authority to make variable rate loans, Federal credit unions have adequate tools to protect against interest rate swings.

The Board has determined not to authorize investments in futures contracts at this time. To the extent that futures contracts are seen as tools to reduce the interest rate risk that results from a mismatch between asset and liability maturities, the Board believes that there are already a range of other business strategies available to FCU's. Such strategies include: (a) Not investing or lending at long term fixed rates; (b) using variable rate lending and floating rate investments; (c) using secondary markets to sell long-term loans to limit or manage the level of exposure; (d) using improved funds management strategies under deregulation to create a "basket" of share maturities which would compliment the duration of longer term assets; and (e) using reserves (established for this purpose) to temporarily cover losses should rising interest rates lead to short-term mismatches. Further, it is the opinion of the Board that as long as Federal credit unions take in short-term funds and elect to invest or lend in long-term instruments, there is a risk. No option, including futures or standby commitments, eliminates the risk; they may, at best, just reduce some of the potential costs.

Kickbacks. The commenters were nearly unanimous in approving of the proposed rule (now § 703.4(e)) prohibiting a Federal credit union's directors, officials, committee members, employees, and immediate family

members of such individuals from receiving pecuniary consideration in connection with the making of an investment or deposit by the Federal credit union.

The Board has approved § 703.4(e) without substantive change, but has added a new § 703.2(i) which defines what is meant by the term "immediate family member." By specifically defining the term, the Board expects to minimize any uncertainty as to who may fall within the "immediate family" for purposes of the rule.

Adjusted trading and short sales. Both the previous regulation and the proposal contained prohibitions against engaging in adjusted trading and short sales. Adjusted trading is the sale of a security at an inflated price above market with the simultaneous purchase of another security, also at an inflated price. The purpose is to hide or defer losses and avoid recording the losses in the accounting period in which they occur. It is a misrepresentation on the balance sheet and is not in accordance with "full and fair disclosure" required in 12 CFR 702.3.

A short sale is the sale of a security not owned at the time of the sale. The seller is speculating that the price of the security will fall prior to his purchase and thus enable him to sell it at a higher previously agreed to price pursuant to the short sale. The practice is considered to be unsafe and unsound.

No commenters objected to the prohibition against these two types of transactions and the prohibitions have been carried over to the final rule, § 703.4 (c) and (d).

IRPS 79-4—Investments

NCUA Interpretive Ruling and Policy Statement 79-4 was originally issued to elaborate on the requirements of Part 703 and to establish accounting procedures to be used in conjunction with certain authorized investment transactions. In light of the fact that the accounting procedures are now covered in NCUA's *Accounting Manual for Federal Credit Unions* and considering the changes and clarifications in the proposed rule, NCUA proposed to repeal IRPA 79-4. The commenters agreed. Accordingly, IRPS 79-4 is repealed.

Delayed Effective Date

This final rule has been issued with a delayed effective date (May 21, 1984) in order to provide Federal credit unions a full opportunity to study the changes in investment authority and responsibilities and develop an understanding of the new investment vehicles before committing funds to any particular type of investment.

Regulatory Procedures

The NCUA Board has determined and certifies that the final rule will not have a significant economic impact on a substantial number of small credit unions because the rule would increase their management flexibility, enhance their competitive positions and reduce their paperwork burdens. A regulatory flexibility analysis is not required. 5 U.S.C. 603(a), 604(a).

List of Subjects in 12 CFR Part 703

Credit unions, Investments.

Dated: March 22, 1984.

Rosemary Brady,

Secretary of the Board.

1. 12 CFR Part 703, Investment and Deposit Activities, is revised to read as follows:

PART 703—INVESTMENT AND DEPOSIT ACTIVITIES

Sec.
703.1 Scope.
703.2 Definitions.
703.3 Authorized activities.
703.4 Prohibited activities.

Authority: 12 U.S.C. 1757(7), 1757(8), 1766(a), and 1789(a)(11).

§ 703.1 Scope.

Sections 107(7) and 107(8) of the Federal Credit Union Act (12 U.S.C. 1757(7), 1757(8)) set forth those securities, deposits, and other obligations in which Federal credit unions may invest. Included are securities issued or fully guaranteed by the United States Government or any of its agencies, shares of central credit unions and any federally insured credit union, accounts in other federally insured financial institutions, and other specified investments. This part interprets several of the provisions of sections 107(7) and 107(8) and places certain limits on the types of transactions that Federal credit unions may enter into in connection with the purchase and sale of authorized securities, deposits and obligations. This part does not apply to investments in loans to members, which are governed by § 701.21 (12 CFR 701.21). Also, other sections of NCUA's regulations affect certain specific investments. For example, investments in credit union service organizations are subject to § 701.27 (12 CFR 701.27), and investments in fixed assets are subject to § 701.36 (12 CFR 701.36).

§ 703.2 Definitions.

(a) *Adjusted trading* means any method or transaction used to defer a loss whereby a Federal credit union sells a security to a vendor at a price above its current market price and simultaneously purchases or commits to purchase from the vendor another security at a price above its current market price.

(b) *Bailment for hire contract* means a contract whereby a third party, bank or other financial institution, for a fee, agrees to exercise ordinary care in protecting the securities held in safekeeping for its customers.

(c) *Bankers' Acceptance* means a time draft that is drawn on and accepted by a bank, and that represents an irrevocable obligation of the bank.

(d) *Cash forward agreement* means an agreement to purchase or sell a security with delivery and acceptance being mandatory and at a future date in excess of thirty (30) days from the trade date.

(e) *Eurodollar deposit* means a deposit in a foreign branch of a United States depository institution.

(f) *Facility* means the home office of a Federal credit union or any suboffice thereof, including but not necessarily limited to a wire service, telephonic station, or mechanical teller station.

(g) *Federal funds transaction* means a short-term or open-ended transfer of funds to a Section 107(8) institution.

(h) *Futures contract* means a contract for the future delivery of commodities, including certain government securities, sold on commodities exchanges.

(i) *Immediate family member* means a spouse, or a child, parent, grandchild, grandparent, brother or sister, or the spouse of any such individual.

(j) *Market price* means the last established price at which a security is sold.

(k) *Maturity date* means the date on which a security matures, and shall not mean the call date or the average life of the security.

(l) *Repurchase transaction* means a transaction in which a Federal credit union agrees to purchase a security from a vendor and to resell the same or any identical security to that vendor at a later date. A repurchase transaction may be of three types:

(1) *Investment-type repurchase transaction* means a repurchase transaction where the Federal credit union purchasing the security takes physical possession of the security, or receives written confirmation of the purchase and a custodial or safekeeping receipt from a third party under a written bailment for hire contract, or is recorded as the owner of the security through the Federal Reserve Book-Entry System;

(2) *Financial institution-type repurchase transaction* means a

repurchase transaction with a Section 107(8) institution.

(j) *Loan-type repurchase transaction* means any repurchase transaction that does not qualify as an investment-type or financial institution-type repurchase transaction.

(m) *Reverse repurchase transaction* means a transaction whereby a Federal credit union agrees to sell a security to a purchaser and to repurchase the same or any identical security from that purchaser at a future date and at a specified price.

(n) *Section 107(8) institution* means an institution in which a Federal credit union is authorized to make deposits pursuant to section 107(8) of the Federal Credit Union Act (12 U.S.C. 1757(8)), i.e., an institution that either is insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation or is a State bank, trust company or mutual savings bank operating in accordance with the laws of a state in which the Federal credit union maintains a facility.

(o) *Security* means any security, obligation, account, deposit, or other item authorized for investment by a Federal credit union pursuant to section 107(7) or 107(8) of the Federal Credit Union Act (12 U.S.C. 1757(7), 1757(8)), other than loans to members.

(p) *Settlement date* means the date originally agreed to by a Federal credit union and a vendor for settlement of the purchase or sale of a security.

(q) *Short sale* means the sale of a security not owned by the seller.

(r) *Standby commitment* means a commitment to either buy or sell a security, on or before a future date, at a predetermined price. The seller of the commitment is the party receiving payment for assuming the risk associated with committing either to purchase a security in the future at a predetermined price, or to sell a security in the future at a predetermined price. The seller of the commitment is required to either accept delivery of a security (in the case of a commitment to buy) or make delivery of a security (in the case of a commitment to sell), in either case at the option of the buyer of the commitment.

(s) *Trade date* means the date a Federal credit union originally agrees, whether orally or in writing, to enter into the purchase or sale of a security.

(t) *Yankee Dollar deposit* means a deposit in a United States branch of a foreign bank licensed to do business in the state in which it is located, or a deposit in a state chartered, foreign controlled bank.

§ 703.3 Authorized Activities.

(a) *General authority.* A Federal credit union may contract for the purchase or sale of a security provided that:

(1) The delivery of the security is to be made within thirty (30) days from the trade date; and

(2) The price of the security at the time of purchase is the market price.

(b) *Cash forward agreements.* A Federal credit union may enter into a cash forward agreement to purchase or sell a security, provided that:

(1) The period from the trade date to the settlement date does not exceed one hundred and twenty (120) days;

(2) If the credit union is the purchaser, it has written cash flow projections evidencing its ability to purchase the security;

(3) If the credit union is the seller, it owns the security on the trade date; and

(4) The cash forward agreement is settled on a cash basis at the settlement date.

(c) *Loans, shares and deposits—other financial institutions.* A Federal credit union may invest in the following accounts of other financial institutions as specified in section 107(7) and 107(8) of the Federal Credit Union Act (12 U.S.C. 1757(7), 1757(8)): loans to nonmember credit unions in an aggregate amount not exceeding 25 percent of the lending credit union's unimpaired capital and surplus; shares, share certificates or share deposits of federally insured credit unions; shares or deposits of any central credit union specifically authorized by the board of directors; and deposits of any Section 107(8) institution. Any such investment is subject to the other applicable provisions of this Part (703).

(d) *Repurchase transactions.* A Federal credit union may enter into an investment-type repurchase transaction or a financial institution-type repurchase transaction provided the purchase price of the security obtained in the transaction is at or below the market price. A repurchase transaction not qualifying as either an investment-type or financial institutions-type repurchase transaction will be considered a loan-type repurchase transaction subject to section 107 of the Federal Credit Union Act (12 U.S.C. 1757), which generally limits Federal credit unions to making loans only to members.

(e) *Reverse repurchase transactions.* A Federal credit union may enter into a reverse repurchase transaction, provided that either any securities purchased with the funds obtained from the transaction or the securities collateralizing the transaction have a maturity date not later than the settlement date for the reverse repurchase transaction. A reverse repurchase transaction is a borrowing transaction subject to section 107(9) of the Federal Credit Union Act (12 U.S.C. 1757(a)), which limits a Federal credit union's aggregate borrowing to 50 percent of its unimpaired capital and surplus.

(f) *Federal funds.* A Federal credit unions may sell Federal funds to a Section 107(8) institution, provided that the interest or other consideration received from the financial institution is at the market rate for Federal funds transaction and that the transaction has a maturity of one or more business days or the credit union is able to require repayment at any time.

(g) *Yankee Dollars.* A Federal credit union may invest in Yankee Dollar deposits in a Section 107(8) institution.

(h) *Eurodollars.* A Federal credit unions may invest in Eurodollar deposits in a branch of a Section 107(8) institution.

(i) *Bankers' acceptances.* A Federal credit unions may invest in bankers' acceptances issued by a Section 107(8) institution.

§ 703.4 Prohibited activities.

(a) A Federal credit union may not purchase or sell a standby commitment.

(b) A Federal credit union may not buy or sell a futures contract.

(c) A Federal credit union may not engage in adjusted trading.

(d) A Federal credit union may not engage in a short sale.

(e) A Federal credit union's directors, officials, committee members and employees, and immediate family members of such individuals, may not receive pecuniary consideration in connection with the making of an investment or deposit by the Federal credit union.

3. NCUA Interpretive Ruling and Policy Statement 79–4—Investments (August 31, 1979, 44 FR 51195), is repealed.

2. NCUA Interpretive Ruling and Policy Statement 81–2—Federal Funds (March 3, 1981, 46 FR 14887), is repealed.

BILLING CODE 7535-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 84-ASW-7; Amdt. 39-4831]

Airworthiness Directives; Hughes Helicopters, Inc., Model 369 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain Hughes Helicopters, Inc., Model 369 helicopters by priority mail. The AD requires the inspection of the swashplate bearing assembly to determine if the ball bearing cage is installed and replacement of swashplate bearing assembly if the bearing cage is missing. The AD is needed to prevent possible loss of control of the rotor system in flight and subsequent loss of the helicopter.

DATE: Effective April 9, 1984, as to all persons except those persons to whom it was made immediately effective by priority mail AD 84-01-02, issued January 10, 1984, which contained this amendment.

Compliance required before further flight after the effective date of this AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from Hughes Helicopters, Inc., Centinela and Teale Avenues, Culver City, California 90230. Copies of the Mandatory Service Information Notices are contained in the Rules Docket at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTACT: Jerry Sullivan, Aerospace Engineer, Airframe Section, ANM-172W, Western Aircraft Certification Office, Northwest Mountain Region, Federal Aviation Administration, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009, telephone number (213) 536-6166.

SUPPLEMENTARY INFORMATION: On January 10, 1984, a priority mail airworthiness directive was issued and made effective immediately upon receipt as to all known U.S. owners and operators of Hughes Helicopters, Inc., Model 369 helicopters. The AD required inspection of the swashplate bearing to determine if the ball bearing cage is installed and replacement of bearing assembly if the ball bearing cage is missing. The priority mail AD was issued because of a report of a swashplate bearing failure. After landing the pilot heard a loud bang, shut down the aircraft, and found the rotating star of the swashplate separated from the lower support. There was no control of the rotor system. Upon inspection it was determined that the swashplate bearing assembly was not manufactured in accordance with the design specification in that the ball bearing cage was not installed during assembly. Hughes Helicopters, Inc., has found 15 improperly assembled bearings since this situation has come to light. The failed bearing had been in service 2½ hours. Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority mail letters issued to all known U.S. owners of Hughes Helicopters, Inc., Model 369 (Army YOH-6A), 369A (Army OH-6A), D, E, H, HE, HM, and HS helicopters. After the AD was issued on January 10, 1984, the manufacturers submitted information which verified that the suspect swashplate bearings are limited to the post June 1, 1983, period. Therefore, the original AD has been amended to provide relief for helicopters with bearings installed prior to June 1, 1983. The AD published in the **Federal Register** is the same as the priority mail AD dated January 10, 1984, except for the relieving feature noted above. The conditions which led to the initial issuance still exist and the AD is hereby published in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Hughes Helicopters, Inc. (Hughes Helicopters): Applies to Hughes Helicopters, Inc., Model 369 series including Army YOH-6A, and OH-6A helicopters certificated in all categories.

Compliance is required prior to further flight, unless already accomplished.

To prevent possible loss of control of rotor system in flight, accomplish the following:

For Hughes Helicopters, Inc., Model 369 (Army YOH-6A), 369A (Army OH-6A) D, E, H, HE, HM, and HS helicopters with swashplate bearing assembly P/N 369A7003-3 installed after June 1, 1983:

(a) Comply with paragraphs A through J of procedures section of Hughes Helicopters, Inc., Mandatory Service Information Notices DN-125, EN-12, and HN-191, as applicable, all dated December 23, 1983, or FAA approved equivalent. Model 369 series are to comply with Mandatory Service Information Notice HN-191 or FAA approved equivalent.

(b) Replace deficient swashplate bearing assembly with serviceable unit.

(c) Swashplate bearing assembly P/N 369A7003-3 with positively identified serial numbers 9000 through 9999 or with a ⅛-inch-diameter blue dot on the outer surface of the snap ring has been determined to contain the ball bearing cage and need not be reinspected.

(d) Only subject bearing assembly positively identified as being S/Ns 9000-9999 or bearing assemblies with blue dot on the outer surface of snap ring or FAA approved equivalent bearing assemblies approved by the Manager, Western Aircraft Certification Office may be used as replacement swashplate bearing assemblies.

Alternative inspections, modifications, or other actions which provide an equivalent level of safety may be used when approved by the Manager, Western Aircraft Certification Office, Hawthorne, California.

This amendment becomes effective April 9, 1984, as to all persons except those persons to whom it was made immediately effective by priority mail AD 84-01-02, issued January 10, 1984, which contained this amendment.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) [Revised, Pub. L. 97-449, January 12, 1983]; 14 CFR 11.89)

Note.—The FAA has detemined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Fort Worth, Texas on March 9, 1984.

C. R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910-13-M

CIVIL AERONAUTICS BOARD

14 CFR Part 256

[Economic Reg. Enactment of Part 256 Docket 41686; Reg. ER-1377]

Display of Joint Operations in Carrier-Owned Computer Reservations Systems

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The Board is adopting an emergency rule that would prevent airlines owning computer reservations systems (CRS's) from denying access to their systems to carriers who coordinate their services under the same airline designator code. The rule also prohibits display discrimination against carriers who conduct such operations. The rule is intended to ensure that systems owners do not use their control of CRS's to limit the ways in which other carriers compete in marketing their services. The Board's action responds to petitions by several air carriers.

DATES: *Adopted:* March 27, 1984.
Effective: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Samuel E. Whitehorn (202) 673-5450. Paul Samuel Smith (202) 673-5450, Barry L. Molar (202) 673-5205, George S. Baranko (202) 673-6011, or Robert D. Young (202) 673-6060, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUPPLEMENTARY INFORMATION:

The Proposed Rule

EDR-470, 49 FR 9430, March 13, 1984, proposed an emergency rule that would prevent air carriers owning computer reservations systems (CRS's) from eliminating other carriers' flight information from their CRS's when the other carriers' flights are operated under a single airline designator code, absent a determination by the Board that the other carriers' use of a common code constitutes a violation of section 411. We instituted this rulemaking in response to requests of Frontier Airlines and a group of other carriers that we declare such action to be an unfair and deceptive practice and an unfair method of competition. They made their requests in a concurrent rulemaking proceeding, covered by EDR-466C (49 FR 11644, March 27, 1984), where we proposed comprehensive rules on CRS-owning airline activities. We indicated that we are proceeding separately with this rule in order to respond to United's announced intention to remove carriers using common designator codes from its APOLLO system on April 1, 1984. The proposed rule would prevent such action pending a determination on the legality of carriers' use of common designator codes, a question that is currently before us in Docket 41875.

The proposed rule is based on essentially the same facts and conclusions that led us to propose EDR-466C, and we incorporated our proposed findings there into this proceeding. Our examination of the CRS industry led us to tentatively conclude that the CRS market is dominated by a few airline owners. Their CRS's are travel agents' primary information source. Agents, in turn, are the primary distributors of scheduled air transportation services. As a result, we found that CRS owners have gained substantial control over the agency distribution system, particularly on a regional level, and are in position to use that power to affect air transportation competition adversely.

This proceeding is concerned with the use of CRS power to inhibit air transportation competition through the use of cooperative service agreements. Generally these agreements provide for some integration of operations, such as the coordination of departure and arrival times and the common use of baggage, terminal and computer facilities. In some cases, the cooperating carriers share common or very similar trade-marks. Most importantly for the purposes of this proceeding, the cooperating carriers also use the same two-letter code to designate their services in the Official Airline Guide and elsewhere. The OAG treats flights having the same two-letter code as on-line connections.

CRS owners obtain their flight information from the OAG and afford commonly designated flights the same treatment, i.e., they are listed as on-line services. On-line connections are generally given higher display priority than inter-line connections and are more likely to be sold.

We found that such cooperative agreements appear to be an attractive method to compete in the marketplace. In exchange for support services, the use of some of its trademarks, and the coordination of schedules, a larger, established carrier can gain valuable feed traffic. Some of the feed traffic they gain is a consequence of the common use of designator codes. Pan American, among others, states that the service provided by these cooperative agreements is attractive to many travelers.

However, the few carriers owning CRS's are in a position to substantially reduce the attractiveness of such operations by denying carriers sharing a designator code access to their systems. United's notice that it would no longer list connecting flights operated by separate carriers under a common code in its APOLLO CRS after April 1, 1984, seemed to illustrate the possible exercise of CRS market power. Faced with the possibility of exclusion from a CRS, we concluded that carriers using common codes can either lose the traffic and other benefits they gain from such arrangements or lose their access to a substantial portion of the travel agent distribution system. In short, we found that United and the other CRS providers have the power to force competitors to abandon their competitive marketing strategy for reasons unrelated to its merits.

United has apparently attempted to justify its decision to delete carriers using common designator codes from APOLLO on the grounds that consumers are being deceived by the implicit representation that the carrier whose code is shared will be providing all the service purchased. When the consumer arrives at the gate of the second carrier, however, he or she finds the service will be provided by an independent airline, usually with small commuter-type aircraft and that the consumer protection rules normally associated with scheduled service are not available. United and certain other carriers believe this constitutes an unfair and deceptive practice under section 411 of the Act.

While we have not unconditionally sanctioned the unrestrained use of common designator codes, we have approved the practice in some circumstances. *See, e.g.*, Order 79-2-106. Some cooperative agreements may affirmatively benefit the public by ensuring service to particular communities. Moreover, travel agents can disclose to consumers the equipment to be used on a particular flight, which appears on the CRS display. We also note that if a certificated carrier owned and operated small aircraft directly, those operations would be exempt from certain consumer protection regulations. 14 CFR 298.90 *et. seq.* On the other hand, we recognized that there may well be circumstances under which the use of common designator codes would be deceptive. However, that was a question that the Board should properly determine. It is

not, in our view, to be resolved by the competitors of the carriers providing these services.

The rule we proposed foreclosed CRS carriers from deleting or discriminating against carriers that use the same designator code, absent our determination that the use of common designator codes by these carriers was a violation of the Act. Our intention was to preserve the *status quo* and retain for ourselves the responsibility to determine if carriers had violated section 411. We indicated that when a CRS carrier, or any other carrier, believed its competitors were using common designator codes to deceive the public, their recourse would be to file a complaint challenging the practice.

The Comments

Comments in support of our proposed rule have been filed by Alaska Airlines; Eastern Air Lines; Empire Airlines; Frontier Airlines, Frontier Horizon, and Combs Airways (the Frontier Group); Air Kentucky Airlines, Chautaugua Airlines, Crown Airways, Fischer Brothers Aviation, Henson Aviation, Pennsylvania Airlines, Piedmont Aviation, Pocano Airlines, Southern Jersey Airways, Suburban Airlines, and USAir, (the Joint Carriers); Metro Airlines; and Pan American World Airways. Crown Airways, Henson Aviation, Pennsylvania Airlines, and Suburban Airlines also filed separate comments in support of the proposed rule.

Opposing comments were filed by Excellair; the General Services Administration (GSA); and United Air Lines. In addition, Aspen Airways, Britt Airways, Command Airways, and San Juan Airlines filed letters indicating their opposition to the proposed rule. Generally, these commenters raise three arguments in opposition to the proposed rule. First, they argue that our conclusions with respect to CRS carrier power and the importance of access to particular CRS's are incorrect and unsupported by the record. Second, they argue that the use of common designator codes is, if not per se deceptive, misleading and anticompetitively deceptive in particular circumstances. Finally, they argue that the proposed rule will have a substantial adverse impact on independent commuter carriers that cannot or will not use the designator codes of a major carrier.

The Aviation Consumer Action Project (ACAP) and American Airlines Inc. comments take no specific position on the proposed rule. However, both suggest there are circumstances in which the sharing of designator codes injures the public. ACAP suggests that we address the features which must be present for a coordinated operation to be listed and advertised as an "on-line" connection. American asks that we expedite consideration of its complaint in Docket 41875 to establish guidelines for the use of such codes. American also questions the factual and legal analysis underlying EDR–470 and suggests that we withdraw that analysis "since it is not necessary to the adoption of the proposed rule." It also suggests that the proposed action should have been undertaken in an enforcement proceeding rather than a rulemaking proceeding.

Delta does not take a position on the proposed rule. It asks, however, that we affirm its understanding that its rights to comment in the broader rulemaking proceeding will not be prejudiced by its decision not to comment here. Its understanding is correct. Similarly People Express Airlines has only filed in order to make sure that our proposed rule is only applicable to computer reservations systems having multi-carrier listing and booking capabilities. In fact, our proposed rule only applies to carriers that own, control or operate CRS's for travel agents in the United States. The computer system People Express' personnel use to book reservations when agents contact People Express does not fall within this definition.

The Final Rule

For the reasons set out in EDR–470, as supported by our tentative findings in EDR–466C, we have decided to adopt the rule preventing airlines owning computer reservations systems from denying access or discriminating against carriers who coordinate their services under the same airline designator code. The specific objections of commenters, our responses, and some clarifying details are set out below.

This rule is based upon the facts we have gathered on CRS industry and common designator code practices. Parties in the comprehensive rulemaking proceeding will have the opportunity to present additional facts and present new argument on our conclusions here. Consequently, after we decide the issues presented in those proceedings, we may re-examine the rule we are adopting here.

Discussion

The first challenge to the proposed rule is the assertion that our analysis of competition in the CRS and air transport industries was incorrect and unsupported by the record. American promises that it will support its assertion to that effect when it submits its comments on EDR–466C. United restates its assertions, made more fully in comments submitted prior to the issuance of EDR–470, that its CRS is not an "essential facility" and that United has not market power in any market. We will not at this stage repeat the detailed analysis that mandates our action here. We simply note that no party has submitted any new evidence or argument relating to our analysis of the CRS industry since we issued EDR–470, and we have no basis for revising our conclusions on those issues at this time.

On the basis of the information we have and the arguments presented so far, we continue to believe that airline CRS vendors have a substantial degree of market power, that there is a danger of their wielding that power in ways that may cause substantial injury to air transport competition and to consumers, and that our responsibilities under section 411 together with the more specific strictures contained in section 102 and other sections of the Federal Aviation Act require that we take immediate action to safeguard the competitive structure of the air transport industry. We note that section 411 requires that we take a somewhat more functional approach than that contained in the case law developed under the Sherman Act. Moreover, if United had succeeded in forcing its competitors to agree to eliminate their common listing practices, those agreements could be construed as agreements in restraint of trade and as violations of section 1 of the Sherman Act. *See Home Placement Service* v. *Providence Journal Co.*, 682 F.2d 274, 279 (1st Cir. 1982). Preventing such developments in their incipiency is a large part of our responsibility under section 411.

Excellair argues that the sharing of a major carrier's designator code by a commuter carrier is anticompetitive because it undermines the competitive position of commuter carriers like Excellair who will not or cannot coordinate their operations with a major carrier and use the latter carrier's designator code. We found in Order 79–2–108 that USAir's agreements with two Allegheny commuters were franchising agreements which are not inherently anticompetitive. Our analysis there remains valid, for such agreements will not necessarily injure competition and may enhance it in some smaller markets.

The remaining arguments made by opponents to the rule relate to the merits of the use of common designator codes. The opponents generally claim that the practice is misleading to the public. Although we found in the case of

several Allegheny commuter agreements that the commuter carrier's analogous use of the carrier's trade name is neither inherently deceptive nor unfair, Order 79–2–106, these arguments appear to merit serious scrutiny in some cases, for example, GSA's complaint against Henson. However, the determination of whether, and to what extent, the use of common designator codes is deceptive is one for the Board to make. Clearly, if the practice were "inherently and unfailingly deceptive," we would have no basis for requiring CRS owners to participate in the practice. *Home Placement Service* v. *Providence Journal Co.*, 682 F.2d at 277. We believe that the question is close enough in some cases to warrant further investigation, either in the context of a rulemaking or enforcement proceedings. We will shortly decide which form is the most appropriate. Thus, in adopting this rule we seek to maintain the status quo. We are not giving our imprimatur to the unbridled use of common designator codes. What we are concluding here is that a CRS owner may not, consistent with section 411, use its market power to dictate the business practices of its competitors.

American contends that the action we take here would more appropriately be taken in the context of an enforcement proceeding. Its basis for that claim is the fact that only one CRS vendor—United—has threatened the action that this rule would prohibit. We are proceeding by rule instead of adjudication for two reasons. First, although United is the only carrier that has threatened action in this regard, the potential remains that other CRS vendors could take similar action. Second, the CRS industry has been, up to this point, completely unregulated. It is our judgment that the introduction of prospective ground rules for the industry should be accomplished as even-handedly as possible and in circumstances where all affected parties may have an opportunity to comment on our decision. Rulemaking is the ideal vehicle for achieving that result.

Several parties have requested that, if a rule is adopted, we make certain clarifying amendments or statements in connection with the rule. American has requested that we amend proposed § 256.4(b) to make it clear that the rules' prohibition on discrimination against common code usage only extends to the system vendor's CRS activities. Since that limitation was intended in the first place, we will make that clear by adding the words ". . . relating to providing the system" at the end of proposed § 256.4(b). United suggests that we should adopt a provision requiring participating carriers who use a common code to indemnify the CRS vendor for any claims arising from their use. We see no reason to adopt that suggestion since we do not interpret our rule or any other requirement as prohibiting vendors from obtaining indemnification if claims are made against the vendor because of the alleged inaccuracy of information supplied by another carrier.

Final Regulatory Flexibility Analysis

The discussion above constitutes the Board's final regulatory flexibility analysis of this rule pursuant to 5 U.S.C. 604. Copies of this document can be obtained from the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428, (202) 673–5432, by referring to the "ER" number at the top of the document.

Effective Date

The Board finds good cause to make this rule effective on publication in the **Federal Register.** United, one of the CRS owners, has stated that on April 1, 1984, it will eliminate from its CRS the schedules of carriers who share one designator code. United's plan will force other carriers to lose their access to United's CRS display or to change their method of conducting coordinated operations, a method followed by several carriers for over 15 years. The Board is adopting the rule to keep any airline CRS owner from so determining how its competitors conduct their operations. To prevent United from taking such action, the Board must make this rule effective immediately.

List of Subjects in 14 CFR Part 256

Advertising, Air carriers, Air transportation-foreign, Antitrust, Consumer protection, Essential air service, Travel agents.

Accordingly, the Civil Aeronautics Board adds a new Part 256 to Chapter II of Title 14, Code of Federal Regulations, to read:

PART 256—DISPLAY OF JOINT OPERATIONS IN CARRIER-OWNED COMPUTER RESERVATIONS SYSTEMS

Sec.
256.1 Purpose.
256.2 Applicability.
256.3 Definitions.
256.4 Display of Information.

Authority: Secs. 102, 204, 404, 411, 412, 419, 1102 Pub. L. 85–726 as amended, 72 Stat. 740, 743, 760, 769, 770, 797; 92 Stat. 1732; 94 Stat. 42; 49 U.S.C. 1302, 1324, 1374, 1381, 1382, 1389, 1502.

§ 256.1 Purpose.

The purpose of this part is to set forth a requirement for operation by air carriers of computer reservation systems used by travel agents so as to prevent unfair, predatory, and anticompetitive practices in air transportation.

§ 256.2 Applicability.

This rule applies to air carriers or foreign air carriers that own, control, or operate computerized reservation systems for travel agent subscribers in the United States, and the sale in the United States of interstate, overseas, and foreign passenger air transportation through such systems.

§ 256.3 Definitions.

"Carrier" means any air carrier, any foreign air carrier, and any commuter air carrier, as defined in 49 U.S.C. 1301(3), 49 U.S.C 1301(22), and § 298.2(f) of this chapter, respectively that is engaged directly in the operation of aircraft in passenger air transportation.

"Display" means the system's presentation of carrier schedules, fares, rules or availability to a subscriber by means of computer terminal.

"Subscriber" means a ticket agent, as defined in 49 U.S.C. 1301(40) of the Act, that holds itself out as a neutral source of information about, or tickets for, the air transportation industry in general, and that has entered into an agreement for the use of a system.

"System" means a computerized airline reservation system offered by a carrier to subscribers, for use in the United States that contains information about schedules, fares, rules or availability of other carriers and that provides subscribers with the ability to issue tickets.

"System vendor" means a carrier that owns, controls or operates a system.

"Designator code" means the airline designations allotted and administered pursuant to Agreements CAB 24606 and 26056.

§ 256.4 Display of information.

(a) A system vendor shall not deny access to its system to two or more carriers whose flights share a single designator code, absent a determination by the Board that the use of the code constitutes a violation of 49 U.S.C. 1381.

(b) A system vendor shall not discriminate against any carrier on the basis of that carrier's using the same designator code as another carrier, either by display bias, or any other means relating to providing the system.

By the Civil Aeronautics Board.
Phyllis T. Kaylor.
Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 370, 379, and 399

[Docket No. 40124-07]

Amendments to the Commodity Control List

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Interim rule with request for comments.

SUMMARY: This rule imposes licensing requirements under the national security provisions of the Export Administration Act of 1979, as amended (EAA) on export and reexport of certain commodities to all destinations. The changes result from a review of strategic controls maintained by the U.S. and certain allied countries through the Coordinating Committee (COCOM). In addition, this rule imposes licensing requirements on shipment of certain technical data to all destinations except Canada. It has been determined that these controls are necessary to protect U.S. national security interests in accordance with the criteria in sections 3(2)(A) and 5 of the EAA.

EFFECTIVE DATE: March 30, 1984. Comments must be received by the Department May 29, 1984.

ADDRESS: Written comments (six copies) should be sent to: Betty Ferrell, Exporters' Service Staff, Office of Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, D.C. 20044.

FOR FURTHER INFORMATION CONTACT: Vincent Greenwald, Exporters' Service Staff (Telephone: (202) 377-3856).

SUPPLEMENTARY INFORMATION: The United States controls exports for national security reasons under the authority of section 5 of the Export Administration Act of 1979, as amended. The Office of Export Administration maintains the Commodity Control List (CCL), which includes all commodities subject to Department of Commerce export controls.

National security concerns have necessitated changes to the CCL and other parts of the Export Administration Regulations, including expansion and clarification of export controls involving general industrial equipment; transportation equipment; electronics and precision instruments; metals, minerals, and their manufactures; chemicals, metalloids, and petroleum products; and rubber products. These changes result from the review of the system of strategic export controls maintained by the United States and certain allied countries through the Coordinating Committee (COCOM).

Changes to the Export Administration Regulations include the following:

1. Certain types of technical data are added to a list of data requiring a validated license for export to all destinations except Canada. These data include, among others, technology specific to the production of "superalloys," and inert gas and vacuum atomizing technology.

2. Certain types of commodities are added to the Commodity Control List (Supplement No. 1 to § 399.1). These commodities include, among others, equipment specially designed for the production of "superalloys"; equipment designed for the manufacture or testing of printed circuit boards; and various materials for the manufacture of high-temperature fine technical ceramic products.

3. An entry covering "rockets and missiles, guided or unguided" is removed from the Commodity Control List because such commodities are under the export licensing jurisdiction of the Office of Munitions Control, Department of State.

Saving Clause

Shipments of commodities or technical data that are removed from general license authorizations as a result of changes set forth in this rule, that were on dock for lading, on lighter, laden aboard an exporting carrier, or en route aboard a carrier to a port of export pursuant to actual orders for export prior to March 30, 1984, may be exported under the previous general license provision up to and including April 13, 1984. Any such commodity or technical data not actually exported before midnight April 13, 1984 require a validated export license.

Rulemaking Requirements and Invitation to Comment

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96-72, 50 U.S.C. app. 2401 *et seq.*) ["the Act"], this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. However, because of the importance of the issues raised by these regulations and the intent of Congress set forth in section 13(b) of the Act, these regulations are issued in interim form and comments will be considered in developing final regulations. These regulations may be revised before the end of the comment period. Accordingly, interested persons who desire to comment are encouraged to do so at the earliest possible time to permit the fullest consideration of their views.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

The period for submission of comments will close May 29, 1984. All comments received before the close of the comment period will be considered by the Department in the development of final regulations. While comments received after the end of the comment period will be considered if possible, their consideration cannot be assured. Public comments that are accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason will not be accepted. Such comments and materials will be returned to the submitter and will not be considered in the development of final regulations.

All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, comments in written form are preferred. If oral comments are received, they must be followed by written memoranda, which will also be a matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001-B, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in

accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

List of Subjects in 15 CFR Parts 370, 379 and 399

Administrative practice and procedure, Exports, Science and technology

PART 370—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

1. Supplement No. 2 to Part 370, "U.S. Munitions List," is amended by removing the phrase "(except meteorological sounding rockets)" from paragraph (a) of Category IV.

PART 379—[AMENDED]

2. Section 379.4 is amended by revising in the first sentence of paragraph (d) the phrase—"No technical data relating to the following commodities"—to read—"No technical data relating to the following commodities or processes"; and by removing the word "and" from paragraph (d)(9); by redesignating (d)(10) as (d)(13); and by adding a new (d) (10), (11) and (12), reading as follows:

§ 379.4 General License GTDR: Technical Data Under Restriction.

* * * * *

(d) *Restrictions applicable to all destinations except Canada.*

* * * * *

(10) Technical data specific to the production of "superalloys" (see ECCN 1301A of the Commodity Control List), regardless of the export controls on the equipment used with such technical data; melting, remelting and degassing techniques specific to the production of "superalloys"; and technical data specific to the production of "superalloys" in crude and semi-fabricated forms;

(11) Technical data (including processing conditions) and procedures for the regulation of temperature, pressure and/or atmosphere in autoclaves when used for the production of composites or partially processed composites using materials controlled by ECCN 1763A of the Commodity Control List:

(12) Inert gas and vacuum atomizing technology to achieve sphericity and uniform size of particles in metal powders, regardless of the type of metal and the export controls on the powder; and

* * * * *

3. Section 379.4 is amended by revising in paragraph (g) the sentence—"See ECCNs 1091A, 1355A and 1527A."—to read "See ECCNs 1091A, 1354A, 1355A, 1527A, and 1532A."

PART 399—[AMENDED]

4. In the Commodity Control List (Supplement No. 1 to § 399.1), Commodity Group 3, General Industrial Equipment, is amended by adding a new entry 1301A (in numerical order, disregarding the first digit) reading as follows:

1301A Equipment specially designed for the production of "superalloys."

Controls for ECCN 1301A

Unit: Report in "$ value."

Validated License Required: Country Groups QSTVWYZ.

GLV $ Value Limit: $0 for all destinations.

Processing Code: TE.

Reason for Control: National security.

Special Licenses Available: None.

Notes.—1. Equipment controlled by this ECCN 1301A does *not* include:

(i) Electric arc and induction furnaces, basic oxygen furnaces, and remelting equipment using other techniques for the production of carbon steels, low-alloy steels and stainless steels;

(ii) Degassing equipment used for the production of carbon steels, low-alloy steels and stainless steels;

(iii) Hot and cold rolling mills, extrusion presses, and swaging and forging machines;

(iv) Decarburizing and annealing and pickling equipment;

(v) Surface finishing equipment; and

(vi) Slitting and cutting equipment.

2. Vacuum induction furnaces used in the production of superalloy powders *are* covered by this ECCN 1301A.

3. See ECCN 1203A for export controls on other electric vacuum furnaces.

4. Equipment specially designed for the production of "superalloys" in crude and semi-fabricated forms *is* controlled by this ECCN 1301A.

5. See other CCL entries for materials and manufacturing processes at later stages in the production process; for example, ECCNs 1431A and 1460A for gas turbine engines.

6. See § 379.4(d) for technical data requiring a validated license for export to all destinations except Canada.

Technical Note.—"Superalloys" are nickel-, cobalt-, and/or iron-base alloys having strengths superior to the AISI 300 series, (as of May 1, 1982) at temperatures over 922K (649°C) under severe environmental and operating conditions. *Excluded* are carbon steels, low-alloy steels and stainless steels having strengths inferior to the AISI 300 series (as of May 1, 1982). (The strengths of "superalloys" covered by this Technical Note are interpreted to mean 90,000 psi tensile strength or 70,000 psi 2% yield tensile strength at 1200°F, per ASTM Special Technical Publication 124.)

5. In the Commodity Control List (Supplement No. 1 to § 399.1), ECCN 2319A of Commodity Group 3, General Industrial Equipment, is amended by revising the heading to read as follows:

2319A Environmental chambers capable of pressures below 10^{-4} Torr, and specially designed components therefor.

* * * * *

6. In the Commodity Control List (Supplement No. 1 to § 399.1), Commodity Group 3, General Industrial Equipment, is amended by adding a new entry 1354A (in numerical order, disregarding the first digit) reading as follows:

1354A Equipment designed for the manufacture or testing of printed circuit boards, and specially designed components and accessories, and specially designed software for such equipment.

Controls for ECCN 1354A

Unit: Report in "$ value."

Validated License Required: Country Groups QSTVWYZ.

GLV $ Value Limit: $1000 for Country Groups T and V, except $0 for the People's Republic of China; $0 for all other destinations.

Processing Code: TE for paragraphs (c), (f) and (g); EE for all other paragraphs.

Reason for Control: National security.

Special Licenses Available: None.

List of Equipment Controlled by ECCN 1354A

(a) Equipment specially designed for removal of resists or printed circuit board materials by dry (*e.g.* plasma) methods;

(b) Computer-aided design (CAD) equipment for printed circuit boards, having any of the following functions:

(1) Generation of artwork design with an interactive capability;

(2) Generation of test string lists for multilayer boards;

(3) Generation of data or programs for "digitally controlled" printed circuit board drilling equipment;

(4) Generation of data or programs for "digitally controlled" printed circuit board shaping and profiling equipment;

(5) Generation of data for control of the sequencing of processes of the equipment for printed circuit board manufacture covered by paragraph (c):

(c) High-speed automated continuous panel processors for plating capable of delivering 860 A/m^2 (80 A/ft^2) or more plate current;

(d) "Digitally controlled" inspection equipment for the detection of defects in printed circuit boards using optical pattern comparison or other machine scanning techniques;

(e) "Digitally controlled" electrical test equipment for the identification of open and short circuits on bare printed circuit boards, capable of:

(1) Continuity testing (less than or equal to 4 ohm) at a rate of 2,500 or more measurements per second; or

(2) High voltage testing (greater than or equal to 50 volts) at a rate of 10,000 or more measurements per minute;

(f) "Digitally controlled" multispindle drills and routers which have any of the following characteristics:

(1) Absolute positioning accuracy of #10 micrometers (0.0004 inch) or better;

(2) Minimum time needed for drill bit changes less than or equal to 5 seconds;

(3) X and Y positioning speeds higher than or equal to 0.125 m/sec. (300 inch/min.) for drilling or for routing;

(g) "Digitally controlled" cyclic voltametric stripping equipment specially designed for printed circuit board plating bath monitoring and analysis.

Notes.—1. See ECCN 1522A(b) for the control of printed circuit board manufacturing equipment incorporating a laser.

2. This ECCN 1354A does *not* cover equipment with controls using the following:

(a) Cams and other purely mechanical means;

(b) Switches including thumbwheel switches;

(c) Plugboards;

(d) On-off and analog controllers;

(e) Diode matrices;

(f) Punched paper tape controllers without a capability to compute, manipulate, or store and rerun program data.

Technical Note.—The term "digitally controlled" refers to equipment, the functions of which are, partly or entirely, automatically controlled by stored and digitally coded electrical signals.

7. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 3, General Industrial Equipment, ECCN 1357A is revised to read as follows:

1357A Equipment for the production of fibers covered by ECCN 1763A, or their composites, and specially designed components and accessories therefor.

Controls for ECCN 1357A

Unit: Report in "$ value."

Validated License Required: Country Groups QSTVWYZ.

GLV $ Value Limit: $1000 for Country Groups T and V, except $0 for the People's Republic of China; $0 for all other destinations.

Processing Code: TE

Reason for Control: National security.

Special Licenses Available: None.

List of Equipment Controlled by ECCN 1357A:

(a) Filament winding machines of which the motions for positioning, wrapping and winding fibers are coordinated and programmed in three or more axes, specially designed to fabricate composite structures or laminates from fibrous and filamentary materials; coordinating and programming controls therefor;

(b) Tape-laying machines of which the motions for positioning and laying tape and sheets are coordinated and programmed in two or more axes, specially designed for the manufacture of composite airframes and missile structures;

(c) Interlacing machines, including adapters and modification kits, for weaving, interlacing or braiding fibers to fabricate composite structures, *except* textile machinery which has not been modified for the above end-uses;

(d) Specially designed or adapted equipment for the production of fibrous and filamentary materials covered by paragraphs (a) and (b) above, as follows:

(1) Equipment for converting polymeric fibers (such as polyacrylonitrile, rayon, or polycarbosilane) including special provision to strain the fiber during heating;

(2) Equipment for the vapor deposition of elements or compounds on heated filamentary substrates; and

(3) Equipment for the wet-spinning of refractory ceramics (such as aluminum oxide);

(e) Specially designed or adapted equipment for special fiber surface treatment or for producing prepregs and preforms covered by ECCN 1763A(c);

Notes.—1. Equipment covered by paragraph (e) above includes, but is not limited to, rollers, tension stretchers, coating equipment, cutting equipment and clicker dies.

2. Specially designed or adapted components and accessories for the machines covered by this ECCN 1357A include, but are not limited to, moulds, mandrels, dies, fixtures and tooling for the preform pressing, curing, casting, sintering or bonding of composite structures or laminates covered by paragraph (d) of the "LIST" in ECCN 1763A.

3. See section 379.4(d) for technical data requiring a validated license for export to all destinations except Canada.

8. In the Commodity Control List (Supplement No. 1 to § 399.1), Commodity Group 3, General Industrial Equipment, ECCN 1370A is amended by revising the heading, the introductory text of paragraph (a) and paragraph (a)(5), and paragraphs (b), (c) and (d) to read as follows:

§ 1370A Machine-tools for generating optical quality surfaces, specially designed components and accessories therefor, and specially designed software.

Controls for ECCN 1370A

* * * * *

List of Commodities Controlled by ECCN 1370A

(a) Turning machines using a single point cutting tool and having all of the following characteristics:

(1) ***

(2) ***

(3) ***

(4) ***

(5) Slide perpendicularity less than 0.001 mm per 300 mm of travel, TIR (peak-to-peak);

(b) Fly cutting machines having both of the following characteristics:

(1) Spindle run-out (radial and axial) less than 0.0004 mm TIR (peak-to-peak);

(2) Angular deviation of slide movement (yaw, pitch and roll) less (finer) than 2 seconds of arc (peak-to-peak) over full travel;

(c) Specially designed components, as follows:

(1) Spindle assemblies consisting of spindles and bearings as a minimal assembly, except those assemblies with axial and radial axis motion measured along the spindle axis in one revolution of the spindle equal to or greater (coarser) than 0.0008 mm TIR (peak-to-peak);

(2) Linear induction motors used as drives for slides, having all of the following characteristics:

(i) Stroke greater than 200 mm;

(ii) Nominal force rating greater than 45 N; and

(iii) Minimum controlled incremental movement less than 0.001 mm; or

(d) Specially designed accessories, *i.e.*, single point diamond cutting tool inserts having all of the following characteristics:

(1) Flawless and chipfree cutting edge when magnified 400 times in any direction;

(2) Cutting radius between 0.1 and 5 mm; and

(3) Cutting radius out-of-roundness less than 0.002 mm TIR (peak-to-peak).

Technical Note.—Machines will be evaluated under the conditions yielding the most accurate values, including but not limited to, the incorporation of control systems that permit mechanical, electronic and software compensation.

9. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 3, General Industrial

Equipment, ECCN 1371A is amended by removing the phrase "(ABEC 5 in the case of hollow bearings)" from paragraph (b) of the "Definitive List of Commodities"; by redesignating paragraph (d) of the "Definitive List" as (e), and adding a new (d); and adding a paragraph (d) to the *Commodity Interpretation*, reading as follows:

1371A Anti-friction bearings.

Controls for ECCN 1371A

* * * * *

Definitive List of Commodities Controlled by ECCN 1371A

* * * * *

(d) Gas-lubricated foil bearings;

(e) Bearing parts usable only for bearings controlled by this ECCN 1371A, as follows: Outer rings, inner rings, retainers, balls, rollers, and subassemblies.

* * * * *

Commodity Interpretation

* * * * *

(d) Ceramic bearings controlled by ECCN 1371A consist of bearing elements (*e.g.*, balls, rollers and/or races) made from ceramic or hybrid (ceramic plus metal) materials and designed to operate at temperatures over 150°C and at DN values equal to or greater than 1.5×10^6.

Note.—DN is defined as the product of the bearing bore diameter in millimeters (mm) and the bearing rotational velocity in revolutions per minute (r.p.m.)

Note.—Hollow bearings are *not* controlled by this ECCN 1371A.

* * * * *

10. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 4, Transportation Equipment, ECCN 2404A, "Rockets and missiles, guided or unguided," is removed.

11. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 4, Transportation Equipment, ECCN 2406A is amended by revising the heading; by removing the "List of Vehicles Controlled by ECCN 2406A" with sub-paragraphs (a) through (d); by revising the word "parts" to read "components" wherever it appears in paragraph (b) and its title of the *Commodity Interpretation;* by designating the sub-paragraph under (b) as (1), and by adding a paragraph (b)(2). As amended, paragraph (b) under *Commodity Interpretation* reads as follows:

2406A Vehicles specially designed for military purposes and specially designed components therefor, excluding vehicles listed in Supp. No. 2 to Part 370.

* * * * *

Commodity Interpretation:

* * * * *

(b) Components for military automotive vehicles.

(1) Functional components are defined as those components making up the power train of the vehicles, the electrical system, the cooling system, the fuel system, and the control system (brake and steering mechanism), the front and rear axle assemblies including the wheels, the chassis frame, springs and shock absorbers. (Components specifically designed for military automotive vehicles on the Munitions List are licensed for export by the U.S. Department of State.)

(2) The following are examples of specially designed components for specially designed military vehicles:

(i) Pneumatic tire casings of a kind specially constructed to be bullet-proof or to run when deflated (excluding types for agricultural and garden tractors and farm implements); and

(ii) Engines for the propulsion of the vehicles described in this ECCN 2406A specially designed or essentially modified for military use, including specially designed components therefor.

12. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 5, Electronics and Precision Instruments, ECCN 1532A is amended by revising the heading, the title of the "List", and the Advisory Note to read as follows:

1532A Precision linear and angular measuring systems, and specially designed components and software therefor.

Controls for ECCN 1532A

* * * * *

List of Precision Linear and Angular Measuring Systems, and Specially Designed Components and Software therefor Controlled by ECCN 1532A

* * * * *

Advisory Note.—Licenses are likely to be approved for export to satisfactory end-users in Country Groups QSWY of equipment defined in paragraph (a) and (d) of the "List" in this ECCN 1532A to civil end-users not engaged in aerospace activities.

13. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 5, Electronics and Precision Instruments, ECCN 1564A is amended by revising paragraph (a) of the "List of Electronic Component Assemblies, Subassemblies, Printed Circuit Boards, and Microcircuits Controlled by ECCN 1564A" to read as follows:

1564A Economic component assemblies, sub-assemblies, printed circuit boards, and microcircuits.

* * * * *

List of Electronic Component Assemblies, sub-assemblies, printed circuit boards, and microcircuits controlled by ECCN 1564A

(a) Substrates for printed circuits including ceramic substrates and coated metal substrates (single-sided, double-sided or multilayer), and thin copper foils therefor, *except:*

(1) Printed circuit boards manufactured from any of the following materials:

(i) Paper base phenolics;

(ii) Glass cloth melamine;

(iii) Glass epoxy resin uncoated or coated with copper foil of a thickness of 18 micrometers (0.00071 inch) or greater;

(iv) Polyethylene terephthalate; or

(v) Any other insulating material having all of the following characteristics;

(A) A maximum continuous rated operating temperature not exceeding 150°C;

(B) A dissipation factor equal to or greater than 0.009 at 1 MHz;

(C) A relative dielectric constant equal to or less than 6 at 1 MHz; and

(D) A coefficient of expansion equal to or greater than 10^{-5} per 0°C over a temperature range of 0 to 120°C;

(2) Ceramic substrates having not more than two layers of interconnection, including the ground plane; and

(3) Copper foil having a thickness of 18 micrometers (0.00071 inch) or greater.

14. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 1715A is amended by removing paragraphs (c)(4) and (5) from the "List of Boron Controlled by ECCN 1715A," and revising (c)(1), (2), and (3) to read as follows:

1715A Boron, as described in this entry.

* * * * *

List of Boron Controlled by ECCN 1715A

* * * * *

(c) * * *

(1) Non-ceramic boron-mitrogen compounds (*e.g.*, borozanes, borozines and boropyrazoyls);

(2) Boron hydrides (*e.g.*, boranes), *except* sodium boron hydride, potassium boron hydride, monoborane, diborane and triborane;

(3) Organoboron compounds, including metalloorganoboron compounds.

15. In the Commodity Control List (Supplement No. 1 to section 399.1),

Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, a new entry 1733A is added (in numerical order, disregarding the first digit) reading as follows:

1733A Base materials, non-composite ceramic materials, ceramic-ceramic composite materials and precursor materials for the manufacture of high-temperature fine technical ceramic products.

Controls for ECCN 1733A

Unit: Report in "lbs."

Validated License Required: Country Groups QSTVWYZ.

GLV $ Value Limit: $1,000 for Country Groups T & V, except $0 for the People's Republic of China; $0 for all other destinations.

Processing Code: CM.

Reason for Control: National security.

Special Licenses Available: See Part 373.

List of base materials, non-composite ceramic materials, ceramic-ceramic composite materials, and precursor materials for the manufacture of high temperature fine technical ceramic products controlled by ECCN 1733A:

(a) Base materials, *i.e.*, "high purity" "fine powders with uniform particle-size distribution," of the following description:

(1) Single or complex non-composite oxides, borides, carbides or nitrides of silicon, aluminium, boron, zirconium or tantalum, *except:*

(i) Single oxides of silicon, boron, aluminum or tantalum;

(ii) Single or complex borides of silicon; and

(iii) Single or complex borides or carbides of aluminium;

(b) Non-composite ceramic materials, in crude or semi-fabricated form, having compositions of the base materials covered by paragraph (a) above;

(c) Granular or fibrous ceramic-ceramic composite materials, containing finely dispersed particles or phases or any non-metallic fibrous or whiskerlike materials, whether externally introduced or grown in situ during processing, where the following materials form the host matrix:

(1) All oxides, including glasses;

(2) Carbides or nitrides of silicon or boron;

(3) Borides, carbides or nitrides of zirconium, hafnium tantalum;

(4) Carbon; or

(5) Any combination of the materials enumerated in (1) to

(4) above;

(d) Precursor materials, *i.e.* special-purpose polymeric or metallo-organic materials for producing any phase or phases of the materials covered by paragraphs (b) or (c) above, as follows:

(1) Polycarbosilanes and polydiorganosilanes (for producing silicon carbide);

(2) Polysilazanes (for producing silicon nitride); or

(3) Polycarbosilazanes (for producing ceramics with silicon, carbon and nitrogen components).

Notes.—1. For compounds of thorium or hafnium, see section 370.10(e) and ECCN 3608A, respectively.

2. For compounds of zirconium, see ECCN 3604A.

3. For compounds of tantalum, see ECCN 1760A.

Technical Notes.—1. For the purpose of this ECCN 1733A, "high purity" is defined as a total metallic impurity, excluding intentional or desired additions, of less than:

(a) 1,000 ppm for single oxides or single carbides;

(b) 5,000 ppm for complex compounds, single borides or single nitrides.

2. "Fine powders with uniform particle size distribution" are defined as powders with at least 90% of the particles being less than or equal to 10 micrometers, and the average particle size being less than or equal to 5 micrometers. (For zirconia, these limits are 5 micrometers and 1 micrometer, respectively.)

16. In the Commodity Control List (Supplement No. 1 to § 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 1746A is amended by removing paragraph (p) "polysilazanes"; and redesignating paragraphs (q), (r), (s) and (t) as (p), (q), (r) and (s) in the "List of Polymeric Substances and Manufactures Thereof Controlled by ECCN 1746A."

17. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals Metalloids, Petroleum Products and Related Materials, ECCN 1757A is amended by revising the "List of Compounds and Materials Controlled by ECCN 1757A" and the Advisory Notes to read as follows:

1757A Compounds and materials, as described in this entry.

* * * * *

List of Compounds and Materials Controlled by ECCN 1757A

Compounds and materials, as follows:

(a) Monocrystalline silicon, except metallurgical-grade monocrystalline silicon having a purity not better than 99.97%;

(b) Gallium of a purity equal to or greater than 99.9999% and gallium III/V compounds of any purity level, *except:*

(1) Gallium phosphide; or

(2) Other gallium III/V compounds having a dislocation density (etch pit density-EPD) greater than 500,000 per cm^2;

(c) Indium and indium compounds containing more than 1% indium;

(d) Hetero-epitaxial materials consisting of a monocrystalline insulating substrate epitaxially layered with silicon, compounds of gallium or compounds of indium;

(e) Elemental Cd and Te of purity levels equal to or greater than 99.999%, and CdTe compounds of a purity level equal to or greater than 99.99% or single crystals of CdTe of any purity level;

(f) Polycrystalline silicon, *except* polycrystalline silicon having a purity not better than 99.99% and containing at least 0.5 part in 10^6 each of iron, carbon, boron and phosphorus, plus other impurities;

(g) Compounds used in the synthesis of the materials covered by paragraph (f) above, having a purity level of 99.5% or better, including but not limited to SiH_4, $SiClH_3$, $SiCl_4$, $SiCl_3$, and $SiCl_2H_2$;

(h) Single crystal sapphire substrates;

(i) B_2O_3 with a purity of 99.9% or greater, containing 1,000 parts per million of H_2O) or less, in powder or cast form;

(j) Monocrystalline germanium with a resistivity greater than 100 ohm cm.;

(k) Resist materials with any of the following characteristics:

(1) Sensitive to X-rays or deep ultraviolet light (wavelength less than 436 nanometers) with a sensitivity of 500 millijoules/cm^2 or better;

(2) Sensitive to electrons or ion beams with a sensitivity of 100 microcoulombs/cm^2 or better;

(3) Specified or optimized for dry development; and

(l) Single-crystal forms of bismuth germanium oxide having piezoelectric properties and single-crystal forms of lithium niobate, of lithium tantalate and or aluminium phosphate.

Note.—The purity level of a mixture containing a silicon-bearing compound shall be taken to be the same as that of the silicon-bearing compound.

Advisory Notes.—1. Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY and the People's Republic of China of monocrystalline silicon having a purity not better than 99.999% and containing at least 0.5 part in 10^6 each of iron, carbon, boron and phosphorus, plus other impurities.

2. Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY and the People's Republic of China of N type 1–1–1 silicon wafers or slices with a resistivity of 50 ohm cm. or less, based on volume of frequency of shipments.

3. Licenses are likely to be approved for export to satisfactory end-users in Country Groups QWY and the People's Republic of

China of gallium III/V compounds intended for light-emitting diodes and having all of the following characteristics:

(a) Dislocation density (etch pit density-EPD) greater than 10,000 per cm^2;

(b) Carrier concentration greater than 1×10^{15} per cm^3; and

(c) Carrier mobility less than 3,000 $cm^2/V.sec$.

18. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 4757B, "Single crystal sapphire substrates," is removed.

19. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 1760A is amended by adding a NOTE after the "List of Forms of Compounds of Tantalum and Niobium (Columbium) Controlled by ECCN 1760A" reading as follows:

1760A Compounds of tantalum and niobium (columbium).

* * * * *

List of Forms of Compounds of Tantalum and Niobium (Columbium) Controlled by ECCN 1760A

* * * * *

Note.—This ECCN 1760A does *not* cover single-crystal lithium niobate and single-crystal lithium tantalate. See paragraph (1) of the List of Compounds and Materials in ECCN 1757A.

20. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 1763A is amended by revising the heading, the "List of Fibrous and Filamentary Materials," the Technical Notes and Advisory Notes to read as follows:

1763A "Fibrous and filamentary materials" that may be used in composite structures or laminates, and such composite structures and laminates.

* * * * *

List of Materials Controlled by ECCN 1763A

(a) "Fibrous and filamentary materials" having both of the following characteristics:

(1) "Specific modulus" greater than 3.18×10^6 m (1.25×10^8 in.);

(2) "Specific tensile strength" greater than 7.62×10^4 m (3×10^6 in.);

(b) "Fibrous and filamentary materials" having both of the following characteristics:

(1) "Specific modulus" greater than 2.54×10^6m (1×10^8 in.);

(2) Melting or sublimation point higher than 1,922 K (1,649°C) (3,000°F) in an inert environment, *except*:

(i) Carbon fibers having a "specific modulus" less than 5.08×10^6 m (2×10^8 in.) and a "specific tensile strength" less than 2.54×10^4 m (1×10^6 in.);

(ii) Multi-phase polycrystalline alumina fibers having a "specific modulus" less than 3.56×10^6 m (1.4×10^8 in.);

(c) Resin-impregnated fibers (prepregs) and metal-coated fibers (preforms) made with materials covered by paragraphs (a) or (b) above;

(d) Composite structures, laminates and manufactures thereof made either with an organic matrix or a metal matrix utilizing materials covered by paragraphs (a) or (b) above.

Technical Notes.—1. "Fibrous and filamentary materials" includes:

(a) Continuous monofilaments,

(b) Continuous yarns and rovings,

(c) Tapes, woven fabrics and random mats,

(d) Chopper fibers, staple fibers and coherent fiber blanket, and

(e) Whiskers, either monocrystalline or polycrystalline, of any length.

2. "Specific modulus" is defined as Young's modulus in N/m^2 (lbs force/sq. in.) divided by specific weight in N/m^3 (lbs force/cu. in.), measured at a temperature of (296±2) K ((23±2)°C) ((73.4±3.6)°F) and a relative humidity of (50±5)%.

3. "Specific tensile strength" is defined as ultimate tensile strength in N/m^2 (lbs force/sq. in.) divided by specific weight in N/m^3 (lbs force/cu. in.) measured at a temperature of (296±2) K ((23±2)°C) ((73.4±3.6)°F) and a relative humidity of (50±5)%.

Advisory Note.—Licenses are likely to be approved for export to Country Groups QWY and the People's Republic of China for bona fide civil end-uses of carbon fibers covered by paragraphs (a) and (b) above and having both of the following characteristics:

(a) "Specific modulus" less than 11.43×10^6m (4.5×10^8 in.); and

(b) "Specific tensile strength" less than 10.16×10^4m (4×10^6 in.).

21. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 7, Chemicals, Metalloids, Petroleum Products and Related Materials, ECCN 4799B is amended by revising the heading to read as follows:

4799B Chemical agents, including tear gas formulation containing 1 percent or less of orthochlorobenzalmalononitrile (CS), or 1 percent or less of chloroacetophenone (CN), except in individual containers with a net weight of 20 grams or less; smoke bombs; non-irritant smoke flares, canisters, grenades and charges; other pyrotechnic articles having dual military and commercial use; and fingerprinting powders, dyes and inks.

* * * * *

22. In the Commodity Control List (Supplement No. 1 to section 399.1), Commodity Group 8, Rubber and Rubber Products, ECCN 1801A is amended by removing paragraph (a) from the "List of Types of Synthetic Rubber Controlled by ECCN 1801A," by redesignating paragraphs (b) and (c) as (a) and (b), and by removing the phrase "and polyisobutylene" from paragraph (d) and redesignating (d) as (c).

Authority: Secs. 5, 13 and 15, Pub. L. 96-72, 93 Stat. 503, as amended 50 U.S.C. app. 2401 *et seq.*, Executive Order No. 12214 (45 FR 29783, May 6, 1980); Executive Order No. 12451 of December 20, 1983 (48 FR 56568, December 22, 1983).

Dated: March 26, 1984.

John K. Boidock,

Director, Office of Export Administration, International Trade Administration.

BILLING CODE 3510-DT-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 145, 146 and 147

Schedules of Fees for Requests for Commisson Records, Reports of the Commission, and Transcripts of Commission Meetings; Correction

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules; corrections.

SUMMARY: This document corrects certain authority citations and errors contained in final regulations implementing schedules of fees for requests for Commission records, reports, and transcripts which were published October 11, 1983 (48 FR 46010). In addition, this document redesignates certain sections of Part 145. The purpose of the redesignations is to make citations to appendices more consistent throughout the Commission's regulations.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Stacy Dean, Counsel to the Executive Director, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-7360.

List of Subjects

17 CFR Part 145

Freedom of Information, Commission records and information, Fees.

17 CFR Part 146

Privacy records maintained on individuals, Fees.

17 CFR Part 147

Sunshine Act, Open Commission meetings, Fees for transcripts and tapes.

1. Accordingly, the Commission makes the following correction: In FR Doc. 83-27403 appearing on page 46010 in the **Federal Register** issue of October 11, 1983, the first full paragraph in the middle column on page 46011 is revised to read as follows: "In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act and, in particular, 7 U.S.C. 4a(j) and in 7 U.S.C. 16a as amended by Pub. L. 97-444, 96 Stat. 2294 (1983), and in 5 U.S.C. 552, 5 U.S.C. 552a and 5 U.S.C. 552b, the Commission hereby amends Parts 145, 146 and 147 of Chapter 1 of Title 17 of the Code of Federal Regulations as follows:".

PART 145—COMMISSION RECORDS AND INFORMATION

2. Sections 145.9a 145.9b and 145.9c are redesignated as Appendix A, Appendix B and Appendix C to Part 145.

3. Headings of Appendix A, Appendix B and Appendix C to Part 145 are revised as follows:

Appendix A—Compilation of Commission Records Available to the Public

Appendix B—Schedule of Fees

Appendix C—Schedule of Fees for Reports

4. Section 145.3 is amended by removing the reference to "(17 CFR Part 145a)."

5. In § 145.7, paragraph (e) is amended by removing the reference to "(§ 145b)."

6. Section 145.8 is amended by removing the reference to "(17 CFR Part 145b)."

PART 146—RECORDS MAINTAINED ON INDIVIDUALS

7. In FR Doc. 83-27403 appearing on page 46010 in the **Federal Register** issue of October 11, 1983, item 4. under Part 146—RECORDS MAINTAINED ON INDIVIDUALS is corrected by changing "4. In Part 146, Appendix A is revised to read as follows:" to "4. In Part 146, subsections a. and b. of Appendix A are revised to read as follows:"

PART 147—OPEN COMMISSION MEETINGS

8. In § 147.9, paragraph (a) is amended by removing the reference to "17 CFR 145.9b" and inserting in lieu thereof "17 CFR Part 145, Appendix B."

* * * * *

Parts 145, 146 and 147 of Chapter 1 of Title 17 of the Code of Federal Regulations are amended pursuant to the authority contained in the Commodity Exchange Act and, in particular, 7 U.S.C. 4a(j) and in 7 U.S.C. 16a as amended by Pub. L. 97-444, 96 Stat. 2294 (1983), and in 5 U.S.C. 552, 5 U.S.C. 552a and 5 U.S.C. 552b.

Issued on March 23, 1984 in Washington, D.C.

Text of Amendments

Part 200 of 17 CFR Chapter II is amended as follows:

PART 200—ORGANIZATION: CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Subpart A—Organization and Program Management

1. By revising the fourth sentence of the introductory text of § 200.1 and by revising paragraph (i) to read as follows:

§ 200.1 General statement and statutory authority.

* * * In addition, under the Bankruptcy Code, the Commission is a statutory party in cases arising under Chapters 9 and 11. * * *

* * * * *

(i) Protection of the interests of public investors involved in bankruptcy reorganization cases and in bankruptcy cases involving the adjustment of debts of a municipality.

* * * * *

2. By revising paragraph (g) under § 200.2, as follows:

§ 200.2 Statutory functions.

* * * * *

(g) *Chapters 9 and 11 of the Bankruptcy Code.* Chapters 9 and 11 of the Bankruptcy Code provides for Commission participation as a statutory party in reorganization cases in cases involving a judgment of debts of a municipality administered in the federal courts. Under 1109(a) of the Bankruptcy Code, the Commission "may raise and may appear and be heard on any issue in the case . . .".

3. By revising the addresses for Regions 5, 6, and 7 in paragraph (b) of § 200.11, as follows:

§ 200.11 Headquarters Office—Regional Office relationship.

* * * * *

(b) * * *

Region 5. Oklahoma, Arkansas, Texas, that part of Louisiana lying west of the Atchafalaya River, and Kansas—Regional Administrator, 8th Floor, 411 West 7th Street, Fort Worth, Texas 76102.

Region 6. Wyoming, Colorado, New Mexico, Nebraska, North Dakota, South Dakota, Utah—Regional Administrator, Two Park Central, Suite 700, 410 Seventeenth Street, Denver, Colorado 80202.

Region 7. California, Nevada, Arizona, Hawaii, Guam—Regional Administrator, 5757 Wilshire Boulevard, Suite 500 East, Los Angeles, California 90036-3648.

* * * * *

4. By revising the last sentence of the existing text to read as follows, by redesignating the existing text as introductory text, by adding paragraphs (a) through (d), and by adding a flush paragraph at the end of the section to read as follows:

§ 200.13 Executive Director.

* * * He or she also provides executive direction to and exercise administrative control over the Office of Consumer Affairs and Information Services, Office of Information Systems Management, Office of Personnel, Office of Public Affairs, and the Office of Applications and Reports Services. In addition, the Executive Director is responsible for the full range of program administration functions for the

purposes of implementing the following statutes, regulations, and Executive Orders, as well as others designated by the Chairman.

(a) Pub. L. 96–511—The Paperwork Reduction Program.

(b) 16 U.S.C. 644—The Small and Disadvantaged Business Utilization Program.

(c) Government Printing and Binding Regulations, U.S. Congress Joint Committee on Printing (1977).

(d) Executive Order 11807 and 29 CFR 1960—The Occupational Safety and Health Program.

These functions include, but are not limited to, the appointment of program officials; the review and approval of program policies, procedures and regulations; the authorization and transmittal of required reports; and the assurance of appropriate resource requirements to implement the programs.

(15 U.S.C. 78d–1, 78d–2)

5. By revising the section heading of § 200.20a to read as follows, by amending the introductory paragraph by changing "The Director of the Division of Corporate Regulation" to read "The Director of the Office of Public Utility Regulation", by removing paragraph (a) and the introductory text of paragraph (b), and by redesignating paragraphs (b)(1) through (b)(3) as paragraphs (a) through (c).

§ 200.20a Director of the Office of Public Utility Regulation.

* * * * *

6. By revising the section heading of § 200.20c to read as follows, by amending the first sentence by changing "The Office of Reports and Information Services" to read "The Office of Applications and Reports Services" and by removing the last sentence.

§ 200.20c Office of Applications and Reports Services.

* * * * *

7. By revising the second sentence of § 200.21 to read as follows:

§ 200.21 General Counsel.

* * * He or she is responsible for the representation of the Commission in judicial proceedings in which it is involved as a party or as amicus curiae, for directing and supervising all civil litigation involving the Commission in the United States District Courts, for directing and supervising the Commission's responsibilities under the Bankruptcy Code and all related litigation, and for representing the Commission in all cases in appellate courts.

8. By revising the section heading § 200.21a to read as follows and by amending paragraph (a) by changing "The Counsel for Professional Responsibility" to read "The Ethics Counsel".

§ 200.21a Ethics Counsel.

* * * * *

9. By adding a new § 200.23a, as follows:

§ 200.23a Office of the Chief Economist.

The Office of the Chief Economist is responsible to the Commission for providing an objective economic perspective to understand and evaluate the economic dimension of the agency's regulatory oversight. The Chief Economist provides the Commission with economic analyses of proposed rule changes, current or proposed policies, and capital market topics. Advice is designed to address such questions as whether proposed rules or policies accomplish their objectives, what benefits are produced by proposed rules or policies, and what costs accompany those benefits. Upon request, the Chief Economist provides professional advice and technical support to operating divisions.

10. By redesignating § 200.23 as § 200.23b and revising it to read as follows:

§ 200.23b Directorate of Economic and Policy Analysis.

The Directorate of Economic and Policy Analysis is responsible to the Commission, in coordination with its other divisions and offices, for the continuing analysis of the economic effects of existing and proposed Commission regulations and developments in the securities industry and markets. Based on its analysis, the Directorate is responsible for recommending to the Commission the adoption or modification or programs, policies and regulations under the statutes administered by the Commission. The Directorate also has the responsibility for coordinating and, together with the Office of the General Counsel, ensuring compliance with the requirements of the Regulatory Flexibility Act.

(15 U.S.C. 78d–1, 8d–2)

11. By revising § 200.24, as follows:

§ 200.24 Office of the Comptroller.

This Office, under the direction of the Comptroller, is responsible to the Executive Director, Chairman and Commission for the internal financial management and programming functions of the Securities and Exchange Commission. These functions include: budgeting, accounting, payroll and adminstrative audit. The Comptroller, and his designees, serves as liaison to the Commission before the Office of Management and Budget and Congressional Appropriations Committees on appropriation matters, and the Treasury Department and the General Accounting Office on financial and progamming matters.

12. By revising the section heading of § 200.24a to read as follows, by amending the first sentence by changing "The Office of Consumer Affairs" to read "The Office of Consumer Affairs and Information Services", and by adding a new sentence to read as follows:

§ 200.24a Office of Consumer Affairs and Information Services.

* * * This Office is also charged with managing the Commission's public reference facilities and with processing general inquiries under the Freedom of Information Act (Pub. L. 90–23, 81 Stat. 54) and the Privacy Act (Pub. L. 93–579, 88 Stat. 1896).

(15 U.S.C. 78d–1, 78d–2)

13. By revising the section heading of § 200.26a to read as follows, by amending the first phrase by changing "The Office of Data Processing" to read "The Office of Information Systems Management", by removing the word "and" before the last phrase, and by adding a new last phrase to read as follows:

§ 200.26a Office of Information Systems Management.

* * * and, development of microcomputer and office automation capabilities and support within the Commission.

14. By amending § 200.27 by removing the parenthetical phrase in the first sentence and by revising the last sentence to read as follows:

§ 200.27 The Regional Administrators.

* * * In addition, the New York Regional Administrator is responsible for the participation in cases under chapters 9 and 11 of the Bankruptcy Code in the New York and Boston Regions, and in the State of Pennsylvania; the Atlanta Regional Administrator in the Atlanta and Washington Regions, except the State of Pennsylvania; the Chicago Regional Administrator in Chicago, Fort Worth and Denver regions, except for the State of Utah; and the Los Angeles Regional Administrator in the Los Angeles and Seattle regions, plus the State of Utah.

15. By revising the section heading of § 200.30–2 to read as follows, by amending the introductory text by changing "Director of the Division of Corporate Regulation" to read "Director of the Office of Public Utility Regulation", and by revising paragraphs (a)(2), (a)(5) and (c) to read as follows:

§ 200.30–2 Delegation of Authority to Director of Office of Public Utility Regulation.

* * * * *

(a) * * *

* * * * *

(2) To authorize the issuance of orders where a notice has been issued and no request for a hearing has been received from any interested person within the period specified in the notice and the matter involved presents no issue that the director believes has not previously been settled by the Commission and it does not appear to the director to be necessary in the public interest or the interest of investors or consumers that a hearing be held; section 20(c) of the Act (15 U.S.C. 79t(c));

* * * * *

(5) To issue notices and grant applications by a holding company or any subsidiary company thereof, under section 3(c) of the Act (15 U.S.C. 79c(c)), for revocation of previously granted exemptions from registration, unless, upon examination, the application appears to the director to present issues not previously settled by the Commission or to raise questions of fact or policy indicating that the public interest of investors or consumers requires that a hearing be held;

* * * * *

(c) Notwithstanding anything in the foregoing in any case in which the Director of the Office of Public Utility Regulation believes it appropriate he may submit the matter to the Commission.

16. By revising the section heading of § 200.30–11 to read as follows, by amending the introductory text by changing "Director of the Office of Reports and Information Services" to read "Director of the Office of Applications and Reports Services" by removing paragraph (d), redesignating paragraph (e) as (d), and by amending newly designated (d) by changing "Director of the Office of Reports and Information Services" to read "Director of the Office of Applications and Reports Services".

§ 200.30–11 Delegation of authority to Director, Office of Applications and Reports Services.

* * * * *

17. By revising § 200.30–12, as follows:

§ 200.30–12 Delegation of authority to Director, Office of Consumer Affairs and Information Services.

Pursuant to the provisions of Pub. L. 87–592; 76 Stat. 394 (15 U.S.C. 78d–1, 78d–2), the Securities and Exchange Commission hereby delegates the following functions to the Director of the Office of Consumer Affairs and Information Services to be performed by him or under his direction by such person or persons as may be designated from time to time by the Chairman of the Commission:

(a) With respect to the Freedom of Information Act, 5 U.S.C. 552 and the Privacy Act, 5 U.S.C. 552a:

(1) To waive or reduce fees for searching and/or duplicating requested records under the Freedom of Information Act whenever it shall be determined that waiver or reduction of fee is in the public interest;

(2) To waive or reduce fees for reproduction under the Privacy Act whenever it shall be determined that good cause therefor exists.

(3) Notwithstanding anything in the foregoing, in any case in which the Director of the Office of Consumer Affairs and Information Services believes it appropriate, he or she may submit the matter to the Commission.

18. By amending paragraph (c)(1)(iii) of § 200.80 in Subpart D to revise the address of the Denver, Fort Worth and Los Angeles Regional Offices, by revising the office hours for the Seattle Regional Office, and by revising the telephone number of the Washington Regional Office, by amending paragraph (d)(7)(i) to add a sentence following the second sentence, as follows:

§ 200.80 Commission records and information.

* * * * *

(c) * * *

(1) * * *

(iii) * * *

Chicago Regional Office: * * * 315–353–7390.

Denver Regional Office, Two Park Central, Suite 700, 410 Seventeenth Street, Denver, Colorado 80202 (303–837–2071). Office Hours—8:00 a.m. to 4:30 p.m. m.s.t.

Fort Worth Regional Office, Eighth Floor, 411 West Seventh Street, Fort Worth, Texas 76102 (817–334–3821). Office Hours—8:30 a.m. to 5:00 p.m. c.s.t.

Los Angeles Regional Office, 5757 Wilshire Boulevard, Suite 500 East, Los Angeles, California 90036–3648 (213–473–3098). Office Hours—8:30 a.m. to 5:00 p.m. p.s.t.

* * * * *

Seattle Regional Office: * * * 8:00 a.m. to 4:30 p.m. p.s.t.

Washington Regional Office: * * * 703–235–3701.

§ 200.80b [Amended]

19. By amending paragraph (b) in § 200.80b to change "*Statistical Bulletin*" to "SEC Monthly Statistical Review".

§ 200.80c [Amended]

20. By amending item 3 under paragraph (b) in § 200.80c to change "Statistical Bulletin" to "SEC Monthly Statistical Review".

§ 200.310 [Amended]

21. By amending paragraph (b) of § 200.310 by changing "Director of the Office of Reports and Information Services" to read "Director of the Office of Consumer Affairs and Information Services".

22. By adding paragraph (a) to § 200.503 to read as follows:

§ 200.503 Senior agency official.

* * * * *

(a) The Deputy Executive Director is the Senior Agency Official for purposes of the Paperwork Reduction Act of 1980. In this capacity, the Deputy Executive Director will carry out all responsibilities required by the Act (Pub. L. 96–511, 3506(b)), as well as serving as "Agency Clearance Officer" for purposes of the publication of notices in the Federal Register.

PART 202—INFORMAL AND OTHER PROCEDURES

§ 202.3 [Amended]

23. By amending paragraph (b) of § 202.3 by changing "Office of Reports and Information Services" to read "Office of Applications and Reports Services" in the first and eighth sentences.

(11 U.S.C. 901, 1109(a))

[Release No. 33-6518 File No. S7-998]

Options Material Not Deemed a Prospectus

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of amendments to Rule 134a under the Securities Act of 1933 relating to options material not deemed a prospectus. The amendments expand the scope of the rule to permit offerors of options products to include certain explanatory information in advertisements of those products and to modify certain of the conditions to the rule's availability. The purpose of the rule amendments is to permit a fuller explication of the nature of newly developed options products.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Ann Glickman (202) 272-2573, Office of the Chief Counsel, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION:

I. Background

Rule 134a [17 CFR 230.134a] under the Securities Act of 1933 (the "Securities Act") (15 U.S.C. 77a et seq. (1976 & Supp. V 1981) as amended by Bus Regulatory Reform Act of 1982, and Pub. L. 97-261, section 19(d), 96 Stat. 1121 (1982)) was adopted in September 1982 as a part of a comprehensive new registration framework for standardized options (Release No. 33-6426 (September 16, 1982) (47 FR 41950) September 23, 1982). As adopted, the rule was intended to permit the dissemination of educational or instructional materials about standardized options without such communications being deemed a prospectus. Since its adoption, however, materials distributed in reliance upon the rule have included not only educational materials designed to explain to investors the nature of options trading, but advertisements promoting particular options products. Because of the rapidly evolving nature of options trading and the number of new and complex options products being offered to the public, and in recognition of the uniqueness of options trading and options products, the Commission proposed amendments to Rule 134a to formalize the availability of the rule for such advertisements (Release No. 33-6494 (October 27, 1983) (48 FR 51328) November 8, 1983).

As proposed, the amendments made clear that Rule 134a would apply to advertisements as well as other written materials, provided that all of its conditions are satisfied. The proposed amendments also sought to modify the conditions of the rule to permit the identification of certain options classes, such as broad-based stock index options and options on exempt securities, in Rule 134a communications.

II. Comments and Discussion

The only persons commenting on the proposal were three stock exchanges,[1] all of which supported the proposals but suggested further amendments or interpretations.

The commentators suggested that the Commission make clear that the amendments are not intended to circumscribe current industry advertising practices or to preclude industry advertising that satisfies the spirit, if not the letter, of Rule 134 (17 CFR 203.134). The Commission wishes to make clear that in amending Rule 134a it took into account the practices of the options exchanges, and that it was the Commission's intent that the amendments define the limits of appropriate options advertising. The Commission is of the view that options offerors cannot exceed the scope of Rule 134a through expansive interpretations of Rule 134.[2] Offerors who rely on Rule 134 must comply with all of its provisions, not simply their reading of its "spirit".[3]

The Commission has made three revisions to Rule 134a suggested by the commentators. First, the commentators suggested that the Commission delete from Rule 134a the requirement that advertisements contain a legend indicating the name and address of the person from whom a prospectus can be obtained, because the required legend detracts from the effectiveness and readibility of advertisements. Taking into account the specialized registration framework applicable to options trading,[4] including the fact that Rule 153(b) (17 CFR 230.153b) provides that the prospectus delivery requirements of the Securities Act is satisfied by the delivery of copies of an options prospectus to the options market, and to customers upon their request, the Commission believes it is unnecessary to continue Rule 134a's prospectus legend requirement and has modified the rule accordingly. As amended, the rule continues to require the identification of the source of an options disclosure document.

Secondly, the Commission has revised the rule to permit identification of the securities comprising an index.[5] The Commission believes that this is consistent with the purpose of the proposed revisions to the rule.

Finally, the Commission has amended Rule 134a to permit identification of foreign currency options ("fco's") in advertising materials. The Commission agrees with the commentators' view that fco's have features and risks that can be appreciated only if it is clear on which foreign currencies options may be traded. Accordingly, the amendments have been revised to make clear that particular currencies may be identified.

The Commission is making the amended rule available for options offerors immediately upon publication in the **Federal Register**. In accordance with 5 U.S.C. 553(d), the amendments are designed to relieve certain restrictions on options offerors, and the Commission is of the view that it is appropriate to permit such offerors to utilize the amendments promptly.

---

[1] The Commission received submissions from the American Stock Exchange, the Chicago Board Options Exchange and the Philadelphia Stock Exchange. Copies of the comment letters are available for public inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, D.C. 20549 (*see* File No. S7-998).

[2] Similarly, Rule 134 defines the limits of permissible advertising by issuers generally. The Commission notes that some issuers, including issuers of securities other than options, have exceeded these limits in recent months. In some cases, such issuers have justified their advertising practices by noting their similarity to registered investment companies, which are permitted by Rule 134 to include certain special categories of information in their advertisements. This view has no basis, since the Commission indicated in Release No. 33-5536 (November 4, 1974) (39 FR 39869) that the specialized provisions of Rule 134 are applicable only to companies registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.). The Commission is concerned about these advertising practices and may take further action in this regard in the near future.

[3] Part of the commentators' concern appears to be grounded in the view that Rule 134a mandates detailed or analytical communications, but it was not the intention of the Commission that the rule require a high level of detail or analysis. Therefore, as amended, the rule will provide the flexibility needed for the sort of options advertising that is appropriate and in the public interest.

[4] Rule 9b-1 (17 CFR 240.9b-1) under the Securities Exchange Act of 1934 (15 U.S.C. 78a-78kk (1976 & Supp. V 1981), as amended by Act of June 6, 1983, Pub. L. 98-38) requires the preparation of an options disclosure document for those options required to be registered under the Securities Act.

[5] Of course, any specific identification of the components of an index should not emphasize particular securities in such a way as to be misleading. The Commission believes that generally an entity wishing to identify some of the securities in an index would be required to identify all of them.

III. Statutory Authority

The revisions of Rule 134a are being adopted by the Commission pursuant to Sections 2, 7, 10 and 19(a) of the Securities Act of 1933. (Secs. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 210, 48 Stat. 905, 906, 908; secs. 1–4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57.)

Reporting and recordkeeping requirements, Securities.

V. Text of Amendments

In accordance with the foregoing, Title 17, Chapter II, of the Code of Federal Regulations is hereby amended as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. By revising the introductory text and paragraphs (d) and (e) and removing paragraph (f) of § 230.134a (rule 134a) as follows:

§ 230.134a Options material not deemed a prospectus.

Written materials, including advertisements, relating to standardized options, as that term is defined in Rule 9b–1 under the Securities Exchange Act of 1934, shall not be deemed to be a prospectus for the purposes of Section 2(10) of the Securities Act of 1933; *Provided*, That such materials are limited to explanatory information describing the general nature of the standardized options markets or one or more strategies; *And, Provided further*, That:

* * * * *

(d) No specific security is identified, other than

(i) An option or other security exempt from registration under the Act, or

(ii) An index option, including the component securities of the index; and

(e) If there is a definitive options disclosure document, as defined in Rule 9b–1 under the Securities Exchange Act of 1934, the materials shall contain the name and address of a person or persons from whom a copy of such document may be obtained.

By the Commission.
Dated: March 22, 1984.

George A. Fitzsimmons,
Secretary.

[Release No. 34-20784; File No. S7-997]

Suspension of Periodic Reporting Obligation

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of revisions to Rule 12h–3 under the Securities Exchange Act of 1934 that permit immediate suspension of the Section 15(d) reporting obligation with respect to any class of securities held of record by less than 300 persons or, in the case of certain small businesses, 500 persons. The Commission also announces the adoption of a new simplified form for reporting such suspension. These changes are intended to eliminate an inconsistency in the provisions suspending the obligation of issuers to file periodic reports and to standardize and simplify the suspension process.

EFFECTIVE DATE: Effective March 30, 1984.

FOR FURTHER INFORMATION CONTACT: William E. Toomey (202) 272–2573, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: Section 13 of the Securities Exchange Act of 1934 (the "Exchange Act")[1] establishes a periodic reporting obligation for every issuer of a class of securities registered under Section 12 of that Act. Section 15(d) of the Exchange Act imposes the same reporting obligation on every issuer which has filed a registration statement that has become effective under the Securities Act of 1933.[2] Pursuant to Rule 12g–4 (17 CFR 240.12g–4), a Section 12 issuer can effect immediate suspension of this obligation whenever it has fewer than three hundred security holders by filing a certification with the Commission. Under Section 15(d) of the Exchange Act and Rule 15d–6 (17 CFR 240.15d–6), a Section 15(d) issuer is entitled to a comparable suspension, but only if it has fewer than three hundred security holders at the beginning of a fiscal year. As a result, a Section 15(d) issuer may be required to continue to report in circumstances where a Section 12 issuer can effect an immediate cessation. Since this distinction does not appear to serve a useful function, the Commission published proposals in October 1983 to establish uniformity, to the extent practicable, in the treatment of Section 12 and 15(d) issuers, to simplify the suspension process and to assist small businesses consistent with investor protection.[3]

The proposals consisted of four parts. First, the proposed revisions to Rule 12h–3 were designed to permit immediate cessation of the periodic reporting requirement for Section 15(d) issuers whenever the number of record holders of a class of registered securities falls below 300 persons or, for certain businesses, below 500 persons. Second, proposed Form 15, a simplified form for reporting suspension under section 15(d) and termination of registration under Section 12(g), would replace form 12g–4/15d–6 (17 CFR 249.323 and 333). Third, conforming amendments to Rules 12g–4 and 15d–6 were proposed to provide uniformity. Fourth, Rule 12h–4 was proposed to be rescinded since its provisions would be included in proposed Rule 12h–3. The Commission received four comment letters which generally supported the proposals.[4]

The proposals are being adopted as proposed with two modifications to Rule 12h–3 and one revision to Rule 15d–6. With respect to Rule 12h–3, the Commission requested specific comment on whether a 90 or 120 day period should be permitted for the filing of an annual report on Form 10–K upon the discontinuance of a suspension. The Commission agrees with the commentators that 120 days, the same period allowed for the filing of Form 10 (17 CFR 249.210) is appropriate. In addition, the first sentence of paragraph (c) of proposed Rule 12h–3 has been clarified to limit its application to a registration statement relating to the class of securities for which suspension is sought. The Commission is of the view

[1] 15 U.S.C. 78a–78kk (1976 and Supp. V. 1981), *as amended by* Act of June 6, 1983, Pub. L. 98–38.

[2] 15 U.S.C. 77a–77aa (1976 and Supp. V. 1981), *as amended by* Bus. Regulatory Reform Act of 1982, Pub. L. 97–261, section 19(d), 96 Stat. 1121 (1982).

[3] Release No. 34–20263 (October 5, 1983) (48 FR 48245).

[4] The commentators consisted of two bar associations, one law firm and one corporation. The comment letters are availabe for inspection and copying at the Commission's Public Reference Room, File No. S7–997. One commentator suggested that proposed revised Rule 15d–6 be rescinded as superfluous. Rule 15d–6 is necessary as it continues to be possible for an issuer to effect a suspension under the basic suspension authority contained in Section 15(d) of the Exchange Act. Another commentator observed that the filing of Form 15 should not be required where a national securities exchange has filed a Form 25 with respect to a class of securities. Form 25 does not provide information relevent to the status of a reporting obligation under either Section 12(g) or Section 15d. Therefore, the Commission believes that the public files should clearly reflect the reporting status of a registrant and that the Form 15 will do this in the least burdensome way.

that this modification will enhance the purpose of the rule by broadening its application in situations where there should be no adverse impact on investors or the public. Finally, Rule 15d–6 has been revised to emphasize that an issuer that has already filed Form 15 with respect to a class of securities pursuant to the provisions of Rule 12h–3, need not make a duplicative filing for that class because of the provisions of Rule 15d–6.

I. Summary of Final Regulatory Flexibility Analysis

The Commission has prepared a final Regulatory Flexibility Analysis in accordance with 5 U.S.C. 604 regarding the revisions to Rule 12h–3. A summary of the corresponding Initial Regulatory Flexibility Analysis was included in the release proposing the changes to Rule 12h–3 at 48 FR 48245. Members of the public who wish to obtain a copy of the Final Regulatory Analysis should contact William E. Toomey in the manner specified above.

Forms, Reporting and recordkeeping requirements, Securities.

III. Text of Amendments

In accordance with the foregoing, Title 17, Chapter II, of the Code of Federal Regulations is proposed to be amended as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

1. By revising § 240.12h–3, Rule 12h–3, to read as follows:

§ 240.12h–3 Suspension of duty to file reports under section 15(d).

(a) Subject to paragraphs (c) and (d) of this section, the duty under section 15(d) to file reports required by section 13(a) of the Act with respect to a class of securities specified in paragraph (b) of this section shall be suspended for such class of securities immediately upon filing with the Commission a certification on Form 15 (17 CFR 249.323) if the issuer of such class has filed all reports required by section 13(a), without regard to Rule 12b–25 [17 CFR 249.322], for the shorter of its most recent three fiscal years and the portion of the current year preceding the date of filing Form 15, or the period since the issuer became subject to such reporting obligation. If the certification on Form 15 is subsequently withdrawn or denied, the issuer shall, within 60 days, file with the Commission all reports which would have been required if such certification had not been filed.

(b) The classes of securities eligible for the suspension provided in paragraph (a) of this section are:

(1) Any class of securites held of record by: (i) Less than 300 persons; or (ii) by less then 500 persons, where the total assets of the issuer have not exceeded $3,000,000 on the last day of each of the issuer's three most recent fiscal years;

(2) Any class of securities of a foreign private issuer, as defined in Rule 3b–4 (§ 240.3b–4), held of record by: (i) Less than 300 persons resident in the United States or (ii) less than 500 persons resident in the United States where the total assets of the issuer have not exceeded $3,000,000 on the last day of each of the issuer's three most recent fiscal years. For purposes of this paragraph, the number of persons resident in the United States shall be determined in accordance with the provisions of Rule 12g3–2(a) (§ 240.12g3–2(a)); and

(3) Any class or securities deregistered pursuant to section 12(d) of the Act if such class would not thereupon be deemed registered under section 12(g) of the Act or the rules thereunder.

(c) This section shall not be available for any class of securities for a fiscal year in which a registration statement relating to that class becomes effective under the Securities Act of 1933, or is required to be updated pursuant to section 10(a)(3) of the Act, and, in the case of paragraphs (b)(1)(ii) and (b)(2)(ii), the two succeeding fiscal years; *Provided, however,* That this paragraph shall not apply to the duty to file reports which arises solely from a registration statement filed by an issuer with no significant assets, for the reorganization of a non-reporting issuer into a one subsidiary holding company in which equity security holders receive the same proportional interest in the holding company as they held in the non-reporting issuer, except for changes resulting from the exercise of dissenting shareholder rights under state law.

(d) The suspension provided by this rule relates only to the reporting obligation under section 15(d) with respect to a class of securities, does not affect any other duties imposed on that class of securities, and shall continue as long as criteria (i) and (ii) in either paragraph (b)(1) or (b)(2) is met on the first day of any subsequent fiscal year; *Provided, however,* That such criteria need not be met if the duty to file reports arises solely from a registration statement filed by an issuer with no significant assets in a reorganization of a non-reporting company into a one subsidiary holding company in which equity security holders receive the same proportional interest in the holding company as they held in the non-reporting issuer except for changes resulting from the exercise of dissenting shareholder rights under state law.

(e) If the suspension provided by this rule is discontinued because a class of securities does not meet the eligibility criteria of paragraph (b) on the first day of an issuer's fiscal year, then the issuer shall resume periodic reporting pursuant to section 15(d) by filing an annual report on Form 10–K for its preceding fiscal year, not later than 120 days after the end of such fiscal year.

§ 240.12g3–2 [Amended]

2. By revising Rule § 240.12g3–2, Rule 12g3–2, to delete paragraph (a)(2) and redesignate paragraph (a)(1) as (a).

3. By revising § 240.12g–4, Rule 12g–4, to read as follows:

§ 240.12g–4 Certification of termination of registration under section 12(g).

(a) Termination of registration of a class of securities shall take effect 90 days, or such shorter period as the Commission may determine, after the issuer certifies to the Commission on Form 15 that:

(1) Such class of securities is held of record by: (i) Less than 300 persons; or (ii) by less than 500 persons, where the total assets of the issuer have not exceeded $3,000,000 on the last day of each of the issuer's most recent three fiscal years; or

(2) Such class of securities of a foreign private issuer, as defined in Rule 3b–4 (§ 240.3b–4), is held of record by: (i) Less than 300 persons resident in the United States or (ii) less than 500 persons resident in the United States where the total assets of the issuer have not exceeded $3,000,000 on the last day of each of the issuer's most recent three fiscal years. For purposes of this paragraph, the number of persons resident in the United States shall be determined in accordance with the provisions of Rule 12g3–2(a) (§ 240.12g3–2(a)).

(b) The issuer's duty to file any reports required under section 13(a) shall be suspended immediately upon filing a certification on Form 15; *Provided, however,* That if the certification on Form 15 is subsequently withdrawn or denied, the issuer shall, within 60 days after the date of such withdrawal or denial, file with the Commission all reports which would have been required had the certification

on Form 15 not been filed. If the suspension resulted from the issuer's merger into, or consolidation with, another issuer or issuers, the certification shall be filed by the successor issuer.

§ 240.12h–4 [Amended]

4. By removing in its entirety § 240.12h–4, Rule 12h–4.

5. By revising § 240.15d–6, Rule 15d–6, to read as follows:

§ 240.15d–6 Suspension of duty to file reports.

If the duty of an issuer to file reports pursuant to section 15(d) of the Act as to any fiscal year is suspended as provided in section 15(d) of the Act, such issuer shall, within 30 days after the beginning of the first fiscal year, file a notice on Form 15 informing the Commission of such suspension unless Form 15 has already been filed pursuant to Rule 12h–3. If the suspension resulted from the issuer's merger into, or consolidation with, another issuer or issuers, the notice shall be filed by the successor issuer.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

1. By revising § 249.323 to read as follows:

§ 249.323 Form 15, certification of termination of registration of a class of security under section 12(g) or notice of suspension of duty to file reports pursuant to sections 13 and 15(d) of the Act.

(a) This form shall be filed by each issuer to certify that the number of holders of record of a class of security registered under section 12(g) of the Act is reduced to less than 300 persons, or that the number of holders of record of a class of security registered under section 12(g) of the Act is reduced to less than 500 persons and the total assets of the issuer have not exceeded $3,000,000 on the last day of each of the issuer's most recent three fiscal years. Registration terminates 90 days after the filing of the certificate or within such shorter time as the Commission may direct.

(b) This form shall also be filed by each issuer required to file reports pursuant to section 15(d) of the Act, as a notification that the duty to file such reports is suspended pursuant to section 15(d) of the Act because all securities of each class of such issuer registered under the Securities Act of 1933 are held of record by less than 300 persons at the beginning of its fiscal year, or otherwise pursuant to the provisions of Rule 12h–3 (17 CFR 240.12h–3).

§ 249.333 [Removed]

2. By deleting in its entirety § 249.333.

OMB No. 3235-0167
Exp. October 30, 1986

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 15

Certification and Notice of Termination of Registration under Section 12(g) of the Securities Exchange Act of 1934 or Suspension of Duty to File Reports Under Sections 13 and 15(d) of the Securities Exchange Act of 1934.

Commission File Number _____

_____
(Exact name of registrant as specified in its charter)

_____
(Address, including zip code, and telephone number, including area code, of registrant's principal executive offices)

_____
(Title of each class of securities covered by this Form)

_____
(Titles of all other classes of securities for which a duty to file reports under section 13(a) or 15(d) remains)

Please place an X in the box(es) to designate the appropriate rule provision(s) relied upon to terminate or suspend the duty to file reports:

Rule 12g-4(a)(1)(i)	[ ]	Rule 12h-3(b)(1)(i)	[ ]
Rule 12g-4(a)(1)(ii)	[ ]	Rule 12h-3(b)(1)(ii)	[ ]
Rule 12g-4(a)(2)(i)	[ ]	Rule 12h-3(b)(2)(i)	[ ]
Rule 12g-4(a)(2)(ii)	[ ]	Rule 12h-3(b)(2)(ii)	[ ]
		Rule 15d-6	[ ]

Approximate number of holders of record as of the certification or notice date: _____

Pursuant to the requirements of the Securities Exchange Act of 1934 (Name of registrant as specified in charter) has caused this certification/notice to be signed on its behalf by the undersigned duly authorized person.

DATE: _____ BY: _____

Instruction: This form is required by Rules 12g-4, 12h-3 and 15d-6 of the General Rules and Regulations under the Securities Exchange Act of 1934. The registrant shall file with the Commission three copies of Form 15, one of which shall be manually signed. It may be signed by an officer of the registrant, by counsel or by any other duly authorized person. The name and title of the person signing the form shall be typed or printed under the signature.

BILLING CODE 8010-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 389

[Docket No. RM84-11-000]

Commission Information Collection Requirements Under the Paperwork Reduction Act; OMB Control Numbers

March 26, 1984.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; notice of OMB Control Numbers.

SUMMARY: The Federal Energy Regulatory Commission is codifying the control numbers that have been issued by the Office of Management and Budget (OMB) for information collection requirements in Commission rules that are approved under the Paperwork Reduction Act. Control numbers will no longer appear as part of the section or part containing the information collection requirement, but will be centrally located in a table in new Part 389.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Kenneth J. Malloy, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol St., NE., Washington, D.C. 20426, (202) 357–8033.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520 (1982) and the Office of Management and Budget's (OMB) regulations, 5 CFR Part 1320 (1983), requires that OMB review certain information collection requirements imposed by agency rules. Upon approval of the agency requirement, OMB issues a control number. The agency must display this control number in its regulations to inform the public that the agency's information collection requirements have been approved by OMB.

In the Commission's initial implementation of the Paperwork Reduction Act, control numbers were published in either of two fashions. For control numbers that applied only to specific sections of the Commission's regulations, the Commission inserted a parenthetical after the section, stating that the information collection requirement in that section was approved under a certain control number. For information collection requirements that cover an entire Part of Commission's regulations, the Commission inserted a similar parenthetical after the Table of Contents of that Part.

The Commission will no longer display its control numbers in this manner. Rather, the Commission is establishing a new Part 389 which will contain all the control numbers that have been issued for its regulations. The Commission believes that it will be easier for the Commission to update this table and that it will be easier for members of the public to determine which regulations have been approved by OMB. Accordingly, the Commission is removing any control numbers which appear as part of individual Parts and Sections and adding a new Part 389 that lists all control numbers in a single table.

List of Subjects in 18 CFR Part 389

Paperwork Reduction Act, OMB Control Numbers.

In consideration of the foregoing, a new Part 389 is added to Chapter 1, Title 18, Code of Federal Regulations, as set forth below.

Lois D. Cashell,

Acting Secretary.

1. The Authority Citation for Part 389 reads as follows:

Authority: Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520(1982).

2. A new Part 389 is added to read as follows:

PART 389—OMB CONTROL NUMBERS FOR COMMISSION INFORMATION COLLECTION REQUIREMENTS

§ 389.101 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

(a) *Purpose.* This part collects and displays control numbers assigned to information collection requirements of the Commission by the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1980. This Part fulfills the requirements of Section 3507(f) of the Paperwork Reduction Act, which requires that agencies display a current control number assigned by the Director of OMB for each agency information collection requirement.

(b) *Display.*

BILLING CODE 6717-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 200, 201, 203, 204, 205, 207, 220, 221, 232, 234, 242, 244, and 250

[Docket No. R-84-1149; FR-1911]

Introduction; Mutual Mortgage Insurance and Rehabilitation Loans; Multifamily Housing Mortgage Insurance; Correction of Structural Defects—Eligibility for Assistance; Insurance of Loans and Mortgages in American Samoa; Nonoccupant Mortgagors—Maximum Mortgage Amounts; Payment of MIP; Occupancy Requirements—Manufactured Home Parks; Removal of Refinancing Limitations on Certain Multifamily Projects; Assignments of Certain Mortgages Under the National Housing Act

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule implements recent statutory amendments that change or clarify certain existing regulatory provisions respecting (1) the eligibility of mortgagors to make claims for structural defects in connection with one- to four-family dwellings that were approved for VA guaranty, insurance or direct loans before construction, but were ultimately insured by FHA; (2) eligibility of loans and mortgages for insurance in American Samoa along with an expanded definition of jurisdictional eligibility; (3) the maximum insurable amount on mortgages on one- to four-family dwellings that are executed by non-occupant mortgagors; (4) the relationship of the one-time mortgage insurance premium (MIP) to the determination of maximum insurable mortgage amounts; (5) the provision of mortgage insurance on manufactured home parks designed exclusively for the elderly; (6) the removal of refinancing limitations previously governing substantial rehabilitation of certain multifamily projects; and (7) elimination of the "buy-back" feature contained in Section 221(g)(4) of the National Housing Act and the procedures to be used by those with outstanding mortgages who choose to exercise the option to assign their mortgages to HUD.

EFFECTIVE DATE: May 10, 1984.

FOR FURTHER INFORMATION CONTACT: John Coonts, Director, Single Family Development Division, Room 9270, telephone number (202) 755-6720; or April LeClair, Director, Development Division, Office of Multifamily Housing Development, Room 6132, telephone number (202) 755-6500. (These are not toll-free numbers.) Written communications to the above-named persons should be sent to the Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: This final rule implements the following provisions of the Housing and Urban-Rural Recovery Act of 1983, Pub. L. 98-181, approved November 30, 1983 (the "1983 Act"):

1. Section 427 of the 1983 Act amends Section 518(a) of the National Housing Act (NHA) (12 U.S.C. 1735b(a)(B)). Section 518(a) authorizes the Secretary to make expenditures for, among other things, the correction of structural defects in one- to four-family dwellings that were approved for FHA mortgage insurance before construction. Section 203(b)(2) of the NHA provides that the mortgage on a one- to four-family dwelling approved for guaranty, insurance, or a direct loan by the Veterans Administration is eligible for FHA insurance. Before the 1983 Act's amendment, section 518(a) of the NHA provided that the Secretary's authority to make expenditures to correct structural defects existed only if the

housing had been approved for mortgage insurance before the beginning of construction. This provision created an ambiguity, since it was unclear whether a dwelling originally approved by VA, but ultimately insured by FHA, was eligible for the protection afforded by section 518(a).

Section 427 of the 1983 Act makes clear that expenditures and reimbursements may be made for correcting defects in FHA-insured dwellings even though they were approved for guaranty, insurance, or a direct loan by the Veterans Administration before construction, instead of having been given preconstruction approval by FHA. Accordingly, 24 CFR 200.507(b) is revised to reflect Section 427 of the 1983 Act.

2. Section 407 of the 1983 Act amends Sections 9, 201(d) and 207(a)(7) of the NHA (12 US.C. 1706d, 1707, 1713) to add American Samoa to the list of jurisdications to which the Department's loan and mortgage insurance authorities in titles I and II of the NHA are applicable. Amendments are included in this rule for definitions in 24 CFR Parts 201, 203, 204, 205, 232, 234, 242, 244, and 250 to reflect this change. The rule also spells out for the first time (in sections 201, 203, and 220) the names of all eligible jurisdictions in which HUD-approved or HUD-insured property may be located.

3. Section 425 of the 1983 Act amends section 203(b)(8) of the NHA (12 U.S.C. 1709(b)(8)) to provide that a mortgage on a dwelling owned by a non-occupant mortgagor is eligible for insurance if the principal obligation is no greater than the lesser of: (1) The amount prescribed under Section 203(b)(2) of the NHA (i.e., the insurable amount for an occupant mortgagor), or (2) 85 percent of the appraised value of the property on the date the mortgage is accepted for insurance. Previously, Section 203(b)(8) had provided that the principal obligation could not, under most circumstances, exceed 85 percent of the amount computed under Section 203(b)(2). This amendment, by increasing the insurable mortgage amount for investors, should heighten investor interest in single-family homes, thereby resulting in an increased supply of rental housing. The amendment is implemented by changes in 24 CFR 203.18(c).

4. Section 423 of the 1983 Act added a new subsection (d) to Section 203 of the NHA. This new subsection allows the maximum insurable mortgage amount determined under any provision of title II of the NHA for a mortgage secured by a one- to four-family dwelling to be increased "by the amount of the mortgage insurance premium (MIP) paid at the time the mortgage is insured."

The Department recently published a final rule that established a new system for collecting MIPs for certain single family mortgages that HUD insures under Section 203. See 48 FR 28794 (June 23, 1983). Under this system, the borrower pays a single MIP when the mortgage loan is closed, which represents the total premium obligation for the insured loan.

As part of implementing the new system, HUD proposed in 1982 to amend certain sections of the NHA to increase the otherwise applicable maximum mortgage amounts by the amount of the MIP, and to exclude the amount of the premium from "cost of acquisition" for purposes of determining minimum down payment requirements. Congress enacted these proposals as Section 201 of the Omnibus Budget Reconciliation Act of 1982, Pub. L. 97–253, approved September 8, 1982.

One of the purposes of the amendments was to permit the homebuyer to add the amount of the MIP to the amount of the insured loan, thereby enduring that implementation of the new system would not increase existing downpayment requirements. Because of their placement, however, the amendments did not completely fulfill this intent.

In addition to statutory provisions directly addressing downpayment requirements, the amount of the required downpayment is also affected by maximum loan-to-value ratios. For example, Section 203(b)(2) of the NHA generally provides that insured loans may not exceed an amount equal to the sum of 97 percent of the first $25,000 of the appraised value of the property and 95 percent of the appraised value in excess of $25,000. No amendment to this or other loan-to-value ratio requirements was included in the 1982 Reconciliation Act. The result is that, in the case of loans that are at the maximum loan-to-value ratio before consideration of the up-front premium, the required downpayment is increased by the percentage resulting from the applicable loan-to-value ratio (5 percent in the case of a loan covered by the ratio provision cited above where the value exceeds $25,000). Section 423 of the 1983 Act corrects this unintended result by providing in one place the general authority to increase, by the amount of the MIP, the otherwise applicable single family maximum mortgage amount—irrespective of whether the amount is arrived at as a result of the relevant dollar or loan-to-value limitation.

Accordingly, this rule adds a new § 203.18c to make clear that all of the one-time mortgage insurance premium amount may be added to the insured mortgage. The rule also removes § 203.18b(d), the provision included in HUD's final rule implementing procedures for one-time MIP payments (see 48 FR 28794, at 28804 June 23, 1983). § 203.18b(d) permitted maximum dollar limits to be increased by the amount of the financed one-time premium, but did not permit loan-to-value limitations to be affected by the addition of the premium to the mortgage amount. The new § 203.18c includes, and expands the reach of, the removed provision, as authorized under Section 423 of the 1983 Act. Affected mortgage insurance programs include HUD's basic home mortgage insurance program under Section 203(b) of the NHA (24 CFR 203.18, 203.18a, 203.18b, 203.29); mortgage insurance for disaster victims under Section 203(h) of the NHA (24 CFR 203.18(e)); mortgage insurance for single family homes in outlying areas under Section 203(i) (24 CFR 203.18(d)); mortgage insurance for single-unit cooperatives under Section 203(n) of the NHA (24 CFR 203.43c); mortgage insurance under title II of the NHA for qualifying manufactured homes (24 CFR 203.43f); and graduated payment mortgages under section 245 of the NHA (24 CFR 203.45, 203.46).

Section 423(c) of the 1983 Act provides that the amendments affecting the treatment of single family premiums may take effect only if the Secretary of Housing and Urban Development has determined that the program of payment of insurance premiums at the time of loan closing—with specific regard to Section 423's changes—is actuarially sound.

The one-time MIP concept was originally developed on the assumption that mortgagors would enjoy the option of including all of their MIP in the insured mortgage. As noted above, it was only a technical oversight in the authorizing legislation that obliged the Department to limit the amount of MIP financed as part of the mortgage by subjecting that amount to statutory loan-to-value limits. In submitting the original methodology paper to the Congress on January 25, 1983, the Secretary found that the option of including *all* of the MIP in the mortgage would be actuarially sound. There is no reason at this time to question or modify this finding with respect to implementing the amendments of Section 423 of the 1983 Act. The Secretary, in approving this rule for publication, has made the

determination required under Section 423(c).

5. Section 435 of the 1983 Act amended Section 207(b) of the NHA to permit the insurance of mortgages on manufactured home parks designed exclusively for occupancy by elderly persons. Formerly, Section 207(b) prohibited the provision of insurance under Section 207 unless the mortgagor certified under oath that there would be no discrimination "by reason of the fact that there are children in the family. . . ." Section 435 retains this basic rule, but provides language clarifying that exceptions may be made with regard to manufactured home parks designed exclusively for the elderly.

Accordingly, 24 CFR 207.20(a) is amended to provide that mortgagors must certify under oath that they will not discriminate against families with children, except in the case of mortgagors who own manufactured home parks designed exclusively for occupancy by the elderly.

6. Section 432 of the 1983 Act amends the mortgage limit provisions of Sections 220(d)(3), 221(d)(3), and 221(d)(4) of the NHA to facilitate refinancing to perform substantial rehabilitation. Before this amendment, the limits on mortgages for substantial rehabilitation of properties were based upon the sum of the cost of repair plus the value of the property before rehabilitation. However, where there was an existing mortgage and application to insure a new mortgage under one of these provisions was made, the mortgage limits were based upon the sum of the estimated cost of repair plus the existing indebtedness (rather than the value of the property before repair). Section 432 deletes the special mortgage limits provision, so that mortgage limits may be determined in the same manner for project refinancing as they are for new financing to carry out substantial rehabilitation.

Amendments to §§ 220.507, 220.508, 221.514, and 221.556 contained in this rule conform the regulations applicable to Sections 220(d)(3), 221(d)(3), and 221(d)(4) of the National Housing Act to reflect the 1983 statutory amendment. 24 CFR 221.515 has been removed as a result of the legislative amendment to these sections of the NHA. The amendment has rendered inapplicable the distinctions based on the status of the property contained in the now-deleted § 221.515.

7. Before it was amended by Section 409 of the 1983 Act, Section 221(g)(4) of the NHA permitted mortgagees holding mortgages insured under Section 221 to assign them to HUD and receive the benefits of insurance, if the mortgage was not in default at the expiration of 20 years from the date of endorsement for insurance. Section 409 terminates this 20-year "buy-back" provision for future insured mortgages. The 20-year "buy-back" continues to be available (under the terms of amended Section 221(g)(4)) for mortgages for which conditional or firm commitments were issued on or before November 30, 1983.

The Department issued a rule-related Notice on December 5, 1983 (48 FR 54571), explaining the effect of Section 409. Today's rule includes amendments to §§ 221.255(a) and 221.770 to conform HUD's regulations to the statutory change previously announced in the Notice. These amendments also provide for the implementation of Section 408 of the 1983 Act, which permits the Commissioner to direct mortgagees submitting claims under the buy-back provision to deliver the credit instrument and mortgage directly to GNMA, in lieu of assigning them to the Commissioner.

As a matter of policy, the Department submits most of its rulemakings to public comment, either before or after effectiveness of the action. In this instance, however, the Secretary has determined that good cause exists for publishing this document as a final rule. Public procedure is believed to be unnecessary because each of the revisions to existing HUD regulations included in this document is being made solely for the purpose of implementing new statutory direction from the Congress where the revised law is self-executing (eligibility of American Samoa (Section 407), mortgage insurance for manufactured home parks for the elderly (Section 435), and termination of the Section 221(g)(4) buy-back (Section 409)); removes ambiguity (correction of defects (Section 427)); makes technical correction of a matter previously subjected to public comment rulemaking (amortization of the one-time MIP (Section 423)); liberalizes the terms and conditions under which a client group may participate in ongoing HUD programs (mortgage limits for non-occupant mortgagors (Section 425), amortization of the one-time MIP (Section 423), and maximum mortgage amounts for the substantial rehabilitation of multifamily projects involving refinancing (Section 432)); or involves an internal administration matter not affecting the rights of regulated groups (assignment of mortgages under the buy-back option to GNMA (Section 408)). Under these circumstances, immediate implementation of these several amendments would best serve the public interest.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50 that implement Section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10278, 451 Seventh Street SW., Washington, D.C. 20410.

In accordance with 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule merely implements statutory amendments and conforms regulatory provisions to statutory law, without imposing any new administrative or economic burdens on small entities.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 17, 1983 (48 FR 47422) under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program numbers are 14.110, 14.117, 14.138, 14.157, 14.400, 14.402, 64.114, 64.118, and 64.119.

List of Subjects

24 CFR Part 200

Administrative practice and procedure, Claims, Equal employment opportunity, Fair housing, Housing standards, Loan programs: housing and community development, Mortgage insurance, Organization and functions (Government agencies), Reporting and recordkeeping requirements, Minimum Property Standards, Incorporation by reference.

24 CFR Part 201

Health facilities, Historic preservation, Home improvement, Manufactured homes, Manufactured homes and lots.

24 CFR Part 203

Home improvement, Loan programs: housing and community development, Mortgage insurance, Solar energy.

24 CFR Part 204

Mortgage insurance.

24 CFR Part 205

Community facilities, Mortgage insurance, Land development.

24 CFR Part 207

Mortgage insurance, Rental housing, Manufactured home parks.

24 CFR Part 220

Home improvement, Mortgage insurance, Urban renewal, Rental housing, Loan programs: housing and community development, Projects.

24 CFR Part 221

Condominiums, Low and moderate income housing, Mortgage insurance, Displaced families, Single family housing, Projects, Cooperatives.

24 CFR Part 232

Fire prevention, Health facilities, Loan programs: health, Loan programs: housing and community development, Mortgage insurance, Nursing homes, Intermediate care facilities.

24 CFR Part 234

Condominiums, Mortgage insurance, Homeownership, Projects, Units.

24 CFR Part 242

Hospitals, Mortgage insurance.

24 CFR Part 244

Health facilities, Mortgage insurance.

24 CFR Part 250

Intergovernmental relations, Low and moderate income housing mortgage insurance.

Accordingly, the Department amends 24 CFR Parts 200, 201, 203, 204, 205, 207, 220, 221, 232, 234, 242, 244, and 250 as follows:

PART 200—INTRODUCTION

1. Section 200.507 is revised to read as follows:

§ 200.507 Eligibility requirements.

To be eligible for consideration by the Commissioner for receiving assistance in the correction of structural defects, the mortgagor must establish that:

(a) The mortgagor is the owner of a one- to four-family dwelling covered by an individual mortgage.

(b) The dwelling was approved for mortgage insurance by the Commissioner, or for guaranty, insurance or a direct loan under chapter 37 of Title 38 of the United States Code (38 U.S.C. 1801–1827) by the Administrator of Veterans Affairs, before the beginning of construction.

(c) The mortgagor has made reasonable efforts to obtain a correction of a structural defect in his or her property by the builder, seller, or other persons, and that the defect has not been corrected.

PART 201—PROPERTY IMPROVEMENT AND MOBILE HOME LOANS

2. In § 201.6, paragraph (a) is revised to read as follows:

§ 201.6 Eligible loans.

(a) *Property location.* The property to be improved shall be located within the United States, Puerto Rico, Guam, the Trust Territory of the Pacific Islands, American Samoa, or the Virgin Islands.

* * * * *

3. In § 201.525, paragraph (a) is revised to read as follows:

§ 201.525 Mobile home location standards.

(a) *In general.* The mobile home shall be located within the United States, Puerto Rico, Guam, the Trust Territory of the Pacific Islands, American Samoa, or the Virgin Islands. The mobile home shall be placed in a mobile home park approved by the Commissioner, on a site owned by the borrower which meets certain requirements prescribed by the Commissioner, or on a site leased from a municipality or other political subdivision, where the leased site otherwise meets the requirements of paragraph (c) of this section.

* * * * *

4. § 201.1110, paragraph (k) is revised to read as follows:

§ 201.1110 Definitions.

* * * * *

(k) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

* * * * *

5. Section 201.1503 is revised to read as follows:

§ 201.1503 Eligibility requirements.

Loans shall be made only for financing, in combination, the purchase of a mobile home and a developed or undeveloped mobile home lot, or a developed or undeveloped mobile home lot by an owner of a mobile home, which mobile home is the principal residence of that owner. Furniture may not be included in the loan, or financed with the proceeds of the loan. The mobile home shall be located within the United States, Puerto Rico, Guam, the Trust Territory of the Pacific Islands, American Samoa, or the Virgin Islands.

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

6. In § 203.18, paragraph (c) is revised to read as follows:

§ 203.18 Maximum mortgage amounts.

* * * * *

(c) *Nonoccupant mortgagors.* A mortgage executed by a mortgagor who is not the occupant of the property shall not exceed:

(1) The lesser of the amount computed under paragraph (a) of this section or 85 percent of the appraised value of the property as of the date the mortgage is accepted for insurance; or

(2) The amount computed under paragraph (a) of this section (even if it is greater than 85 percent of the appraised value of the property as of the date the mortgage is accepted for insurance), if the mortgage covers a one- to two-family residence and the Commissioner is furnished with certificates indicating that:

(i) The mortgagor will not rent (except for a rental term of not less than 30 days and not more than 60 days), sell (except where the insured mortgage is paid in full as an incident of the sale), or occupy the property before the 18th amortization payment of the mortgage except with the prior written approval of the Commissioner;

(ii) Not less than 15 percent of the original principal amount of the mortgage proceeds has been deposited in an escrow, trust, or special account;

(iii) The mortgagor agrees that, if the property is not sold before the due date of the 18th amortization payment of the mortgage to a purchaser, acceptable to the Commissioner, who will occupy the property, assume, and agree to pay the mortgage indebtedness, the amount held in escrow, trust, or special account will be applied in reduction of the outstanding principal amount of the mortgage as of the due date of the 18th amortization payment of the mortgage; and

(iv) The mortgagee agrees that any portion of the fund held in escrow, trust, or special account, not applied to the mortgage in accordance with the

provisions of this paragraph, shall be deducted from the amount of the insurance benefits to which the mortgagee would otherwise be entitled if a claim for insurance benefits is filed.

* * * * *

§ 203.18b [Amended]

7. Section 203.18b is amended by removing paragraph (d).

8. Part 203 is amended by adding a new § 203.18c, to read as follows:

§ 203.18c One-time mortgage insurance premium excluded from limitations on maximum mortgage amounts.

After determining any maximum insurable mortgage amount under the provisions of this subpart, the maximum insurable amount of any mortgage subject to the provisions of § 203.259a may be increased by the amount of any one-time mortgage insurance premium that will be financed as part of the mortgage.

9. Section 203.40 is revised to read as follows:

§ 203.40 Location of property.

The mortgaged property shall be located within the United States, Puerto Rico, Guam, the Virgin Islands, the Trust Territory of the Pacific Islands, or American Samoa. The mortgaged property, if otherwise acceptable to the Commissioner, may be located in any community where the housing standards meet the requirements of the Commissioner.

10. In § 203.251, paragraph (s) is revised to read as follows:

§ 203.251 Definitions.

* * * * *

(s) "State" includes the several States, Puerto Ricoe, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 204—COINSURANCE

11. In § 204.251, paragraph (p) is revised to read as follows:

§ 204.251 Definitions.

* * * * *

(p) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 205—MORTGAGE INSURANCE FOR LAND DEVELOPMENT [TITLE X]

12. In § 205.1, paragraph (p) is removed, and paragraph (m) is revised to read as follows:

§ 205.1 Definitions.

* * * * *

(m) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

13. In § 207.20, the introductory text of paragraph (a) is revised to read as follows:

§ 207.20 Occupancy requirements.

(a) *Nondiscrimination against families with children.* Except in the case of a mortgage with respect to a manufactured home park designed exclusively for occupancy by elderly persons, the mortgagor shall certify under oath to the Commissioner that:

* * * * *

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

14. In § 220.103, paragraph (a) is revised to read as follows:

§ 220.103 Type and location of property.

* * * * *

9(a) Constitute real property located within the United States, Puerto Rico, Guam, the Trust Territory of the Pacific Islands, American Samoa, or the Virgin Islands.

* * * * *

15. In § 220.507, the introductory text of paragraph (d)(2) and (d)(2)(ii) are revised to read as follows:

§ 220.507 Maximum mortgage amounts.

* * * * *

(d) * * *

(2) *Property subject to existing mortgage.* If the mortgagor owns the project subject to an outstanding indebtedness that is to be refinanced with part of the insured mortgage, the maximum mortgage amount shall not exceed 90 percent of:

(i) * * *

(ii) The Commissioner's estimate of the value of the property before repair or rehabilitation; or

* * * * *

§ 220.508 [Amended]

16. In § 220.508, paragraph (d) is removed and reserved.

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

17. In § 221.255, paragraph (a) is revised to read as follows:

§ 221.255 Assignment option.

(a) A mortgagee holding a mortgage insured pursuant to a conditional or firm commitment issued on or before November 30, 1983 has the option to assign, transfer and deliver to the Commissioner the original credit instrument and the mortgage securing it, provided the mortgage is not in default at the expiration of 20 years from the date of final endorsement of the credit instrument. In processing a mortgagee's claim for insurance benefits under this section, the Commissioner may direct the mortgagee to assign, transfer and deliver the original credit instrument, and the mortgage securing it, directly to the Government National Mortgage Association (GNMA). Upon such assignment, transfer and delivery, either to the Commissioner or to GNMA, as directed, the mortgage insurance contract shall terminate and the mortgagee shall be entitled to receive insurance benefits in accordance with this section.

* * * * *

18. In § 221.514, the introductory text of paragraph (a) and the introductory text of paragraph (a)(3) are revised as follows:

§ 221.514 Maximum mortgage amounts.

(a) The mortgage shall involve a principal obligation not in excess of the lesser of the following:

* * * * *

(3) *Repair or rehabilitation (including projects to be refinanced).*

* * * * *

§ 221.515 [Reserved]

19. Section 221.515 is removed and reserved.

20. Section 221.556 is revised to read as follows:

§ 221.556 Reduction in mortgage amount—rehabilitation.

(a) In the event the mortgage is to finance repair or rehabilitation, the mortgagor's actual cost of such repair or rehabilitation may include the items of expense permitted for new construction in accordance with § 221.550, and the applicable cost certification procedure described therein will be required.

(b) If the principal obligation of the mortgage exceeds in the case of:

(1) General or limited distribution mortgagors, 90 percent;

(2) All other mortgagors, when the mortgage is to be insured under section 221(d)(4), 90 percent; or

(3) All other mortgagors, when the mortgage is to be insured under section 221(d)(3), 100 percent.

of the actual cost of the repair or rehabilitation plus the Commissioner's estimate of the fair market value of the land and existing improvements, the mortgage shall be reduced by the amount of such excess before final endorsement for insurance.

(c) *Nonapplicability to rehabilitation sales mortgagors.* The provisions of paragraphs (a) and (b) of this section shall not be applicable to a project involving a rehabilitation sales mortgagor.

21. § 221.770 is revised to read as follows:

§ 221.770 Assignment option.

A mortgagee holding a mortgage insured pursuant to a conditional or firm commitment issued on or before November 30, 1983 (or, in the Direct Endorsement program described in 24 CFR 200.163, a property appraisal report signed by the mortgagee's approved underwriter on or before November 30, 1983) has the option to assign, transfer and deliver to the Commissioner the original credit instrument and the mortgage securing it, provided that the mortgage is not in default at the expiration of 20 years from the date of final endorsement of the credit instrument. In processing a mortgagee's claim for insurance benefits under this section, the Commissioner may direct the mortgagee to assign, transfer and deliver the original credit instrument, and the mortgage securing it, directly to the Government National Mortgage Association (GNMA). Upon such assignment, transfer and delivery either to the Commissioner or to GNMA, as directed, the mortgage insurance contract shall terminate and the mortgagee shall be entitled to receive insurance benefits in accordance with § 221.780.

PART 232—NURSING HOMES AND INTERMEDIATE CARE FACILITIES MORTGAGE INSURANCE

22. In § 232.1, paragraph (h) is revised to read as follows:

§ 232.1 Definitions.

* * * * *

(h) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

* * * * *

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

23. In § 234.505, paragraph (i) is revised to read as follows:

§ 234.505 Definitions.

* * * * *

(i) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 242—MORTGAGE INSURANCE FOR HOSPITALS

24. In § 242.1, paragraph (g) is revised to read as follows:

§ 242.1 Definitions.

* * * * *

(g) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 244—MORTGAGE INSURANCE FOR GROUP PRACTICE FACILITIES (TITLE XI)

25. In § 244.1, paragraph (g) is revised to read as follows:

§ 244.1 Definitions.

* * * * *

(g) "State" includes the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

PART 250—COINSURANCE FOR STATE HOUSING FINANCE AGENCIES

26. In § 250.101, paragraph (h) is revised to read as follows:

§ 250.101 Definitions.

* * * * *

(h) *"State Housing Agency (Agency)"*—Any public body, agency, or instrumentality created by a specific act of a State legislature and empowered to finance activities designed to provide housing and related facilities, through land acquisition, construction or rehabilitation, for persons and families of low and moderate income. The term "State" shall include the several States, Puerto Rico, the District of Columbia, Guam, the Trust Territory of the Pacific Islands, American Samoa, and the Virgin Islands.

BILLING CODE 4210-27-M

Office of Assistant Secretary for Public and Indian Housing

24 CFR Part 941

[Docket No. R-84-1063; FR-1665]

Public Housing Development; Approval of Projects With Dwelling Construction and Equipment Costs in Excess of Prototype Cost Limits

AGENCY: Office of Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations governing public housing development to require approval by the Assistant Secretary for Public and Indian Housing for any public housing project dwelling construction and equipment costs that will exceed 100 percent of the appropriate prototype cost limits for the area. The existing regulations permit the HUD Field Office to approve such projects.

EFFECTIVE DATE: May 10, 1984.

FOR FURTHER INFORMATION CONTACT: Raymond W. Hamilton, Director, Public Housing Development Division, Office of Public Housing, Office of Assistant Secretary for Public and Indian Housing, Department of Housing and Urban Development, Washington, D.C. 20410, (202) 426-0938. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: This final rule amends (1) § 941.204(e) to require approval by the Assistant Secretary for Public and Indian Housing for all projects proposed to have dwelling construction and equipment costs (DC&E) in excess of 100 percent of the applicable project prototype cost limit published under Part 941; (2) deletes the list of factors specified in current regulations which may justify approval by Field Offices of requests to exceed prototype cost limits; and (3) conforms the regulations to the current HUD policy stated in a HUD Headquarter's memorandum to Field Offices dated October 22, 1981 and is applicable to all projects, whether funded before or after October 1, 1980. The current HUD policy permits the Deputy Assistant Secretary for Public and Indian Housing to approve DC&E costs for projects up to 110 percent of the prototype cost limits. Requests for

approval under this rule must be supported by a justification describing the circumstances involved for the particular project and demonstrating that approval is needed. Appropriate changes will be made to HUD Handbook 7417.1 and 7417.1 REV–1 after this rule becomes effective.

At present, HUD Field Offices are authorized under 24 CFR 941.204(e), which became effective on October 1, 1980, to approve any project which has DC&E costs up to 110 percent of the appropriate project prototype cost limit, but only under specified circumstances. Before October 1, 1980, Field Offices had the authority to approve projects with DC&E costs up to 105 percent of the project prototype cost limit and Regional Administrators could approve projects with costs up to 110 percent (24 CFR 841.115(b)(2); 42 FR 5883, January 31, 1977).

On June 24, 1983, the Department published a proposed rule in the **Federal Register** (48 FR 29003) to amend Field Offices' authority to approve public housing projects with DC&E in excess of 100 percent of the appropriate area prototype cost limits. Interested parties were invited to submit comments until August 23, 1983. Comments were received from six entities, including four public housing agencies, one housing commission, and one community development commission. The comments are summarized, together with HUD's response to them in the "Discussion of Comments" section which follows.

In a separate rulemaking (48 FR 55452, December 13, 1983), the Department moved all regulations affecting the programs administered by the Assistant Secretary for Public and Indian Housing to 24 CFR Chapter IX. This rule, originally proposed as an amendment to Part 841 (Chapter VIII of Title 24 of the Code of Federal Regulations) is now an amendment to Part 941—the redesignated location of regulations affecting Public Housing Development.

Discussion of Comments

The following is a summary of the concerns raised by the public and an explanation of the Department's position with respect to each.

1. Some commenters opposed the proposed rule on the ground that the staff in HUD Headquarters lacks sufficient knowledge of local conditions, including building material and labor costs and urged instead that the cost containment provisions in the current regulations and HUD handbooks relating to public housing development be used. Another commenter suggested that a lesser quality housing would result from the rule, and requirements of the Total Development Cost (TDC) cap and the February 23, 1982 policy memorandum on excessive amenities were adequate to contain costs. The Department considered these points in drafting the proposed rule, but concluded that quality projects could be built within the established prototype costs, which are based on the costs of material, labor, and equipment for the housing construction industry in a geographic area. It should be noted that it is the policy of the Department to contain costs to the maximum extent practicable. The Department found that project costs were not being contained satisfactorily under the existing handbooks and regulations. The TDC cap, the policies on excessive amenities and this rule, together, are intended to ensure that costs are contained. This rule recognizes that certain unique circumstances may warrant authorization to exceed 100 percent of project prototype cost limits, and provision has been made for consideration of such requests.

2. One commenter indicated that the rule would result in additional approval processing and cause an unnecessary hardship in the production of public housing units. It was suggested that the prototype cost limits are not realistic for the time period at which they appear in the **Federal Register**, and the subsequent time lag has only served to increase the difference between HUD prototype and mounting construction costs. In addition, it was stated that adequate provision has not been made for a realistic projection of construction costs at a time when inflationary trends have produced a critical condition in all phases of the construction industry.

It should be noted that HUD publishes the unit prototype cost schedules at least annually, and that the schedules may be revised based on public comments or other evidence that construction costs exceed the limits determined by HUD.

The Department believes that this rule will not result in additional or costly delays or inaccurate decisions, because the determinations will be made based on supportive justification from the Field. Furthermore, the Department finds that past inflationary trends are not being sustained and, for a number of areas, prototype cost limits have been reduced as a reflection of locally reduced construction costs.

3. One commenter expressed an opinion that public housing funds should be provided directly to public housing agencies and that their performance in the production of units should then be monitored by HUD, using a set of performance standards. The Department has considered several approaches to providing public housing funds directly to the public housing agencies; however, no final determinations have been made. The Department believes that it has a responsibility to ensure that funds provided by the Congress are used to assist the greatest number of eligible families possible.

Other Matters

This rule does not constitute a "major rule," as that term is defined in Section 1(b) of Executive Order 12291 issued by the President on February 17, 1981. Analysis of the proposed rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implements Section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

Under the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule would not have a significant economic impact on a substantial number of small entities. The rule may have some economic impact on builders or developers of public housing, some of whom may constitute small entities, but it is believed that neither the number of small entities affected, nor the degree of economic impact, will be substantial.

This rule is listed at 48 FR 47442 as item H–103–82 in the Department's Semiannual Agenda of Regulations, published on October 17, 1983, under Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number and title is 14.146, Low-Income Housing-Assistance Program (Public Housing).

List of Subjects in 24 CFR Part 941

Loans programs, Housing and Community Development, Public Housing, Prototype costs, Cooperation Agreement, Turnkey.

The information collection requirements contained in 24 CFR 941.204(e) have been approved by the Office of Management and Budget (OMB). The approval OMB number is 2502–0153.

PART 941—[AMENDED]

Accordingly, the Department amends 24 CFR Part 941 by revising paragraph (e) of § 941.204 to read as follows:

§ 941.204 Prototype costs.

* * * * *

(e) *Project Prototype Cost Limit.* (1) The Field Office shall determine the project prototype cost limit by multiplying the base project prototype cost by the prototype cost adjustment factor. The amount approvable by the Field Office for dwelling construction and equipment may not exceed the project prototype cost limit. The limit may be exceeded (in accordance with Section 6(b) of the Act) by up to ten percent, with the approval of the Assistant Secretary for Public and Indian Housing. (Approval by the Assistant Secretary to exceed 100 percent prototype costs is also required for projects being processed under a Program Reservation issued before October 1, 1980.) (2) A request for approval to exceed 100 percent of the project prototype cost limit shall be supported by a justification describing the circumstances involved for the particular project and demonstrating that such approval is needed.

(Approved by the Office of Management and Budget under OMB Control Number 2502–0153)

Authority: (Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d); Section 6, U.S. Housing Act of 1937, 42 U.S.C. 1437(d)).

Dated: March 20, 1984.

James E. Baugh,

General Deputy Assistant Secretary for Public and Indian Housing.

24 CFR Parts 4101, 4102, 4103, and 4104 are removed, and 24 CFR Parts 4100 is revised to read as follows:

PART 4100—ORGANIZATION AND CHANNELING OF FUNCTIONS

Sec.

4100.1 Functions and activities.
4100.2 General organization.
4100.3 Field activities.
4100.4 Inquiries.

Authority: Title VI, Pub. L. 95–557, 92 Stat. 2115 (42 U.S.C. 8101 et seq.); as amended by Sec. 315, Pub. L. 96–399, 94 Stat. 1645; and Sec. 710, Pub. L. 97–320, 96 Stat. 1544.

§ 4100.1 Functions and activities.

(a) *General statement.* The Neighborhood Reinvestment Corporation (referred to in this Part as "the Corporation") was established by Congress in the Neighborhood Reinvestment Corporation Act (Title VI of the Housing and Community Development Amendments of 1978, Pub. L. 95–557, October 31, 1978). The Corporation is not a department, agency, or instrumentality of the Federal Government.

(b) The Corporation is authorized to receive and expend Federal appropriations and other public and private revenues to conduct a variety of programs designed to reverse decline in residential neighborhoods. These programs include:

(1) *Neighborhood Housing Services.* The major effort of the Corporation is to assist local communities in the development, expansion and provision of technical services to local Neighborhood Housing Services (NHS) programs. NHS programs are based upon partnerships of community residents, and representatives of local governments and financial institutions. Each local program is administered by an autonomous, private, non-profit corporation, and conducts a comprehensive revitalization effort in locally selected neighborhoods. Services to neighborhood residents include rehabilitation counseling, construction assistance, financial counseling, loan referrals and loans at flexible rates and terms to homeowners who do not meet private lending criteria. Programs and strategies to remove blighting influences, obtain improved public services and amenities, and improve the neighborhood's image and the functioning of its real estate market are also undertaken. To insure the continuing effectiveness of NHS programs, the Corporation provides grants, training, information and technical services to NHS programs.'

(2) *Neighborhood Preservation Projects; Neighborhood Program Development:* The Corporation identifies, monitors, evaluates and supports through demonstration grants and technical assistance other promising neighborhood preservation strategies based on local, public-private partnerships. Those which show particular promise after the monitoring and evaluation stage are developed and replicated as complementary programs and stategies to treat specific problems in other neighborhoods.

(3) *Neighborhood Housing Services of America:* The Corporation also supports Neighborhood Housing Services of America (NHSA), an independent, private, non-profit corporation which provides a variety of services to local NHS programs, including a secondary market for NHS revolving loan fund loans, and the strengthening of private sector resources available to the network of local NHSs.

§ 4100.2 General organization.

(a) *The Board of Directors.* (1) The Corporation is under the direction of a Board of Directors composed of six members: the Chairman of the Federal Home Loan Board; the Secretary of Housing and Urban Development; a Member of the Federal Reserve Board designated by its Chairman; the Chairman of the Federal Deposit Insurance Corporation; the Comptroller of the Currency;' and the Chairman of the National Credit Union Administration. Members of the Board serve *ex officio* during their tenure in the offices mentioned without additional compensation. The Board elects from among its members a Chairman and Vice-Chairman. The Bylaws of the Corporation provide for the creation of an Audit Committee, and such other committees as the Board may from time to time establish.

(2) The Board holds an Annual Meeting each year during the month of May (or as the Bylaws or the Board may specify). The Board also holds regular meetings at least quarterly and special meetings as required. The meetings of the Board are conducted in accordance with provisions of the Neighborhood Reinvestment Corporation Act, the Government in the Sunshine Act (5 U.S.C. 552b), the Corporation's Bylaws, and when not inconsistent with the foregoing, with Robert's Rules of Order. Every portion of every meeting of the Board is open to public observation except as provided by the Government in the Sunshine Act. Interested members of the public may attend such meetings, but may not participate therein unless invited or permitted to do so by the Board.

(3) The Secretary of the Corporation, in consultation with the Corporation's General Counsel, is responsible for taking such steps as are required to ensure the Corporation's compliance with the Government in the Sunshine Act, as that Act may be amended from time to time. Consistent with this responsibility, the Secretary of the Corporation provides to the Communications Department at the principal office of the Corporation such records as the Act requires to be made available to the public for access during regular office hours on regular business days.

(b) *The Officers.* (1) The officers of the Corporation are the Executive Director, the Deputy Executive Director, the Secretary, the Treasurer, and such other officer positions as the Board may, in consultation with the Executive Director, create. The Board elects the officers of the Corporation annually.

(2) The Neighborhood Reinvestment Corporation Act provides that the Executive Director shall serve as the chief executive officer of the Corporation. Consistent with that authority, the Corporation's Bylaws provide that the Executive Director shall have the responsibility and authority for the day-to-day administration of the affairs of the Corporation under the general supervision of the Board. The Board periodically reviews the activities of the Executive Director and, from time to time, provides guidance and policy direction to the Executive Director in the exercise of his or her authority.

(3) The responsibilities and authorities of the other officers of the Corporation are set forth in the Corporation's Bylaws, resolutions and policies adopted by the Board, duties and authorities delegated to each officer, other statutes and this statement. (See, for example, the Government in the Sunshine Act and paragraph (a)(3) of this section for specific duties of the Secretary and General Counsel.)

(c) *Principal Office.* The Corporation maintains its principal office in the District of Columbia. Currently, the principal office is maintained at 1850 K Street NW., Suite 400, Washington, DC 20006.

§ 4100.3 Field activities.

The Corporation conducts its field activities from regional and field offices around the country. Regional offices provide coordination of field activities in support of local programs within the geographic limits of each region. Field offices within each region provide assistance in the development and support of local programs. A current directory of all regional and field offices can be obtained upon request from the Communications Department, Neighborhood Reinvestment Corporation, 1850 K Street NW., Suite 400, Washington, DC 20006.

§ 4100.4 Inquiries.

(a) *General.* All requests for information, forms, and records should be addressed to: Communications Department, Neighborhood Reinvestment Corporation, 1850 K Street NW., Suite 400, Washington, DC 20006.

(b) *Applications.* Applications for the Corporation's assistance in the development of NHS programs and complementary programs and strategies, or the support of other promising neighborhood strategies are accepted on an ongoing basis. Local governmental or nonprofit entities should submit completed applications (forms are available upon request), including supportive materials, to the Corporation at the address stated in paragraph (a) of this section. The Corporation reviews applications to determine their readiness for development or support. Promising applications are selected for field reviews. Subject to the availability of the Corporation's resources, the Corporation may enter into agreements with top ranking applicants to provide financial and technical assistance in the development or support of selected programs. The application form contains a list of the criteria used for determining the readiness and promise of applications.

(c) *Records.* (1) The Corporation maintains such records and information for public inspection and copying as are required by the Freedom of Information Act (5 U.S.C. 552), as that Act may be amended from time to time. Records are available for public inspection and copying during regular business hours on regular business days at the address stated in paragraph (a) of this section. Requests for records should be submitted in writing and state the full name and address of the person requesting the records and a description of the records or other information sought that is reasonably sufficient to permit their identification without undue difficulty. A request should be submitted sufficiently in advance of the date inspection or copying is desired, preferably by mail. Requests for information which can be produced only by processing through an information system program especially designed for that purpose are not regarded as requests for records that must be disclosed pursuant to the Freedom of Information Act.

(2) Although the Corporation finds that the publication of indexes of statements of policy and interpretations or administrative staff manuals and instructions would be unnecessary and impracticable, such information will be made available upon request.

(d) *Fees for providing copies of records.* (1) A person requesting access to or copies of particular records shall pay the cost of searching or copying such record at the rate of $10 per hour for searching and 10 cents per page for copying. Records may be furnished without charge or at a reduced charge where the Executive Director determines that waiver or reduction of fees is in the public interest because furnishing the information can be considered as primarily benefiting the general public. Unless the person making the request states in his or her initial request that he or she will pay all costs regardless of amount, the Corporation will notify him or her as

soon as possible if there is reason to believe that the cost for obtaining access to and/or copies of such records will exceed $50. If such notice is given, the time limitations contained in the Freedom of Information Act shall not commence until the person making the initial request agrees in writing to pay such cost. The Associate Director of Communications is authorized to require an advance deposit whenever in his or her judgment such a deposit is necessary to insure that the Corporation will receive adequate reimbursement of its costs. If such a deposit is required, the time limitations contained in the Freedom of Information Act shall not commence until the deposit is paid.

(2) The Associate Director for Communications is authorized to waive payment in instances in which total charges are less than three dollars.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Parts 2, 5, and 33

Procedures and Practice, and Indian Education

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule; technical amendments.

SUMMARY: This document makes technical changes to the regulations regarding Procedures and Practice, and Indian education. The reason for the changes is to correct certain references to regulations of the Secretary of the Interior and the Office of Personnel Management.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Sam Adams, Acting Chief, Division of Management Research and Evaluation, Bureau of Indian Affairs, 1951 Constitution Avenue NW., Washington, D.C. 20245, telephone number (202) 343-7684.

SUPPLEMENTARY INFORMATION: The authority to issue rules and regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9). This final rule is published in exercise of rulemaking authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

The Bureau of Indian Affairs is publishing a final rule document that corrects references in various parts of 25 CFR Chapter I and corrects one paragraph designation. The corrections became necessary because previous references cited were changed and the paragraph designation is numbered incorrectly.

Since this document contains only administrative changes, advance notice and public comment would have no impact on the nature of the rule and they are hereby dispensed with in accordance with section (b)(B) of 5 U.S.C. 553 (1970). For the same reason, the 30-day deferred effective date is dispensed with under the exception provided in subsection (d)(3) of 5 U.S.C. 553 (1970). Accordingly, these amendments will become effective upon the date of publication of this document in the **Federal Register**.

This document does not impact upon any of the requirements of Executive Order 12291 and the Regulatory Flexibility Act since it is only administrative in content.

The List of Subjects normally required in rulemaking documents is not included in this document since the amendments contained herein are only administrative.

PART 2—[AMENDED]

References in various Parts of Chapter I of 25 CFR are hereby amended as follows:

§ 2.19 [Amended]

1. In paragraph (c)(2) of § 2.19, Action by Commissioner on appeal, the reference to 43 CFR 4.354 and 4.355 is removed and the reference 43 CFR 4.310 is added. The footnote to §§ 4.354 and 4.355 is removed.

PART 5—[AMENDED]

§ 5.2 [Amended]

2. In paragraph (b) of §5.2, Appointment actions, the reference to 5 CFR 213.3112(a)(7) is removed and the reference Exception Number 213.3112(a)(7) is added. The footnote to Section 213.3112(a)(7) of title 5 is removed.

PART 33—[AMENDED]

§ 33.7 [Amended]

3. In § 33.7, Implementing procedures, paragraph (b)(3) is hereby redesignated as paragraph (b)(2).

John W. Fritz,
Deputy Assistant Secretary—Indian Affairs (Operations).

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 601

Statement of Procedural Rules; Miscellaneous Amendments

AGENCY: Internal Revenue Service; Treasury.

ACTION: Correction.

SUMMARY: This document contains a correction to the **Federal Register** publication beginning at 48 FR 15623 which set forth miscellaneous amendments to the statement of procedural rules, Part 601 of Title 26 of the Code of Federal Regulations.

EFFECTIVE DATE: The amendments that are subject of this correction were effective April 12, 1983. The correction is effective on the same date.

FOR FURTHER INFORMATION CONTACT: Michel A. Dazé of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, Attn: CC:LR:T. Telephone 202-566-3458 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On April 12, 1983, the **Federal Register** published miscellaneous amendments to the statement of procedural rules (48 FR 15623). The amendments were issued under the authority contained in 5 U.S.C. 301 and 552.

Need for a correction

Subparagraph 1 of paragraph 4 of the miscellaneous amendments revised paragraph (d)(5) of § 601.702. However, the revised text of paragraph (d)(5) incorrectly omitted the final sentence of that revised paragraph.

Correction of Publication

§ 601.702 Publication and public inspection.

Accordingly, the publication of the miscellaneous amendments to the statement of procedural rules that was the subject of FR Doc. 83-9620 is corrected by adding to the end of the revised text of paragraph (d)(5) of § 601.702 the sentence, "Information will not be disclosed, however, concerning any trade secrets, processes, operations, style of work, or apparatus, or

confidential data or any other matter within the prohibition of 18 U.S.C. 1905."

George H. Jelly,

Director, Legislation and Regulations Division.

Office of the Secretary

41 CFR Part 10-60

48 CFR Part 1033

Disputes and Appeals

AGENCY: Office of the Secretary, Treasury.

ACTION: Final rule.

SUMMARY: This rule explains the process for handling disputes and appeals arising between the Department of the Treasury and contractors as the result of changes made by the Federal Acquisition Regulations. This is in an effort to consolidate the acquisition regulations into a single Title and a single body of regulations.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Thomas P. O' Malley or Susan M. Hubbard, Office of Procurement, 1500 Pennsylvania Ave., NW., Washington, D.C. 20220, telephone (202) 566-2586.

SUPPLEMENTARY INFORMATION: This document changes, without substantive modification, the citations of the text previously codified at 41 CFR 10-60.100 through 10-60.204 to 48 CFR 1033.070 through 1033.075.

Background

The Federal Acquisition Regulations System is established for the codification and publication of uniform policies and procedures for acquisition by all executive agencies. The development of this System is in accordance with the requirements of the Office of Federal Procurement Policy Act of 1974 (P.L. 93-400), as amended by Pub. L. 96-83.

Under Federal Acquisition Regulation 1.301 and 1.303 which become effective April 1, 1984, each agency is to codify under the assigned chapter in Title 48, Code of Federal Regulations, any agency acquisition regulation that controls the relationship between the agency and contractors or prospective contractors. This is in an effort to consolidate the acquisition regulations into a single Title and a single body of regulations.

As explained herein, this rule merely recodifies material currently at 41 CFR Part 10-60 into 48 CFR Part 1033. The former citation refers to the rules of the General Services Administration's Board of Contract Appeals (GSBCA) pertaining to disputes and appeals published at 41 CFR Part 5-60; the new citation refers to such rules of the GSBCA now pending publication at 48 CFR Part 533. Although minor technical and stylistic changes have been made to the Treasury rule, no substantive modifications have been made. For these reasons, the Department of the Treasury has determined that notice and public procedures and a delayed effective date, normally required by 5 U.S.C. 553(b) and (d), respectively, are unnecessary with respect to this rule.

Executive Order 12291

In accordance with the memorandum from David Stockman, Director, Office of Management and Budget, to Donald Sowle, Administrator, Office of Federal Procurement Policy, and Christopher DeMuth, Administrator, Information and Regulatory Affairs, dated October 4, 1982, this rule is exempt from the provisions of Executive Order 12291.

Regulatory Flexibility Act

This rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96-354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have a significant economic impact on a substantial number of small entities. Since this rule reformats existing procurement policies to comply with the FAR structure and does not promulgate any new procurement policies which would impact the public, the Department of the Treasury certifies that this rule will not have a significant economic impact on a substantial number of small entities. Therefore, no regulatory flexibility analysis has been prepared.

List of Subjects in 48 CFR Part 1033

Department of the Treasury Acquisition/Procurement Regulations, Disputes and appeals, Government procurement.

The revisions are as follows:

PART 10-60—PROCEDURES FOR SETTLING CONTRACT DISPUTE APPEALS

1. Part 10-60 of Title 41, Code of Federal Regulations is removed.

2. Part 1033 of Title 48, Code of Federal Regulations is amended by establishing Chapter 10, consisting of Part 1033 to read as set forth below:

Chapter 10—Department of the Treasury Acquisition/Procurement Regulation

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 1033—DISPUTES AND APPEALS

Sec.

1033.070 Treasury contract appeals to be heard by General Services Administration Board of Contract Appeals
1033.071 Rules regarding contract dispute appeals.
1033.072 Notice of appeal.
1033.072-1 Filing.
1033.072-2 Forwarding of appeals.
1033.073 Appeal file.
1033.074 Treasury representation before the General Services Administration Board of Contracts Appeals.
1033.075 Effective date.

Authority: Office of Federal Procurement Policy Act of 1974, Pub. L. 93-400, as amended (41 U.S.C. 401 note) and Pub. L. 95-563 (41 U.S.C. 601-613).

§ 1033.070 Treasury contract appeals to be heard by General Services Administration Board of Contract Appeals.

The General Services Administration Board of Contract Appeals (herein called the Board) is the designated and authorized representative of the Secretary of the Treasury in hearing, considering, and determining, as fully and finally as would the Secretary, all appeals of decisions of contracting officers filed by contractors on disputed questions taken pursuant to the provisions of contracts (other than contracts of the Comptroller of the Currency) when such appeals require the determination by the Secretary or a duly authorized representative. (Formally 41 CFR 10-60.100.)

1033.071 Rules regarding contract dispute appeals.

The rules and regulations pertaining to the appeals of General Services Administration contract disputes prescribed in or pursuant to Part 533 of this title and this part shall govern the appeal of all contract disputes with the Department of the Treasury, or with any bureau (other than the Comptroller of the Currency) or other organization in the Department of the Treasury, except for the rules entitled "Notice of appeal", "Request, preparation and submission," "Payment of claims", now contained in Part 533 of this title. Wherever the rules of the GSA Board in Part 533 of this title refer to the General Services Administration (or GSA) or the Administrator or the General Counsel, GSA, there shall be substituted the terms Department of the Treasury, the Secretary or the General Counsel,

Department of the Treasury, respectively. (Formerly 41 CFR 10–60.200.)

1033.072 Notice of appeal.

1033.072–1 Filing.

A notice of appeal must be in writing, and shall be filed with the office of the contracting officer from whose decision the appeal is taken. The notice of appeal must be mailed or otherwise filed with the contracting officer within the time specified therefor in the contract, or as allowed in applicable provisions of regulation or law. (Formerly 41 CFR 10–60.201–1.)

1033.072–2 Forwarding of appeals.

When a notice of appeal in any form has been received by the contracting officer, he or she shall endorse thereon the date of mailing and the date of receipt (or the date of receipt only, if otherwise conveyed) and within 20 days shall forward said notice of appeal, together with the envelope in which same was enclosed, to the Board with a copy to the General Counsel, Department of the Treasury, Washington, DC 20220. Following receipt by the Board of the original notice of appeal (whether through the contracting officer or otherwise), the contractor, the contracting officer, and the General Counsel, Department of the Treasury, will be advised promptly thereof, and the contractor will be furnished a copy of the Board's rules. (Formerly 41 CFR 10–60.201–2.)

1033.073 Appeal file.

Following receipt of a notice of appeal, the contracting officer shall promptly, and in any event within 30 days, compile and transmit to the General Counsel, Department of the Treasury, two (2) copies of the appeal file as prescribed in Part 533 of this title. The General Counsel will submit the appeal file to the Board as promptly as possible after receipt of the Board's request therefor, and in any event so as to reach the Board within 45 days after such receipt. (Formerly 41 CFR 10–60.202.)

1033.074 Treasury representation before the General Services Administration Board of Contract Appeals.

The General Counsel of the Department of the Treasury will assure representation of the interests of the Government in proceedings before the General Services Administration Board of Contract Appeals. All officers and employees of the Department of the Treasury will appear and give testimony as required and will cooperate with the General Services Administration Board of Contract Appeals and Government counsel in the processing of appeals so as to assure their speedy and just determination. (Formerly 41 CFR 10–60.203.)

1033.075 Effective date.

The regulations in 1033.070–1033.075 are effective on April 1, 1984. The regulations in this part shall apply to all cases now pending or in which appeal from the contracting officer's decision is taken on or after the effective date. (Formerly 41 CFR 10–60.204.)

David E. Pickford,

Acting Assistant Secretary (Administration).

BILLING CODE 4810-25-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 4100

Grazing Administration, Exclusive of Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule correction.

SUMMARY: A final rulemaking amending the regulations in Part 4100 of Title 43 of the Code of Federal Regulations regarding grazing on public lands was published in the **Federal Register** on February 21, 1984 (49 FR 6440). The publication contained a number of errors which are corrected by this notice.

ADDRESS: Any inquiries or suggestions should be sent to: Director (220), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Alexander (202) 653–9210; or Mr. Richard Miller (202) 343–8735.

SUPPLEMENTARY INFORMATION: The corrections are as follows:

1. On page 6449, right column, § 4100.0–2, item 2, is corrected by removing the semicolon following the words "public lands" and replacing it with a comma, and by removing the semicolon following the words "public range" and replacing it with a comma.

2. On page 6449, right column, § 4100.0–3(d) item 3.c, is corrected by inserting a closing parenthesis following the citation "118(d)" where it appears, and correcting item d. by removing the period at the end of the first sentence in paragraph (e) and replacing it with a semicolon followed by the word "and".

3. On page 6450, left column, § 4110.0–5, item f, is corrected by removing it. As discussed in the preamble, item f was replaced in final rulemaking by a new definition of "consultation, cooperation and coordination," found at item h. The proposed revision was inadvertently retained in the final rulemaking.

4. On page 6450, center column, § 4100.0–5, is corrected by inserting the word "and" following the word "shelf" where it appears.

5. On page 6450, right column, § 4110.3–1(c), item 11.b., is corrected by removing the citation "§ 4110.5" where it appears and replacing it with the citation "§ 4130.1–2".

6. On page 6451, center column, § 4110.4–2(b), is corrected in line 6 by removing the comma and inserting a parenthesis preceding the word "national" where it first appears and closing the parenthesis following the word "etc.", and the word "waver" in line 13 is corrected to read "waiver".

7. On page 6452, center column, § 4120.3–3(b), is corrected by removing the word "improvement" where it first appears and replacing it with the word "improvements".

8. On page 6452, center column, § 4120.3–3(c), is corrected by removing the words "or wells" where they first appear.

9. On page 6452, center column, § 4120.3–6(b), is corrected by inserting the word "or" following the word "objectives" where it appears.

10. On page 6453, left column, § 4130.1–1(a), is corrected by removing the word "affecting" where it appears in the first sentence and replacing it with the word "affected" and removing the word "required", where it appears in the second sentence and replacing it with the word "require".

11. On page 6453, left column, § 4130.1–2(c), is corrected by removing the word "applicants," and replacing it with the word "applicant's".

12. On page 6453, left column, § 4130.2(a), is corrected by removing the semicolon following the word "title" and replacing it with a period.

13. On page 6453, center column, § 4130.5(b), is corrected by removing the word "and" following the word "bulls", inserting a period following the word "sanitation" and removing the semicolon and the word "and" and replacing it with a period.

14. On page 6453, right column, § 4130.6–2, is corrected by placing the following paragraphs immediately following paragraph (d):

"(e) The kinds of indigenous animals authorized to graze under specific terms and conditions;

"(f) Provision for livestock grazing to be temporarily delayed, discontinued or modified to allow for the reproduction,

establishment, or restoration of vigor to plants, or to prevent compaction of wet soils, such as where delay of spring turnout is required because of weather conditions or lack of plant growth; and

"(g) The percentage of public land use determined by the proportion of livestock forage available on public lands within the allotment compared to the total amount available from both public lands and those owned or controlled by the permittee or lessee."

15. Beginning on page 6453, right column, § 4130.6–3 (e), (f), and (g) are removed in their entirety.

16. On page 6454, left column, § 4130.7–2(b) is corrected by removing the word "amount" where it appears and replacing it with the word "among".

17. On page 6454, center column, § 4130.7–3, is corrected by adding a closing parenthesis to the citation "(43 U.S.C. 1734(a)".

18. On page 6454, right column, § 4150.4–2, is corrected by inserting the word "or" before the figure "§ 4150.4–1(c)" where it appears.

19. On page 6455, left column, § 4160.3(c), is amended by placing a period after the word "appeal" in the third sentence and deleting the remainder of the sentence. As presently written, the final words of this sentence refer to paragraphs 4160.3 (d) and (e) which are deleted by the final rulemaking at page 6455, center column, item 45 c.

20. On page 6454, right column, § 4160.1–1 inserted a new second sentence that should have replaced the second sentence of the existing regulation. The second sentence of section 4160.1–1 is removed because it is inconsistent with the new sentence.

21. On page 6455, center column, item 46, is corrected by inserting the words "or lessee" following the word "permittee".

Dated: March 27, 1984.

Leona A. Power,

Acting Assistant Secretary of the Interior.

[FR Doc. 84–8531 Filed 3–29–84; 8:45 am]

BILLING CODE 4310–84–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 97

Restrictions on Amateur Service Use of the 1900–2000 kHz Band Imposed Due to LORAN–A Operations.

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission amends Parts 2 and 97 of its Rules to remove restrictions on Amateur Service use of the 1900–2000 kHz band which were imposed due to LORAN–A radiolocation operations. This action eliminates provisions now obsolete because of discontinued LORAN–A operations.

EFFECTIVE DATE: March 27, 1984.

FOR FURTHER INFORMATION CONTACT:

Mr. Fred Thomas, Office of Science and Technology, 2025 M Street, NW., Washington, D.C. 20554, (202) 653–8171.

List of Subjects

47 CFR Part 2

Frequency allocations.

47 CFR Part 97

Radio.

Order

In the Matter of Amendment of Parts 2 and 97 to remove restrictions on Amateur Service use of the 1900–2000 kHz band due to LORAN–A operations.

Adopted: March 22, 1984.

Released: March 27, 1984.

By the Commission.

1. In General Docket 80–739, Implementation of the 1979 World Administrative Radio Conference (FCC 83–511, 49 FR 2357), footnote NG15 to the Table of Frequency Allocations contained in Section 2.106 was modified to provide continued protection from harmful interference to Canadian LORAN–A radiolocation operations in the 1900–2000 kHz band until January 1, 1984. There is no reason to continue protection to the Canadian LORAN–A radiolocation operations, as they were discontinued on December 31, 1983. Therefore, this Order modifies the Table of Frequency Allocations by removing footnote NG15 and by modifying footnote US290, which makes reference to footnote NG15. Further, Part 97, governing the Amateur Radio Service, is also modified to remove restrictions on amateur use which were imposed to protect the LORAN–A operations. The appropriate modifications to Parts 2 and 97 are listed in the Appendix.

2. Because this amendment simply removes obsolete restrictions on spectrum use and is to the benefit of FCC licensees, compliance with the prior notice and effective date provisions of the Administrative Procedure Act (5 U.S.C. § 553) is unnecessary.

3. Accordingly, It is ordered, that effective March 27, 1984, §§ 2.106, 97.61 and 97.185 are amended as set forth in the Appendix. Authority for this action is contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

4. For further information about this item contact Fred Thomas, (202) 653–8171.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 2 and 97 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—[AMENDED]

A. Part 2 Frequency Allocations and Radio Treaty Matters; General Rules and Regulations.

1. Section 2.106 is amended by removing footnote designation NG15 at column 5 for the 1900–2000 kHz band, by removing the text of footnote NG15 in its entirety from the list of footnotes following the Table of Frequency Allocations and by revising the text of footnote US290 at the list of footnotes following the Table of Frequency Allocations.

§ 2.106 Table of Frequency Allocations.

UNITED STATES TABLE

Government	Non-Government
Allocation kHz (4)	Allocation kHz (5)
* * * * *	
1900–2000 RADIOLOCATION US290	1900–2000 RADIOLOCATION US290

* * * * *

US290 In the band 1900–2000 kHz amateur stations may continue to operate on a secondary basis to the radiolocation service, pending a decision as to their disposition through a future rule making proceeding in conjunction with the implementation of the standard broadcasting service in the 1625–1705 kHz band.

* * * * *

PART 97—AMENDED

B. Part 97 Amateur Radio Service.

1. Section 97.61 is amended by amending paragraph (a) by changing the first entry in the table to read 1800–2000, by removing the second entry in the table in its entirety, and by removing the texts of paragraphs (b)(1) and (b)(2), while reserving their paragraph designators.

§ 97.61 Authorized frequencies and emissions.

(a) * * *

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1-192]

Organization and Delegation of Powers and Duties; Emergency Preparedness Functions of the Maritime Administration

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Final rule.

SUMMARY: This amendment revokes the separate delegation to the Maritime Administration (MarAd) to carry out defense mobilization and emergency preparedness functions, since MarAd has now been integrated into DOT's general plan for defense mobilization and emergency preparedness of all civilian transportation.

DATE: The effective date of this amendment is March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, C–50, Department of Transportation, Washington, DC (202) 426–4723.

SUPPLEMENTARY INFORMATION: Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register**.

When MarAd was transferred to DOT from the Commerce Department in 1981, the existing delegation to MarAd to conduct defense mobilization and emergency preparedness was left in force pending integration of MarAd's responsibilities into the DOT-wide plan for defense mobilization and emergency preparedness of all United States civilian transportation. This plan is carried out for the Secretary by the Office of Emergency Transportation in the Research and Special Programs Administration; that office has completed the integration of MarAd into its DOT-wide plan and there is no longer any reason for a direct delegation to MarAd.

List of Subjects in 49 CFR Part 1

Authority delegations (government agencies); Organization and functions (government agencies).

PART 1—[AMENDED]

§ 1.66 [Amended]

In consideration of the foregoing, § 1.66 of Part 1 of Title 49, Code of Federal Regulations, is amended by removing paragraph (p).

Authority: 49 USC 322.

Issued in Washington, DC, on March 15, 1984.

Elizabeth Hanford Dole,
Secretary of Transportation.

Proposed Rules

Federal Register
Vol. 49, No. 63
Friday, March 30, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Parts 332 and 337

Check-Guaranty and Credit Card; Sponsorship Programs

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Withdrawal of proposed rulemaking.

SUMMARY: The Federal Deposit Insurance Corporation (the "FDIC") hereby gives notice that it has withdrawn its outstanding proposed rule published on June 12, 1981 (46 FR 31018) that would have specifically authorized nonmember insured banks to conduct check-guaranty and credit card sponsorship programs, subject to fixed limitations on risk. The proposal, which was intended to remove an uncertainty concerning the applicability of existing regulatory proscriptions to these programs, is being withdrawn because of its stale date. The FDIC is currently considering a new proposal which would have the same effect as the June 12, 1981 proposal and which reflects commentary received as a result of the earlier proposal.

DATE: The withdrawal is effective March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Ms. Janis R. Blake, Attorney, Legal Division, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, D.C. 20429, (202) 389-4271.

By Order of the Board of Directors, March 26, 1984.

Federal Deposit Insurance Corporation.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 230 and 240

[Release Nos. 33-6519; 34-20785; File No. S7-12-84]

Electronic Filing, Processing and Information Dissemination System

AGENCY: Securities and Exchange Commission.

ACTION: Solicitation of comments.

SUMMARY: The Commission today is publishing a release requesting indications of interest from companies in participating in a pilot electronic filing, processing and information dissemination system. The judgment and experience of companies participating in the pilot operation will influence the development and specifications of the system. The release includes a questionnaire directed to potential participants in the pilot which is designed to provide the Commission with information necessary to implement the pilot. The Commission expects experience with the pilot system to assist it in the creation of an operational electronic filing, processing and dissemination system which will permit corporations to make their required filings electronically and allow investors, securities analysts and the public to instantly access such information on home and business computer screens. The Commission also is soliciting comments from securities analysts and other potential users of the electronic disclosure system.

DATE: Comments and questionnaires should be received on or before May 11, 1984.

ADDRESS: Comments and questionnaires should be addressed in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. All comment letters should refer to File No. S7-12-84. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Herbert Scholl (202) 272-2589, Division of Corporation Finance, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is seeking volunteer registrants to participate in a pilot electronic disclosure system, designated "EDGAR" for Electronic Data Gathering, Analysis and Retrieval, which will begin in September 1984. The pilot program's equipment specifications and processing systems will be based, in large part, on the information derived from the response to the attached questionnaire. Accordingly, only those registrants which complete the questionnaire will be eligible to file electronically during the pilot period. Therefore, all registrants who are potentially interested in participating are urged to complete the questionnaire.

The remainder of this release sets forth background on the development of EDGAR, information concerning the pilot program, a questionnaire to be completed by potential participants and a solicitation of comments from other registrants and potential users of the electronic disclosure system.

I. Background

Technological developments have revolutionized information analysis and distribution in the financial community. The traditional paper-supported system of data processing and reporting is being replaced by sophisticated electronic communication and data management systems. Computer literacy, instant data retrieval and electronic mail are having a profound impact on information gathering and dissemination.

The Commission has studied these developments with great interest. It has recognized for some time that the potential use of the information contained in corporate filings has not been fully realized by analysts or investors. With the adoption of the integrated disclosure system, which provides for a uniform disclosure system under the Securities Act of 1933 and the Securities Exchange Act of 1934,[1] a new data base framework for filed information has been created. The Commission is committed to providing the public with convenient and immediate access to this data base.

Accordingly, the Commission has formed a Computer Task Force with the purpose of determining, in conjunction

[1] Release No. 33-6383 (March 3, 1982) [47 FR 11380].

with the Mitre Corporation,[2] the most effective and efficient means of using computer technology to improve the receipt, storage, review and dissemination of filed information. The Task Force is seeking to develop the requirements for the EDGAR operational system, which will permit registrants to make their required filings electronically, provide investors with instant access to Commission information on their computer screens, and provide the Commission with the capability to process and analyze filings on an electronic basis. Such a system should reduce registrants' costs, improve the dissemination of information to investors and accelerate Commission reviews.

II. Pilot Program

In furtherance of these objectives, a "request for proposals" (RFP) has been issued seeking proposals from contractors to install and support a pilot program to test electronic filing, processing and dissemination on a limited basis.[3] The solicitation period closed on March 9 and the Commission anticipates award of the contract in May.

The Commission is establishing a pilot branch within the Division of Corporation Finance. The branch will begin processing and reviewing electronic filings in September 1984. The number of filings being processed electronically will increase as familiarity with the new system develops. When the pilot program is fully operational, the Commission anticipates that up to 1,000 registrants will be able to participate.[4]

The pilot branch also will evaluate various decision support systems (including data base access) and office automation tools, as well as test new automated selective review techniques. The judgment and experience of the participation companies and the Commission with the pilot operation will determine, in large part, the configuration of the fully operational system.

The Commission therefore is seeking volunteer companies will file their required disclosure documents electronically. The potential savings and efficiencies provided by electronic filing should be attractive to many registrants, and the Commission encourages registrants to take advantage of these benefits. Limitations on filing formats and graphics will be kept to a minimum during the test period.

In order to provide the Commission with the information necessary to establish the pilot, interested companies are requested to fill out the attached two part questionnaire. The first part provides general information about the registrant and the name of the person to contact for further information. The second part requests information on potential cost savings and technical data, such as requirements for electronic filing and computer storage capacity, which the Commission will use in developing the system's technical specifications.

After the Commission evaluates the responses to the questionnaire, it will contact registrants directly to explore more fully the mechanics of participating in the pilot program.

The Commission recognizes that certain of its current rules and regulations concerning signatures, fee receipt and general filing requirements will need to be revised. Commentators are requested to suggest rules that may need revisions and to recommend specific changes. Following the award of the pilot contract, the Commission will take necessary steps to accommodate the pilot system.

III. Solicitation of Comments

The Commission also is requesting comments on EDGAR from potential users, such as securities analysts and investors, as well as from registrants who initially may not wish to participate in the pilot. The Commission is seeking specific information on the estimated annual dollar benefits which may accrue from the electronic system. Information on potential cost savings (printing, delivery, clerical, etc.), expedited delivery times and immediate information access for purpose of research, analysis, and investment decisions is sought. The Commission also is interested in (1) whether commentators would be willing to invest in hardware or software, assuming a reasonable cost, to view Commission filings on their computer screens; (2) whether the ability to analyze and compare individual data items (e.g., sales, income, names of directors, management's discussion and analysis) found in Commission filings, with or without additional software, is important to effective use of the system; and (3) if so, which items are important. Responses to these questions will aid the Commission as it constructs its system to meet the needs of investors and the business and financial communities.

By the Commission.

Dated: March 22, 1984.

George A. Fitzsimmons,
Secretary.

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Order denying rehearing.

SUMMARY: On January 6, 1984, the Federal Energy Regulatory Commission (Commission) issued Order No. 354, terminating fifteen rulemaking dockets. Order No. 354 withdrew two Notices of Proposed Rulemaking and denied 13 petitions for rulemaking.

The Commission received two timely requests to rehear Order No. 354 from Miles Laboratories, Inc., Docket No. RM82–22–001, and from Church and Dwight Company, Inc., Docket No. RM83–48–001. For exemptions from incremental pricing for citric acid (Miles) and sodium bicarbonate used in animal feed (Church and Dwight). In this order, the Commission denies these requests for rehearing.

DATE: This order denying rehearing is effective March 26, 1984.

FOR FURTHER INFORMATION CONTACT: Elizabeth Withnell, Office of the General Counsel, Rulemaking and Legislative Analysis, Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, D.C. 29428, (202) 357–8033.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is denying requests to rehear Order No. 354 [1] which were submitted by Miles Laboratories, Inc. (Miles), in Docket No. RM82–22–001, and by Church and Dwight Company, Inc. (Church and Dwight), in Docket No. RM83–48–001. Order No. 354 among other actions, denied petitions for rulemaking filed by the two companies requesting exemptions from incremental pricing for citric acid (Miles) and sodium bicarbonate used in animal feed (Church and Dwight).

[1] Termination of Rulemaking Dockets, Docket No. RM79–50–000, *et al.*, issued Jan. 6, 1984, 49 FR 1525 (Jan. 12, 1984).

II. Discussion

A. Miles Laboratories, Inc.

Miles Laboratories, Inc. is one of two manufacturers of citric acid. Miles petitioned the Commission to exempt the boiler fuel use of natural gas to manufacture citric acid, arguing that production of this chemical is food processing exempt from incremental pricing surcharges under section 206(b) of the Natural Gas Policy Act (NGPA), 15 U.S.C. 3346(b) (1981).[2] In Order No. 354, the Commission denied the petition. The Commission noted that Miles had failed to file its request for exemption by the date the Commission had set for consideration of agricultural exemptions under section 206(b) of the NGPA. The Commission was also not convinced that the exemption should be granted in any case because citric acid is not a food and therefore its production is not food processing, as that term is used in the Commission's regulations. Nothing in Miles' rehearing request persuades the Commission to change this view.

Miles disputes the Commission's authority to establish a date by which petitions for exemptions had to be filed, arguing that the NGPA requires the Commission to exempt any agricultural use. The Commission believes that its decision to require the filing of requests for exemption by a date certain fully comports with its Congressional grant of discretion to administer the incremental pricing program.[3] The Commission has initiated five separate rulemaking proceedings regarding the scope of exemptions under section 206 of the NGPA, spanning a period of nearly three years.[4] The Commission has not foreclosed the possibility of granting additional exemption requests. It nevertheless believes that those filing petitions asking the Commission to initiate a new rulemaking docket on agricultural exemptions must provide clear evidence that would warrant committing additional agency resources to this area. Miles has not sustained that burden. In any case, the Commission's decision to deny Miles' petition for rulemaking was not predicated solely on Miles' delay in filing its request, but primarily on the Commission's view that citric acid is a chemical additive and not a food and therefore its manufacture is not food processing.

The Commission has decided that the constituent chemicals that may eventually be combined with other ingredients to form "food" must themselves be "food" prior to the act of being combined in order for their separate manufacture to be considered food processing. The fact that food may eventually result from the addition of chemicals or that the chemicals may eventually be considered as part of food does not mean that the chemical, by itself, is food. Citric acid is a chemical used in food in a variety of ways. Its manufacture, however, is not the manufacture of food and is therefore not food processing.[5]

Miles disagrees with this substantive finding. To support its position, the company notes that citric acid is listed in the *Food Chemical Codex (FCC)*, "an authoritative compilation of foods and food additives." The inclusion of citric acid in the *FCC*, however, does not make citric acid a food.

The *FCC* contains specifications for over 450 chemical additives that contribute to the appearance, flavor, preservation or other aspects of food. While some of these chemicals may themselves be regarded as food, it would be inappropriate under the law to exempt the manufacture of any these products simply by virtue of their inclusion in the *FCC*.

The company also argues that the Commission's distinction between organic chemicals added to food and discrete food substances, such as spices, "does not withstand analysis because many organic chemicals which the Commission regards as food are chemical additives." The Commission regards as "food" those items that are generally considered by the industry to

[2] Section 206(b) exempts agricultural users of natural gas from surcharges designed to recoup increases in the average cost of natural gas. Agricultural uses of natural gas include gas used for agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping or crop drying. 15 U.S.C. 3346(b)(3)(A) (1982).

[4] Regulations Implementing the Incremental Pricing Provisions of the Natural Gas Policy Act of 1978, Docket No. RM79–14–000 issued Sept. 28, 1979 (Order No. 49), 44 FR 57726 (Oct. 5, 1979); Agricultural Uses Exemption; Interim Rule Amending Commission's Regulations under the Natural Gas Policy Act of 1978, Docket No. RM80–75–000, issued Oct. 6, 1980, 45 FR 67276 (Oct. 9, 1980); Definition of Agricultural Use; Incremental Pricing; Final Rule, Docket No. RM80–48–000, issued Dec. 5, 1980 (Order No. 114), 45 FR 82915 (Dec. 17, 1980); Incremental Pricing; Final Rule, Docket No. RM80–18–000, issued Sept. 24, 1981 (Order No. 177), 46 FR 50000 (Oct. 9, 1981); Definition of Agricultural Use, Docket No. RM81–17–000, issued Nov. 16, 1981, (Order No. 189), 46 FR 57469 (Nov. 24, 1981).

[5] *See also* Definition of Agricultural Use; Incremental Pricing; Final Rule, Docket No. RM80–48–000, issued Dec. 5, 1980, (Order No. 114), 45 FR 82915 (Dec. 17, 1980) (the processing of agricultural products and by-products does not constitute food processing).

be food and are so classified by the Office of Management and Budget (OMB) in its *Standard Industrial Classification Manual (SIC Manual)*.[6] In the *SIC Manual*, citric acid is not a food. Recognizing that the *SIC Manual* is not the only source of information on what is food, the Commission also classifies as "food" those items that are commonly considered food.

Spices are listed as food preparations in the *SIC Manual* (SIC. Code 2099 Miscellaneous Food Preparations and Kindred Products, Food Preparations, Not Elsewhere Classified). Spices are also the kind of products commonly regarded as food. Although they are added to foods, they are also sold separately as discrete products. Monosodium glutamate, which the Commission also regards as food, is not categorized as food by the *SIC Manual* but, like spices, it is a discrete product that is available separately from the products in which it may be used.[7] Citric acid is not a discrete product like spices that is available separately from the food products in which it is used.[8]

Finally, Miles points out that granting the company the requested exemption would have only very narrow implications. The Commission disagrees. A large number of chemicals used in food potentially could be exempt from incremental pricing under Miles' definition of food processing. The Commission's decision to draw the line at seasonings akin to spices reflects its view that at some point in the food production chain the manufacture of a substance becomes sufficiently attenuated to lose its distinction as a food. The Commission believes that the manufacture of citric acid is at this point. Miles' request for rehearing accordingly is denied.

B. Church and Dwight Company, Inc.

Church and Dwight Company, Inc. produces sodium bicarbonate which is used to adjust the content of the rumen of cattle in order to increase feed efficienty. Church and Dwight petitioned the Commission to exempt the boiler fuel use of natural gas in the production of sodium bicarbonate because, in their view, the substance is an animal feed. The Commission denied the petition in Order No. 354 on the basis that sodium bicarbonate is a non-feed ingredient added to animal feed, the primary purpose of which is not to provide nutrition but to promote the conversion of animal feed. The company disputes the Commission's decision.

When the Commission issued the final rule exempting from incremental pricing the boiler fuel use of natural gas in the manufacture of animal feed,[9] sodium bicarbonate was not included as an exempt animal feed. Church and Dwight argues that because it filed comments in the docket and because those comments were not cited in the Commission's final rule, its exclusion could only have been accidental. The Commission considered all comments submitted and arguments made before issuing its final rule. Nevertheless, the Commission wishes to point out that if Church and Dwight believed a clarification of the Commission's decision was necessary, the time to request such a clarification was during the statutory rehearing period following issuance of the final order. Church and Dwight, however, did not request rehearing.

Church and Dwight makes reference to its compliance with unspecified Federal and state animal feed regulations. The implication of this reference is apparently that such compliance proves the company manufactures animal feed. The Commission disagrees. Because Church and Dwight produces a regulated component of animal feed does not prove that it is an animal feed manufacturer. In implementing the NGPA, the Commission has the responsibility to determine precisely which facilities qualify under the exemption categories in Section 206 of the NGPA.[10]

The company further contends that sodium bicarbonate is an important element in proper animal digestion and thus qualifies as an animal feed. In reaching the contrary conclusion, the Commission first consulted the *SIC Manual* for animal feed. Sodium bicarbonate is not listed under the SIC Code for Prepared Feeds and Feed Ingredients for Animals and Fowls (SIC Code 2048). The Commission also considered the information initially supplied by Church and Dwight about its product and has reexamined its decision in light of the additional statements the company provided in the rehearing request. Upon reconsideration, however, the Commission does not believe its original determination should be modified. Just as the Commission's exemption for food processing distinguishes between the processing of food and the processing of non-food substances that are used in foods, the Commission's exemption for animal feed is designed to distinguish between the manufacture of animal feed and the manufacture of non-feed components of that feed. Sodium bicarbonate falls in this latter category.

Church and Dwight's final contention is that the Commission's decision on their exemption petition is contrary to Congressional intent. Congress gave the Commission broad authority under section 206(d) of the NGPA to decide who should be covered by its exemption rules.[11] The Commission believes its decision to deny Church and Dwight an exemption fully comports with its statutory authority to define the scope of its discretionary exemptive rules. Accordingly, the company's request for rehearing of Order No. 354 is denied.

The Commission orders:

For the foregoing reasons, the Commission denies rehearing of Order No. 354 as requested by Miles Laboratories, Inc. in Docket No. RM82–22–001 and by Church and Dwight Company in Docket No. RM83–48–001.

By the Commission.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[6] The *SIC Manual*, while initially published as a government statistical tool, is now widely used by private industry. Office of Management and Budget, Standard Industrial Classification Manual 3 (1972).

[7] The same analysis holds true for naturally-occurring vitamins which also have an incremental pricing exemption for boiler fule used in their production.

[8] The Commission is not alone in distinguishing food on the basis of its availability as a discrete product. In determining that the use of natural gas to produce food-grade salt is an essential agricultural use, the Department of Agriculture used a similar analysis, which Miles quotes in its rehearing petition.

The NGPA does not permit distinction in determining the types of food products to be certified as essential agricultural uses. Instead, its language indicates that all food products are to be so certified. The production of food-grade salt should be included in the list of essential agricultural uses under section 401(f)(1)(A) because it is manufactured under food-grade standards for sanitation and cleanliness, is used as a food additive for preservative, and is sold in retail stores for food use. Proposed Amendment Regarding Certification of Essential Agricultural Uses and Requirements; Natural Gas Policy Act, 48 FR 23438, 23439 (May 25, 1983).

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1956

[Docket No. T–4]

Submission of the New York State Plan for Public Employees Only and Its Availability for Public Comment

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Proposed Initial State Plan Approval.

SUMMARY: This document gives notice of the submission by the New York Department of Labor of a State plan for the enforcement of occupational safety and health standards applicable to public sector (state and local government) employment only. After an opportunity for public comment, the Assistant Secretary of Labor for Occupational Safety and Health will approve the plan if it is determined that the plan meets the criteria set forth in the Occupational Safety and Health Act of 1970 and applicable regulations.

DATES: Written comments, data, views, and arguments on the proposal must be postmarked by April 30, 1984. Objections and requests for a hearing must be postmarked by April 30, 1984.

ADDRESSES: Written comments, objections and requests for a hearing should be submitted in quadruplicate, to the Docket Officer, Docket T–4 Room S–6212, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone (202) 523–7894.

Location of Plan for Inspection and Copying

A copy of the plan may be inspected and copied during normal business hours at the following locations: Docket Office, Docket T–4, U.S. Department of Labor, Occupational Safety and Health Administration, Third Street and Constitution Avenue, NW., Room S–6212, Washington, D.C. 20210; Office of the Regional Administrator, U.S. Department of Labor, Occupational Safety and Health Administration, 1515 Broadway (1 Astor Plaza) Room 3445, New York, New York 10036; State of New York Department of Labor, State Office Building Campus, Building 12, Room 579, Albany, New York 12226; Division of Occupational Safety and Health, State of New York Department of Labor, Room 6994, 2 World Trade Center, New York, New York 10047.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Public Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3637, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone (202) 523–8148.

SUPPLEMENTARY INFORMATION:

Authority

Section 18 of the Occupational Safety and Health Act of 1970 ("the Act," 29 U.S.C. 667) provides that a State which desires to assume responsibility for the development and enforcement of standards relating to any occupational safety and health issue with respect to which a Federal standard has been promulgated may submit a plan to the Assistant Secretary of Labor for Occupational Safety and Health ("Assistant Secretary") describing in detail the proposed program. Regulations promulgated pursuant to the Act at 29 CFR Part 1956 provide that a State may submit a State plan for the development and enforcement of occupational safety and health standards applicable only to employees of the State and its political subdivisions ("public employees"). Under these regulations the Assistant Secretary will approve a State plan for public employees if, in his judgment, the plan provides for the development and enforcement of standards relating to hazards in employment covered by the plan which are or will be at least as effective as in providing safe and healthful employment and places of employment for public employees as standards promulgated and enforced under section 6 of the Federal Act, giving due consideration to differences between public and private sector employment. In making this determination the Assistant Secretary will consider, among other things, the criteria and indices of effectiveness set forth in 29 CFR Part 1956, Subpart B.

Background

A State plan for the enforcement of occupational safety and health standards in New York was approved by the Assistant Secretary on May 14, 1973 (39 FR 13482; 29 CFR 1952.180 et seq.). This plan included coverage of private workplaces as well as a program for public employees. The plan was subsequently withdrawn effective June 30, 1975 under the authority of then Governor Hugh L. Carey (40 FR 27655). During 1980, the New York State legislature passed legislation, signed into law by the governor on June 30, 1980, which provided the basis for establishing a comprehensive occupational safety and health program applicable to the public employees in the State. This statute, the Public Employee Safety and Health Act (the "New York Act"), Chapter 729 of the Laws of 1980, became effective on December 29, 1980. Pursuant to the New York Act, the State formally submitted for Federal appoval a plan applicable only to public employees on February 11, 1982. In response to Federal review of the proposed State plan, supplemental assurances, and revisions, corrections and additions to the plan were submitted on March 4, 1984 and March 15, 1984.

Description of the Plan

The plan designates the New York Department of Labor as the State agency responsible for administering the plan throughout the State. The State has pledged to adopt within three months of initial plan approval all Federal standards promulgated as of July 1, 1983 and to incorporate future OSHA revisions in accord with 29 CFR 1953.21. The plan includes legislation, the Public Employees Safety and Health Act (Chapter 729 of the Laws of 1980),

passed by the New York legislature in 1980. Under that legislation the Industrial Commissioner (now Commissioner of Labor), head of the State of New York Department of Labor, has full authority to enforce and administer all laws and rules protecting the safety and health of employees of the State and its political subdivisions.

The plan includes provisions for the granting of permanent and temporary variances from State standards in terms substantially similar to the variance provisions contained in the Federal Act. The State provisions require employee notification of variance applications as well as employee rights to participate in hearings held on variance applications. Variances may not be granted unless it is established that adequate protection is afforded employees under the terms of the variance.

Section 5 of the New York Act provides for inspections of covered workplaces including inspections in response to employee complaints. If a determination is made that an employee complaint does not warrant an inspection, the complainant shall be notified, in writing, of such determination and afforded an opportunity to seek informal review of the determination. Additionally, section 5 of the New York Act provides the opportunity for an employer and employee representatives to accompany an inspector during an inspection for the purpose of aiding in the inspection.

The plan provides for notification to employees of their protections and obligations under the plan by such means as a State poster, and required posting of notices of violation. Section 10 of the New York Act provides for protection of employees against discharge or discrimination resulting from exercise of their rights under the State's Act in terms essentially identical to section 11(c) of the Federal Act.

The plan provides a scheme of enforcement for compelling compliance under which employers are issued notices of violation and orders to comply, for any violation of standards and orders. Such notices shall fix a reasonable time for compliance. Employers, employees and other affected parties may seek informal review with the Department of the notice of violation including the reasonableness of the abatement period, and/or may seek formal administrative review with the Industrial Board of Appeals. Judicial review of the decision of the Industrial Board of Appeals may be sought pursuant to Article 78 of New York's Civil Practice Law and Rules. The Commissioner of Labor may seek judicial enforcement (mandamus actions) of orders to comply by commencing a proceeding pursuant to Article 78 of the Civil Practice Law and Rules against non-complying employers.

Also included in the plan are provisions for right of entry for inspection, prohibition of advance notice of inspection and employers' obligations to maintain records and provide reports as required. Further the plan provides assurances of a fully trained, adequate staff, including 30 safety and 8 health compliance officers for enforcement inspections, and 10 safety and 12 health consultants to perform consultation services in the public sector. The State has also given satisfactory assurances of adequate funding to support the plan. 29 CFR 1956.10(g) requires that State plans for public employees provide a sufficient number of adequately trained and qualified personnel necessary for the enforcement of standards. The staffing requirements (or "benchmarks") for State plans covering both the private and public sectors are established based on the "fully effective" test established in *AFL–CIO* v. *Marshall,* 570 F.2d 1030 (D.C. Cir., 1978). There is some question whether this staffing test, and the complicated formula used to derive benchmarks for complete private/public sector plans, was intended, or is appropriate for application to, the staffing needs for public sector only plans. However, the State has given satisfactory assurance in its plan that it will meet the compliance staffing benchmarks established for public sector only coverage in accord with the 1980 benchmarks formula or any subsequent revisions thereto, and the schedule for their attainment, thereby meeting the requirements of 29 CFR 1956.10.

Although the New York Act sets forth the general authority and scope for implementing the New York Public Employee Only Plan, the plan is developmental under the terms of 29 CFR 1956.2(b), in that specific rules and regulations must still be adopted to carry out the plan and make it fully operative. The plan sets forth a timetable for the accomplishment of these and other developmental goals. This timetable addresses such general areas as the development of procedures governing enforcement, consultation, variances and review of contested cases in addition to development of a Field Operations Manual and various forms and instructions.

During the course of Federal review of the New York Plan, a number of issues were raised which in OSHA's judgment required further clarification by the State. By letter dated March 4, 1984, from Lee O. Smith, Deputy Commissioner of Labor for Legal Affairs, the State provided assurances that (1) the New York State Department of Labor has full and complete authority to promulgate and enforce occupational safety and health standards in regard to employees of the public schools of the various political subdivisions within the State, (2) that despite the existence of a 60 day period for contest of notices of violation, judicial enforcement for nonabatement may and will be sought, as appropriate, at the expiration of the abatement period specified in the notice of violation (which period is often less than 60 days), and (3) that the New York Department of Labor has the authority to enter without delay and at reasonable times public sector workplaces to investigate and inspect for occupational safety and health violations. In order to prevent any questions concerning the State's right of entry, the State has sought a legislative amendment to the Public Employee Safety and Health Act, through a bill introduced in the 1984 session of the New York State Legislature. The State further assures that should the State's position on any of these issues be successfully challenged, legislative amendment will be sought.

Public comment on the New York Public Employee Plan is hereby requested. Any interested person(s) who submit particularized written objections to federal approval of the proposed plan may request an informal hearing concerning the proposed plan or any part thereof. If the Assistant Secretary finds that substantial objections have been filed, a hearing may be held on the subjects and issues involved. The Assistant Secretary will consider all relevant comments, arguments and requests which are submitted. He will thereafter issue the decision on the approvability of the plan, which decision will be published in the **Federal Register.**

Regulatory Impact and Regulatory Flexibility Act Analysis

The proposed approval of the New York State Public Employee Plan is not a major action as defined by Executive Order No. 12291 as it will not have an annual effect on the economy of $100 million or more, cause major increases in costs or prices, or have any other significant adverse effects. By its own terms, the plan will have no effect on private sector employment, but rather, is limited to the State and its political subdivisions. Moreover, the New York legislation has been in effect since 1980, public sector employers have been

subject to its terms since that time, and accordingly no new obligations would be placed on public sector employers as a result of Federal approval of the plan.

For the same reasons, OSHA certifies pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) that this proposed initial approval will not have a significant adverse economic impact on a substantial number of small entities.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 166

[CGD 81–80B]

Shipping Safety Fairway Amendments, Gulf of Mexico

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to amend existing shipping safety fairways and to establish new fairway anchorages in the Gulf of Mexico. The safety fairway modifications and anchorages are necessary to provide for safe access routes in areas of high traffic density and offshore structures. This action modifies proposals which were published in a notice of proposed rulemaking on August 9, 1982 (47 FR 34432). Under authority of the Ports and Waterways Safety Act (33 U.S.C. 1223) the Coast Guard is proposing a new fairway at the mouth of the Mermentau River; a widening of the existing fairway at the entrance to Southwest Pass; and new fairway anchorages at Sabine Bank and Calcasieu Pass. The regulations governing shipping safety fairways (33 CFR Part 166) provide that offshore structures are not permitted within designated safety fairways, and are permitted within fairway anchorages only if the structures are two miles apart.

DATE: Comments must be reached on or before June 28, 1984.

ADDRESSES: Comments should be submitted to Commandant (G–CMC/44) (CGD81–80B), U.S. Coast Guard, Washington, D.C. 20593. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council, room 4402, between the hours of 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Christopher Young, Project Manager, or Commander Galen Siddall, Chief, Marine Information and Rules Branch, Office of Navigation (G–NSR–3), room 1418, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, D.C. 20593, telephone (202) 245–0108.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her name and address, identify this notice as CGD 81–80B, and give the reasons for the comment. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned; but one may be held at a time and place to be set in a subsequent notice if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will be beneficial to this rulemaking.

Drafting Information

The principal persons involved in drafting this rulemaking are: Mr. Christopher Young, Project Manager, Office of Navigation, and Lt. David Shippert, Project Attorney, Office of Chief Counsel.

Background

In 1978, the Ports and Waterways Safety Act (PWSA) was amended to authorize the Coast Guard to establish shipping safety fairways (Pub. L. 95–474; 92 Stat. 1473; 33 U.S.C. 1223(c)). Prior to this amendment fairways were established by the Corps of Engineers. Although the Coast Guard now designates the fairways, the authority to issue permits for structures remains with the Corps.

A shipping safety fairway is an area or corridor of a waterway where the right of navigation is paramount over other uses, and where no fixed structures are permitted. A fixed structure in a fairway would be considered an obstruction to navigation, and the Corps of Engineers will not issue a permit for the construction of a structure therein. The fairways exist to ensure that an obstruction free corridor is available during development and production of offshore resources. Although the proposed fairways will be indicated on navigation charts, the use of fairways by vessels is voluntary.

The authority to create a fairway may be exercised by the Coast Guard only after a study of potential traffic density and use conflicts has been conducted to determine the need for designated safe access routes for vessels proceeding to and from U.S. ports. The study for this rulemaking was initiated by a notice in the **Federal Register** in April 1979 (44 FR 22543, modified in 45 FR 7027). The study results for the ports along the Gulf of Mexico were published on October 8, 1981 (46 FR 49989).

The study concluded that new vessel traffic fairways are necessary at the mouth of the Mermentau River and at Southwest Pass, and that fairway anchorages are needed at Sabine Bank and Calcasieu Pass. Before these findings could be implemented, it was necessary that Gulf fairways already established by the Corps of Engineers be adopted by the Coast Guard. This was accomplished by a Final Rule published in the **Federal Register** on May 13, 1982 (47 FR 20589). That action adopted the Corps' regulations with no substantive changes and the regulations formerly found at 33 CFR 209.135 are now contained in 33 CFR Part 166.

On August 9, 1982, the Coast Guard published a notice of proposed rulemaking to amend 33 CFR 166. That NPRM included editorial changes to Part 166, as well as specific proposals to add new fairways and anchorages in the Gulf of Mexico. Several comments were received which caused the Coast Guard to reevaluate the proposed fairways and anchorages. A Final Rule was published on June 30, 1983 (48 FR 30108), to promulgate only the editorial changes to Part 166. The present Supplementary NPRM contains the proposed amendments to specific fairways and anchorages. In drafting it, the Coast Guard has considered the comments received on the NPRM as well as newly available information such as the results

of the Outer Continental Shelf (OCS) lease sale for the Gulf of Mexico held on May 30, 1983.

Discussion of Proposed Regulations

The following discussion describes the proposals to establish specific safety fairways and fairway anchorages, with particular reference to changes made in response to comments on the NPRM published on August 9, 1982. Of eight comments received, one expressed concerns which were relevant to the Final Rule published on June 30, 1983, and addressed therein (48 FR 30109). Three commenters expressed support for the proposals as enhancements of navigation safety. Four comments identified specific objections to the proposed locations of new anchorages or fairways. Comments received on each proposal are addressed in the following discussion of the affected areas.

1. Sabine Bank/Port Arthur Anchorages

As in the original NPRM (August 9, 1982), it is proposed that two new fairway anchorages be established in the vicinity of Sabine Bank, adjacent to the existing Sabine Pass Safety Fairway in the approach to Sabine Lake and Port Arthur, Texas (as described in 33 CFR 200(d)(12)). One anchorage will be available to general cargo vessels, while the other will be designated for vessels carrying Liquefied Natural and Petroleum Gas (LGN/LPG). These anchorages are intended to improve navigation safety by providing areas where vessels may anchor during periods of reduced visibility or during times when scheduling of port facilities or pilot services causes a delay in arrival. The Sabine Bank/Port Arthur area is a major petrochemical area with a volume of vessel traffic which warrants the designation of fairway anchorage areas. Siting of structures in these anchorage areas will be governed by the spacing limitations described in 33 CFR 166.200(c).

The general anchorage will encompass an area approximately one and one-half miles by two miles. Although one commenter asserted that the proposed location overlapped a leased block, a review of the charts indicates that only unleased blocks 155, 156 and 162 in the West Cameron Area, West Addition, would be affected. Therefore, there is no change to the description as proposed in the NPRM.

The LNG/LPG anchorage will encompass an area approximately one and one-half miles by two and one-half miles. As originally proposed in the NPRM, this anchorage would have occupied portions of West Cameron Area, West Addition lease blocks 295, 296, 297 and 298. As observed by one commenter, a 12" pipeline lies approximately 800 feet to the northwest of the northwest corner of the proposed location. No other conflicts with the proposal have been identified. If the anchorage is shifted so that its northern boundary coincides with the northern boundary of blocks 297 and 298, the pipeline would clear the anchorage by approximately 1,000 feet, a more comfortable margin for navigation safety purposes. The area lost to this shift can be regained by moving the southern boundary of the proposed anchorage south to coincide with the southern boundary of blocks 297 and 298. The appropriate changes have been made in the geographical descriptions in the regulations proposed below.

As a consequence of these new anchorage areas, the existing Sabine Pass Anchorage area, described at 33 CFR 166.200(d)(13)), would be renumbered as 33 CFR 166.200(d)(13)(i).

2. Calcasieu Pass/Lake Charles Anchorage

As in the NPRM published on August 9, 1982, it is proposed that a new fairway anchorage be established adjacent to the existing Calcasieu Pass Safety Fairway in the approach to Calcasieu Lake and the port of Lake Charles, Louisiana (described at 33 CFR 166.200(d)(15)). This anchorage will be designated for vessels carrying LNG/LPG and will encompass an area approximately three and one half miles by two miles. The volume of deep draft vessels and the operations of LNG/LPG facilities in the area have created a need for a new anchorage area in the interest of navigation safety.

Siting of structures in this anchorage will be governed by the spacing limitations described at 33 CFR 166.200(c).

The proposed anchorage described in the August 1982 NPRM lies within the West Cameron Area. Two commenters objected to the location of this proposal as interfering with leased blocks. It appears that blocks 203, 204, 213 and 214 would be affected by the original proposal. Also, a 20" pipeline crosses block 213 from its southeast to northwest corners. Permits for this pipeline were issued in May 1981. Although any lease right awarded after April 1979 is subject to the results of the Coast Guard Port Access Route Study initiated at that time, a review by the Coast Guard indicates that the interests of navigation safety can be accommodated by locating the anchorage approximately 14 miles farther south along the western boundary of the Calcasieu Pass Fairway. In consultation with the Minerals Management Service, it was determined that blocks 257, 258 and 267 in the West Cameron Area, and block 366 in the West Cameron West Addition Area contained the closest area to shore free of structures, pipelines, leases and sanctuaries. Additionally, the MMS examined formation surveys and noted that the structure of the formation in these blocks is unlikely to bear hydrocarbons. Local Coast Guard officials in Port Arthur found that the increased distance offshore was acceptable to the pilots. The appropriate changes have been made in the geographical descriptions in the regulations proposed below.

As a consequence of this new anchorage, the existing Calcasieu Pass Anchorage Area would be designated as a general anchorage and would be renumbered as 33 CFR 166.200(d)(16)(i).

3. Mud Lake Fairway

As in the August 1982 NPRM, it is proposed that a new fairway be established at the channel entrance to Lower Mud Lake. This fairway would be approximately two miles wide and one and one half miles long to ensure obstruction free access to the channel which is in steady use by offshore crew boats and fishing vessels. In essence, it will replace the fairway which was located at the entrance to Mermentau River. After determining that vessel traffic uses this channel rather than Mermentau River to gain access to Mud Lake, the Corps of Engineers deleted the Mermentau River fairway from its regulations [33 CFR 209.135(d)(17)] on October 29, 1981 (46 FR 53408). This was prior to the Coast Guard adoption of the corps' fairway regulations on May 13, 1982 (47 FR 20580). The proposed fairway would be inserted at 33 CFR 166.200(d)(17). No comments were received regarding the Mud Lake Fairway as proposed in the NPRM, and no change is made in the geographical description in the proposed regulations below.

Currently there are two pipelines crossing the area of this proposed fairway: A 20" pipeline buried to a depth of 7 feet below the mudline; and a 12" pipeline buried to a depth of 3 feet. There is also a small production platform south of the end of the proposed fairway. However, the pipelines that cross the area have not interfered with a safe access for vessel traffic to or from Lower Mud Lake (crew boats, fishing vessels and recreational boats). In the event anchoring was required within the fairway, the anchors generally used aboard the small vessels

that ply these waters should pose little threat to the integrity of the pipelines located under it.

The presence of the production platform off the southeast end of the fairway does not present a significant obstruction to vessel movement in the fairway. The vessels that operate in and out of Lower Mud Lake handle sufficiently well to avoid the structure, and the new fairway will provide sufficient distance for lining up in a direct approach to the channel. Additionally, contacts with leaseholders in the area indicated no impact on their operations from the proposed fairway.

4. Southwest Pass Fairways and Anchorage

As in the August 1982 NPRM, it is proposed that the existing Southwest Pass (Mississippi River) Safety Fairway and anchorage (33 CFR 166.200(d) (28) and (29)) be amended by expanding a portion of the fairway and reducing the size of the anchorage at the entrance to Southwest Pass. However, where the NPRM originally proposed expansion of the fairway both to the west and to the east, the current proposal is to expand the fairway only to the East, with resulting changes in the anchorage area.

The proposed changes to the Southwest Pass fairway are intended to establish a greater obstruction-free maneuvering area for taking on and letting off pilots near the sea buoy. Pushing the anchorage area to the east will reduce confusion between anchored vessels and vessels maneuvering for a pilot.

The proposed westward triangular expansion of the fairway near the mouth of Southwest Pass would have moved the fairway into West Delta Area lease block 109 where an 8" oil pipeline is located. This pipeline currently runs south to north parallel to the existing western fairway boundary. The pipeline is 1000 feet away from the boundary and it is buried to a depth of 4 feet below the mudline.

Three commenters expressed concern about including this pipeline within the fairway limits. After reviewing the comments and the totality of circumstances affecting navigation in the area, the Coast Guard has concluded that the limited benefit to navigation in increasing the fairway slightly to the west is outweighed by the concern for safety of the pipeline or the cost of having it reburied to a safer depth below the mudline. Therefore, only the expansion of the fairway to the east, with resulting changes to the anchorage area, are proposed at this time. The appropriate changes have been made in the geographical descriptions in the regulations proposed below.

Regulatory Evaluation

Although shipping safety fairways interfere with the direct exploration for and production of oil and gas on the Outer Continental Shelf, and fairway anchorages limit how closely platforms may be situated, there is no indication that the acreage involved in the proposed regulations will obstruct OCS development. Indeed, the Coast Guard, in revising the original proposals, has minimized each identifiable cost impact while also satisfying the needs of safe navigation.

As explained in the NPRM, in circumstances where the Coast Guard is convinced that fixed structures must be placed in an area designated as a fairway to gain access to significant quantities of oil or gas, and that navigation safety would not be jeopardized by a modification of that fairway, a request would be given the appropriate consideration in accordance with the Ports and Waterways Safety Act (PWSA), and rulemaking procedures. In many cases a fairway modification will require a PWSA port access study before rulemaking can be commenced.

These proposed regulations are considered to be nonmajor under Executive Order 12291 and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). There are no costs associated with the proposed new fairways and anchorages. These designations will contribute to navigation safety without interfering with development of the OCS. The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 166

Marine safety, Shipping safety fairways, Anchorage areas.

PART 166—SHIPPING SAFETY FAIRWAYS

In consideration of the foregoing, the Coast Guard proposes to amend Title 33 of the Code of Federal Regulations Part 166 as follows:

In Section 166.200, paragraphs (d)(13), (d)(16), (d)(17), (d)(28) (i) and (ii), and (d)(29) are revised and introductory text is added to paragraph (d) to read as follows: **§ 166.200 Areas in the Gulf of Mexico.**

* * * * *

(d) *Designated Areas.* All geographical positions in the following designations are North Latitude and West Longitude.

* * * * *

(13) *Sabine Pass Anchorage areas*—(i) *Sabine Pass Anchorage Area.* The area enclosed by rhumb lines joining points at:

Latitude	Longitude
29°37'32"	[illegible]
29°37'32"	[illegible]
29°32'52"	[illegible]
29°36'28"	93°47'14"
[illegible]	[illegible]

(ii) *Sabine Bank General Anchorage Area.* The area enclosed by rhumb lines joining points at:

Latitude	Longitude
29°26'06"	[illegible]
29°26'06"	[illegible]
29°24'06"	[illegible]

(Sec. 4(c), Pub. L. 95–474, 92 Stat. 1473 (33 U.S.C. 1223); 49 CFR 1.46(n)(4))

Dated: March 28, 1984.

T. J. Wojnar,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

[FR Doc. 84-8433 Filed 3-29-84; 8:45 am]

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans Education; Medical-Dental Internships and Residencies

AGENCY: Veterans Administration.

ACTION: Proposed regulation.

SUMMARY: The regulation which the VA (Veterans Administration) uses in determining whether to recognize medical and dental residencies has become outdated. Changes in accrediting associations and the structure of medical and dental residencies are reflected in the proposal. This proposal states how the VA will determine which residencies are institutional training.

DATES: Comments must be received on or before April 30, 1984. It is proposed to make these regulations effective the date of final approval.

ADDRESSES: Send written comments to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until May 10, 1984. Anyone visiting VA Central Office in Washington, D.C. for the purpose of inspecting any of these comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to VA field stations will be informed that the records are available for inspection only in Central Office and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, Washington, D.C. 20420 (202–389–2092).

SUPPLEMENTARY INFORMATION: Section 21.4265, Title 38, Code of Federal Regulations is amended to show that accreditation by the Accreditation Council for Graduate Medical Education is sufficient for the VA to recognize a medical residency as institutional training. If the council has delegated its accrediting authority to a Residency Review Committee, accreditation by the committee will be sufficient for recognition of the medical residency as institutional training. The Commission on Dental Accreditation now accredits dental residencies. Section 21.4275, Title 38, Code of Federal Regulations is amended because medical and dental internships have been phased out.

The VA has determined that these proposed regulations are not a major rule as that term is defined by Executive Order 12291, entitled "Federal Regulation". The annual effect on the economy will be less than $100 million. The proposal will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans' Affairs hereby certifies that the proposed regulations, if made final, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these proposed regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because this is a technical change only. The VA does not expect substantial changes in recognition of residencies to result from this regulatory change. Consequently the proposal will have no significant impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by these regulations is 64.111.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: March 14, 1984.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

The Veterans Administration proposes to amend 38 CFR Part 21 as set forth below:

1. In § 21.4265, paragraph (a) is revised as follows:

§ 21.4265 Practical training approved as institutional training or on-job training.

(a) *Medical-dental internships and residencies.* (1) Medical and dental residencies, and osteopathic internships and residencies may be approved and recognized as institutional courses only when an appropriate accrediting agency accredits and approves them as leading to certification for a recognized professional objective.

(2) The appropriate accrediting agencies are:

(i) The Accreditation Council for Graduate Medical Education, or where the Accreditation Council for Graduate Medical Education has delegated accrediting authority, the appropriate Residency Review Committee,

(ii) The American Osteopathic Association, and

(iii) The Commission on Dental Accreditation of the American Dental Association.

(3) Residency programs—

(i) Must lead to certification by an appropriate Specialty or Subspecialty Board, the American Osteopathic Association, or the American Dental Association; and

(ii) Will not be approved to include a period of practice following completion of the education requirements even though the accrediting agency requires the practice.

(4) No other medical or dental residency or osteopathic internship or residency will be approved or recognized as institutional training.

(38 U.S.C. 1788(b))

* * * * *

2. In § 21.4275, paragraph (a) is revised as follows:

§ 21.4275 Practical training courses; measurement.

(a) Medical and dental residencies and osteopathic internships and residencies. The Veterans Administration will measure medical and dental residencies, and osteopathic internships and residencies as provided in § 21.4270(b) if they are accredited and approved in accordance with § 21.4265(a).

(38 U.S.C. 1788(b))

BILLING CODE 8320-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6561]

Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Cortlandt, Westchester County, New York.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in the **Federal Register** at 49 FR 1775 on January 13, 1984, and hence supersedes those previously published proposed rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in each community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed flood elevations are available for review at the Town Clerk's Office, Municipal Building, Croton-on-Hudson, New York.

Send comments to: Honorable Charles DiGiacomo, Cortlandt Town Supervisor, Municipal Building, Croton-on-Hudson, New York 10520.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the Town of Cortlandt, Westchester County, New York, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Annsville Creek	At confluence with Hudson River	*8
	At confluence with Peekskill Hollow Brook and Sprout Brook	*8
Peekskill Hollow Brook	At confluence with Annsville Creek and Sprout Brook	*8
	Upstream side of Pump House Dam	*231
	Approximately 0.72 mile upstream of Gallows Hill Road	*280
	At first upstream corporate limits	*288
	At third upstream corporate limits	*1123
Sprout Brook	At confluence with Annsville Creek and Peekskill Hollow Brook	*8
	Upstream side of abandoned road	*14
	Upstream side of Cortlandt Lake Dam	*87
Furnace Brook	Approximately 130' downstream of Furnace Dock Road	*77
	Upstream side of Washington Street	*188
	Upstream side of Furnace Brook Drive (2nd crossing)	*238
	Approximately 0.36 mile upstream of Furnace Brook Drive (2nd crossing)	*251
Croton River	At downstream corporate limits	*8
	Approximately 50' upstream of Quaker Bridge Road (1st crossing)	*44
	At upstream corporate limits	*80
Hudson River	Entire shoreline within community	*8
Lake Meahagh	Entire shoreline within community	*8
New Croton Reservoir	Entire shoreline within community	*199

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44

44 CFR Part 67

[Docket No. FEMA-6586]

Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Griswold, New London County, Connecticut.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in the **Federal Register** at 49 FR 6754 on February 23, 1984, and hence supersedes those previously published proposed rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in each community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed flood elevations are available for review at the Building Inspector's Office, 50 School Street, Griswold, Connecticut.

Send comments to: Honorable Donald Burdick, First Selectman of the Town of Griswold, 50 School Street, Griswold, Connecticut 06351-2398.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the Town of Griswold, New London County, Connecticut, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to quality or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Quinebaug River	Downstream corporate limits	*77
	Upstream of Connecticut Turnpike.	*83
	Most upstream corporate limits.	*100
Pachaug River	Downstream corporate limits	*129
	Upstream of Connecticut Turnpike.	*134

44 CFR Part 67

[Docket No. FEMA-6586]

Proposed Flood Elevation Determinations

Correction

In FR Doc. 84-2963 beginning on page 6752 in the issue of Thursday, February 23, 1984, make the following corrections.

1. On page 6755, in the second line of the location column for Barrington, Cook and Lake Counties, Illinois, "360 downstreams" should have read "360 feet downstreams".

2. On page 6759, in the source of flooding column for Franklin County, Missouri, "Little Calvey" should have read "Little Calvey Creek".

BILLING CODE 1505-01-M

FEDERAL MARITIME COMMISSION

46 CFR Part 508

[Docket No. 83-45]

Actions To Adjust or Meet Conditions Unfavorable to Shipping in the United States/Republic of the Philippines Trade

AGENCY: Federal Maritime Commission.

ACTION: Notice of request for further comment.

SUMMARY: The purpose of this Notice is to provide further opportunity for comment on the Notice of Proposed Rulemaking published at 48 FR 45800 (Oct. 7, 1983) and to address certain factual, legal, procedural, and policy matters raised by the initial round of comments. In addition, a synopsis of the factual allegations contained in the comments is provided in the Appendix to this Notice.

DATE: Comments on or before May 2, 1984 (original and 15 copies).

ADDRESS: Send comments to: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT: Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION:

Background

This rulemaking proceeding under section 19 of the Merchant Marine Act, 1920 was instituted by the Commission, on its own motion, in response to allegations of the existence of unfavorable conditions in the foreign oceanborne trade between the United States and the Republic of the Philippines.[1] The Proposed Rule would

[1] Section 19(1)(b), Merchant Marine Act, 1920, (46 U.S.C. 876), as implemented by Commission General Order No. 33 (G.O. 33) (46 CFR Part 506) authorizes the Commission to make rules and regulations affecting shipping in the foreign trade of the United States in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade of the United States and which arise out of, or result from, foreign laws, rules or regulations, or from competitive methods or practices employed by owners, operators, agents or masters of vessels of a foreign country.

suspend the tariffs of Philippine carriers operating in the United States/Republic of the Philippines trade or, alternatively, bar access of Philippine carriers to United States ports and cargoes unless these carriers obtain authorization from the United States Government.[2] The effect of the Rule would be to adjust or meet any unfavorable conditions by imposing burdens on Philippine carriers equal to those imposed on non-Philippine carriers by Philippine laws and regulations.

At the request of counsel for the Philippine carriers, the comment period on the Rule was extended from December 5, 1983 to January 20, 1984. A total of 13 comments were received. Philippine-flag [3] and U.S.-flag carriers [4] opposed the Proposed Rule. Comments either supporting the Proposed Rule, favoring some action by the Commission, or expressing concern over conditions in the United States/Republic of the Philippines trade were received from third-flag carriers,[5] port authorities,[6] shipper interests,[7] and foreign shipowners.[8] A motion by four Executive Branch Departments to file a comment after other comments were received was denied.

The purpose of this Notice of Request For Further Comment is to solicit comment on the allegations of unfavorable conditions which were presented in the initial round of comment. In addition, comment is specifically invited on certain matters which were not addressed or not sufficiently explored in the initial round of comment. Finally, this Notice affords an opportunity to dispose of some threshold legal and policy issues raised in the comments and thereby focus any further comment on the remaining issues. The Commission does not believe that further comment on legal and policy matters disposed of herein would be useful at this time and the parties are urged to avoid reargueing these matters. A synopsis of factual allegations made in the initial round of comment is provided in an Appendix to this Notice.

Discussion

The Philippine carriers present various legal, procedural, and policy arguments in opposition to the Proposed Rule. Certain U.S.-flag carriers also oppose the Proposed Rule and state that no action should be taken pending ongoing government negotiations. Many of these arguments, although expressed somewhat differently, were raised and recently addressed in a section 19 proceeding involving the United States/Venezuela trade. *See Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Venezuela Trade*, Interim Report on Current Status of Proceeding, 21 S.R.R. 1621 (1983). For reasons stated below, we conclude that these arguments are without merit and that there are no statutory, procedural or policy impediments to Commission action in this proceeding.

I. The Philippine carriers argue that section 19 was not enacted for the benefit of third-flag carriers or shippers and that the Commission is without authority to make rules under that section on their behalf. These carriers read the language and legislative history of the Merchant Marine Act of 1920 as authorizing action solely for the purpose of promoting and protecting the U.S. merchant marine. The Philippine carriers contend that U.S. carriers in the United States/Philippines trades have, in fact, been favored as a result of Philippine cargo reservation laws and that section 19, therefore, cannot be invoked. The U.S. carriers, in their comment, also contend that the congressional policy underlying the Merchant Marine Act, as expressed in section 1 of the Act (46 U.S.C. 861), limits the exercise of section 19 authority to measures which serve the statutory purpose of aiding the U.S. merchant marine.

Maersk argues that section 19 may be invoked for the benefit of third-flag carriers. Maersk states that the objective of the statute is to ensure fair and competitive access of all carriers in U.S. trades and not only to guarantee access to U.S. carriers. Maersk asserts that the Commission has, in the past, taken action specifically for the benefit of a third-flag vessel and cites the recent example of Commission action in the United States/Venezuela trade as support for such relief. CMA, in its comment, also argues that third-flag carriers, as well as shippers, are protected by section 19.

This argument of the Philippine carriers has been previously considered and rejected in other section 19 proceedings. The Commission has authority under section 19 to provide relief from *any* conditions unfavorable to shipping in the foreign trades of the United States. Section 19 authorizes the Commission:

> To make rules and regulations affecting shipping in the foreign trade * * * to adjust or meet general or special conditions unfavorable to shipping in the foreign trade whether in any particular trade or upon any particular route or in commerce generally * * *.

Nothing contained in the language of section 19 limits relief to U.S. carriers. Nor can the promotional goals of the Act, as expressed in the Preamble, in section 1, and in the legislative history, be construed to restrict relief under section 19 to U.S. carriers only. G.O. 33 states that any person "who has been harmed by, or who can reasonably expect harm from existing or impending conditions unfavorable to shipping in the foreign trade of the United States, may file a petition for relief" under section 19 (46 CFR 506.4).[9] G.O. 33 specifically includes importers, exporters, shippers and operators of liner vessels as persons who may petition for section 19 relief. Finally, the Commission has consistently held that section 19 relief extends to third-flag carriers and shippers.[10]

II. The Philippine carriers argue that one option under the Proposed Rule i.e., suspension of tariffs, goes beyond the present factual record and would be an

---

[2] The Notice of Proposed Rulemaking was published in the **Federal Register** on October 7, 1983 (48 FR 45800).

[3] A comment opposing the Proposed Rule was filed on behalf of National Galleon Shipping Corporation (Galleon) and the Maritime Company of the Philippines (MCP).

[4] A comment filed by the members of the U.S.-Flag Far East Discussion Agreement (Agreement No. 10050) opposes any action by the Commission. The members of Agreement No. 10050 are: American President Lines, Ltd.; Lykes Bros. Steamship Co., Inc.; Sea-Land Service, Inc., United States Lines, Inc.; and Waterman Steamship Co.

[5] Separate comments were filed by Maersk Line (Maersk) and Barber Blue Sea Lines (BBSL).

[6] The port authorities filing comments are: Port of Portland (Portland); Virginia Port Authority (VPA); The Port Authority of New York and New Jersey (New York); Philadelphia Port Corporation (Philadelphia); and the Maryland Port Administration (Baltimore).

[7] P.L. Thomas Paper Co., Inc., the New York Chamber of Commerce and Industry, and the Chemical Manufacturers Association (CMA) supported Commission action.

[8] The Council of European & Japanese National Shipowners' Associations (CENSA).

[9] Certain comments filed in Docket No. 72-62 (which led to the promulgation of present G.O. 33) suggested that the G.O. 33 regulations be restricted to protecting U.S.-flag ships. It was also proposed that other shipping interests in the foreign trade of the United States be protected in separate regulations. The Commission rejected these suggestions stating: "The intent of the Commission is not, however, so narrow. It is shipping in the foreign trade which is to be protected." The Commission also stated in connection with changes to another section of the regulations that: "The interests of the United States are much broader, however, than the conditions affected U.S. flag ships. Therefore, these rules have been amended to broaden the application to conditions affecting shipping in the foreign trade of the United States which are unfavorable." (39 FR 38647, November 1, 1974).

[10] *See Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Venezuela Trade*, 21 S.R.R. 1621 (1983); *Petition of Ace Lines, Ltd.*, 19 S.R.R. 481 (1979).

unacceptable act of retaliation not legally permitted under section 19. They contend that section 19 only permits the Commission to take action which *adjusts* or *meets* general or special *existing* conditions unfavorable to shipping. Allegedly, no actual trade dislocation has been established. The U.S. carriers also state that the Commission may exercise its section 19 authority "only if unfavorable conditions *exist*."

Maersk argues that section 19 is not limited to relief from existing unfavorable conditions and that Commission action may be taken in response to prospective harm which can reasonably be expected. It states that it is not unreasonable to predict that Maersk an other third-flag lines will ultimately be excluded from the trade if enforcement of the Philippine cargo reservation system is unchecked. Maersk also contends that, in this case, it has provided evidence of actual harm to Maersk Line.

The Commission is granted broad authority under section 19 to make rules and regulations not in conflict with law in order to meet unfavorable trade conditions. One remedy available to the Commission is the suspension of tariffs such as is proposed under Option A of the Proposed Rule. Although tariff suspension is admittedly a serious sanction, the Commission has the authority to take such an action should trade conditions warrant it. While the Philippine carriers do not state that tariff suspension is never available as a remedy under section 19, they do contend that such a sanction exceeds what would be legally permitted on the present record.

Section 19 contemplates the use of countervailing measures to correct an unfavorable trade condition. In some instances, *e.g.*, where a fine or charge is levied, a precisely mirrored penalty may be devised. In other cases, the remedy may not be so easy to devise but the Commission will consider all reasonable alternatives. In this instance, it is alleged that Philippine cargo reservation laws have the effect of excluding third-flag carriers from the trade. The suspension of tariffs, as proposed in Option A, would impose a similar effect on Philippine carriers. It should be noted that the Commission has merely issued a Proposed Rule and has not taken any final action. However, should conditions be established for which the only remedy is tariff suspension, then such action would not be an act of excessive retaliation under section 19. Suspension, in whole or in part, of any tariff is one of the actions specifically authorized under the Commission's rules. *See* 46 CFR 506.9(c).

Finally, it should be noted that section 19 relief may be granted upon a showing of prospective harm. Such action is provided for in the Commission's rules which state that an unfavorable condition is one which precludes or *tends to preclude* other vessels in the trade from competing in the trade on the same basis as any other vessel. *See* 46 CFR 506.3(a). In the recent Venezuela case, the Commission stated that it is not necessary to wait until a third-flag carrier is actually forced out of the trade or other actual harm is suffered before taking action.[11] Relief may be granted for prospective and potential harm which may reasonably be expected to occur.

III. The Philippine carriers argue that the foreign policy implications of tariff suspension make it an improper exercise of Commission authority under section 19. They state that the legislative history of the Act indicates that section 19 was not intended to authorize retaliatory sanctions with serious foreign policy implications through a summary administrative action. The Philippine carriers cite other provisions of the Shipping Act and argue that elsewhere the Commission is authorized to invoke severe sanctions affecting foreign entities only upon formalized hearings or consultations with the President.[12] The Philippine carriers argue that section 19 does not provide for such hearings or consultation. Therefore, they infer that the Commission may not so use section 19.

The Commission's procedures under G.O. 33 expressly provide for cooperation and consultation between the Commission and the Executive Branch and establish avenues for resolution of section 19 matters through diplomatic channels (46 CFR 506.8). Moreover, G.O. 33 states that:

> The Commission shall postpone or discontinue any or all such actions if the President informs the Commission that postponement, discontinuance, or suspension is required for reasons of foreign policy or national security. 46 CFR 506.13.

As discussed above, tariff suspension is a permissible remedy under section 19. The fact that tariff suspension has foreign policy implications does not make it an improper or an unlawful exercise of Commission authority. G.O. 33 is sensitive to foreign policy ramifications and tariff suspension is a proper exercise of Commission authority.

Finally, we note that the Philippine carriers object to the Proposed Rule as a "summary administrative device." However, Congress intended that section 19, which was modeled on the British Orders in Council, provide a summary administrative instrument for dealing swiftly and effectively with conditions unfavorable to shipping. Although the statute does not expressly provide for a hearing, the Commission has always taken care to afford parties who may be adversely affected by section 19 action with an adequate opportunity to be heard.

IV. The Philippine carriers argue that the Proposed Rule is procedurally defective under the Commission's own regulations. The carriers cite that section of G.O. 33 which sets forth the requirements for a petition for relief under section 19 (46 CFR 506.6). The Philippine carriers do not contend that the Commission must adhere to the same technical requirements as a private petitioner. However, they do argue that the Commission must adhere to comparable standards for proceedings initiated on its own motion. The carriers argue that the record relied upon by the Commission is insufficient even for the Commission to *propose* a rule under section 19.

Maersk Line argues that the laws and actions of the Philippine Government, in themselves, establish a *prima facie* case for the imposition of the Proposed Rule.

Whatever the minimum requirement for the Commission to merely propose a rule under section 19 might be, we believe that there is more than an adequate basis for the Commission to take the step of issuing a proposed rule where: (1) There is evidence of the existence of a legal and regulatory regime having as its stated purpose the limitation of third-flag carriers' participation in the trade; and (2) there have been complaints from interested parties that these laws are producing unfavorable conditions. Both of these factors were present in this case when the Commission took the action of issuing a notice of proposed rulemaking.

V. The Philippine carriers argue that this proceeding fails to meet minimum standards of due process established by constitutional and administrative law.

---

[11] "The Commission is not inclined to wait for carriers to suffer irreparable harm in the form of declining shares before it takes action, when it is nevertheless clear that the foreign law on its face would create unfavorable conditions and the foreign government is beginning enforcement." 21 S.R.R. at 1627.

[12] The Philippine carriers note that section 14a of the Shipping Act, 1916 (46 U.S.C. 813), which provides for exclusion of a vessel from U.S. ports, requires a full evidentiary hearing on the record. The Commission is referred to other sections of the Shipping Act where authority to suspend tariffs, *i.e.*, sections 18(b)(7) and 22(c)(2) (46 U.S.C. 817(b)(7) and 821(c)(2)), is subject to review by the President.

They argue that they have a constitutionally protected property right in their authorization to pursue a lawful business. This property right is allegedly vested in their tariffs and may not be taken without due process of law. According to the carriers, due process guarantees them an opportunity to present evidence and to challenge allegations and evidence introduced against them. They argue that under principles of administrative law, a party may not be deprived of a property right in an adjudicatory proceeding without an evidentiary hearing. The Philippine carriers assert that no final action should be taken by the Commission without an opportunity to prepare rebuttal evidence and to present that evidence in an appropriate proceeding.

Comments by several ports express concern that the Philippine cargo-sharing plan and the waiver program will lead to a diversion of cargo presently moving through those ports. Maersk argues that the actions of the Philippine Government have been shown to unfairly burden third-flag carriers, as well as shippers, exporters, importers and ports and are otherwise unfavorable to shipping in the foreign trade of the United States. Maersk urges the Commission to issue the Proposed Rule without a further proceeding.

The essence of the Philippine carriers argument is that the Commission cannot take any retaliatory action or impose any sanction, based on the present record, without some opportunity for further participation in this proceeding by the Philippine carriers. The carriers do not argue that a formal trial-type hearing is necessary, but they do assert that, at a minimum they should have an opportunity to respond to adverse comments which were filed simultaneously with theirs. As indicated above, section 19 was intended by Congress to provide a means for dealing in the swiftest manner possible with unfavorable trade conditions. the statute does not contain any express requirement for an evidentiary hearing on the record. Moreover, G.O. 33 provides for summary disposition in section 19 proceedings. Nevertheless, the Commission through this Notice of Request for Further Comment is affording the Philippine carriers an opportunity to respond to adverse comments and to submit additional information in support of their position.

VI. The Philippine carriers state that the cargo sharing program of the Philippine Government is only a modest attempt to encourage the development of its own liner companies. They assert that this is a legitimate sovereign goal and suggest that the Philippine program is closely akin to United States cargo preference programs.

The Commission in the Notice of Proposed Rulemaking specifically stated that it does not question the sovereign right of a foreign government to impose conditions on its own domestic commerce. The Commission stated:

> Many nations, including the United States, have legitimate interests in promoting the economic well-being of their maritime commerce. However, it is not reasonable to expect the export commerce of the United States to bear the burden of the economic costs of the carrier promotion policies of the Republic of the Philippines.[13]

As further noted in the Notice of Proposed Rulemaking, the laws and regulations promulgated by the Philippine Government attempt to impose unilaterally a strict 40–40–20 cargo sharing formula on the trade of the United States.[14] This regime covers a substantial portion of the export cargo from the United States and is not comparable to the much more limited cargo reservation programs of the United States. A recent report of the U.S. General Accounting Office would appear to indicate that U.S. cargo preference programs do not cover a substantial portion of the total oceanborne liner cargo in the U.S. foreign trade.[15]

To the extent that specific information on the amount of cargo in the United States/Philippines trade affected by U.S. cargo preference laws is available, such information would be useful in this proceeding. Executive Branch departments or other interested persons with access to this information are invited to submit this data to the Commission.

VII. The U.S. carriers argue that no action should be taken by the Commission at the present time because of ongoing governmental and commercial efforts to resolve maritime issues in the United States/Philippines trade. According to the U.S. carriers, Commission action at this time would undermine these efforts. These carriers cite past commercial efforts to harmonize conflicting national policies through the filing of a proposed U.S.-Philippine Equal Access Agreement (Agreement No. 10461). They also cite recent maritime consultations in Manila between the United States and Philippine delegations at which the delegations agreed to meet again in the near future to draw up a bilateral agreement governing liner transport in the United States/Philippines trade. Implementation of sanctions under section 19 would allegedly chill these government negotiations.

The U.S. carriers present no reasonable basis to favor a suspension of this proceeding at this time. Agreement No. 10461 was withdrawn and is no longer being pursued as a commercial alternative. As to government negotiations, should the diplomatic situation change, it is presumed that the Executive Branch would advise the Commission of significant diplomatic developments which might affect any final decision by the Commission. Suspension of this proceeding at this time does not appear to be warranted.

Conclusion

An Appendix is included with this Notice which summarizes factual assertions made in the various comments. This synopsis is provided solely for the convenience of interested persons and in order to facilitate further comment. The synopsis should not be construed as factual findings nor is any further Commission action limited to matters contained in the synopsis.

The Commission declines analysis of the factual record established at this time and has limited its discussion in this notice to issues of law and policy raised by the comments. This absence of discussion of the factual record, however, should not be construed as a determination that the present record is not, in itself, sufficient to support a finding of unfavorable conditions.

In fact, serious allegations of unfavorable conditions have been made and factual information supporting those allegations has been provided. The present record establishes the existence of a comprehensive cargo sharing regime which seeks to allocate shares in the trade on a 40–40–20 basis. The record also shows that this regime is being implemented through a waiver program which affects only third-flag carriers.

---

[13] Docket No. 83–45, *Actions to Adjust or Meet Conditions Unfavorable to Shipping in the United States/Republic of the Philippines Trade*, Notice of Proposed Rulemaking, October 7, 1983, p. 11; see also the Commission's Interim Report in the Venezuela proceeding at 21 S.R.R. 1628.

[14] This cargo sharing formula would appear to apply to all cargo except for that cargo covered by P.D. 1466, all of which is reserved for carriage by Philippine-flag vessels.

[15] Although the data presented in the GAO report does not provide specific information on the United States/Philippines trade, it does indicate that in 1980, U.S.-flag vessels carried 6.0 million tons of U.S. government cargo which was 9.5% of the total liner cargo shipped on U.S. flag vessels between U.S. and foreign ports. *See* U.S. General Accounting Office, *Economic Effects of Cargo Preference Laws*, Report To The Chairman, Committee on Merchant Marine and Fisheries House of Representatives, p. 10 (1984).

The Commission wishes through this Notice to provide parties that would be adversely affected by the Proposed Rule with the opportunity to address other comments which were filed simultaneously with theirs and to present any other additional factual information relevant to this proceeding. In addition, Executive Branch Departments will have an opportunity to address the comments filed and advise the Commission of their views. It should be noted, however, that further rounds of comment may not be necessary for the Commission to take some final action and should not be anticipated.

As discussed above, the present record does not indicate the extent to which cargo moving in the United States/Philippines trade is governed by U.S. cargo preference laws. Such data would be helpful to the Commission in this proceeding. Interested persons are invited to submit information which shows the percentage of the total oceanborne liner cargo in the U.S. export trade to the Philippines which was carried by U.S.-flag vessels because of the requirements of U.S. cargo preference laws. Such data for the most recent year available would be useful and relevant.

The Commission also invites further comment regarding the options proposed as remedies. Although some commentators opposed both options and others favored one option or another, the Commission believes that further comment on these options may be beneficial. In particular, port interests are invited to comment on whatever relief other than the proposed options they believe may be adequate to meet their specific concerns.

Interested parties are given until May 2, 1984 to file comments on the Proposed Rule. Factual submissions relating to conditions in the United States/Philippines trade should, to the extent possible, be supported by sworn documents and affidavits.

List of Subjects in 46 CFR Part 506

Maritime carriers, Tariffs.

By the Commission.

Francis C. Hurney,

Secretary.

Appendix: Synopsis of Comments

The purpose of this synopsis is to summarize the comments received in response to the Notice of Proposed Rulemaking in order to make this information broadly available to persons interested in this proceeding and thereby facilitate further comment on the Proposed Rule. This synopsis is limited to factual matters contained in the comments and does not include legal, procedural or policy matters which are raised by the comments and which are discussed in the supplementary information section of this Notice of Request for Further Comment. Moreover, it should be noted that this synopsis focuses, for the most part, on those factual matters which are in dispute among the several commentators, or which involve allegations of unfavorable conditions in the trade. However, not every factual assertion contained in the comments which may be relevant is necessarily included. This synopsis is not intended to be a substitute for the comments themselves which are available to interested persons in the Office of the Secretary. The comments in their entirety make up the present record in this proceeding. The synopsis is organized so that comments alleging facts which would be supportive of the Proposed Rule are summarized first, following by the comments of those who oppose the Proposed Rule.

I. The Waiver Program

A. Supporting Comment. Third-flag carrier commentators assert generally that the provisions, implementation and administration of the Philippine Government waiver program has caused unreasonable delay, unnecessary cost, and has placed shippers at a disadvantage to their foreign competitors. Both BBSL and Maersk note that only third-flag carriers are required to obtain a waiver. BBSL states that such a requirement puts third-flag carriers at a competitive disadvantage to national-flag carriers that do not need a waiver. Maersk states that a third-flag carrier may book cargo, and not know until the "eleventh hour" whether a national-flag vessel will claim that cargo. Maersk states that this uncertainty has an adverse impact on commitments of equipment and relationships with shippers. Maersk states that there are only eight Philippine consulates in the United States where waivers may be obtained. Shippers, particularly small shippers, located in areas distant from a consulate may simply decide to ship with a carrier not requiring a waiver. In order to reduce this burden on shippers, Maersk states that third-flag lines have undertaken to arrange for waivers on behalf of shippers and have absorbed the fee paid for waivers.

CMA contends that virtually all responding CMA members with significant involvement in the United States/Philippine export trade reported that they had experienced delays in shipments and incurred costs due to the waiver system. CMA contends that in recent months the waiver process has become even more time-consuming, often requiring extensive negotiations with Philippine carriers and the Philippine consulate. Finally, CMA cites examples of alleged arbitrary administration of the waiver system, such as refusal to grant waivers even where waiver criteria are met.

B. Opposing Comment. The Philippine carriers make an extensive defense of the waiver system including a point-by-point refutation of specific allegations mentioned in the Notice of Proposed Rulemaking. According to the Philippine carriers, all waiver requests are acted upon within 24 hours and 90 percent of these requests are granted. The specific grounds for issuing waivers are stated on the waiver form. However, MARINA allegedly has been flexible in administering the waiver program and has granted waivers for any good reason. The Philippine carriers assert that no complaints about the waiver system have been received by MARINA for some time. Waivers allegedly are granted automatically or for extended periods in appropriate cases, as where Philippine vessels do not call at a port, or where sailings are infrequent. They assert that there is no known instance of interruption of waiver service at New York or any other consulate office within the United States. According to the Philippine carriers, MARINA maintains a constant oversight of the waiver program in order to ensure its efficient operation.

The Philippine carriers explain that a lower freight rate is a valid reason for obtaining a waiver only where the third-flat rate is at least 15 percent below a national-flag carrier rate. The Philippine carriers state that this requirement is rarely met because the Philippine carriers have resigned from conferences and now offer rates which are competitive with other low-priced independents. The Philippine carriers conclude that the waiver system has not burdened shippers with either adverse rate or service conditions.

II. Fines and Penalties

A. Supporting Comment. Third-flag carriers, shippers and others assert generally that third-flag carriers are subjected to fines and penalties for failure to comply with regulations issued under E.O. 769. They note that section 48 of the "Rules & Regulations Implementing Executive Order No. 769" empowers MARINA to impose sanctions and administrative fines in an amount not to exceed the cost of freight covered by a particular violation.

B. Opposing Comment. The Philippine carriers assert that the fines imposed for violation of the waiver system have been so small as to be insignificant. They assert that the penalty provision, which would potentially subject a carrier offloading cargo from the United States in the Philippines without a waiver to a fine equal to the freight rate, has rarely, if ever, been applied. Furthermore, they state there are no present plans to apply this penalty. In the majority of cases, according to the Philippine carriers, fines have been a nominal 200 pesos (approximately $14). However, they do state that where violations have been repeated, the fine has been increased to 750 pesos (approximately $54).

III. Central Bank Memorandum Requirements

A. Supporting Comment. Maersk interprets the language of section 3 of the Central Bank Memorandum[1] as requiring third-flag carriers to wait until the national-flag lines have carried 80 percent of cargo for the year before they could participate for their 20 percent. Maersk notes that literal application of such a rule would, as a practical matter, exclude all third-flag service. CMA and the Port of New York interpret this Central Bank rule in the same manner as Maersk.

B. Opposing Comment. The Philippine carriers argue that section 3 of the Central Bank Memorandum has been interpreted to allocate cargo on a current basis throughout the year. The 20 percent share for third-flag carriers is not withheld until the bilateral share is obtained but rather is allocated on a current proportional basis. Otherwise, the Philippine carriers note, third-flag carriers would have to shut down operations until the 80 percent share for national-flag carriers had been achieved.

[1] Section 3 of the Central Bank Memorandum states:

In accordance with MARINA's guidelines, compliance with the 40–40–20 cargo sharing arrangement shall be determined periodically on the basis of the aggregate of Philippine import liner cargoes from the United States not covered by P.D. No. 1466 and not on the basis of import liner cargoes of each importer. *Moreover, the 40–40 share of the Philippines and the United States should first be filled up during the year to ensure compliance therewith.* Accordingly, all importations covered shall be shipped thru national flag vessels of the Philippines or the United States unless the prescribed waiver is secured. (Emphasis added).

IV. Cargo Shares in the United States/Philippines Trade

A. Supporting Comment. Maersk, BBSL[2] and CMA all contend that the Philippine cargo reservation program has already resulted in a shift of cargo from third-flag carriers to U.S. and Philippine-flag carriers. Maersk and CMA have provided Journal of Commerce data which shows the following recent trend in third-flag participation in United States/Philippines export trade:

	1981		1982		First Half 1983	
	Tons	Percent	Tons	Percent	Tons	Percent
U.S.-flag	117,560	32.7	158,392	34.1	81,806	43.7
Philippine-flag	59,374	16.5	90,561	19.5	42,970	20.4
Third-flag	183,122	50.8	215,877	46.4	85,466	45.9

These data document a decline in third-flag share following implementation of the Philippine cargo sharing system. Maersk provides further data which attempts to document more specifically the impact of Philippine laws. Maersk states that these laws were first implemented in the third quarter of 1982. Maersk provides the following comparative third quarter data in the export trade for 1982 and 1983.

	Third quarter 1982		Third quarter 1983	
	Tons	Percent	Tons	Percent
U.S.-flag	123,772	33.7	144,870	44.2
Philippine-flag	72,674	19.8	60,839	18.6
Third-flag	170,752	46.5	116,768	35.6

These figures show a decline in the overall third-flag share for the third quarter from 47 percent to 36 percent. Maersk's own share of the export trade for this quarter dropped from 15.7 percent (57,547 tons) to 10.8 percent (34,716 tons).

Maersk states that during the period 1980–82 its annual revenues from the trade were approximately $18 million. In 1983, Maersk estimates revenues at $6 million. Prior to the implementation of Philippine laws, 9.1 percent of Maersk's total revenues were earned in United States/Philippines trades. Maersk now earns approximately 4.3 percent of total revenues from the trade. Annual average tonnage for Maersk has declined from 110,000 freight tons to about 50,000 freight tons in 1983.

Finally, Maersk provides data on its cargoes to the Philippines shipped in less-than-containerloads. During 1982, 34 percent of Maersk cargoes to the Philippines were less-than-containerloads, whereas in 1983 the comparable figure was 19 percent. Maersk concludes that these figures demonstrate that small shippers are turning away from third-flag carriers as a result of Philippine cargo reservation laws because it is easier for the small shipper to deal with a national-flag carrier.

CMA also provides documentation of third-flag carrier cargo losses. CMA claims that its members report a shift of between 50 to 75 percent of their entire cargo from third-flag carriers to national-flag lines. CMA cites one member company which had shipped approximately 50 percent of its shipments with third-flag carriers and 50 percent with United States carriers. CMA states that, after this company's third-flag carriers began to have difficulty in obtaining waivers in May of 1983, this shipper shifted nearly all of its cargo to U.S.-flag vessels. CMA states that another company reported that in January of 1982, 80 percent of its traffic was transported by third-flag carriers. Now this company uses third-flag carriers for approximately 20 percent of its volume.

B. Opposing Comment. The Philippine carriers acknowledge that U.S.-flag carriers have increased their share of the U.S. export trade at the expense of third-flag carriers. They state:

"That is not to say there have been no changes in the trade as a result of the Philippine cargo-sharing program. The most important change is that while the Philippine Carriers' share of the trade has remained constant, there has been a substantial increase in the share of the trade carried by U.S.-flag vessels. This increase has been at the expense of third-flag carriers." (Philippine Carriers' Comment at 27).

They state, however, that section 19 does not provide relief for third-flag carriers' loss of share of the trade. The Philippine carriers also state that their own share of the total volume of the United States/Philippines trade has

[2] BBSL states that implementation of Philippine laws has resulted in actual cargo and revenue losses to third-flag carriers but does not provide specific data as does Maersk.

remained more or less unchanged at approximately 17 percent.

V. Rates

A. Supporting Comment. A number of comments allege generally that Philippine cargo reservation laws will have an adverse impact on freight rates. However, only CMA provides specific information which attempts to establish that the Philippine cargo reservation system has resulted in rates which are higher than would otherwise prevail under current economic conditions. The CMA data show that rates on two commodities—borax and phosphates—in the United States/Philippines trades were not consistent with rates on these commodities in other comparable trades. These data show that rates on these commodities did not decrease as sharply between 1982 and 1984 in the Philippines trade as they did in the trades to Hong Kong, Taiwan and South Korea. CMA suggests that the rates on these commodities were insulated from the full impact of downward economic trends by the Philippine cargo reservation program. CMA believes that rates are 25 to 50 percent higher than they would be absent the Philippine cargo reservation system. CMA also cites the example of one member who reported that its freight rates increased by 19 percent when Yang Ming Line allegedly was driven out of the Philippine trade by the cargo reservation system.

B. Opposing Comment. The Philippine carriers note that both MCP and Galleon have resigned from their conferences and now offer rates that are competitive with other low priced independents. This comment is made in response to the allegation, cited in the Notice of Proposed Rulemaking, that shippers will be forced to pay higher conference rates.

VI. Service
